RESOLUTION ON THE ANNUAL PROGRESS REPORT ON THE FOREST ADMINISTRATION IN THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING 30TH JUNE 1918.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Forest Branch.

CALCUTTA, THE 30TH DECEMBER 1918.

RESOLUTION—No. 9829For.

READ—

The Annual Progress Report on the Forest Administration in the Presidency of Bengal, for the year ending the 30th June 1918.

Read also—

The corresponding report of the previous year and the Government Resolution thereon.

SIR HENRY FARRINGTON was in charge of the Bengal Forest Circle throughout the year. He was on tour for 311 days and inspected all the Forest Divisions. Mr. A. K. Nicholson, Deputy Conservator of Forests, and Mr. J. M. Cowan, Assistant Conservator of Forests, were absent on military duty throughout the year, and Mr. L. E. S. Teague, another Deputy Conservator, during a part of the year.

2. **Changes in area and in administration.**—There was a small change in the area of the reserved forests under the Forest Department due to the inclusion of 495 acres in the Buxa Forest division. Four acres of the reserved forests in the Jalpaiguri and Buxa divisions were transferred to the charge of the Public Works Department without being disforested. There was no change in the area of the protected forests.

3. **Reservation and Demarcation.**—The settlement work in respect of the same area of 495 acres was completed during the year and the areas declared reserved forests. That in respect of the Holapara extension of the Titi Reserve in Jalpaiguri was also completed during the year. Effect has been given to this extension since the close of the year.

Some progress has been made in the work of demarcation in the Chittagong Hill Tracts division. The Governor in Council desires that this difficult, but important, work should be expedited in the remaining areas of the division.

4. **Working plans.**—No new working plans were sanctioned during the year, but a revised working scheme for the Kurseong Forest division for the period 1919-1926 was sanctioned after the close of the year. It was determined to adopt this course instead of preparing a new working plan for a longer period, as the important question of the method of regeneration of the forests of Northern Bengal is still under investigation. The main feature of the new scheme is the substitution of artificial for natural reproduction of *sâl*. A technical description is given in paragraphs 53-64 of the report under review of the different results obtained by natural and artificial reproduction generally.

The deviations from the sanctioned working plans have been sufficiently explained by the Conservator in his report.

Since the close of the year an officer has been specially deputed to prepare working plans for the Chittagong and the Chittagong Hill Tracts divisions with a view to meeting commercial and economic demands.

5. **Communications and Buildings.**—One mile of cart road, two miles of bridle-path and two miles of foot-path were constructed during the year. The total expenditure on communications amounted to Rs. 15,904 against Rs. 22,675, and on new buildings and repairs to Rs. 25,311 against Rs. 34,776, in the preceding year. The large decrease is attributable to the compulsory curtailment of expenditure on account of the war, but the Conservator reports that this low rate of expenditure cannot be maintained without involving [illegible] expenditure in the future.

6. **Protection.**—There was a slight increase in the total number of forest offences reported during the year, the number being 2,780 against 2,642 in the previous year. The average of the past three years was 2,276. In the Chittagong division where an increase of 129 was reported last year, there has been a still larger increase from 461 last year to 628 in the year under review. This the Conservator reports is primarily due to the inadequate punishments awarded to the offenders by the Courts.

The area in which fire protection was attempted during the year comprises 367,854 acres, and the percentage of successful protection was 97·9. The cost per square mile was Rs. 8-1 against Rs. 7-7 in the preceding year. The increase of cost is attributed to larger expenditure in the Kurseong division in putting out big fires. The area burnt over amounted to 7,566 acres against 8,290 in the previous year. In 19 out of 36 cases the causes of the fires were undetected. It is satisfactory to note that the damage done was not serious.

There was no change in the area open to grazing. The number of cattle impounded during the year was 4,720 against 5,226 in the previous year and 4,238, the average of the last three years. The decrease was mainly in the Buxa division due to the satisfactory working of the token system and to the proper punishment of offenders in the previous year.

The question of cattle-grazing in the Darjeeling hill forests was considered by Government and orders were issued after the close of the year for preventing hardship to graziers by allowing them in future to restore

their herds to the previous strength when their numbers have been temporarily diminished for sufficient reasons, and by expediting the preparation of Government *bathans* with paddocks attached.

Observations on the spread of the *sâl* root fungus were continued during the year in Buxa, Jalpaiguri and Kurseong Forest divisions. The information collected is still incomplete.

7. **Exploitation.**—Minor forest produce continued to be disposed of generally under permits at scheduled rates. There was a large increase in the outturn of bamboos and there were increased sales of bamboos and canes to the tea-gardens.

Departmental work increased considerably during the year owing to the fact that a large quantity of sleepers was sawn and supplied to the Munitions Board. Besides sleepers, timber, both round and sawn, was supplied for various purposes connected with the production of munitions. The outturn of timber increased from 6,187,000 last year to 7,645,000 cubic feet during the year under report.

Last season's khedda operations conducted by the Forest Department in the Buxa Forest division resulted in the capture of 33 elephants. One escaped, another died during extraction from the stockade, and two old females were released as having no sale value. Out of the remaining 29 elephants 24 were sold and five were retained by the Forest Department.

Forty-three elephants were also captured in Chittagong during the year. All were sold.

8. **General.**—The number of persons reported to have been killed by tigers in the Sundarbans was 14 against 19 in the previous year, and 86, the average of the last five years. This remarkable decrease is reported to be due to discrimination in the issue of tiger-shooting permits to approved *shikaris* as well as to a decided increase in the number of deer. The number of tigers killed was 46 including one cub.

The proposals for strengthening the controlling staff of the Forest Department mentioned in last year's Resolution were sanctioned by the Secretary of State during the year.

Mr. H. S. Gibson, Deputy Conservator of Forests, was permitted during his leave to study methods of forest engineering and mechanics in the United States of America. He submitted during the year an interesting report showing the results of the enquiries made during his tour.

9. **Financial results.**—During the year under review the total revenue increased from Rs. 14,33,555 in 1916-17 to Rs. 15,01,670, while the expenditure increased from Rs. 6,29,153 to Rs. 7,71,124 and the surplus amounted to Rs. 7,30,546 against Rs. 8,04,402 in the preceding year. The average of the last five years was Rs. 7,57,878.

The increase in expenditure and consequent decrease in the surplus is attributed mainly to the large expenditure on account of the departmental extraction of timber, which has increased from Rs. 402 last year to Rs. 1,08,844 in the year under review. As already mentioned, this expenditure was incurred mainly in connection with the production of munitions.

10. The thanks of the Governor in Council are due to Sir H. A. Farrington for his careful and efficient administration of the department during the year. His Excellency in Council notices with pleasure the Conservator's appreciation of the good work done by officers of the department and the references in the report to the efficient work of Forest subordinates.

Order.—Ordered that this Resolution be published in the gazette and that a copy, with a copy of the report, be submitted to the Government of India.

By order of the Governor in Council,

M. C. McALPIN,

Secretary to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 26th December, 1918.

Summary.—No rain fell during the week. The standing spring crops are suffering from want of moisture. Their outlook is generally reported to be unsatisfactory. Reaping of winter paddy is proceeding briskly; threshing continues. The average price of common rice for the province has fallen by about 0·71 per cent. as compared with that of the previous week.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

S. C. RAY,

for *President, Advisory Food Committee.*

CALCUTTA, *the 6th January 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 2nd January 1919.

Summary.—The week was rainless. Reaping of winter paddy is fast approaching completion. Threshing continues. Harvesting of potatoes, pulses and sugarcane is in progress. The prospects of standing crops are generally reported to be unsatisfactory owing to drought. The average price of common rice for the province has fallen by about 2 per cent. as compared with that of the previous week.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

CONTENTS.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR DECEMBER 1918.

I. **Character of the Season.**—The rainfall for the month was below the normal everywhere excepting in 24-Parganas, Khulna and Howrah. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of winter rice and sugarcane was continuing. *Rabi* sowing were well advanced. Transplantation of tobacco seedlings were also going on.

III. **State of standing crops.**—The spring crops were not faring well on account of the continued drought.

IV. **Prospects and probable outturn.**—Excepting in the irrigated areas the prospects of the spring crops are not favourable.

V. **Damage to standing crops.**—Considerable damage has been done by drought to winter paddy nearly all over the province. Insects and fungus diseases are also responsible for some damage at places.

VI. **Condition of agricultural stock.**—Agricultural live-stock was reported to be in fair condition throughout the province. Cattle-disease was found to be prevalent in parts of Hooghly, Burdwan, Bankura and Midnapore.

VII. **Failure of pasturage and fodder.**—The fodder supply was deficient in Bankura, Rajshahi, Bogra and in Brahmanbaria subdivision of Tippera.

VIII. **Prices of food grains.**—During the second fortnight of the month under review the price of common rice rose in six districts, fell in fourteen, and remained stationary in the rest, prices varying from 6 seers chitaks a rupee at Howrah to 9 seers 8 chitaks a rupee at Jalpaiguri and Rangpore.

IX. **Condition of agricultural people.**—The general condition of the agricultural population continued fair.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Wheat Crop of Bengal, 1918-19.

[*Note.—On an average of the five years ending 1916-17, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to total wheat acreage in* (a) *British India and (b) in the territory now reported on, has in the five years ending 1916-17, averaged (a) 41·1 and (b) 18·7 per cent., respectively.*]

Explanatory.—Three forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

Area sown.—According to the estimates of District Officers the total area sown amounts to 109,700 acres against 122,700 and 124,000 acres returned in last year's first and final forecasts. The decrease in area is attributed to the unfavourable character of the season previous to seeding time.

Character of the season and condition of the crop.—The months of September and October were practically rainless in most districts, the principal wheat growing areas, *viz.*, Malda, Rajshahi, Pabna, Murshidabad and Nadia being badly droughted. In addition, therefore, to a considerable reduction in area in these districts the general condition of the crop is reported to be poor.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 18th January 1919.

APPENDIX I.

First Forecast of the Wheat Crop of Bengal, 1918-19.

District.	Approximate normal area under the wheat crop, in acres.	Approximate area under wheat last year (1917-18), in acres.	Estimated area under wheat this year (1918-19), in acres.	Date on which the sowing of the crop was begun this year.	Remarks by District Officers.
	Acres.	Acres.	Acres.		
Nadia	23,100	13,800	9,400	Last part of October to end of November.	Sowings were late in the Ranaghat, Meherpur and Chuadanga subdivisions and in some thanas of the Sadar subdivision. The weather and rainfall conditions have not been favourable. Hence the crop is in poor condition.
Murshidabad ...	69,300	31,200	23,700	October to November.	Sowings were normal in the Sadar and Lalbagh subdivisions but late in the Jangipur and Kandi subdivisions. The weather has been unfavourable owing to continued drought. Hence the condition is poor.
Jessore ...	2,300	1,100*	1,100*	October and November.	Sowings were normal. The weather has not been favourable, and the condition of the crop is poor.
Burdwan ...	2,000	2,000*	2,000*	End of October to end of November.	Sowings were normal except at Katwa where it is reported to be late. The weather has not been favourable as there was not sufficient moisture at the sowing time due to cessation of rainfall from the beginning of September. Hence the condition of the crop is poor.
Birbhum ...	5,000	4,100	4,100	End of November...	Sowings were late. The weather has not been favourable. The condition of the crop is poor.
Bankura ...	3,600	3,600*	3,600*	Last week of October.	Sowings were early The weather has not been favourable. The condition of the crop is poor.
Midnapore ...	1,200	1,200*	1,200*	November ...	Sowings were normal. The weather has not been favourable as there was practically no rain since September last. Hence the condition of the crop is poor.
Hooghly ...	2,400	1,700*	1,700*	November, late ...	The weather has not been favourable. The condition of the crop is poor.
Rajshahi ...	8,500	7,800*	6,800	End of November...	Sowings were normal. The weather has not been favourable for want of rain. The condition of the crop is fair.
Dinajpur ...	1,000	1,400*	1,300	By the end of October, normal.	The weather has been favourable. The condition of the crop is fair.
Jalpaiguri ...	800†	500	500	By the end of November.	Sowings were late owing to continuous rainfall till a late season this year. The weather has not been favourable to the crop and its condition is poor.
Darjeeling ...	4,500	2,500	2,500	September to October.	Sowings were normal. The weather has been favourable. The condition of the crop is fair.
Rangpur ...	3,000	3,400*	3,400*	First week of November.	Sowings were normal. The weather has not been favourable to the growth of the crop as there was no rain since sowing time. The present condition is fair.
Pabna ...	16,000	12,000.	12,000	Middle of November.	Sowings were normal. The weather and rainfall conditions have not been favourable for the growth of the crop. Hence the condition of the crop is poor.
Malda ...	60,000	35,000	35,000	End of October, normal.	The weather and rainfall conditions were not favourable throughout. The drought since September has retarded growth. The present outlook of the crop is not very promising.
Faridpur ...	2,700	2,700*	2,700*	First week of November.	Sowings were normal. The weather has not been favourable. The condition of the crop is fair.
Total ...	205,400	124,000	109,700		

* Conventional area. † Revised.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 16th January 1919.

Summary.—Excepting light showers in some places of Western Bengal no rain fell in the rest of the province. Threshing of winter paddy is well advanced. Preparatory tillage for the next autumn crops has commenced in Eastern Bengal. Transplanting of summer paddy and harvesting of sugarcane, potatoes and early oilseeds are progressing. The prospects of standing crops are generally unfavourable. The average price of common rice for the province has risen by about 0·6 per cent. as compared with that of the previous week.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the Fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The Fund is now of ten years' standing and has a balance of over three and-a-half lakhs with Government on four per cent. interest. For forms of applications and rules of the Fund apply to the Comptroller, India Treasuries, Imperial Secretariat Buildings, Calcutta.

GOVERNMENT OF BENGAL.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN THE BENGAL PRESIDENCY (EXCEPT CALCUTTA) DURING 1917-18.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal Branch.

CALCUTTA, THE 27TH JANUARY 1919.

RESOLUTION—No.287M.

READ—

Reports from the Commissioners of Divisions on the working of municipalities in the Bengal Presidency (except Calcutta) during the year 1917-18.

1. **Number of municipalities.**—The number of municipalities increased from 113 to 115 in consequence of the partition of Bhadreswar into the two separate municipalities of Bhadreswar and Champdani and of the partition of Halisahar into the municipalities of Halisahar and Kanchrapara.

2. **Elections.**—General elections were held in 22 municipalities during the year. In the majority of cases the attendance of voters was satisfactory, but there was no poll in three municipalities, and in five other cases votes were recorded in only one ward. The election at Nawabganj, of which the Commissioners had hitherto been appointed by Government, was hotly contested. The elections in two wards of the Baduria municipality had to be declared null and void for a second time by the District Magistrate owing to irregularities in election proceedings.

3. **Number of ratepayers.**—The number of ratepayers decreased from 321,099 to 316,563, the reduction being largest in the Presidency Division where it amounted to 4,988. The district of the 24-Parganas alone was responsible for a decrease of 4,073, which is reported to have been due chiefly to a change in the form of assessment, *viz.*, the introduction of a rate on holdings in lieu of a tax on persons in Naihati, and to the abandonment of holdings acquired by rice mills.

The ratio of ratepayers to the population residing within municipal limits averaged 16 per cent in the Presidency as a whole and varied in individual towns from 36 per cent in Katwa to less than 4 per cent in the mill town of Titagarh. Other towns in which rates are paid by less than one-tenth of the people are Darjeeling, Narayanganj, Garden Reach, Garulia, Bhatpara and Champdani.

4. **Assessment and taxation.**—The incidence of taxation fell slightly and now averages Rs. 2-4-11 per head of the population. It is highest in the hill stations of Darjeeling (Rs. 8-10-7) and Kurseong (Rs. 6-13-10) and in the suburban municipality of Cossipore-Chitpur (Rs. 6-9-10). In only three other towns (Howrah, Chittagong and Mymensingh) is it above Rs. 4, while it is below Re. 1 in 44 municipalities, or two-fifths of the total number, falling in five cases to below 8 annas a head.

Only about one-sixth of the municipal population, however, pays rates, and a truer idea of the incidence of taxation can, therefore, be gained by considering the amount paid by the actual ratepayers, which averages Rs. 14-6-6 per ratepayer for the whole Presidency. The diversity for individual towns is great, the ratepayers in Darjeeling, for instance, paying nearly Rs. 132 a head, while those in some of the petty rural towns pay on the average under Rs. 2 each.

In the Presidency as a whole altogether 5½ per cent of the amount realized from holding, conservancy, lighting and water rates and taxes is paid for Government buildings. The payments represent in Darjeeling, Berhampore and Chittagong approximately one-twelfth, in Dacca one-eighth and in Rampore-Boalia nearly one-fifth of the municipal receipts from these rates, which constitute the bulk of the income from taxation. These figures serve to illustrate the fact, which is not always realized by the municipalities themselves, that, apart from its position as a controlling authority, Government has a direct interest as a ratepayer in the purity and efficiency of municipal administration.

5. **Revision of assessment.**—A general revision of assessment was effected in twelve municipalities. while the revision made in the previous year took effect in two other towns. In Dacca the net increase of revenue amounted to Rs. 40,451, of which Rs. 39,439 were due to the introduction of a revised scale of latrine fees. Pabna secured an increase of Rs. 7,439 and Dinajpur of Rs. 2,630, while in Nator an enhancement of the rate of taxation brought in an additional income of Rs. 2,542. The revision of assessment in Bogra resulted in an increase of Rs. 5,973, but is subject to the result of many appeals. A revision of assessment on the basis of a valuation of holdings in lieu of a tax on persons was undertaken in the Comilla municipality.

6. **Collections.**—The total collections fell from Rs. 45,04,800 to Rs. 44,82,680, the percentage on current demand being consequently reduced from 96 to 92. There was a decrease of Rs. 89,396 in the Burdwan Division alone, where the percentage on current demand was 85 against 96 in 1916-17; this was principally due to the inability of the Howrah municipality to collect a large proportion of its current demand owing to causes which will be referred to later. In 8 municipalities the collections were in excess of

the current demand and in 15 they were over 99 per cent. On the other hand, the ratio was under 85 per cent in 8 municipalities, falling as low as 69 per cent in Bansberia and 51½ per cent in the newly formed municipality of Kanchrapara. The amount of remissions was smaller than in the previous year and represented under 3 per cent of the current demand. Only 3 municipalities remitted more than 10 per cent, viz., South Dum-Dum, Taki and Debhatta, while four remitted over 7 per cent.

There was an abnormal increase in outstanding balances, which rose from Rs. 3,75,345 to Rs. 6,12,128. Of this amount Howrah alone was responsible for Rs. 2,20,857; half of this figure is accounted for by the fact that a sum of Rs. 1,10,088, which was paid on account of taxes by the East Indian Railway on the last working day of the year, could not be credited to the municipal fund during the year. A balance of Rs. 45,000 in Cossipore-Chitpur was due, as in the previous year, to the non-payment by the Corporation of Calcutta and the Eastern Bengal Railway of taxes due from them. Other municipalities which had unduly large outstandings were Burdwan, Midnapore, Hooghly-Chinsura, Serampore, Bally, Maniktala, Tollygunge, Dacca, Mymensingh, Barisal and Rampore-Boalia. No satisfactory explanation has been furnished of these large outstanding balances, which are generally due to laxity in collections and the neglect of the municipal executive to enforce punctual payments, quarter by quarter, by means, where necessary, of a regular and impartial issue of warrants.

7. **Income and expenditure.**—The total receipts, including opening balances, amounted to Rs. 83,58,974 as against Rs. 81,14,287 in the previous year. The increase was mainly due to grants and loans received from Government, large grants being made to the municipalities of Midnapore, Natore and Satkhira for water-works schemes, while loans aggregating 1¾ lakhs were given to Dacca and Mymensingh for similar projects. The total actual income showed an increase of Rs. 1,69,763 and amounted to Rs. 58,62,251. Receipts from rates and taxes fell from Rs. 46,07,994 to Rs. 45,59,861, but there was a slight increase in receipts from other sources.

The total expenditure rose from Rs. 65,30,795 to Rs. 66,74,302. There was a decrease of a lakh under the head of "general administration and collection charges", while the expenditure on account of public health rose by 1½ lakhs.

8. **General administration and collection charges.**—The decrease is mainly due to the fact that the figure for the previous year included the sums of Rs. 49,347 expended on a survey of the Howrah municipality and of Rs. 94,794 being the balance of a Government grant refunded by Narayanganj. If these sums are left out of account, there is an all-round increase, which is attributed to the rise in the price of stationery, the grant of grain compensation allowances and increments of the pay of municipal employés. The net percentage of the cost of administration on the total expenditure, however, fell from 8·6 to 8·1, the proportion varying from 2·4 per cent in Uttarpara and 4·6 in Dacca to the high figure of 33·03 in Debhatta and 24·6 per cent in North Dum-Dum.

9. **Education.**—The total amount spent on education was Rs. 2,61,514, or 4½ per cent of the municipal income. The expenditure was nearly Rs. 13,000 more than in the previous year, but Government grants rose by Rs. 22,000 and the receipts from other sources by Rs. 4,000; there was consequently a decrease in the amount devoted to education by the municipalities themselves. Deducting the grants made by Government and other contributions, the expenditure from the municipal fund was only Rs. 1,90,546, or 3¼ per cent of the municipal income.

The educational expenditure consists mainly of grants to private schools. In the whole of Bengal there are only 8 municipal primary schools, *i.e.*, primary schools entirely maintained by municipalities. Some still fail to realize their obligations in regard to primary education; during the year under review the amount spent by 17 municipalities, or approximately one in seven, was less than 3·2 per cent of their ordinary income —this percentage is taken to represent the amount required for the education of half the boys of school-going age. On the other hand, 55, or

nearly half the total number, spent over 5 per cent of their income, compared with 42 in the previous year, while 8 spent more than 10 per cent. On the whole, the municipal towns of Bengal are well provided with primary schools, though their standard and equipment leave much to be desired; and in some places the number is so large as to lead to overlapping, with consequent waste of money, unhealthy competition and inefficiency. Recent enquiries have shown, for instance, that there are 12 primary schools to the square mile in Howrah and Bankura, 11 in Bogra, 7 in Serampore, 5 in Midnapore, and 3 in Burdwan.

10. **Water-supply.**—The provision of a pure water-supply is one of the greatest needs of Bengal towns, which, however, are unable to bear the expense of constructing water-works without large grants from Government. Of late years the amount which Government is able to contribute has been curtailed by financial stringency, and the execution of many useful schemes has consequently had to be deferred; but during the year under review it was possible for Government to give substantial grants and loans, with the help of which considerable progress was made.

A grant of a lakh was made to the Midnapore municipality, where a start was made with a much needed water-supply scheme, while a project for Uttarpara was nearly completed, the expenditure during the year being Rs. 83,000. The construction of new water-works at Satkhira was pushed on; the improvement of those established at Berhampore was taken in hand; and a scheme for the supply of filtered water to Krishnagar received administrative sanction. In Dacca an important project for the improvement of the existing system was undertaken with the aid of a Government loan of a lakh, while a loan of Rs. 70,000 was given to Mymensingh for the improvement of its system. The construction of water-works, to which Government had made a substantial contribution, was also in progress at Natore. Pipe water was extended to almost all the roads in Barisal, where the public health is reported to have improved greatly in consequence of the introduction of a supply of filtered water. Government, however, regret to observe that it is also reported the management of the water-works is unsatisfactory and apathetic. The water-works at Pirojpur had to be closed owing to the impurity of the filtered water, and steps have been taken to repair the filtered beds.

The statutory rule laid down by Government requiring meters to be affixed to private house connections continued to meet with a certain amount of opposition. In Howrah a suit was instituted to test its legality and on appeal was decided in favour of the Municipal Commissioners. Legal proceedings were also instituted at Chittagong with a similar result; an appeal is now pending with the High Court.

11. **Drainage.**—The poverty of municipal resources and the limitation on the amounts which Government could contribute impeded progress with large schemes of drainage. Tangail was, however, able to bring a scheme to completion; while Mymensingh proceeded to take up a comprehensive project in instalments; progress was also made with work in Bhadreswar and Bhatpara, and schemes were prepared for other towns.

12. **Conservancy.**—A detailed sewerage scheme was approved for the town of Kurseong, and Government agreed to make a grant of Rs. 50,000 and a loan of Rs. 30,000 towards its cost. The necessity and urgency of an up-to-date sewerage scheme for the town of Dacca is forcibly illustrated in the Magistrate's report, and arrangements are being made to start work on a project which has long been ready, but which has hitherto been kept in abeyance owing to financial exigencies. The total cost is 30 lakhs, of which Government has agreed to grant 25 lakhs, the balance being met by a Government loan.

13. **Public works.**—The percentage of the outlay on public works to the total expenditure varied in the smaller towns from 1·6 in Champdani to 51·2 in Taki and in larger municipalities from 4·6 in Natore to 41·2 in Chandpur.

A fine building, which will serve both as a town hall and as the municipal office, was in course of construction at Darjeeling, this addition to the

buildings of the town being rendered possible by the munificent offer of Rs. 1,65,000 by His Highness the Maharaja of Cooch Behar.

14. **Loans.**—Altogether 39 municipalities were in debt to Government at the end of the year, their total liability amounting to nearly 43 lakhs. The largest outstanding liabilities were those of Howrah (Rs. 21,92,154), Darjeeling (Rs. 6,56,114), Dacca (Rs. 3,38,801), Chittagong (Rs. 1,42,400) and Narayanganj (Rs. 1,09,111). Three municipalities took loans during the year for water-works, viz., Dacca (Rs. 1,00,000), Mymensingh (Rs. 70,000) and Uttarpara (Rs. 25,000). Kharar, Panihati and Faridpur liquidated their loans.

15. **Closing balances.**—The closing balances, which had fallen from Rs. 16,59,012 to Rs. 15,83,492 in 1916-17, rose to Rs. 16,84,672, and about one-third of the total number of municipalities closed the year with a balance exceeding one-quarter of the total expenditure. Five municipalities had closing balances of over a lakh, viz., Dacca (Rs. 2,25,685), Howrah (Rs. 1,85,773), Midnapore (Rs. 1,70,521), Cossipore-Chitpur (Rs. 1,03,058), Maniktala (Rs. 1,01,614) and Darjeeling (Rs. 1,00,717). The large balances in the case of Midnapore and Dacca were due mainly to the receipt of a grant and loan, respectively, which Government gave for water-supply schemes, and which could not be fully expended during the year. The comparatively large balances standing to the credit of Cossipore-Chitpur and Maniktala are not excessive, in the opinion of the Commissioner, regard being had to their needs. No explanation has been furnished for the large balance in Darjeeling.

On the other hand, a number of municipalities failed to keep adequate working balances and in 16 cases, as against 9 in the previous year, they were insufficient to meet outstanding liabilities. Jessore with an ordinary expenditure of Rs. 36,000 had a balance of Rs. 319 only, while Baduria with an expenditure of Rs. 5,000 closed the year with the exiguous sum of Rs. 8 in hand. The tendency to incur liabilities in excess of resources was most marked in the municipalities of Hooghly-Chinsura, Serampore, Pabna, Dinajpur and Barisal. The worst offender was Serampore, which had outstanding liabilities of Rs. 51,680, or nearly three-fourths of its current demand, against an actual balance of Rs. 5,619. This deplorable result is said to be due to lack of supervision over the municipal establishment.

16. **Audit of accounts and embezzlements.**—The accounts of most of the municipalities were audited during the year. Serious irregularities and embezzlements came to light in the municipalities of Burdwan, Hooghly-Chinsura and Serampore. The loss to the Burdwan municipality, so far as has been ascertained up to the present, amounted to Rs. 3,850; the amount embezzled in Serampore and Hooghly-Chinsura is not reported. In Rangpur two municipal employés were convicted of embezzling municipal money, and a case of embezzlement of Rs. 1,600 was also detected in Rajpur. No case of embezzlement was reported in any of the other divisions.

17. **Howrah.**—The current demand on account of taxes in Howrah rose by nearly a lakh, and amounted to Rs. 10,97,631. The total demand (including arrears) amounted to Rs. 11,40,347, of which only Rs. 8,79,589, or 77·1 per cent, were collected during the year. This low percentage is due partly to the fact already referred to that a payment of over a lakh could not be credited to the municipal fund within the year, partly to the slow disposal of a large number of appeals against revision of assessment and partly to delay in the Assessment Department in dealing with petitions against wrong assessments and with lists of holdings not in existence. As a result of these latter two factors over a lakh was uncollected, and there is a large accumulation of outstanding taxes which it will be difficult to realize.

The financial position of the municipality has not shown any appreciable improvement, and the remark of the Chairman that the Municipal Commissioners are in a position to meet current expenses without increasing the rates seems to be too optimistic. Normal receipts, it is true, exceeded normal expenditure by Rs. 25,000, but expenditure was restricted largely in consequence of conditions imposed by the war and the prohibitive cost of materials, as well

as by the obvious necessity of maintaining financial equilibrium ; and there are many reforms of which the execution is precluded by the financial exigencies of the municipality. The water-works improvement scheme had to be postponed owing to want of funds and the high price of materials. No new drainage works involving capital expenditure could be taken up during the year and the canal scheme had to be postponed. The outlay on roads in the previous year, which was less than half of the amount estimated as necessary for their proper upkeep, was reduced by Rs. 3,000. In the year under review it was even less, and remetalling had to be suspended. The Municipal Commissioners, however, are not responsible for the reduced expenditure. They provided in their budget for a far larger amount, but could not work up to the budget provision owing to causes over which they had no control, viz., the difficulty of getting metal by rail, from which many other local bodies have suffered. The conservancy of the town is defective. The cleaning of latrines is admittedly unsatisfactory, while the absence of adequate machinery for the prompt removal of scrapings from drains, which are allowed to accumulate on the sides of the roads, is a well-founded cause of complaint. The expenditure on primary education is extremely small for a town of the size of Howrah, viz., Rs. 10,665, or 2·6 per cent of the ordinary municipal income. These facts tend to show that the municipality is unable, with its existing scale of taxation, to provide fully for its present needs, much less to provide for the development and improvement of the town on modern lines.

The Hon'ble Babu Mahendra Nath Ray continued to be the Chairman, and the Governor in Council is pleased to observe the Commissioner's commendation of the good work done by him. The Chairman himself modestly remarks that it is almost impossible for a busy professional man to discharge the heavy duties of Chairman to his full satisfaction, and the Governor in Council has all the more pleasure in acknowledging the work done by him in such time as he could spare. The License Department was reorganized during the year with satisfactory results and a consequent increase of over Rs. 14,000 in the collections. Another improvement was the reorganization of the Health Department. In recognition of the sound principle that the primary duty of a Health Officer is the prevention of disease, and not conservancy work, the Health Officer was placed in charge solely of matters connected with public health, while conservancy was handed over to the Municipal Engineer. The Chairman has also in contemplation other schemes of reorganization, which have had to be postponed for want of funds.

18. **General remarks.**—The district of the 24-Parganas contains nearly one-fourth of the municipalities of the Presidency and its municipalities are typical of the whole number, for some are large suburban towns in which a standard of administration similar to that of Calcutta is required, others are progressive mill towns, others are more like overgrown villages in which the conditions are rural rather than urban. The Governor in Council is pleased to observe that both the Commissioner and the District Magistrate agree that their administration shows steady improvement. An interesting and thoughtful review of the year's work is given by the District Magistrate, who writes : "On the whole, if allowance is made for the difficulties caused by the war, there has been an advance in the standard of municipal administration in most of the important municipalities. Maniktala, which a short time ago was a byword for party feeling and faction, has settled down. Its drainage problem still remains unsolved and its sanitary condition, therefore, gives rise to much unfavourable comment. But, generally, the character of the administration has improved. Cossipore-Chitpur has had a fairly uneventful year. The financial position needs to be carefully watched, and the problems of adequate water-supply and proper drainage still await solution. Like Maniktala, Cossipore-Chitpur's problems are complicated by external conditions. Of the other suburban municipalities Garden Reach is the best run, and signs of a vigorous administration are visible. Tollygunge is in great financial difficulties, being in debt to the Calcutta Corporation for a whole year's water-rate. An effort is now being made to put matters

right, but there is great lack of foresight and vigour in the administration. The South Suburban Municipality is surprisingly backward. Further south, Budge-Budge is embarking on a scheme of improved drainage which is much needed. The mill municipalities continue to prosper and the relations between the Indian and European Commissioners have been most friendly. The other riparian municipalities call for no remark, their poverty preventing them from embarking on any ambitious schemes.

"Most of the municipalities away from the Hooghly consist of groups of rural villages, and the administration generally is feeble. Usually there are many more miles of metalled roads than can be properly maintained and, save a latrine service of varying efficiency, almost none of the ordinary conveniences of municipal life are available. Drainage almost everywhere is bad, and in the few places where a drainage system has been introduced at a considerable cost the results are almost nil. Lighting is poor or non-existent. Unfortunately, too, the administration of many of these municipalities is in the hands of Commissioners who are generally non-resident, but who take a great deal of trouble to obtain posts, the duties of which they cannot discharge. In other cases the most influential local resident is the successful candidate for the post of Chairman and, having obtained it, leaves everything to the Vice-Chairman or the office staff, which in too many cases becomes the real local executive, with evil results."

Mr. Prentice adds—and the Governor in Council would invite the attention of all municipal Commissiners to his remarks—"Administrative improvement can be easily brought about if only those who aspire to and obtain office recognize that office entails work as well as confers dignity and that, as trustees for the public, they are bound to see that the public money is fairly collected and also spent to the best advantage, that the staff are the servants of the public, and not their masters, as is too often the case, that the requirements of the law are met and that correspondence is disposed of with reasonable despatch. In short, there must be much more attention to the detail and drudgery of administration".

In Nadia the District Magistrate points out that party spirit, which is so frequently decried as an obstacle to progress, is often of real service as the opposition presses for improvement of the administration. Berhampore is undertaking the improvement of its water-supply and drainage systems, but want of funds prevents appreciable progress in either direction. A recent inspection by the Examiner of Local Accounts shows that the financial position of Kushtia has gone from bad to worse.

The Commissioner of Burdwan reports that the municipalities in his Division were fairly well managed with the exception of Burdwan, Hooghly-Chinsura, Serampore and Bansberia. The continued maladministration of Burdwan and Hooghly-Chinsura has compelled Government to take the extreme step of ordering the supersession of the Municipal Commissioners. The administration of Serampore was characterized by the same grave defects as that of Burdwan and Hooghly-Chinsura. Lack of supervision led to the accumulation of heavy arrears of taxes, serious irregularities, embezzlement and excessive outstanding liabilities. The liabilities, as already mentioned, aggregated Rs. 51,680, or nearly three-fourths of the current demand, while the actual balance in hand amounted to Rs. 5,619. Bansberia is said to be the worst managed of the small municipalities, and the District Magistrate describes its administration as deplorable. The Governor in Council considers it necessary to draw the special attention of the Municipal Commissioners of both Serampore and Bansberia to these remarks, and to administer a grave warning as to the necessity of reform.

The Commissioner of Rajshahi gives a favourable account of the municipalities in his Division, which, with few exceptions, continued to do good work. The most notable exception is Rampore-Boalia, which, as in previous years, suffered from general feebleness and want of enterprise. Natore in the same district set an example which the headquarters town might well follow, for, in spite of greater difficulties, it was well administered without friction,

Darjeeling kept up its usual high standard of administration, and the Municipal Commissioners were conspicuous for a keen sense of public spirit and for the harmony with which they disposed of business.

The reports on municipalities in Eastern Bengal are generally jejune and give no clear and comprehensive conspectus of their work. The same defect has characterized their annual reports for some time past, and the Governor in Council suspects that it is due to want of that intimate knowledge which can only be gained from inspections. Mymensingh has shown a progressive spirit, and increased taxation has enabled the Municipal Commissioners to take up important improvements. The other municipalities in the Mymensingh District are unprogressive. Some of them show a strong tendency to evade their responsibilities, in particular by trying to shift the burden of maintaining municipal roads on to the District Board. Comilla has decided to substitute a rate on holdings for a tax on persons with a consequent increase of revenue, and the Municipal Commissioners have in view several schemes of improvement. In Noakhali the problems of the Commissioners are complicated by the possibility of the town being swept away by the sea.

19. **Inspections.**—The Governor in Council regrets to observe that none of the municipalities in the Chittagong Division were inspected by District Magistrates during the year. The record in the Dacca Division is scarcely more satisfactory, only 5 out of 17 municipalities being inspected by District Magistrates. On the other hand, there was, with a few exceptions, no neglect of this important duty in North and West Bengal. The Governor in Council desires to draw the attention of all District Officers to the need of thorough and regular inspection of the municipalities in their districts.

20. The names of the following gentlemen have been specially brought to the notice of Government by the Commissioners of Divisions on account of the good work done by them in municipal administration, and the Governor in Council desires to express his appreciation of their public spirit :—

Mr. R. F. Lodge, I.C.S., Chairman, Asansol,
Mr. M. C. G. Young, } Vice-Chairmen,
Dr. G. L. Johnston, } Asansol.
Mr. G. Crawford, Chairman, Raniganj.
Dr. Bepin Behari Banarji, Vice-Chairman, Raniganj.
Babu Jatindra Nath Banarji, } Chairmen,
Babu Nihar Ranjan Banarji, } Dainhat.
Babu Jnanoda Kinkar Mukharji, Chairman, Suri.
The Hon'ble Babu Sivnarayan Mukerji, Chairman, Uttarpara.
Mr. John Low, Chairman, Baidyabati.
Babu Debendra Nath Mukherji, Vice-Chairman, Baidyabati.
The Hon'ble Babu Mahendra Nath Ray, C.I.E., Chairman, Howrah.
Babu Jati Prosad Banarji, Chairman, Kotrang.
Babu Nava Gopal Basu, Vice-Chairman, Arambag.
Mr. G.E. Prain, Chairman, Bally.
Mr. J. M. George, Chairman, Naihati.
Maulvi Saiyid Mafakharer Rahaman, Vice-Chairman, Titagarh.
Rai Shama Charan Bhattacharji, Vice-Chairman, Bhatpara.
Mr. W. F. Davie, Chairman, Garden Reach.
Babu Hem Chandra De, Chairman, Cossipore-Chitpur.
Mr. J. M. Cuthbert, Chairman, Baranagar.
Mr. W. Thomson, Chairman, Titagarh.
Babu Hari Das Ray Chaudhury, Vice-Chairman, Baruipur.
Babu Nilmoni Bhattacharji, Vice-Chairman, Berhampore.
Babu Sachindra Nath Rai, Chairman, Dhulian.
Raja Bijoy Singh Dudhoria, Chairman, Azimganj.
Babu Hari Das Rai, Chairman, Santipur.
Babu Upendra Mohan Mitra, Chairman, Comilla.
The Rev. J. Takle, Chairman, Brahmanbaria.
Babu Bhabadeb Bhattacharjee, Vice-Chairman, Brahmanbaria.
Maulvi Safar Ali, Chairman, Noakhali.
Maharaja Sir Girija Nath Roy Bahadur, K.C.I.E., Chairman, Dinajpur.
Babu Surendra Kumar Sen, Vice-Chairman, Dinajpur.
Babu Anukul Chandra Mukherjee, Chairman, Jalpaiguri.
Rai Dina Nath Biswas Bahadur, Chairman, Pabna.
Babu Surendra Nath Mazumdar, Vice-Chairman, Pabna.
Dr. B. Seal, Vice-Chairman, Darjeeling.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secretary to the Government of Bengal.

FORM NO. I.—*Statement showing the constitution of the Municipalities in the Bengal* [illegible] *...d.*

Civil Surgeons. Taken as a whole the table possesses a relative value, although the figures for individual districts probably only approximate those of the respective districts as per Government of Bengal, Municipal Department, Order No 118San, dated the 8th February 1918 to the Government of India, Education Department, Order No. [illegible], dated the 26th March 1918

CHARLES A. BENTLEY,

Sanitary Commissioner for Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

The following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta Block* in certain selected articles during the months of April to November, 1918, as compared with the corresponding period of 1917 and 1916. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April to November, 1918, amounted to 9,314,000 maunds as against 7,849,000 maunds in the corresponding period of the preceding year,—an increase of 19 per cent. There was an increase (8 per cent) in the imports of coal and coke (56,328,000 maunds as against 52,116,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piece-goods showed an increase of 51 per cent, the total value amounting to Rs. 3,84,52,000 as against Rs. 2,54,30,000 in 1917. The quantity of indigo imported during the months of April to November, 1918, increased by 900 maunds, or 12 per cent, to 9,000 maunds. The imports of raw jute amounted to 3,512,000 bales as against 2,622,000 bales,—an increase of 34 per cent. The importations of gunny bags also showed an increase of 16 per cent (323 million bags as against 277 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 64 per cent from 3,122,000 maunds to 5,115,000 maunds. The imports of tea increased by 3 per cent from 2,304,000 maunds to 2,374,000 maunds, and those of sugar by 2 per cent from 426,000 maunds to 436,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the months of April to November, 1918, decreased by 9 per cent (Rs. 15,03,38,000 as against Rs. 16,64,14,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 938 million bags to 924 million bags, but the shipments of gunny bags to other Indian ports increased from 13 million to 25 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 3,788,000 maunds to 3,266,000 maunds, or by 14 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles for the eight months, April to November, 1918, compared with the corresponding months of 1917

DEPARTMENT OF STATISTICS, INDIA,
January 27, 1919.

G. FINDLAY SHIRRAS,
Director of Statistics.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 23rd January 1919.

Summary.—During the week light rain fell all over the province improving the prospects of standing crops generally. Threshing of winter paddy and transplanting of summer rice are nearing completion. Preparation of fields for jute and autumn paddy and harvesting of sugarcane, potatoes and early oilseeds are proceeding. The average price of common rice for the province has fallen by about 0·13 per cent. as compared with that of the previous week.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

CONTENTS.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane Crop of Bengal, 1918-19.

(Note.—On an average of the five years ending 1916-17, the area under sugarcane in Bengal has represented some 9·2 per cent. of the total area under sugarcane in British India).

Character of the Season.—The crop was planted under favourable conditions which in spite of abnormal rainfall in June continued up till July. A good deal of damage was done to the crop in Eastern Bengal by floods in August and September. The Western districts have in their turn suffered severely from the drought which has prevailed since August. The season has thus, on the whole, not been a favourable one for sugarcane.

Acreage.—The area planted is estimated at 218,900 acres against 207,400 acres last year.

Outturn.—From the appendix attacked to the report it will be seen that only four districts, namely Rangpur, Malda, Chittagong and Noakhali, report a crop between 90 and 100 per cent., thirteen districts a crop between 75 and 90 per cent. and eight districts between 68 and 75 per cent. The districts of Murshidabad and Darjeeling report crops as low as 58 and 46 per cent. of the normal.

According to the estimates of the District Officers, the average outturn of the crop for the Province works out at 77 per cent. of the normal against 89 per cent. last year.

Taking 36 maunds as the normal rate of cane-*gur* per acre, the gross outturn for the Province is estimated at 4,458,100 cwts. against 4,814,300 cwts. last year.

Other sources of *gur*.—The total quantity of *gur* likely to be obtained this year from date-palm juice is estimated at 1,954,800 cwts. and from palmyra-palm juice 1,400 cwts. against 2,022,400 cwts. and 1,400 cwts. respectively last year.

The total quantity of *gur* in the Province from all sources this year is thus estimated at 6,414,300 cwts. against 6,838,100 cwts. last year.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 30th January 1919.

APPENDIX I.

Final Forecast of the Sugarcane Crop of Bengal, 1918-19.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
24-Parganas ...	5,100	4,000	4,100	100	87	Beginning of December. Normal.	The increase in area compared with last year was due to favourable weather at planting time. Since October the weather conditions were not favourable and the growth of the plants was retarded thereby.
Nadia ...	7,000	5,600	5,800	75	67	December. Normal.	The increase in area is due to high price of sugar. The weather was favourable but some damage was done by drought in the Ranaghat subdivision. The outturn is much below the normal owing to heavy rain during the period of growth.
Murshidabad ...	3,800	3,200	3,100	83	58	Jangipur; November. Normal. Elsewhere not begun yet.	The decrease in area as compared with last year was due to want of rain at the time of planting. The weather has not been favourable owing to want of rain which has injured the crop by about 42 per cent.
Jessore ...	3,900	2,800	2,600	83	75	December. Normal.	The weather has not been favourable. The outturn has fallen below the normal owing to drought.
Khulna ...	1,500	1,400	1,100	77	77	End of September. Normal.	The decrease in area was due to drought at the time of planting. The weather has not been favourable. The outturn is expected to be below the normal for want of timely rain.
Burdwan ...	25,800	18,000	19,000	100	75	Not yet begun ...	The increase in area as compared with last year was due to favourable weather at planting time. Since the submission of the second forecast the weather has not been favourable as the crop suffered for want of rain. The drought has affected both the growth and outturn of the crop.
Birbhum ...	9,000	11,000	11,000	83	75	Not commenced yet	The weather has not been favourable. The drought has caused damage to the extent of about 25 per cent.
Bankura ...	15,000	11,500	11,500	83	75	Ditto ...	The weather has not been favourable. About 25 per cent. of the crop has been injured by drought.
Midnapore ...	3,000	3,000	3,000	90	80	December. Normal	The weather has not been favourable for want of rain.
Hooghly ...	7,200	5,200	5,000	93	87	Not commenced yet	The weather has not been favourable owing to want of rain which has caused some damage.
Howrah ...	8,500	5,100	5,300	63	71	Ditto ...	The weather has not been favourable. About 29 per cent. of the crop is reported to have been damaged by drought.
Rajshahi ...	18,000	13,100	13,200	80	70	Middle of November Normal.	The weather has been fair. The flood in August and September caused some injury to the crop.
Dinajpur ...	25,000	29,300	30,500	86	78	January to March. Normal.	The weather has not been favourable. The excessive rainfall in August and September and flood in August affected the crop to some extent.
Jalpaiguri ...	5,300	3,800	4,000	87	80	Middle of November. Normal.	Since October the weather has been favourable. The drought at planting time and heavy rainfall in May and afterwards caused the outturn to fall below the normal.
Darjeeling ...	100	100*	100*	62	48	Not yet begun ...	The incessant rain at planting time and drought later on has reduced the outturn by about 52 per cent.
Rangpur ...	20,500	11,000	11,000	100	100	First week of December. Normal.	The weather has not been favourable since October. The flood in August caused some injury to the crop.
Bogra ...	20,000	2,100	3,700	73	67	Middle of January. Normal.	Owing to excessive rain in June, July and August and to drought subsequently the plants did not thrive well. Hence the low outturn is estimated.
Pabna ...	10,000	10,000	9,700	70	65	Middle of December. Normal.	High flood in August and want of rain since October have greatly injured the crop.
Malda ...	300	300*	300*	90	100	Latter part of October. Normal.	The weather has been favourable. A normal outturn is expected.

* Conventional area.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
Dacca	21,100	22,100	23,900	98	74	July to November. Normal.	The increase in area is due to high prices of *gur*. Excessive rain at planting time and high flood subsequently have reduced the outturn by about 26 per cent.
Mymensingh ...	11,100	10,300	10,300	100	80	December. Normal	The weather has been generally favourable. Excessive rain and flood caused damage to the crop by about 20 per cent. in Netrokona and Kishorganj.
Faridpur ...	7,100	7,300	7,400	95	87	End of September. Normal.	The weather was favourable at planting time, but subsequently heavy rain and flood affected the growth of the crop, thus causing the outturn to fall below the normal.
Bakarganj ...	11,000	16,400	20,000	90	60	October to December. Normal.	The increase in area compared with last year was due to favourable weather at planting time and to good market for *gur*. The weather was favourable since October but heavy rain during the period of growth damaged the crop by about 20 per cent.
Chittagong ...	6,400	5,000	5,400	97	95	November. Normal	The weather has been favourable, but heavy rain and flood in July and August as well as *fungus* disease damaged the crop in places.
Tippera ...	8,000	4,100	6,100	90	70	December. Normal	The weather has not been favourable owing to want of rain. The outturn is below the normal owing to damage caused by flood.
Noakhali ...	800	800*	800*	80	90	End of September. Normal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 30th January 1919.

Summary.—Light rain fell in the northern and western districts. Elsewhere there was practically no rain. The rain has facilitated the ploughing of fields for autumn crops and has benefited the standing crops generally. Pressing of sugarcane and harvesting of potatoes and early oilseeds are progressing. The average price of common rice for the province has risen about 1·14 per cent. as compared with that of the previous week.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches.			
1	24-PARGANAS	0·06	7¼	7¼	Harvesting of *rabi* crops and sugarcane continues. Fodder and water are sufficient.
	Diamond Harbour.	0·25	7½	7½	
	Barrackpore	Nil	6¾	6¼	
	Barasat ...	0·30	8	8	
	Basirhat ...	Nil	9	9	
2	NADIA ...	0·13	6⅜	7½	Weather cloudy. More rain is wanted. Lands are being prepared for *bhadoi* paddy. Prospects of standing crops are not favourable. Fodder supply is sufficient.
	Kushtia ...	0·02	7½	7¾	
	Meherpur ...	1·15	7	7	
	Chuadanga...	0·04	7¼	7¼	
	Ranaghat ...	0·40	6⅝	6⅞	
3	MURSHIDABAD	0·52	7	7	Weather cool and cloudy with occassional showers. The recent rain has improved the prospects of sugarcane and *rabi* crops, but some harm is apprehended to peas and gram. Harvesting of *aman* paddy is almost finished. Fodder is sufficient.
	Lalbagh ...	1·29	7	7	
	Jangipur ...	[illegible]	7½	(*n*)	
	Kandi ...	0·82	7¼	8	
4	JESSORE ..	0·02	8	8	Weather cloudy. Harvesting of *aman* paddy is finished. Lands are being prepared for jute and *aus* paddy. Prospects of standing crops are poor. Fodder is sufficient.
	Jhenidah ...	0·32	9	9	
	Magura ...	(*n*)	9	9	
	Narail ...	(*n*)	9	9	
	Bangaon ...	0·16	$8\frac{7}{16}$	8⅞	
5	KHULNA ...	Nil	8	8¼	Harvesting of winter paddy is still going on. Fodder and water are sufficient.
	Satkhira ...	0·09	8¼	8¼	
	Bagerhat ...	Nil	8	8	

(*n*) Not reported.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
6	BURDWAN ...	0·45	6⅝	7	Weather cloudy. The *rabi* and vegetable crops have been benefited by the recent rain. Condition of sugarcane is poor. Export of rice continues.
	Asansol ...	1·76	6¾	6¾	
	Katwa ...	0·35	7¼	6¾	
	Kalna ...	(n)	(n)	7¼	
7	BIRBHUM ...	1·07	7	7	Weather cool and cloudy. The recent rain has benefited the standing crops. Fodder and water are sufficient.
	Rampurhat	0·56	7	7	
8	BANKURA ...	2·74	7	7½	Cutting of sugarcane began early owing to drought, but is now suspended owing to recent rain. Standing *rabi* crops have been much benefited by the recent rainfall. The price of rice rose at Sadar as less rice came to market. Prospects of fodder crops have improved, but the price of straw continues dear. Water supply has been greatly improved by the rain. Distress is apprehended owing to partial failure of winter paddy, but stocks of rice are sufficient. No abnormal export or import. There are early indications of distress. There has been more emigration of labouring classes. Preliminary measures for relief arrangements for *takavi* and agricultural loans are being taken. Some gratuitous relief from private funds is being given. Collection of land improvement and agricultural loans has been suspended.
	Vishnupur ...	0·82	7½	7½	
9	MIDNAPORE	0·60	7½	8	Fodder supply is sufficient. Harvesting of winter is nearly completed. Prospects of sugarcane are fair, but those of rape and mustard are not good.
	Ghatal ...	0·12	7¼	8	
	Tamluk ...	1·65	7⅛	7⅛	
	Contai ...	1·12	9½	9½	
10	HOOGHLY ..	0·30	7	7	Effects of weather on the growth of the crops are good. Fodder is sufficient.
	Serampore ...	0·24	6	6	
	Arambagh ...	0·73	7½	8	
11	HOWRAH ...	0·08	6¼	6⅜	Weather cloudy and warm. Threshing of *aman* paddy and harvesting of sugarcane continue. Condition of *rabi* crops is fair. Fodder is sufficient.
	Uluberia ...	Nil	6½	6½	
12	RAJSHAHI (RAMPUR-BOALIA).	1·16	7	7½	Prospects of standing crops are good owing to recent rainfall. Fodder is sufficient. More rice than usual is being exported to up-country from Godagari.
	Naogaon ...	0·50	7½	7½	
	Nator ...	0·70	7½	(n)	
13	DINAJPUR ...	0·16	7 13/16	7½	Condition of *rabi* crops is fair. Harvesting of sugarcane and mustard is going on.
	Thakurgaon ...	0·85	9	9	
	Balurghat ...	0·59	8 5/16	8 9/16	

(n) Not reported.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches			
14	JALPAIGURI	0·30	7	7	Prospects of standing crops are fair. Fodder is sufficient.
	Alipur ...	0·29	8	8	
15	DARJEELING	0·50	7	7	Wheat is progressing well. Condition is not very favourable. Fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	0·46	7	7	
	Siliguri ...	0·45	7½	7	
	Kalimpong...	Nil	7	7	
16	RANGPUR ...	0·26	8	8	Prospects of standing crops are fair. Lands are under preparation for jute and *aus* rice. Fodder and water are sufficient.
	Nilphamari	0·36	8	8	
	Kurigram ...	0·27	8¾	8	
	Gaibandha ...	0·20	8	8	
17	BOGRA ...	0·54	7¾	7¾	Rain has facilitated ploughing for jute and *aus* paddy and has benefited the standing crops generally. Fodder is sufficient except in the area which was flooded.
18	PABNA ...	0·08	7½	7½	Recent rains, though late, have done much good to the standing crops and have helped the preparation of lands for jute and autumn paddy. Fodder is sufficient.
	Sirajganj ...	Nil	7	7	
19	MALDA ...	0·84	7	6¾	Weather cloudy. The rainfall has improved the condition of *rabi* crops and has facilitated ploughing of fields for jute and *aus* paddy. Sowing of *boro* rice is almost completed. Stocks of fodder are sufficient at present.
20	COOCH BEHAR	0·45	9⅝	9 7/16	Weather cloudy. Harvesting of *haimanti* paddy is nearing completion. Prospects and co[illegible]n of standing crops are favourable. Stocks of food-grains and fodder are sufficient.
21	DACCA ...	0·00	7½	7½	Weather seasonable. There has been slight rain but more is wanted. Ploughing has commenced. Mustard is being harvested. Prospects of standing crops, on the whole, are fair. Cattle-disease is reported from Munshiganj subdivision. Fodder and water are sufficient.
	Manikganj ...	Nil	7¾	7¾	
	Narayanganj	Nil	7	7	
	Munshiganj*	Nil	7½	7½	
22	MYMENSINGH	Nil	7½	7½	Weather slightly cloudy. Preparation of soil for jute and autumn paddy is going on. Fodder is sufficient.
	Jamalpur ...	0·11	8	8	
	Tangail ...	0·02	6¾	6¾	
	Netrakona ...	Nil	7	7	
	Kishorganj...	Nil	7½	7½	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
23	FARIDPUR ...	Nil	7	7	Weather cloudy. Prospects of *rabi* crops are fair. Harvesting of sugarcane continues in Goalundo subdivision. Fodder is sufficient.
	Goalundo ...	Nil	8¼	(*n*)	
	Madaripur ...	Nil	8	8	
	Gopalganj* ...	Nil	(*n*)	8½	
24	BAKARGANJ (BARISAL).	Nil	7½	7½	Prospects of standing crops are good. Fodder is sufficient.
	Pirojpur ...	Nil	7	7½	
	Patuakhali ...	Nil	7¾	7¾	
	Dakshin Shabazpur (Bhola).	Nil	7½	7½	
25	CHITTAGONG	Nil	8	8	Prospects of standing *rabi* crops are fair. Rain is wanted. *Panga* salt is selling at 10 seers and 8 seers per rupee at Sadar and Cox's Bazar, respectively. Fodder is sufficient.
	Cox's Bazar	Nil	10	9½	
26	TIPPERA (COMILLA).	Nil	8	8	Condition of standing crops is fair. Fodder and stocks of rice are insufficient in Brahmanbaria subdivision.
	Brahmanbaria.	Nil	$7\frac{13}{21}$	$7\frac{13}{21}$	
	Chandpur ...	Nil	7	8	
27	NOAKHALI ...	Nil	7	8	Weather cloudy. Lands are being prepared for jute. Prospects of standing crops are good. Fodder is sufficient.
	Feni ...	Nil	$8\frac{7}{16}$	(*n*)	
28	CHITTAGONG HILL TRACTS.	Nil	8	8	Weather cloudy. Prospects of standing crops are fair. *Jhum* cutting has comfinished. Fodder is sufficient.

* The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.
(*n*) Not reported.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal is 56·46 ft. from 10th February 1916 to 15th June 1918. From the 16th June 1918 the zero is 54·81 ft. above M.S.-L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. should be

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From 1st November 1915 the zero of gauge is 2·43 ft. above M. S.-L. Previous to that the zero was at M. S.-L. dating back 15 the

(c) From the 28th January 1916 the zero of gauge at Berhampore is 20·89 ft. above M. S.-L.

(d) From the 28th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M. S.-L. was erected at Rampur-Boalia

The 4th February 1919.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Report on the Cotton Crops of Bengal, 1918-19.

(Note.- On an average of the five years ending 1916-17, the area under the Cotton Crops in Bengal has represented some 0·2 per cent. of the total area under Cotton in India.)

THE "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is unimportant and is mainly grown in Bankura and Midnapore.

Character of the Season.—Since the issue of the third forecast, the continued drought has further affected the outturn in Bankura and in parts of the Hill Tippera State. In the Chittagong Hill Tracts, however, the weather has not been unfavourable for the early crop. In the few other districts growing cotton, a fair outturn is expected.

Area sown.—The total area sown with the early crop is returned at 70,786 acres and that with the late crop 2,203 acres against 69,130 and 2,100 acres, respectively, in the corresponding forecast of last year.

Outturn.—The estimated outturn of the early crop is returned at 30,908 bales this year against 17,786 bales in the corresponding forecast of last year. The outturn of the late crop is estimated at 737 bales this year against 1,068 bales for last year.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 3rd February 1919.

Final Report on the Cotton Crops of Bengal, 1918-19.

(a) Nadia, Birbhum, Hooghly, Rangpur, Bogra, Malda, Dacca, Bakarganj, Chittagong, Tippera and Noakhali.
* Conventional area.

(1) The weather was latterly rainless and was unfavourable to the growth of the crops. The decrease in outturn is due to want of rain since October.
(2) The condition of the crop is not good for want of rain. The date of harvesting was normal.
(3) The weather has been fair. The condition of the crop is generally good.
(4) The weather and general condition of the crop have been good. The date of harvesting was normal.
(5) Since the submission of the third forecast, the weather has affected the crop and the outturn has fallen below the estimate made in the third forecast as the outturn in one division is very poor. The date of harvesting was normal.
(6) The weather and general condition of the crops have not been favourable. The dates of harvesting were normal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th February 1919.

Summary.—Light showers over the most part of the province have improved the prospects of the standing spring crops and facilitated preparatory tillage for the next autumn paddy and jute. Pressing of sugarcane and harvesting of potatoes, mustard and other oilseeds continued. The average price of common rice for the province has risen by about 0·4 per cent. as compared with that of the previous week. Owing to partial failure of winter paddy some distress is apprehended at Bankura. Preliminary relief measures have been arranged for.

RESOLUTION ON THE RECOMMENDATIONS OF THE PUBLIC SERVICES COMMISSION REGARDING THE EXCISE AND SALT DEPARTMENT.

GOVERNMENT OF BENGAL.

FINANCE AND COMMERCE DEPARTMENT.

Separate Revenue.

Excise.

CALCUTTA, THE 15TH FEBRUARY 1919.

RESOLUTION—No. 417S.R.

READ—

Report of the Royal Commission on the Public Services in India.

THE various recommendations of the Royal Commission on the Public Services in India with regard to the Excise and Salt Departments have lately been under the consideration of the Local Government. The Bengal Excise

Department, with which was amalgamated the Salt Department, was reorganised in 1915, and the combined department, after this reorganisation, conforms in the main to the suggestions of the Public Services Commission, thus leaving little scope for further change. There are, however, some points in the recommendations of the Commission on which the Governor in Council would like to give the public an opportunity of expressing an opinion before committing himself to a final decision.

2. **Distillery Expert.**—The present distillery expert in this province was recruited in Europe. It has been observed by the Public Services Commission that such recruitment is not justified on any grounds of policy. The Commission recommend that suitable steps should be taken to train up statutory natives of India for this work, and as Superintendents and Inspectors of Excise and Salt with sufficient scientific grounding are becoming increasingly available, it seems possible in future to give effect to this suggestion.

3. **Appointment of statutory natives of India in the Excise and Salt Department and their recruitment.**—The Commission advise, as an absolute rule for the Excise and Salt Department, that appointments (with the possible exception of that of the distillery expert) should be made in India from amongst statutory natives of that country. The Public Services Commission approve of the selection of candidates by nomination, but suggest the creation of selection committees to advise the local authorities. It is suggested that such committees might consist of three officials and two non-officials, including two Indians. With regard to the educational qualifications of candidates the Commission recommend that they should either have taken a university degree or have passed the examination of a corresponding standard prescribed by Government for European schools. The existing regulations provide that the candidate must be a graduate, while in the case of a European candidate he must possess at least the recognised school-leaving examination certificate of a secondary school for Europeans.

4. **Salaries of superintendents of Excise and Salt.**—The present scale of salaries of Superintendents of Excise and Salt is as follows :—

		Rs.
1st grade	... ...	700 a month.
2nd „	... ...	600 „
3rd „ (time scale of pay) Rs. 250—15—400—25—500		„

The first two grades are selection grades, promotion to which does not follow as a matter of course but is dependent on merit, ability and activity and the Public Services Commission are in favour of retaining these two grades. For the time scale of pay the Commission would, however, substitute the scale of Rs. 250—$\frac{40}{3}$—450—$\frac{50}{3}$—500 a month, which they have recommended for Indian graduates or members of the domiciled community for other departments.

5. The other matters dealt with in the Commission's report affecting the Excise and Salt services are mainly of departmental interest only. As the Government of India desire to be furnished with the views of the Local Government at as early a date as possible, it is requested that any criticisms or remarks which any person or public bodies interested may desire to offer, may be forwarded to the Secretary to the Government of Bengal in the Finance and Commerce Department not later than the 21st March 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

J. DONALD,

Secy. to the Govt. of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF DISTRICT BOARDS IN BENGAL DURING 1917-18.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Local Self-Government.

CALCUTTA, THE 17TH FEBRUARY 1919.

RESOLUTION No. 506L.S.-G.

READ—

The Reports from the Commissioners of Divisions on the working of District Boards in Bengal during the year 1917-18.

District Boards.—During the year under review five District Boards, or one-fifth of the total number, were given the privilege of electing a Chairman from among the non-official members. The districts in question were Burdwan, the 24-Parganas, Jessore, Bakarganj and Murshidabad. The Murshidabad Board elected the non-official Chairman appointed by Government in the previous year, who consequently held office throughout the year. In the other four District Boards the Chairmen were elected two and three months respectively before the year came to a close.

Enquiry made after the close of the year showed that the amount of touring in the interior done by some of the non-official Chairmen was small. The Chairman of the Murshidabad District Board spent only nine days on tour during the year, while the Chairmen of the Boards of the 24-Parganas and Jessore toured only six and five days, respectively, in the six months ending in June 1918. It was therefore necessary to remind them that widely extended travelling is essential if the work of the Boards is to be satisfactorily carried out.

2. **Local Boards.**—The elective system was introduced in the Local Boards of the Noakhali district. General elections were held in six districts: they failed in 13 thanas owing to the non-attendance of the prescribed number (10 per cent.) of registered voters. One Local Board election failed because the number of voters presenting themselves before the presiding officer was far in excess of the number whose votes it was humanly possible for him to record in one day, and he broke down under the strain. The result of this election has drawn attention to defects in the existing rules, under which the election has to be held at the headquarters of each thana under one presiding officer at one sitting. A revision of the rules has been undertaken so as to provide additional polling centres and polling officers and so obviate the possibility of such a failure.

3. **Union Committees—(a) Constitution.**—The number of Union Committees actually at work at the end of the year increased from 156 to 174 (86 in West Bengal and 88 in East Bengal) with a population of over one million and a half. In addition to these, 53 Union Committees, of which 47 were in Rangpur, were sanctioned but had not been constituted before the end of the year. The District Board of Murshidabad resolved to form 20 new Union Committees and a scheme was prepared for the establishment of Union Committees throughout the Sadar subdivision of Howrah as well as in the Uluberia subdivision. The elective system has gradually been extended and will be introduced in all the existing Union Committees on the expiry of the term of office of the present members.

4. **(b) Income.**—The total income of Union Committees (excluding opening balances) increased from Rs. 1,68,505 to Rs. 2,00,043, of which

Rs. 1,12,954 was contributed by District Boards. The number of Committees imposing Union rates rose from 67 to 86 and the amount realised from Rs. 39,801 to Rs. 52,093. In the Dacca district alone, where the Committees have considerable vitality and enterprise, 14 more Unions taxed themselves, and the receipts were doubled. In this district all but three raise some income by self-taxation and the Union rates now represent nearly a third of their income—facts which justify the claim of the Commissioner that people will not object to pay taxes when they can see the money spent on useful objects at their doors.

In Birbhum, again, Union rates are levied in all the Unions and account for two-thirds of their total receipts: one indeed (Paikar) obtained nearly its whole income in this way and was entirely independent of the assistance of the District Board. The Committees in Rangpur, though not imposing taxation under the Local Self-Government Act, succeeded in raising considerable local contributions to supplement the grants received from the District Board. On the other hand, there was a noticeable lack of initiative in this respect in the Bankura, Bogra, Tippera and the 24-Parganas, where none of the Committees impose Union rates.

5. (c) **Expenditure.**—Expenditure on roads amounted to Rs. 86,224, while sanitation and water-supply claimed about one-third of the total expenditure. Out of the total amount of Rs. 3,944 spent on education, seven Union Committees in Jessore spent Rs. 2,229, the balance being shared between a Committee in Birbhum, two in Murshidabad and 14 in Dacca. The Union Committees in the 24-Parganas and a few of those in Birbhum, Jessore and Dacca devoted part of their funds to dispensaries, while those in Birbhum, Hooghly, Murshidabad, Dacca, Noakhali, Rangpur and Bogra spent a considerable share of their income on water-supply.

6. (d) **Balances.**—Altogether 23 Union Committees disposed of the whole of their funds and 15 were left with balances of Rs. 9 or less. The Rampur Hât Union spent more than Rs. 7,000 out of its income of Rs. 8,668, Manikganj over Rs. 6,000, Bolpur over Rs. 4,000, eight unions over Rs. 3,000 each and six others over Rs. 2.000 each. The Rajbari Union spent Rs. 4,690 out of its income of Rs. 10,448, which included a grant of Rs. 2,000 from Government for water-works: a large part of the balance is presumably earmarked for expenditure on these works. The Unions of the 24-Parganas, whose incomes consist almost entirely of contributions from the District Board, spent nearly the whole of their receipts. On the other hand, the three unions established in Bankura with a paltry income of Rs. 349 closed the year with a balance of Rs. 138, those of Nadia and Bogra retained balances almost equal to their expenditure, while the balances of those in Midnapore and Hooghly amounted very nearly to half their expenditure. One in Rangpur, which received the large contribution of Rs. 2,240 from the District Board and raised Rs. 46 from other sources, spent only Rs. 853, one in Faridpur spent only Re. 1 out of its income of Rs. 316, and another in Bankura never utilised its grant of Rs. 100 made by the Board for fear that it should be required to supplement it by local contributions. It consequently opened and closed the year with a balance of Rs. 100.

7. (e) **General remarks.**—Although the increase in the number of Union Committees in the year under review has not been quite so rapid as in the previous year and the reports of the public spirit displayed by them are not always favourable, there is good reason for looking forward to steady progress and improvement in this branch of local self-government.

Reports from Birbhum and Hooghly testify to the continued good work done by the Union Committees of these districts. In Birbhum, where the receipts from taxation have risen from Rs. 450 to Rs. 15,000 in 5 years, six new unions being constituted in that period, their expanding resources have enabled the Committees to appoint a separate overseer for the supervision of works undertaken by them. The Chairman of the Birbhum District Board reports :—"The Union Committees in this district have displayed commendable readiness to tax themselves and much vitality and energy in carrying on works of sanitation, water-supply and improvement of communications. With their record of good work and their example in submitting cheerfully to self-taxation they will serve as good models for the Union Committees which will before

long spring up all over the district after the new Bengal Village Self-Government Bill passes into law."

In Dacca the Committees are showing commendable zeal and enthusiasm, and evidence is not wanting of their capacity to benefit by each other's experience. In this district it is the custom for the Chairmen and members to meet with the chaukidari panchayats at an annual Conference held at the Dacca Government farm, where questions of village administration are debated and the work carried on at the farm is studied with keen interest. The Conference during the year under review was attended by about 1,000 members of these village authorities, whose keenness was stimulated by the presence of His Excellency the Governor. The Governor in Council joins with the Commissioner in congratulating the Chairman of the District Board, Mr. S. G. Hart, I.C.S., on the able and sympathetic manner in which he has guided the development of village self-government in his district.

The other side of the picture is presented in the report of the Chairman of the Bankura District Board, who found the working of the Union Committees most disappointing. "Neither threat nor persuasion," he remarks, "has availed to arouse the slumbering instinct of self-help and patriotism." The non-official Chairman of the Burdwan District Board complains that the majority of the Union Committees want to have doles from the District Boards without exerting themselves. In other districts also the aversion to local taxation is noticeable. At the same time, Committees which have failed to introduce local taxation have not always been marked by lack of vitality or initiative: the people o Rangpur, though they do not assess themselves, raise considerable sums from voluntary contributions. Many Committees moreover are of recent creation, and it is hoped that, with greater experience and with an expansion of their work, the advantages of self-taxation will be more widely recognized. An encouraging instance of the readiness of villagers to manage and pay for village needs is furnished by the existence of 89 informal Committees in the Rangpur district, which spent Rs. 27,640 on roads, Rs. 7,854 on wells and Rs. 3,959 on other heads.

8. **District Board receipts.**—The total receipts from all sources (excluding opening balances) increased from Rs. 1,06,09,964 to Rs. 1,10,22,117 and the total disbursements decreased from Rs. 1,10,04,449 to Rs. 1,08,12,415. The fluctuations cannot be assigned to any general causes. The largest decreases were Rs. 1,13,000 under local rates, a result due mainly to bad collections, Rs. 33,000 under police, Rs. 52,000 under miscellaneous and Rs. 12,000 under railways. On the other hand, receipts from education rose from Rs. 10,68,263 to Rs. 12,53,689 owing to an increase in the educational grants made by Government; receipts from medical increased from Rs. 90,482 to Rs. 1,44,201 mainly on account of larger contributions from private sources; and receipts from civil works rose from Rs. 10,37,235 to Rs. 12,37,066 chiefly as a result of larger contributions from Government.

9. **Incidence of taxation.**—The incidence of taxation varied from 2 annas per head in the Dacca Division to 3¼ annas per head in the Burdwan Division, and averaged 2½ annas for the whole Presidency.

10. **District Board expenditure.**—In contrast with the previous three years when expenditure exceeded current income by 5½, 7½ and 2¼ lakhs, respectively, the expenditure in the year under review exceeded current income by less than Rs. 5,000. Many District Boards have incurred additional recurring expenditure which has absorbed the greater part of the enhanced income due to the transfer by Government of the receipts from the public works cess, and they have therefore little or nothing to spend on original works of any magnitude. In Bankura, for instance, a district with small resources, an inelastic income and growing needs, where the whole of the increased income is absorbed by recurring expenditure, the Board spent less on original works than before it received the public works cess receipts. Others, however, still have large surpluses, which were available for capital expenditure, but which remained unspent owing to the restrictions placed on the construction of new works by war conditions, and more particularly the prohibitive price of materials and the difficulty of obtaining them consequent on the dislocation of railway traffic. The year closed with an aggregate balance of 20 lakhs or approximately one-fifth of the total expenditure.

11. **Education.**—The expenditure on education amounted to approximately 25 lakhs, of which nearly half consisted of Government grants. The total number of upper and lower primary schools maintained and aided by District Boards rose from 34,020 to 35,278, of which 27,863 were boys' schools and 7,415 girls' schools: those actually maintained by the Boards numbered 2,842. Village opinion still seems to consider the education of girls a luxury rather than a necessity and the progress of female education is consequently slow, there being an addition of only 6,700 in the number of girls attending schools maintained and aided by the Boards. The education of small and backward communities received some attention. The District Boards of Birbhum and Midnapore helped in the education of the Santhals, while in Chittagong two special schools for the Arakanese Maghs were maintained at Cox's Bazar and Ramoo. In Birbhum a feature of the year's work was the starting of night schools, at which free education was given to the children of labourers, cultivators and artizans.

12. **Medical.**—There was an increase of nearly Rs. 80,000 in the provision of medical relief. In view of the inadequacy of medical relief available in rural areas Government urged the Boards to prepare programmes for the establishment of additional dispensaries, so that in course of time there might be a network of dispensaries in each district and every village might be within reach of one. Altogether 23 new dispensaries were established in the year under review, and the Governor in Council is pleased to observe that almost all the District Boards outside the Chittagong Division have adopted programmes of extension. Jessore, Howrah and Dacca have decided to introduce a system of endowed medical aid for rural areas, under which localities, where medical aid is not procurable and there is not sufficient local support to justify the establishment of a dispensary, are selected and medical men induced to settle and practise in them by the grant of a subsidy. Four such centres were selected in Howrah and ten in Jessore. The experiment was tried elsewhere some years ago but proved a failure; and it remains to be seen with what success it will now meet. The Rajshahi District Board appointed a supernumerary doctor specially to treat cases of malaria in primary schools in the vicinity of the town of Rampur-Boalia. The experiment having proved a success, steps are being taken to make similar arrangements for schools in other centres. The Governor in Council would draw the attention of other District Boards to this interesting development of practical school hygiene.

13. **Sanitation.**—There was an increased outlay of over Rs. 23,000 on sanitary measures, a large part of the expenditure being incurred, as in previous years, on village works carried out through the agency of Local Boards and Union Committees. The sanitary staff of some of the Boards was usefully employed in delivering lantern lectures in villages and instructing villagers in the main principles of hygiene and their application. It is interesting to note, as an instance of growing interest in questions of public health, that the non-official Chairman of the District Board of Jessore composed and distributed a leaflet on cholera and malaria, which was approved by the Sanitary Commissioner.

It has been felt for some time that without an adequate public health organization under each District Board, the problems of public health and the prevention of disease in rural areas cannot receive proper attention. The fact that none of the District Boards in the Chittagong Division has appointed a Sanitary Inspector, as required by the Local Self-Government Act, shows how little this important responsibility is realized by some Boards. Orders have recently issued requiring each District Board to appoint a properly qualified District Health Officer, and an officer of this class has already been appointed in Burdwan. The Chittagong District Board resolved during the year to appoint one, and the question of making a similar appointment has been taken up by the Midnapore District Board.

14. **Vaccination.**—The decision of the District Boards of Burdwan and Chittagong to introduce free vaccination throughout those districts—a measure which involves the entertainment of a considerable staff—is also an encouraging sign of growing interest in the campaign against disease. A system of free vaccination which was adopted in the Faridpur district as an experimental measure

was found to be unsatisfactory and was discontinued during the year. The results of an experiment in the Sadar subdivision of the Bakarganj district, however, proved satisfactory and the Board decided that the scheme should be extended to the three remaining subdivisions of the district. The Governor in Council agrees with the Commissioner that in view of the successful results attained in Bakarganj the causes of failure in Faridpur require investigation.

15. **Civil works.**—The prevalence of war conditions is mainly responsible for the decrease of Rs. 1,73,540 under this head, which includes water-supply and drainage. The outlay on original works on buildings fell by nearly half a lakh and that on communications by over three lakhs, but on the other hand, 1½ lakh more was spent on the improvement of the water-supply in rural areas. Work was especially hampered by the difficulties of railway transport, which often rendered it impossible to obtain either metal for the roads or coal for burning bricks. As was to be expected under these conditions, there were large lapses, amounting in Noakhali to nearly one-third of the total allotment for civil works. The District Boards of Burdwan, Hooghly and Nadia allowed over 20 per cent. of their allotments to lapse, and five other Boards, viz., Midnapore, 24-Parganas, Dacca, Bogra and Chittagong had lapses of over 10 per cent. Taking the figures for the Province, as a whole, the proportion of lapses rose from 9 to 11 per cent.

16. **Water-supply.**—Expenditure on the improvement of the sources of water-supply showed a satisfactory increase of 1½ lakh and accounted for nearly one quarter of the net public works cess receipts. The Governor in Council is pleased to observe that Midnapore, which was noticed last year as having spent only 2·2 per cent. of its public works cess receipts on water-supply, increased its outlay to 34·4 per cent. Nadia and Dacca spent over 43 per cent. of their receipts from the cess, while five other Boards spent over 30 per cent. On the other hand, expenditure by the District Board of Chittagong was only one-third of that of the previous year, and the explanation of the reduced expenditure given by the Chairman is not convincing. In Howrah there was a decrease, which was due to the fact that the Board had to give up its programme of excavating tanks in the open country so as to avoid risks of pollution. The result was that many of the tanks were not used except by a few persons living in the vicinity, and the Board realizing its mistake has had to adopt another scheme.

17. **Arboriculture.**—There was an increase of Rs. 3,442 in the expenditure under this head. Nearly half of the provincial expenditure was incurred in the Burdwan Division, where the District Boards pay more attention to the planting and maintenance of road-side trees than those elsewhere. The Asansol Local Board alone spent more than any other division in the Presidency. The District Boards of Jessore, Dacca and Bakarganj appear to have little interest in this matter, the first Board spending only Re. 1 and the latter two, nothing on their trees.

18. **Veterinary charges.**—Expenditure under this head, which includes charges on account of veterinary dispensaries, contributions towards the pay of veterinary assistants, and scholarships tenable at the Belgachia College, increased from Rs. 88,716 to Rs. 1,00,513. Jalpaiguri shows the largest expenditure, mainly owing to the construction of a veterinary hospital and dispensary, which is nearing completion. The veterinary assistants continued to do useful work on the outbreak of epidemics and their work appears to have met with growing appreciation. It is regrettable to observe that the posts of veterinary assistants at Nadia and Bakarganj could not be filled up for want of qualified candidates.

19. **Closing balances.**—Five years have now passed since the public works cess was made over by Government to the District Boards. At first the District Boards, for want of prepared programmes and schemes, were unable to spend the whole of the large sums placed at their disposal aggregating 29 lakhs: the receipts from this source have since risen to over 32 lakhs. Large balances accumulated which have been gradually reduced; but owing largely to the dislocation of railway goods traffic and the consequent difficulty of obtaining materials this process was suspended during the year under review and the actual balance remained practically the same. Some District

Boards, it is true, have cleared off the accumulations and in four districts viz., Dacca, Faridpur, Bakarganj and Rangpur, the balance is now below the minimum working balance necessary. Rangpur, with an ordinary expenditure of over five lakhs, closed the year with an actual balance of Rs. 5,110 against the prescribed minimum of Rs. 19,787. On the other hand, the District Boards of Burdwan, Noakhali and Tippera retained disproportionately large balances (Rs. 3,67,566, Rs. 1,15,000, and Rs. 1,55,864, respectively), approximating in the first two cases to half or more of the current expenditure and in the third case to over 15 times the minimum working balance. Other District Boards with a closing balance of over one lakh are Mymensingh, Midnapore and the 24-Parganas.

The suspension of works due to war conditions is the explanation generally given for the accumulation of balances, but in Midnapore, even after allowing for the lapse under civil works, the result is not satisfactory, and in Mymensingh the balance increased by nearly six thousand. The explanation is also inadequate in the case of Tippera, where the lapse under civil works represented only Rs. 19,000. For Burdwan a somewhat different explanation is given, viz., an underestimate of one lakh in the cess receipts, which depend on the profits and royalties from collieries and are therefore difficult to estimate properly, and the incompetence of the Assistant Engineer of the Asansol Local Board which resulted in a saving of 1½ lakh allotted for civil works. As a contrast to this, may be mentioned the Bakarganj District Board, which, with an ordinary expenditure of over Rs. six lakhs, had a balance of only Rs. 42,000 owing to the expeditious way in which the District Engineer and the District Board office checked and passed the bills for works.

20. The Governor in Council desires to express his appreciation of the good work done by the following gentlemen :—

VICE-CHAIRMEN OF DISTRICT BOARDS.

Burdwan Division.

Rai Banwari Lal Hati Bahadur, Burdwan.
Khan Bahadur Maulvi Muhammad Shamsuzzoha, Birbhum.
Rai Sahib Bama Charan Ray, Bankura.
Babu Atal Behari Sinha, Midnapore.
Rai Bijoy Narayan Kundu Bahadur, Hooghly.
Babu Ashutosh Bose, Howrah.

Presidency Division.

Rai Biswambhar Ray Bahadur, Nadia.
Babu Kulada Prosad Roy, Murshidabad.
,, Bijoy Krishna Mitra, Jessore.
Rai Amrita Lal Raha Bahadur, Khulna.

Dacca Division.

Babu Sarat Chandra Chakrabarti, Dacca.
Khan Bahadur Maulvi Muhammad Ismail, Mymensingh.
Maulvi Rahmat Jan Choudhuri, Faridpur.
Khan Bahadur Hemayetuddin Ahmed, Bakarganj.

Chittagong Division.

Rai Satis Chandra Sen Bahadur, Chittagong.
Maulvi Sayid Abdul Jabbar, Tippera.
Maulvi Abdur Rashid Khan, Noakhali.

Rajshahi Division.

Maulvi Emaduddin Ahmad, Rajshahi.
Babu Jogendra Chandra Chakrabarty, Dinajpur.
Rai Kali Pada Bannerji Bahadur, Jalpaiguri.
Rai Mrityunjoy Rai Chaudhury Bahadur, Rangpur.
Khan Bahadur Maulvi Wasimuddin Ahmad, Pabna.
Khan Sahib Maulvi Kader Baksh, Malda.

MEMBERS.

Burdwan Division.

Babu Tara Prasanna Mukharjee, Burdwan.
Rai Mati Lal Haldar Bahadur, Howrah.

Presidency Division.

Babu Baidya Nath Dutta, Nadia.

Dacca Division.

Babu Khetra Gopal Sarkar, Faridpur.

Chittagong Division.

Rai Upendra Lal Rai Bahadur, Chittagong.
Babu Durga Das Dutta, Chittagong.
Maulvi Muzafar Ahmed, Noakhali.
Khan Sahib Maulvi Bazlur Huq, Noakhali.
Babu Kali Kumar Ghose, Noakhali.

Rajshahi Division.

Babu Radha Raman Majumdar, Rangpur.
,, Durga Kanta Chakravarty, Pabna.
Maulvi Khaliluddin Talukdar, Pabna.
Mr. W. L. Travers, }
,, J. A. Polwhele, } Jalpaiguri.
,, R. McLean, }
,, W. J. Milne, }

By order of the Governor in Council.

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

FORM No. I (a).

Statement showing the constitution of District Boards in Bengal during the year 1917-18.

Serial No.	Name of District Board.	Act under which constituted.	Area in square miles.	Population within the area.	Particulars about Chairman. Elected non-official.	Elected official.	Nominated non-official.	Nominated official.	Number of Members. Ex-officio.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans.	Indians.	Total number of meetings held including those specified in columns 19 and 20.	Number of meetings out of the total in column 18 which proved abortive for want of a quorum.	Number of meetings out of the total in column 18 which were adjourned.	Average percentage of officials present at each meeting.	Average percentage of non-official present at each meeting.	Average percentage of all members present at each meeting.

(a) Balagarh Union Committee has been split up into two separate Union Committees, viz., Sripur-Balagarh and Somrah which however, did not come into actual working during the year.

DEPARTMENT OF AGRICULTURE, BENGAL.

Third and Final Report on the Winter Rice Crop of Bengal, 1918-19.

(Note.—On the average of the five years ending 1916-17, the area under winter rice crop in Bengal has represented some 19·8 per cent. of the total area under rice in British India.)

Character of the Season.—As explained in the Second Forecast of this crop the season opened in a promising fashion but, owing to the failure of the rains after September, finished badly. The period covered by this Forecast is that of the harvest, during which the weather conditions have been favourable for field operations.

Acreage.—The area figures are now returned at 15,895,800 acres as against 15,962,100 of the Second Forecast and 15,515,500 of the Final Forecast of last year. The decrease of 66,300 acres from the figures of the Second Forecast is due mainly to a reduction on the estimates from Malda district. The increase of area as compared with last year is, as was explained in the First Forecast, mainly due to large increases in the Rangpur and Dinajpur districts where transplanting difficulties, owing to favourable weather conditions, were met with in the previous season.

Outturn.—District figures of outturn have been in many cases considerably modified since the publication of the Second Forecast owing to results obtained by a large number of crop weighments. While the figures for some districts have been increased the balance is on the other side and a reduction of 5 per cent. has to be recorded, the Provincial average being now returned at 72 per cent. as against 77 per cent. in the Second Forecast and 100 per cent. in the Final Forecast of last year.

According to the latest returns in only one district, viz., Bakarganj, has a crop above the Provincial normal figure been returned. Crops over 80 per cent. are returned from six districts, twelve districts estimate crops between 60 and 80 per cent., and six between 50 and 59 per cent., while the figure for Bogra falls as low as 44 per cent. The estimate for the Chittagong Hill Tracts has been returned at 100 per cent. in spite of a not too favourable season as the average crop in that locality greatly exceeds the accepted Provincial normal.

Taking 12½ maunds as the normal yield of cleaned rice per acre, the gross outturn for the Province is estimated at 105,106,900 cwts. against 136,789,700 cwts. reported in the Final Forecast of last year, or a decrease of about 23 per cent.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 10th February 1919.

APPENDIX I.

Third and Final Report on the Winter Rice Crop of Bengal, 1918-19.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1917-18).	This year (1918-19).	Last year.	This year.		
	Acres.	Acres.	Acres.				
24-Parganas ...	899,700	880,400	893,200	117	83	November. Normal.	Since the submission of the second forecast, the weather was favourable in Sadar but unfavourable elsewhere. Damage by drought to the extent of 17 per cent. is reported from Basirhat. Some damage is also reported from Barasat subdivision. The outturn is below the normal owing to deficient rainfall.
Nadia ...	136,800	123,800	125,600	83	58	November and December. Normal.	The weather was not favourable. Some damage was done owing to want of rain. The outturn is much below the normal for want of rain.
Murshidabad ...	345,600	312,100	326,300	92	58	November. Normal.	The increase in area as compared with last year was due to early and favourable rainfall at sowing season and that with the second forecast was due to revision of figures for thana Jellunghi and for Jangipur and Lalbag subdivisions. The weather was not favourable. Want of rain affected the growth. Damage caused by flood at the beginning and by drought afterwards was about 42 per cent.
Jessore ...	568,100	463,000	462,500	96	67	November. Normal.	The weather was not favourable for want of rain and the growth of the crop not good. Damage to the extent of about 33 per cent. was done by drought.
Khulna ...	745,200	750,000	734,100	108	85	Beginning of December.	The decrease in area was due to heavy rainfall which retarded the transplantation. The weather was favourable in the Sadar and Satkhira subdivisions. A shower of rain was needed in October and early in November when the paddy was in ears. Hence the outturn was below the normal.
Burdwan ...	874,800	716,000	700,000	108	66*	......	The weather was favourable at sowing time, but thereafter heavy rainfall and drought at the end, when the crops were flowering, affected the growth as well as the outturn of the crop. The outturn is based on the figures reported from several subdivisions, but I do not think that the outturn of the district as a whole is less than two-thirds of a normal crop.
Birbhum ...	604,600	601,500	601,500	100	67	Beginning of December. Normal.	The weather was not favourable. About 33 per cent. of the crop was damaged by drought.
Bankura ...	510,600	520,000	520,000	117	62·5	Beginning of December; Normal in Bishnupur and somewhat early in the Sadar subdivision.	Since the submission of the second forecast the weather conditions were uniformly dry. The growth of the crops was retarded for want of rain which destroyed about half the crop. Hence the outturn is much below the normal.
Midnapore ...	1,579,400	1,637,000	1,648,000	110	60	Second week of November. Early.	The increase in area was due to corresponding decrease in jute cultivation. Want of rain affected the growth of the crop and resulted in the outturn falling below the normal.
Hooghly ...	276,700	198,000	196,800	100	73*	First week of December. Early.	The decrease in area was due to want of timely rainfall at sowing time. The weather was unfavourable and considerable damage was done by drought.
Howrah ...	125,900	119,300	114,400	87	79*	Middle of November. Normal.	The weather was not favourable and some damage was caused by drought.
Rajshahi ...	697,000	562,600	620,000	80	53	Second week of December. A little earlier than usual.	The weather was hotter and drier than usual and was unfavourable to the growth of the crop. Floods in August and drought in October and November damaged the transplanted paddy and caused the outturn to fall by about 47 per cent.
Dinajpur ...	1,[illegible]20,300	749,800	1,019,100	80	57·3	By the third week of November. Normal.	The weather was not favourable. The flood in August damaged the crop to a considerable extent and the failure of rain in October retarded the growth of the crop. Hence the large decrease in outturn this year.

* Estimated by the Director of Agriculture.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1917-18).	This year (1918-19).	Last year.	This year.		
	Acres.	Acres.	Acres.				
Jalpaiguri ...	551,300	484,000	497,400	100	85	Beginning of December. Normal.	The weather was not favourable. Some damage was done by drought.
Darjeeling ..	65,200	26,100	25,900	100	92	November. Normal.	The weather was not favourable. The outturn is below the normal owing to insufficient rainfall.
Rangpur ...	822,300	585,000	674,000	80	59	End of November. Normal.	The increase in area was due to low prices of jute which prevailed during last year. The weather was generally favourable at sowing time, but subsequently the crop suffered from flood in July and August and from drought since October. The percentage outturn has been revised on the basis of crop-cutting experiments.
Bogra	303,000	445,500	450,000	60	41	First week of December. Normal.	Owing to continued drought since the submission of the second forecast, the outturn has fallen below the estimate previously made.
Pabna	506,000	503,700	520,000	100	50	End of November. Normal.	The weather conditions at sowing time and afterwards were not favourable. About 12½ per cent. of the crop was destroyed by floods and 37½ per cent. by drought and insects.
Malda	326,200	320,000	220,000	110	60	Latter part of November. Normal.	The decrease in area as compared with the estimate in the second forecast and with the area of last year is due to the fact that in some parts of the district, many lands could not either be sown or transplanted on account of flood as elicited on a further careful enquiry into the matter. The former figures based on Police reports were found to be inaccurate. The weather was favourable till September, but since then there was very little rain and this has seriously interfered with the growth of the crop. In fact paddy was withered in places for want of rain. About 40 per cent. of the crop is estimated to have been damaged by drought.
Dacca ...	647,900	645,000	649,000	110	75	November. Normal.	The weather was favourable at the beginning, but want of sufficient rain stunted the growth of the transplanted crop. High floods and *ufra* disease and other insect pests caused slight damage to the broadcast crop. Hence the outturn is below the normal.
Mymensingh ...	1,126,700	969,700	969,700	100	75	Middle of November. Normal.	The weather was not favourable. Damage of about 30 per cent. was reported owing to flood in the beginning and to want of rain subsequently.
Faridpur ...	770,100	787,900	740,000	100	69	Middle of November. Normal.	The decrease in area is mainly due to increase in area under jute and sugarcane. Since the submission of the second forecast, the weather was sometimes cloudy and was not favourable. Damage done to the crop by heavy rain, high water and insects was about 31 per cent.
Bakarganj ...	1,200,000	1,267,000	1,340,000	105	120	November to December. Normal.	The increase in area over that of last year is due to reclamation of some lands in the Sunderban area. Untimely rainfall and cloudy weather in December affected the yield to a certain extent. The outturn was above the normal. The favourable condition of the crop was due to favourable weather at the time of transplanting and plentiful rain later up to the middle of October.
Chittagong ...	418,400	426,100	426,100	100	95	December. Normal.	Since the submission of the second forecast the weather was fair. Owing to insufficient moisture in some parts the outturn was below the normal.
Tippera ...	724,800	780,000	780,600	100	60	Middle of November. Normal.	The weather was not favourable. The outturn was much below the normal owing to damage caused by flood, insects and want of rain.
Noakhali ...	610,000	600,000	600,000	100	85	November. Normal.	The actual percentage outturn has been ascertained to be 85 from the result of a considerable number of crop weighments. About 15 per cent. of the crop was damaged by *ufra* in parts of the Sadar subdivision and by flood in parts of the Feni subdivision.
Chittagong Hill Tracts.	47,500	42,000	41,600	75	100*	First week of December. Normal.	The weather was not favourable. Some damage was done by flood.
Total Bengal ...	16,663,500	16,515,500	15,895,800	100	72		

* Estimated by the Director of Agriculture.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 13th February 1919.

Summary.—Light rain fell in a number of places. More rain is urgently wanted all over the province. *Rabi* sowings are practically over. Harvesting of oilseeds, pulses and potatoes continues. The outturn is reported to be fair. Preparation of lands for the next autumn crops is in progress. Drought is hampering the operations. Distress prevails in Bankura and in the Bramhanbaria subdivision of Tippera. Gratuitous relief and agriculturist loans are being distributed. Test works have also opened. The average price of rice for the province has fallen by about 0·3 per cent. as compared with the previous week.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

1	2	3	4	5	6
		Inches			
6	BURDWAN ...	Nil	7	6⅝	Weather warmer. The standing crops have been benefited by the recent rain. Sowing of *til* and pressing of sugarcane have begun in places. Ploughing of land, threshing of paddy and harvesting of *rabi* crops and potatoes continue. Condition of sugarcane is poor. Export of rice is depleting the stock and keeping the prices high. Cattle-disease is reported from Salanpur.
	Asansol ...	Nil	6¾	6¾	
	Katwa ...	Nil	8	7¼	
	Kalna ...	Nil	6⅝	(*n*)	
7	BIRBHUM ...	Nil	7	7	The threshing of winter paddy has begun. The standing crops are doing well. Fodder and water are sufficient.
	Rampurhat	Nil	6	7	
8	BANKURA ...	Nil	7	7	The prospects of *rabi* crops are good. Sugarcane cutting has been resumed. The price of fodder continues dear although the supply is sufficient for the present. Stock of rice is sufficient. No abnormal export or import. Water is inadequate in places. Temporary wells are being sunk by the District Board. Distress prevails in some unions. Officers have been deputed into the interior to organize relief and distribute land improvement and agriculturist loans. Gratuitous relief has been given to 462 persons. The District Board has opened test works in Taldangra, Indpur and Chatna thanas. Five hundred and eighty-eight males, 261 females and 86 children are at work. Cattle-disease is reported from Saltora thana. Emigration of labourers continues.
	Vishnupur ...	Nil	7½	7½	
9	MIDNAPORE	0·40	7⅜	7½	Fodder supply is sufficient. Pressing of sugarcane and sowing of *til* are going on. Prospects of rape and mustard and tobacco are not good.
	Ghatal ...	0·27	7¼	7¼	
	Tamluk ...	Nil	7⅛	7⅛	
	Contai ...	1·24	9	9½	
10	HOOGHLY ...	Nil	6½	7	Effects of weather on the growth of the crops are good. Fodder is sufficient. Recent flood in Damodar has slightly damaged tobacco and vegetable crops in Arambagh.
	Serampore ...	0·05	6¼	6	
	Arambagh ...	Nil	7½	7½	
11	HOWRAH ...	0·06	6¼	6¼	Weather seasonable. Threshing of *aman* paddy and harvesting of sugarcane continue. Condition of *rabi* crops is fair. Fodder is sufficient.
	Ulubaria ...	0·19	6½	6½	
12	RAJSHAHI (RAMPUR-BOALIA).	Nil	7½	7	Prospects of standing crops are fair. Cultivation for jute and *aus* paddy continues Fodder is sufficient.
	Naogaon ...	Nil	7½	7½	
	Nator ...	Nil	7½	7½	

(*n*) Not reported.

13	DINAJPUR ...	Nil	7½	7 13/16	Condition of standing crops is fair. Harvesting of sugarcane and mustard continues. Scarcity of fodder is reported from Rashmond police-station.
	Thakurgaon	Nil	8	9	
	Balurghat ...	(n)	(n)	8 5/16	
14	JALPAIGURI	Nil	7	7	Prospects of standing crops are fair. Lands are being prepared for the cultivation of jute and paddy. Fodder is sufficient.
	Alipur ...	Nil	8	8	
15	DARJEELING	0·08	7	7	Wheat is about to ripen; condition is favourable. Potatoes are being sown. Fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	Nil	7	7	
	Siliguri ...	Nil	7	7½	
	Kalimpong...	Nil	7	7	
16	RANGPUR ...	Nil	8	8	Weather seasonable. Harvesting of mustard is finished and that of potatoes are going on. Standing crops are doing well. Lands are under preparation for jute and *aus* rice. Fodder and water are sufficient.
	Nilphamari	(n)	(n)	8	
	Kurigram ...	Nil	8¼	8¾	
	Gaibandha ...	Nil	7	8	
17	BOGRA ...	Nil	7¾	7¾	Ploughing for jute and *aus* paddy continues. Fodder is sufficient except in the flooded area.
18	PABNA ...	Nil	7½	7½	Standing *rabi* crops have been benefited to some extent by the recent rain. More rain is, however, wanted. Fodder is sufficient.
	Sirajganj ...	Nil	7	7	
19	MALDA ...	Nil	7	7	Weather seasonable. Prospects of standing crops are not very promising. Ploughing of fields for jute and *aus* paddy continues. Stocks of fodder are sufficient at present though want of green grass is felt in places. Export of paddy and rice is brisk.
20	COOCH BEHAR	Nil	8⅜	9⅝	Sowing of *cheena* and *kaon* commenced. Standing crops are doing well. Fodder is sufficient.
21	DACCA ...	0·00	7 3/[illegible]	7½	Weather getting warmer. Want of rain is hindering the agricultural operations. Harvesting of rape and mustard continues. Prospects of *rabi* crops are fair. Cattle-disease is reported from Munshiganj subdivision. Fodder and water are sufficient.
	Manikganj ...	Nil	7¾	7¾	
	Narayanganj	0·00	7 9/16	7	
	Munshiganj*	Nil	7¼	7¼	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

(n) Not reported.

RESOLUTION ON THE REPORT OF THE PUBLIC SERVICES COMMISSION.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Miscellaneous.

CALCUTTA, THE 24TH FEBRUARY 1919.

RESOLUTION—No. 1857.

READ—

The Report of the Royal Commission on the Public Services in India.

Report on Indian Constitutional Reforms.

THE Governor in Council has had under consideration the recommendations of the Public Services Commission made in annexure VIII concerning

the Forest Department, and this Resolution is published in order to give the public interested an opportunity of expressing their views on the more important questions involved.

2. The three main problems which require consideration are the following :—

(1) The percentage of recruitment of Indians for the Imperial Forest Service,

(2) The methods of training of Indians and Europeans for that service, and

(3) The pay of that service.

These problems are dealt with briefly below.

3. The Forest Service is divided into two branches, the Imperial and the Provincial Service. It was proposed by the Commission that all the posts of major charges at present held by Provincial officers should be transferred to the Imperial Service; but that ultimately, after the interests of the present members of the Provincial Service have been satisfied, the number of such posts, which for present convenience can be called "listed posts," should be reduced by one-half. At the same time it was proposed that not less than one-half of the direct recruitment for the Imperial Service should be made in India. The effect of this proposal is that out of a total number of 270 posts, 28 would ultimately, though not immediately, be listed posts and for the remaining 242 posts at least one-half would be recruited from Indians every year.

4. The Commissioners were not, however, unanimous in their recommendations. It was pointed out that the Forest Service was not popular with Indians, that it was premature to recruit Indians at such a pace until a higher grade Forest School in India had been established and its efficacy proved, and that the interests involved were too immense to warrant far-reaching experiments without a cautious trial. It has accordingly been suggested that a more cautious rate of recruitment should be adopted and that the initial recruitment of Indians should be fixed at 25 per cent. of the direct requirements with an annual increase of 1½ per cent. until the subject is re-examined. The result of the adoption of such standards, provided the present number of listed posts remained the same, would be that 33 per cent. of the Imperial Service would be filled by Indians at the end of ten years. This it has been suggested is a sufficiently rapid advance.

A further suggestion has also been made that, in view of the two sources of recruitment of Indians for the Imperial Service (*a*) through the listed posts and (*b*) by direct recruitment, it is at present impracticable to lay down what should be on the one hand the total number of listed posts, and what on the other the percentage of direct recruitment of Indians. Fully qualified Indians may not be forthcoming by direct recruitment even to make up for a reduction in the number of listed posts. Therefore, whilst it may not be wise to look forward to more than 33 per cent. of the service being filled by Indians from both services in ten years, it may not be possible, until experience shows to what extent Indians will come forward to undergo in India the higher course of instruction to fit them for the Imperial Service, to lay down what part of that 33 per cent. should be filled by Indians directly recruited on the one hand or promoted from the Provincial Service on the other. In other words, until experience has been gained in untried methods of recruitment, it may not be wise to adopt too rigid rules at the outset in the Forest Department.

5. As to the methods of recruitment of Indians and Europeans for the Imperial Service, the Public Services Commission have recommended that, in cases where it is necessary to resort to recruitment in Europe, the

Secretary of State should continue to select recruits in England between the ages of 19 and 22 from Science graduates of the Universities of the United Kingdom and to train them in Europe, with some modifications, as at present. Later, ready-trained foresters might be available as the present schools of Great Britain develop. For recruitment in India they recommended the selection of the best candidates possessing the degree of Bachelor of Science, who had completed an advanced course of training at Dehra Dun.

6. An alternative suggestion is that recruitment should be made both in England and in India at the school-leaving age by competitive examination and that both sets of recruits should be trained together at the proposed higher grade Dehra Dun College for about 2½ years; they could then visit England and the continent of Europe, partly on a tour to selected continental forests.

In support of the latter alternative it is urged—

(1) that, if Indians are to be given the same chances as Europeans and if the two classes are subsequently to work together harmoniously in one service, they should be trained together under identical conditions;

(2) the cost of opening a higher grade school at Dehra Dun would be unjustifiably high, unless Provincial and Imperial recruits are trained together, which for reasons of discipline and the different class of training required appears undesirable ; and

(3) whilst it is considered impracticable to arrange for the joint training in England under present conditions, it should be possible to make the necessary arrangements at Dehra Dun for such a higher grade school.

The objections to training Europeans at the school are—

(1) that such a higher grade college cannot possibly be developed sufficiently quickly up to the highest European standard, and therefore that until the school has proved its efficacy no experiment should be made in the training of Europeans at it when sounder methods of training are available ;

(2) that it jettisons a method of selection of Europeans, which is securing a good type of officer, and the best training available in the forest schools of Great Britain ; and

(3) that in view of the strides taken in afforestation in Europe and in particular owing to the deforestation caused by the war, the demand for foresters in Europe will become greater and the forest schools in Britain in consequence so more efficient that there should be no difficulty in obtaining the ready-trained foresters contemplated by the Public Services Commission.

On the other hand the establishment of a higher grade school for the training of Indians appears to be in every way desirable and it is questionable whether any considerations of expense should stand in its way.

7. The Public Services Commission propose to retain the salaries of Imperial officers on the present scale of Rs. 380-40-700-50-1,250, but to increase the pay of Conservators to Rs. 1,500-100-2,000. It has however been represented by these officers that as compared with other services containing officers of the same class and education they are underpaid and that their life is harder and more unhealthy than that of other officers. This claim can be supported by a reference to the Reforms Report, in paragraph 318 of which His Excellency the Viceroy and the Secretary of State have recognised the need for improving the conditions of

the European services generally, if they are to attract the type of men required. It has accordingly been suggested that Forest officers below the rank of Conservator and who have an overseas domicile should be given an adequate "overseas allowance" in addition to the pay fixed for Indian recruits Rs. 300—$\frac{50}{2}$—500—50—1,050 a month, and that a further increase should be made in the pay of Conservators.

8. His Excellency in Council does not propose to deal specifically with the other matters dealt with in the Commission's Report, so far as the Forest services are concerned. It is requested that any remarks or criticisms, which any person or body of persons interested may desire to offer, may be forwarded to the Revenue Secretary to the Government of Bengal, not later than the 15th March 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information and a copy sent to the leading associations in Bengal.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 4808.R.

Dated Calcutta, the 24th February 1919.

THE following report on the state of the salt market for the third quarter of the yea 1918-19, comprising the months of October, November and December 1918, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 1,723,634 maunds (including 1,251,101 maunds issued under thè credit system), as compared with 3,047,605 maunds (including 2,388,658 maunds issued under the credit system) in the previous quarter and 1,689,788 maunds (including 1,347,076 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 15,67,559 (including Rs. 9,84,751 adjusted under the credit system), as against Rs. 31,87,150 (including Rs. 23,82,659 adjusted under the credit system) in the previous quarter, and Rs. 21,85,729 (including Rs. 17,90,621 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

TABLE I.

Total ...	1,862,157	2,764,487	2,274,612	1,511,331	1,492,840	1,420,427*

* Inclusive of 1,251,101 maunds of salt issued under the credit system. Besides this quantity 3,069 maunds of salt were issued under the credit system to inland bonded warehouses.

Compared with the corresponding quarter of the previous year and the same quarter of 1916-17, importations were less by 34·3 and 19·8 per cent., respectively, and clearances were less by 6·0 and 48·6 per cent., respectively. As compared with the corresponding period of the previous year, the decreased imports from the United Kingdom, Spain. Aden and Massowah and the increased imports from Port Said are noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

TABLE II.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published when they are available as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 306 maunds, as against *nil* in the previous quarter, and 475 maunds in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to *nil* as compared with 138 maunds in the previous quarter and 263 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the Port of Calcutta, according to the published market reports, amounted to *nil*.

9. Table III shows the average wholesale prices* per 100 maunds of salt at the Port of Calcutta during each fortnight of the quarter :—

11. Under Government Notification No. 478Com., dated the 27th January 1919, the Local Government, in exercise of the power conferred by sub-rule 2 (*b*) of rule 11-J, of the Defence of India (Consolidation) Rules, 1915, has fixed the following maximum wholesale prices per 100 maunds for the sale of imported salt at the ports of Calcutta and Chittagong :—

	Ex golas. Sulkea.	Ex golas. Chittagong.
	Rs.	Rs.
Liverpool	188	198
Spanish	183	193
Port Said	180	190
Mussawah	180	190
Aden, Fine	180	190
Indo-Aden	179	189

The maximum retail price for the sale of imported salt has been fixed at one anna and six pies per seer in all places in the Presidency and Burdwan Divisions, and one anna and nine pies per seer in all places in the Dacca, Chittagong and Rajshahi Divisions, except the Chittagong Hill Tracts in the Chittagong Division where the maximum retail price has been fixed at two annas per seer, and the Sadar, Kalimpong and Kurseong subdivisions of the district of Darjeeling where the maximum retail price has been fixed at two annas and three pies per seer.

12. Table V below shows the quantities of sea-imported salt admitted into bond and cleared from bond and shipboard at the Port of Chittagong and at the several inland warehousing stations :—

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were less by 46·1 and more by 69·9 per cent., respectively.

By order of the Governor in Council,

J. DONALD,

Secretary to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JANUARY 1919.

I. **Character of the Season.**—Light to moderate rain fell during the last two weeks of the month. The fall was above the normal everywhere excepting in Khulna, Jalpaiguri, Bakarganj, Chittagong, Tippera and Noakhali. The usual rainfall statement is appended.

II. **Progress of Agricultural Operations.**—Reaping of winter paddy was completed. Threshing also was well advanced. Preparatory tillage for the next autumn crops commenced. Rainfall during the last two weeks favoured the operations. Transplanting of summer paddy, cutting and pressing of sugarcane and harvesting of potatoes, pulses and early oilseeds were also progressing.

III. **State of Standing Crops.**—Owing to the rainfall the standing spring crops somewhat recovered from the effects of continued drought.

IV. **Prospects and probable outturn.**—The prospects of the spring crops are reported as on the whole fair.

V. **Damage to Standing Crops.**—No further report of damage to the standing crops was received during the month from any district.

VI. **Condition of Agricultural Stock.**—Condition of the live-stock was fair. Cattle-disease was found to be prevalent in parts of the districts of Jessore, Burdwan, Bankura, Midnapore, Darjeeling, Malda, Dacca and Noakhali.

VII. **Failure of Pasturage and Fodder.**—The fodder supply continued deficient in Bankura, Dinajpur, Bogra and in Brahmanbaria subdivision of Tippera.

VIII. **Prices of Food Grains.**—During the second fortnight of the month under review the price of rice rose in fourteen districts, fell in four and remained stationary in the rest, prices varying from 6 seers and 8 chitaks at Birbhum to 9 seers 8 chitaks at Rangpur.

IX.—**Condition of Agricultural People.**—The general condition of the agricultural population continued fair. Distress was, however, apprehended in Bankura owing to partial failure of winter paddy. Preliminary measures of relief were arranged for.

N. GUPTA,

for *Director of Agriculture, Bengal.*

DACCA, *the 23rd February 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 20th February 1919.

Summary.—During the week rainfall was general all over the western districts, but elsewhere the fall was light. The recent rain has improved the prospects of standing crops, especially in the western districts, and has facilitated preparatory tillage for autumn crops. Sowing of jute, autumn paddy and millet has commenced in some districts of Eastern Bengal. Harvesting of oilseeds, potatoes and other spring crops continues. The average price of common rice for the province has risen by 1·63 per cent. as compared with that of the previous week. Distress continues to prevail in Bankura and in the Brahmanbaria subdivision of Tippera where 1,549 and 238 persons, respectively, resorted to test-works. Agricultural loans are also being distributed. Gratuitous relief is being given to 1,021 persons in Bankura only.

LIBERALITY OF BABUS HARI KISSEN RATHI AND NARMAL BAJORIA.

No. 618M., dated Calcutta, the 26th February 1919.

From—The Hon'ble MR. L. S. S. O'MALLEY, C.I.E., I.C.S., Secretary to the Government of Bengal, Municipal Department,

To—The Commissioner of the Burdwan Division.

WITH reference to your letter No. 57T—J.E., dated the 22nd January 1919, reporting that Babu Hari Kissen Rathi and Babu Narmal Bajoria of the town of Bankura have jointly contributed Rs. 17,000 towards the construction of a Dharamsala in that town, I am directed to request that you will be so good as to convey to the donors the thanks of Government for their liberality and public spirit.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Wheat Crop of Bengal,* 1918-19.

(Note.—On an average of the five years ending 1916-17, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on, has in the five years ending 1916-17, averaged (a) 41·1 and (b) 16·7 per cent., respectively.)

Character of the season.—The weather conditions have been unfavourable for this crop owing to the prolonged drought which prevailed from the end of September till the middle of January. The rainfall in January, however, has improved the situation to some extent but has come too late to ensure a normal crop.

Area sown.—The total area under wheat, according to the estimates of District Officers, amounts to 110,600 acres, against 124,200 acres and 124,000 acres shown in the second and final forecasts, respectively, of last year.

Outturn.—According to the estimates of District Officers the Provincial outturn works out at 52 per cent. of the normal, against 70 per cent. reported in the corresponding forecast and 69 per cent. in the final forecast of last year. As stated above, the low outturn is due to lack of soil moisture at sowing time and subsequent drought.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 27th February 1919.

APPENDIX I.

Second Forecast of the Wheat Crop of Bengal, 1918-19.

District.	Approximate normal area under the wheat crop in acres.	Approximate area under wheat last year (1917-18).	Estimated area under wheat this year (1918-19).	Taking 100 to represent the normal, what would be the average outturn per acre cropped. Last year.	This year.	Date by which the sowing generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
	Acres.	Acres.	Acres.				
Nadia ...	23,100	18,800	9,400	67	25	Last part of October to end of November, Generally late.	The decrease in area as compared with the area of last year was due to want of rain at sowing time. The weather has not been favourable. Considerable damage has been caused by drought especially in Ranaghat subdivision and Nakashipara thana. The outturn is likely to be much below the normal.
Murshidabad ...	69,800	31,200	23,600	67	42	October to November. Late in Jangipur and Kandi.	The decrease in area compared with last year is due to unfavourable weather conditions. About half the crop has been damaged by continued drought, but the recent rain has improved the prospects. The outturn is anticipated to be 42 per cent.
Jessore ...	2,300	1,100*	1,100*	75	58	October. Normal	The weather has not been favourable. About 42 per cent. of the crop has been damaged by continued drought.
Burdwan ...	2,000	2,000*	2,000*	83	58	End of October to end of November.	The weather was unfavourable up to middle of January owing to drought. The recent rain has done some good to the crop and has improved the condition of the crop.
Birbhum ...	5,000	4,100	4,100	83	67	November. Normal.	The weather conditions have not been favourable owing to continued drought since sowing time. About 33 per cent. of the crop has been damaged by drought. But since the rainfall in January, the prospects have improved.
Bankura ...	3,600	3,600*	3,600*	83	75	Last week of November. Normal.	Owing to prolonged drought, the crop suffered till January. Since then the prospects have improved owing to rainfall.
Midnapore ...	1,200	1,200*	1,200*	100	70	November. Normal.	The crop has suffered much for want of rain, but the recent rains, however, have proved beneficial. The outturn is expected to be much below the normal for want of timely rain.
Hooghly ...	2,400	1,700*	1,700*	50	50	November. Late	The weather has not been favourable for want of timely rain. About half the crop has been damaged by drought.
Rajshahi ...	8,500	7,800*	6,500	70	60	End of November. Normal.	The decrease in area was due to want of rain at sowing time which injuriously affected the crop. The outturn is also therefore anticipated to be much below the normal.
Dinajpur ...	1,000	1,400*	1,300	52	41·4	By the end of October. Normal.	The weather has not been favourable owing to want of rain since sowing time, but the recent rain has improved the prospects to some extent. The outturn is therefore expected to be much below the normal.
Jalpaiguri ...	800	500	500	75	85	By the end of November. Normal.	The weather has not been favourable. Owing to continued drought the crops in many places are in poor condition, but the rainfall at the end of January has improved the prospects.
Darjeeling ...	4,500	2,500	2,500	100	100	Last week of September.	The weather has been favourable and a normal outturn is anticipated.
Rangpur ...	3,000	3,100*	3,400*	100	80	November. Normal.	The weather has been fair. The outturn is expected to fall below the normal owing to want of rain in September and October.
Pabna ...	16,000	12,000	12,000	70	50	Middle of November. Normal.	The weather was favourable for cultivation but defective rainfall since October retarded the growth of the crop. About half the crop has been damaged by drought. Since the submission of the first forecast the weather has been favourable.
Malda ...	60,000	35,000	35,000	60	50	End of October. Normal.	The prolonged drought up to the middle of January had a very injurious effect on the crop and considerable damage in the shape of poor yield is likely to be caused. The falling off in outturn below the normal is due to stunted growth brought on by drought and unfavourable weather. There has been a slight rain since the submission of the first forecast which has improved the condition of the crop to some extent.
Faridpur ...	2,700	2,700*	2,700*	82	89	Beginning of November. Normal.	The weather has not been favourable. The outturn is expected to fall below the normal owing to want of rain
Total ...	205,400	124,000	110,600	6	52		

* Conventional area.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Spring Oilseed crops of Bengal, 1918-19.

(Note.—On an average of the five years ending 1916-17 the area under linseed in Bengal has represented some 5·8 per cent, and that under rape and mustard 20·5 per cent, of the total area under these crops in British India.)

Area sown.—Oilseeds are grown chiefly in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions, the area is small. The estimated area under these crops (excepting sesamum for which separate forecasts are issued) for this year amounts to 1,301,100 acres, against 1,328,300 acres and 1,333,500 acres reported, respectively, in the corresponding and final forecasts of last year.

Character of the season.—As reported in the First Forecast, although the weather was favourable for preparatory tillage, there was a general deficiency of soil moisture at sowing time. The continued absence of rain in the months October-December has thus been badly felt in most districts. The January rainfall, although beneficial, has come too late to ensure a normal outturn, the deficiency all over being roughly about one-third.

Outturn.—According to the estimates of District Officers the Provincial outturn of the different oilseed crops works out at 66 per cent. of the normal, against 82 per cent. in the corresponding forecast of last year.

S. MILLIGAN,
Director of Agriculture, Bengal.

DACCA,
The 27th February 1919.

APPENDIX I.

Second Forecast of the Spring Oilseed Crops of Bengal, 1918-19.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1917-18).	This year (1918-19).	Last year.	This year.		
		Acres.	Acres.	Acres.				
24-Parganas ...	Linseed	1,600	600*	600*	100	83		
	Rape and mustard	1,500	800*	800*	108	75	December to February. Normal.	The weather has not been favourable for want of timely rain which has caused some damage and the outturn is therefore anticipated to be below the normal.
	Other oilseeds (excepting *til*).	300	300	300	88	83		
	Total ...	3,400	1,700	1,700	101	79		
Nadia ...	Linseed	55,700	34,700	32,200	50	33		The decrease in area as compared with last year was due to drought at the time of sowing and the increase as compared with the first forecast is due to revision.
	Rape and mustard	23,500	14,600	14,400	42	33	January to February.	The weather has not been favourable Damage has been caused by drought which has reduced the outturn considerably.
	Other oilseeds (excepting *til*).	18,900	3,500	3,300	50	33		
	Total ...	98,100	52,800	49,900	48	33		
Murshidabad	Linseed	20,800	14,700	13,000	67	50	Harvesting not yet commenced except mustard in Lalbag at the end of January.	The decrease in area under linseed and other oilseeds as compared with the first forecast is due to revision of figures.
	Ripe and mustard	18,900	13,200	12,300	75	50		The weather has not been favourable owing to continued drought, which has caused damage to the crops by about 49 per cent.
	Other oilseeds (excepting *til*).	8,700	3,500	3,100	75	58		
	Total ...	48,400	31,400	28,400	71	51		
Jessore ...	Linseed	24,000	9,600	9,400	75	75		
	Rape and mustard	49,600	19,600	18,000	58	67	January. Normal	The weather has not been favourable. The outturn has fallen below the normal owing to damage caused by drought. This year's area under different crops has been revised after careful checking.
	Other oilseeds (excepting *til*).	3,300	1,600	1,900	50	50		
	Total ...	76,900	30,800	29,300	63	68		
Khulna ...	Linseed	900	200	100	93	81	End of January. Normal.	The weather has not been favourable. The outturn is expected to fall below the normal for want of timely rain.
	Rape and mustard	29,700	19,500	18,700	100	92	End of December. Normal.	
	Other oilseeds (excepting *til*).	100	500	500	100	100	Not yet commenced.	
	Total ...	30,700	20,200	19,300	100	92		
Burdwan ...	Linseed	23,500	11,200	7,700	83	67	Not yet begun ...	The decrease in area as compared with last year is due to drought. The weather has not been favourable. The drought has affected the growth of the crops and has caused some damage. The outturn is likely to be much below the normal.
	Rape and mustard	21,100	14,700	8,100	75	58	End of January.	
	Other oilseeds (excepting *til*).	1,500	800	100	75	42	Not yet commenced.	
	Total ...	46,100	26,700	15,900	78	62		
Birbhum ...	Linseed	800	800*	800*	83	58		
	Rap and mustard	2,000	2,000*	2,000*	83	58	Not yet commenced.	The weather was not very favourable owing to want of rain from the sowing time up to middle of January. The damage done by drought has been considerable.
	Other oilseeds (excepting *til*).	200	200	200	83	50		
	Total ...	3,000	3,000	3,000	83	57		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1917-18).	This year (1918-19).	Taking 100 to represent the normal, what would be the average outturn per acre cropped. Last year.	This year.	Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Acres.	Acres.	Acres.				
Bankura ...	Linseed	1,000	1,000*	1,000*	100	88	Not yet commenced.	Recent rains have done much good to the crop. The outturn is anticipated to be 88 per cent. as the crops suffered from want of sufficient moisture at the beginning.
	Rape and mustard	7,000	4,100	3,700	100	88		
	Other oilseeds (excepting *til*).	8,000	4,500	3,600	100	88		
	Total ...	16,000	9,600	8,300	100	88		
Midnapore ...	Linseed	15,000	11,500	11,500	90	60	January ...	The weather has not been favourable. Want of rain has caused damage to the crops to the extent of about 43 per cent.
	Rape and mustard	31,000	11,500	11,000	90	50		
	Other oilseeds (excepting *til*).	14,500	13,100	14,000	90	60		
	Total ...	60,500	36,100	36,500	90	57		
Hooghly ...	Linseed	800	700*	700*	50	54	......	The decrease in area as compared with that of last year is due to want of rain at proper time. The outturn has fallen considerably below the normal due to drought.
	Rape and mustard	7,900	4,000	3,800	53	55		
	Other oilseeds (excepting *til*).	2,700	700	700	50	54		
	Total ...	11,400	5,400	5,200	52	55		
Howrah ...	Linseed	2,000	400	200	71	51	Middle of February. Normal.	The decrease in area as compared with last year was due to deficient rain at sowing time. The weather has not been favourable. Owing to drought the outturn has fallen much below the normal.
	Rape and mustard	1,100	800	400	65	55		
	Other oilseeds (excepting *til*).	100	100	100	67	50		
	Total ...	3,200	1,300	700	67	53		
Rajshahi ..	Linseed	28,000	5,400	14,300	60	50	Not yet commenced.	The weather is now favourable owing to recent rain. Some damage has been done by drought.
	Rape and mustard	74,000	44,200	57,800	67	50	Latter part of January. Normal.	The outturn is likely to fall much below the normal owing to unfavourable weather conditions prevailing at sowing time and thereafter.
	Other oilseeds (excepting *til*).	400	1,700	2,000	55	38		
	Total ...	102,400	51,300	74,100	66	50		
Dinajpur ...	Linseed	(40)	(40)*	(40)*	70	70	Third week of January; a little late.	The decrease in area this year was due to unfavourable weather condition at sowing time. Since the submission of the first forecast, the weather has not been very favourable. Hence the outturn is much below the normal.
	Rape and mustard	70,000	65,800	50,500	75	54		
	Other oilseeds (excepting *til*).	...	100	100	60	60		
	Total ...	70,000	65,900	50,600	75	54		
Jalpaiguri ...	Rape and mustard	53,600	51,900	51,400	95	92	Latter part of January and first week of February. Normal.	The weather has not been favourable owing to drought which has caused some damage. The outturn is therefore anticipated to be below the normal.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	53,800	52,100	51,600	95	92		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1917-18).	This year (1918-19).	Last year.	This year.		
		Acres.	Acres.	Acres.				
Darjeeling ...	Rape and mustard	7,000	3,300	2,800	92	100	Second week of January	The weather has been favourable. A normal outturn is anticipated.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	7,200	3,500	3,000	92	100		
Rangpur ...	Rape and mustard	160,000	140,000	118,000	100	80	......	The decrease in area as compared with last year was due to unfavourable weather at sowing time. The weather has not been favourable owing to drought which has hampered the growth of the crops and has caused slight damage. The outturn is expected to fall below the normal.
	Other oilseeds (excepting *til*).	1,100	200	200	100	100		
	Total ...	161,100	140,200	118,200	100	80		
Bogra ...	Linseed	1,000	1,500	1,600	50	68	Middle of March	The low outturn is due to the continued drought. The recent rains have benefited linseed, but had no appreciable effect on other oilseeds.
	Rape and mustard	60,000	12,000*	12,000*	50	55	End of January.	
	Other oilseeds (excepting *til*).	...	200	200	25	50	End of December.	
	Total ...	61,000	13,700	13,800	50	55		
Pabna ...	Linseed	7,600	8,500	8,500	70	50	Not yet commenced.	The weather was favourable for cultivation, but defective rainfall since October last has retarded the growth of the crops and has adversely affected the outturn. Half the crops have been damaged by drought.
	Rape and mustard	110,000	114,500	114,500	70	50	Middle of January. Normal.	
	Total ...	117,600	123,000	123,000	70	50		
Malda ...	Linseed	6,000	4,500	3,500	70	45	January and February. Normal.	The decrease in area under linseed and rape and mustard as compared with last year was due to want of timely rainfall. The growth of the crops was interfered with owing to absence of rain since September, which has caused damage to some extent. Hence the outturn is expected to fall much below the normal.
	Rape and mustard	30,000	20,000	10,000	70	45		
	Other oilseeds (excepting *til*).	2,500	1,200	1,200	70	30		
	Total ...	38,500	25,700	14,700	70	44		
Dacca ...	Linseed	4,800	4,600	600	75	100	January. Normal.	The increase in area under rape and mustard is due to extension of cultivation in the Manikganj subdivision. The weather has not been favourable. About 35 per cent. of the crop has been damaged by drought which impaired the growth of the crops.
	Rape and mustard	52,400	58,000	74,900	57½	65		
	Other oilseeds (excepting *til*).	200	...	200	...	100		
	Total ...	57,400	62,600	75,700	58	65		
Mymensingh	Linseed	13,800	13,800	13,800	75	50	Middle of March. Normal.	The weather has not been favourable for want of rain during the latter part of November. Some damage by insects is reported from the Kishoreganj and Netrokona subdivisions.
	Rape and mustard	430,700	472,300	472,300	90	70	Middle of January. Normal.	
	Other oilseeds (excepting *til*).	300	300	300	100	75	Not yet commenced.	
	Total ...	444,800	486,400	486,400	90	70		
Faridpur ...	Linseed	5,900	6,100	6,100	89	89	Middle of February. Normal.	The increase in acres under rape and mustard this year is due to extension of cultivation. The weather has not been favourable for want of rain and the outturn is therefore expected to fall below the normal.
	Rape and mustard	23,700	23,700	23,700	86	82	Middle of January. Normal.	
	Other oilseeds (excepting *til*).	1,100	1,100	1,100	89	90	Not yet commenced.	
	Total ...	32,700	30,900	32,900	87	84		

*The decrease in area this year is due to revision of estimates.

Third and Final Report on the Winter Rice Crop of Bengal, 1918-19.

Substitute the word "unfavourable" *for* "favourable" in line 8 of the paragraph on "Acreage" in the Third and Final Report on the Winter Rice Crop of Bengal, 1918-19, published in page 187 of the Supplement to the *Calcutta Gazette*, dated the 19th February 1919.

S. MILLIGAN,
Director of Agriculture, Bengal.

TRAINING OF MECHANICAL ENGINEERS IN BENGAL.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education Branch.

CALCUTTA, THE 27TH FEBRUARY 1919.

RESOLUTION No. 348Edn.

READ—

Letter No. 526, dated the 21st December 1917, from the Director of Public Instruction, Bengal, forwarding a copy of the report of the sub-committee of the Governing Body of the Civil Engineering College, Sibpur, on the training of mechanical engineers in Bengal.

Read also—

(1) Letter No. 543, dated the 25th April 1918, from the Agent, East Indian Railway.
(2) Letter No. 4381C., dated the 22nd August 1918, from the Agent, Eastern Bengal Railway.
(3) Letter No. 11501, dated the 27th August 1918, from the Agent, Bengal-Nagpur Railway.

THE question of improving the present method of training mechanical engineers in Bengal has for some time been under the consideration of the Governing Body of the Civil Engineering College, Sibpur, which in 1917 appointed a sub-committee to consider the whole question. The sub-committee submitted a report in which it was pointed out that at present there are two different systems of training. Under one a youth enters Sibpur college at the age of 16 or 17 and studies there for four years after which he undergoes a year's practical training in the college workshops. Under the other system a youth at the age of 15 or 18 becomes apprenticed for five years to a railway or other workshop, during which period he obtains a somewhat meagre amount of theoretical instruction in part-time classes. "The one system", they remark, "turns out a college product with little practical experience, while the second turns out a practical man with insufficient theoretical education." The sub-committee proposed that the advantages of the two systems should be combined by selecting the best boys from the workshops after four years' training and sending them to Sibpur for a two years' course. The sub-committee's proposal briefly was to co-ordinate the work of the Sibpur College with the schemes for the training of apprentices now to be found in connection with railway and other workshops. It was suggested that a definite educational standard should be laid down as a condition of admission to apprenticeship, that an admission examination, should be held twice yearly by the Principal of the Sibpur college, and in order that the education of the apprentices might be maintained during apprenticeship, that the technical institutes attached to railway workshops should be utilised and developed. Other questions which received consideration were the revision of the college courses, the reorganisation of the teaching staff, the provision of hostels for apprentices in railway workshops, the establishment of mechanical institutes and the grant of stipends to apprentices in recognised workshops.

2. As the scheme of the sub-committee depended upon the co-operation of the railway companies, the Governor in Council consulted the agents of the East Indian, Bengal-Nagpur and Eastern Bengal Railways on the proposals contained in the report. The replies received show that the agents are divided in their views as to the merits of the scheme, and at present the Eastern Bengal Railway alone is prepared to co-operate in it.

In these circumstances, before passing orders on the scheme, the Governor in Council has decided to refer it for consideration to a Committee consisting of the following gentlemen :—

1. The Hon'ble Sir R. N. Mukerji, K.C.I.E., President.
2. The Hon'ble Sir Nilratan Sarkar, Kt.
3. Mr. C. D. M. Hindley, Deputy Agent of the East Indian Railway.
4. Mr. H. H. Spalding of the Eastern Bengal Railway.
5. Mr. W. H. Everett, Superintendent of Industries and Inspector of Technical and Industrial Institutions, Bengal.
6. Mr. B. Heaton, Principal of the Civil Engineering College, Sibpur, Secretary.

3. The Committee will consider and advise Government as to the arrangements that should be made to afford selected mechanical apprentices in the Eastern Bengal Railway workshops an opportunity of taking advantage of the courses at Sibpur College in order to obtain a higher specialised training in subjects bearing on their work, the arrangements being based on the general lines of the recommendations contained in the report of the sub-committee. The scheme recommended should, if possible, be such that it may be directly applicable also to other workshops, the authorities of which may desire to participate in it, and it should have regard to the requirements of Indian as well as European apprentices.

ORDER.—Ordered that the resolution be published in the *Calcutta Gazette*, that copies with copies of the report of the sub-committee, and of the replies received from the agents of the railways consulted, be forwarded to the President and members of the Committee, and to the Director of Public Instruction, Bengal, for information.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 27th February 1919.

Summary.—During the week light rainfall in some places. Ploughing of fields and harvesting of spring crops continue. Sowing of jute and autumn paddy has commenced in the Eastern Bengal districts. The prospects of standing crops are generally reported to be unfavourable. The average price of common rice for the province has risen by about 0·28 per cent. as compared with that of the previous week. Distress prevails in Bankura and in the Brahmanbaria subdivision of Tippera. In Bankura agricultural loans are being distributed and gratuitous relief is being given to 1,305 persons. The number of persons attending test-works in Bankura and Tippera amounts to 2,005 and 449, respectively.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal is 56·46 ft. from 10th February 1916 to 15th June 1918. From the 16th June 1918 the zero is 54·81 ft. above M.S.-L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. should be

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From 1st November 1915 the zero of gauge is 2·43 ft. above M. S.-L. Previous to that the zero was at M. S.-L. dating back 15th

(c) From the 25th January 1916 the zero of gauge at Berhampore is 30·99 ft. above M. S.-L.

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M. S.-L. was erected at Rampur-Boelia

The 4th March 1919.

July 1897. The zero is again at M. S.-L. from 1st April 1918.

n place of the permanent gauge washed away. The zero of gauge is at M. S.-L. from 25th June 1918.

G. J. St. C. Sedgeley,

Under-Secy. to the Govt. of Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta Block* in certain selected articles during the months of April to December, 1918, as compared with the corresponding period of 1917 and 1916. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April to December, 1918, amounted to 10,902,000 maunds as against 9,031,000 maunds in the corresponding period of the preceding year,—an increase of 21 per cent. There was an increase (11 per cent) in the imports of coal and coke (63,798,000 maunds as against 57,671,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 53 per cent, the total value amounting to Rs. 4,37,00,000 as against Rs. 2,86,37,000 in 1917. The quantity of indigo imported during the months of April to December, 1918, decreased by 3,100 maunds, or 18 per cent, to 14,000 maunds. The imports of raw jute amounted to 4,005,000 bales as against 3,286,000 bales,—an increase of 22 per cent. The importations of gunny bags also showed an increase of 11 per cent (351 million bags as against 315 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 77 per cent from 3,360,000 maunds to 5,956,000 maunds. The imports of tea decreased by 9 per cent from 2,851,000 maunds to 2,579,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the months of April to December, 1918, decreased by 2 per cent (Rs. 17,88,73,000 as against Rs. 18,22,56,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,053 million bags to 999 million bags, but the shipments of gunny bags to other Indian ports increased from 17 millions to 27 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 4,278,000 maunds to 3,693,000 maunds, or by 14 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR THE YEAR ENDING 30TH SEPTEMBER 1918.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Land Revenue Branch.

CALCUTTA, THE 7TH MARCH 1919.

RESOLUTION—No. 2256L.R.

READ—

The Survey and Settlement Reports for the year ending 30th September 1918.

IN consequence of the policy enunciated by Government in the Resolution on the working of the Survey and Settlement Departments for the year 1916-17 that, although it was necessary to secure as much economy as possible during the war, it was, at the same time, incumbent on Government to provide continuous employment for the highly trained staff of the departments, survey operations were started in the year under review in the district of Nadia, and settlement operations resumed in the districts of Bankura and Jessore, in which operations had been postponed in 1915. On the other hand, in areas not under general settlement, that is to say, where district operations were not in progress, only summary resettlements of revenue extending the term of the previous settlements were made, unless a regular resettlement was likely to be immediately remunerative. In the same areas applications for the settlement of private estates were ordinarily refused, but for reasons

other than economy. It is inexpedient from many points of view to deal with such estates piecemeal and preferable to wait for the advent of the district operations.

2. The main programme of traverse survey carried out by the Survey Department lay in the districts of Jessore, Nadia, Bankura and Burdwan, where an area of 2,134 square miles was dealt with by three survey parties, irrespective of 1,028 square miles in Jessore and Bankura where unidentified stations of the original traverse survey of 1914-15 were relaid. One survey party dealt with Jessore, where an area of 622 square miles falling in thanas Salkopa, Jhenida and Kaliganj, which now forms the second year's survey programme for the district, was traversed. The riverain tracts lying between the districts of Jessore and Faridpur on the east and Jessore and Khulna on the south, together with ten villages recently transferred from Jessore to Faridpur, were also traversed. Another survey party completed the traverse of 715 square miles in thanas Chakdah, Ranaghat, Santipur, Krishnagar, Nakashipara and Kaliganj in the district of Nadia. This is the survey programme for the first year in that district and excludes areas close to the Bhagirathi, where, in accordance with the ordinary procedure and because such areas are liable to change on account of fluvial action, the traverse survey is being undertaken this year, the same year as that of the cadastral or detailed survey of the area. The third survey party traversed portions of Bankura and Burdwan. The traverse survey of the Asansol subdivision in Burdwan, comprising 618 square miles, which had been subsequently included in the programme of work for the Bankura district with a view to the provision of up-to-date maps of the coal areas, was completed. In Bankura, 179 square miles in police-stations Saltora and Mejhia were surveyed. In these areas observations were also taken for the purpose of showing contour lines.

3. Comparative maps for 469 square miles of diara land falling between the districts of Rajshahi, Murshidabad and Malda were prepared. Miscellaneous work connected with the survey and mapping of Howrah and Cossipore-Chitpore Municipalities and isolated areas in various parts was also undertaken. Nearly a million and a half village maps were reproduced during the year by the Vandyke process. Some progress was also made in the production of jurisdiction maps. The Governor in Council hopes, now that a definite system for their preparation is in force, that adequate arrangements will be made to bring out these important maps as soon as it can be conveniently managed in conjunction with the different settlement officers.

4. Exclusive of ordinary students, three district kanungos and six candidates for such posts completed their course of training in the Government Survey School near Comilla. The number of students admitted into the school was 28 against 24 in the preceding year.

5. Seven major operations for cadastral survey and the preparation of a record-of-rights were in progress in Jessore, Bankura, Dacca, Mymensingh, Midnapore, Tippera and Noakhali, Rajshahi and the neighbouring riparian areas in Pabna, Malda, Nadia and Murshidabad. The area cadastrally surveyed was 2,517 square miles and preliminary records were written for 2,506 square miles, against 1,211 square miles in both cases for the previous year. Records were attested for 1,676 square miles and final records prepared for 3,142 square miles: the figures for last year were 1,891 and 3,468 square miles, respectively. In the minor operations in Hooghly, Howrah, 24-Parganas, Khulna, Murshidabad, Faridpur, Dinajpur and Malda the total outturn of cadastral survey and of final publication scarcely exceeded 18 and 57 square miles, respectively. A considerable amount of diara resumption and resettlement of land revenue was, however, accomplished in the course of these operations, both major and minor, mostly in Mymensingh, Rajshahi, Faridpur, Tippera and Noakhali. The total area of which a record-of-rights has now been completed in this Presidency is 30,203 square miles. This amounts to about 40 per cent. of the total area, exclusive of the large rivers of the Presidency. It comprises the whole of the Dacca Division, nearly the whole of the Chittagong Division, almost two districts in that of Rajshahi, practically one district in the Burdwan, but so far no district in the Presidency Division.

6. The three major operations in Dacca, Midnapore and Mymensingh had reached the closing stages, which are, ordinarily, recovery of costs, case-work—consisting mainly of the disposal of applications for the enhancement of rent under section 105, Bengal Tenancy Act—and the handing over of records to the Collector. Dacca was finished during the year under review with the disposal of the remaining applications for enhancement of rent. The Mymensingh settlement was nearly completed except for the disposal of a certain amount of case-work, some recovery and of resumption proceedings under Act IX of 1847, in particular, in the Jamuna diara for which special arrangements have been made: floods in Kishoreganj retarded recovery. Midnapore was mainly remarkable for the large number of applications for enhancement of rent. Though as many as 113,109 tenancies were dealt with, 71,163 were pending at the end of the year; this prevented the conclusion of the operations during the year.

7. The two major operations of Rajshahi and Tippera-Noakhali were in the intermediate stages. In Rajshahi, the records of the last and fifth block, comprising the diara areas of Malda and Murshidabad districts, were attested, objections were disposed of, and the final scrutiny completed. Case-work was in progress in the first block. Coercive measures for recovery were suspended in the areas where damage had been done by the abnormal floods in the Rajshahi Division.

Cadastral survey and stages up to the field-to-field verification of the map and the record were completed in all the remaining portions of Tippera district in thanas Muradnagar, Chanduria, Laksam, Comilla and Chauddagram. The progress of attestation was such that after the year's programme was finished it was found possible, with the assent of the landlords, to attest in advance of the programme the records of the area surveyed during the year. It is noteworthy that even in this settlement—previous accounts of which have tended to the conclusion that the raiyat in the districts of Tippera and Noakhali possesses an unusual power of looking after his own interests—illegal enhancements of rent on a large scale and impediments placed by landlords in the way of their tenants, when the latter were seeking to make improvements in the village water-supply, have now been discovered.

8. In the remaining two major operations of Jessore and Bankura, fresh ground has been broken by the Settlement Department. In Jessore, cadastral survey and initial record-writing were completed in 839 square miles, together with the field-to-field verification in 535 square miles, against a programme under both heads of 994 square miles. In the report satisfactory reasons have been given for the deficit, namely, the delay between the original traverse of 1914-15 and the cadastral operations of the year under review, the difficulty of replacing the lost traverse stations and the large number of plots and interests. The programme of the district has accordingly been changed under Government orders; and the traverse survey of the district will now be spread over four instead of three years altogether. In the preparation of the record other difficulties, it is reported, were also encountered. It is said that the system of land tenure in Magura thana contains many of the complications which made Faridpur the most difficult and expensive settlement yet encountered; that the people are litigious and that, therefore, much time was lost in examining bundles of Civil Court decrees which were placed into the hands of kanungos on the mere chance that they might help the case of the disputants who produced them; and that the shifting of rivers and khals was responsible for some of the most troublesome boundary disputes.

In Bankura, the whole of the first block of 971 square miles lying in the south of the district and comprised in thanas Raipur, Khatra, Simlapal and police-station Chhatna was finished up to the verification stage. Though the same necessity for the identification of the lost traverse stations of the year 1914-15 was experienced as in the case of Jessore, the circumstances were more favourable in that the country is undulating and not subject to floods, plots and interests were fewer, and the work is done under pleasanter conditions. The country comprised in the block is a continuation of the Chota Nagpur plateau and belongs to the "Jungle Mahals." The tenants are poor

and conditions somewhat primitive. Produce rents are common and instances are not rare where a fowl or even a single vegetable has been recorded as the rent of an acre of land.

9. Except in Rajshahi and Midnapore expenditure has in all settlements been kept within the estimates. In Rajshahi, the excess is due to the large number of plots and interests, while, in Midnapore, case-work, as distinguished from settlement work proper, is responsible for the excess reported. Nevertheless, in these settlements the net cost of the operations on account of larger receipts from court-fees, may be less than that estimated. The Governor in Council is satisfied that the financial aspect of all operations has been as steadily and jealously kept in view as in the past.

10. In paragraph 10 of last year's resolution a reference was made to the novel experiment started for the maintenance of the record-of-rights of the Fatehsingh estate belonging to the Nawab Bahadur of Murshidabad with the object of realizing arrears of rent by the certificate procedure. So far the experiment has worked smoothly and successfully. A similar scheme has been sanctioned for introduction in the Enaitpur Mahal of the Mathurapur estate in the district of Malda.

11. Survey and settlement records and maps continued to be utilised more and more in all revenue and administrative work as well as in criminal and civil matters. It is reported that district boards and municipalities and even village panchayats have not been behindhand in their use. Exclusive of copies issued on public service, over 9,000 copies of village maps and 1,000 copies of thana maps were sold. Printed records-of-rights to the extent of about four lakhs of copies were sold in addition to those freely distributed in the course of recovery of costs. These facts, in the opinion of the Governor in Council, leave little room for doubt as to the utility and popularity of the record-of-rights.

12. To the ordinary public the technical procedure of survey and settlement operations seems dry and uninteresting. With the object of making it more intelligible the Settlement Department has published, at a small price, a useful brochure entitled "*Guide and Glossary to Survey and Settlement Records in Bengal*," explaining in plain language the different stages of the operations together with the law involved. This was modelled on a similar publication prepared by Government in 1907 with reference to the practice in districts in Bihar.

13. His Excellency in Council regrets to have to record the death in France of Major J. C. Jack, D.S.O., M.C., from wounds received on active service. After being Assistant Settlement Officer of Bakarganj and Settlement Officer of that district and in Faridpur from 1902 onwards, he succeeded Mr. (now the Hon'ble Sir) N. D. Beatson Bell as Director of Land Records in 1912 and held charge of the department till he joined the Royal Artillery in England in 1914. He left an indelible mark on the morale and traditions of the department which he did so much to strengthen and consolidate. Unfortunately, there were several other deaths in the superior and intermediate ranks of the settlement staff, including that of Mr. S. Klingenstein, I.C.S., Settlement Officer of Jessore, during the year.

Mr. C. A. O'Donel was in charge of the Bengal Survey Department throughout the year and justified the promise he evinced when he succeeded Major Hirst. Mr. M. C. McAlpin, I.C.S., after 5½ years' efficient and tactful administration as Director of Land Records, severed his connection with the Settlement Department towards the close of the year. The Governor in Council has pleasure in acknowledging the good work done by Messrs. Sachse, Jameson, Nelson, Thompson and Pringle. The services of the other numerous officers whose names are mentioned in the concluding portions of the two reports will be noted.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* and that a copy of it, together with copies of the two reports, be submitted to the Government of India.

By order of the Governor in Council,

SYED ABDUL LATIF,
for *Secy. to the Govt. of Bengal.*

RESOLUTION ON THE RECOMMENDATIONS OF THE PUBLIC SERVICES COMMISSION REGARDING THE INDIAN CIVIL SERVICE.

GOVERNMENT OF BENGAL.

APPOINTMENT DEPARTMENT.

CALCUTTA, THE 10TH MARCH 1919.

RESOLUTION—No. 1645A.

READ—

(1) Report of the Royal Commission on the Public Services in India.
(2) Report on Indian Constitutional Reforms.

THE Governor in Council has under consideration the recommendations of the Public Services Commission relating to the Indian Civil Service which are contained in annexure X to the Commissioners' Report, and this resolution is published in order to give the public interested in the subject an opportunity of expressing their views on the various issues involved. The leading points that call for consideration are indicated below.

2. **Organisation.**—In paragraph 26 of their report the Commission have recommended the maintenance of the existing organisation of the civil services into a higher (Indian) and a lower (Provincial) service. The division is based on the work for the performance of which the two services are recruited, and not on any artificial distinction ; the evidence recorded by the Commission disclosed no desire for any change ; and Mr. Abdur Rahim, while favouring in principle the institution of a common list for purposes of promotion, accepted the conclusion that in the civil services such a list was impracticable.

The Commissioners remark that the Indian Civil Service occupies a unique position among the services in India in that its constitution is derived from various enactments of the Imperial Parliament. These enactments have been consolidated by the Government of India Act, 1915, and substantive additions to the statutory provisions affecting the service have been made by the amending Act of 1916. In the opinion of the majority of the Commission, the statutory recognition and protection of the service should be continued. Mr. Abdur Rahim dissents from this view. He argues that the "policy should be to retain a free hand for the authorities" and that the statutes should be revised with that object. His recommendation is tantamount to proposing the repeal of section 98 of, and Schedule III to, the Government of India Act, 1915, and, with the repeal of these provisions, the need for maintaining sections 99 and 100 of the Act would disappear.

The Indian Civil Service, strictly speaking, comprises only that body of civil servants which is recruited in accordance with the provisions of the Government of India Act of 1858 (reproduced in section 97 of the Government of India Act, 1915), for whom certain appointments have been reserved, principally in the older or so-called regulation provinces. The Commission draw attention to the fact that the schedule of appointments reserved for members of the Indian Civil Service is out of date and that it is anomalous that the statute should apply only to certain of the major provinces. They also feel that the power to admit Indians under section 99 of the Government of India Act, 1915, only to certain offices in the service, as distinguished from the service itself, is too restricted. They, therefore, recommend—

(*i*) that the statute of 1861 be made applicable to the whole of India and that its schedule be revised so as to include those appointments which they recommend should be regarded as Indian Civil Service posts ;

(*ii*) that such further legislation should be undertaken as will, without disturbing the power conferred by the statute of 1870, make it possible to admit Indians to the Civil Service itself on exactly the same terms as the officers who have hitherto been recruited in London ; and

(*iii*) that other officers appointed to fill Indian Civil Service posts, though not admitted to the Civil Service itself, should none the less take rank with Civil Service officers from the date of their appointment, and should be eligible with them for all posts in the Civil Service cadre on their merits.

3. The first recommendation involves an amendment of the third schedule to the Government of India Act, 1915, so as to include in it all posts which should be regarded as reserved for the Indian Civil Service, without any distinction between regulation and non-regulation provinces. The Commission have not clearly indicated what appointments they recommend should be regarded as so reserved, but their intention appears to be that, after the various changes which they recommend have been made in the superior cadres, the schedule should be revised as to correspond with the facts then existing. The recommendation will involve the removal from the schedule of all the posts now included in it which are classed as inferior, as well as of any other posts which may, as the result of the consideration of the report, be so treated in future.

4. It remains to be decided what appointments should be regarded as superior. The present definition of a superior post as one carrying pay in excess of Rs. 1,000 a month was condemned by Mr. Abdur Rahim as unsound and was also criticised in the Imperial Legislative Council in March last during the discussion of the Hon'ble Mr. Srinivasa Sastri's resolution deprecating any increase in the cadre of the Indian Civil Service. The present line of demarcation is purely arbitrary and the Commission clearly contemplate that the term "superior posts" should be held to include only those posts of which the incumbents perform duties of independent responsibility and control. Mr. Abdur Rahim has interpreted this definition as including only collectorships, district and sessions judgeships and other posts of a like or a higher status, and, in Schedule I to his minute, he has indicated 83 posts, now classed as superior, which ought, in his opinion, to be treated as inferior.

5. The Commission's second recommendation regarding legislation involves various technical questions which need not be considered pending a decision on the methods to be adopted for increasing the recruitment of Indians, a matter which is further discussed in a later part of this resolution. An important departure is contemplated in their third recommendation that officers promoted to fill Indian Civil Service posts should take rank with Indian Civil Service officers from the date of their promotion and should be eligible with them for all posts on the Indian Civil Service cadre on their merits. The Commission deprecate the present system of promotion whereby an officer in the lower service is eligible for appointment only to a restricted class of posts in the higher service. They describe it as indefensible in principle and also point out the practical danger that, with the lower status, a lower standard may be established, and that individuals may be promoted, not so much on the ground of marked capacity as on that of general merit combined with seniority. They therefore recommend that promoted officers should in future be given the same opportunities as officers who have been directly recruited.

6. **Recruitment.**—The sole channel of entry to the Indian Civil Service is at present the competitive examination held in London under section 97 of the Government of India Act, 1915, which reproduces the provisions of section 32 of the Government of India Act, 1858. The examination is open to all natural-born British subjects : but the Commission were of the opinion that it had not provided a sufficient number of Indians for the service and that some supplementary system of recruitment was required. They recommend that the present competitive system should be retained and that the London examination should remain the main channel of entry to the service. It is, however, inevitable that Indians should be placed at a

disadvantage in the competition with Europeans owing to the expense in which they are involved in going to England to prepare and sit for the examination in London; and it may, therefore, be necessary to look to other means to secure any considerable extension of the employment of Indians in the higher posts in the administration. The practical questions which remain for examination and decision are what the percentage of recruitment in India should be and how that percentage should be obtained.

7. The Commission take the view that the nature of British responsibility for the good governance of India requires the employment in the higher ranks of the Indian Civil Service of a preponderating proportion of British officers; and on this hypothesis they propose that provision should be made for a minimum of 25 per cent. of Indians in the superior posts of the service. This percentage they intend should include all appointments made by the promotion of officers from the Provincial Services, as well as direct appointments to superior judicial posts from the Bar, but should be exclusive of the number of Indians who may be successful at the competitive examination in London. The Commission's proposal in this matter has been received with some dissatisfaction and has been adversely criticised in the Imperial Legislative Council. Much of the criticism to which the proposal has been subjected is due to misapprehension of the Commission's intention. It is assumed that the percentage recommended is a maximum, whereas the Commission definitely state that it is a minimum, and they intend that the figure should be revised every five years in the light of the strength of the service for the time being and of the general working of the arrangement. The Commission's recommendation that the percentage of Indian recruitment should be based on the number of superior posts, and not on the whole cadre of the service, has also been misunderstood. It is true that a given percentage of the superior cadre yields a somewhat smaller percentage of the whole cadre; but the cadre for which recruitment is made, and which alone can be regarded as the proper basis of calculation, consists of superior posts only, and the size of the inferior cadre is purely dependent on the number of such posts. While, therefore, it is relevant to consider how the whole cadre will be affected, the sound method of calculation seems to be that proposed by the Commission. In principle, their proposal is in consonance with the view expressed by His Excellency the Viceroy and the Secretary of State in paragraph 316 of their Report on Indian Constitutional Reforms, that, while it may not be possible to dispense with training in Europe for some of the principal services, the present system of recruitment in England should be supplemented by fixing a definite percentage of recruitment to be made in India. They have recommended that recruitment for 33 per cent. of the superior posts should be made from Indians, and that this percentage should be increased by 1½ per cent. annually until the periodic Commission is appointed which will re-examine the whole subject.

8. Of the methods by which recruitment in Europe may be supplemented by recruitment in India, the one which finds most favour among Indians is that of simultaneous examinations in England and India, conducted in both cases by the Civil Service Commissioners, with the same examination papers and a common list embodying the results. The demand for simultaneous examinations has a long history into which it is not now proposed to enter. Various objections to the system are fully explained in the report of the Commission on the Public Services, and it is desirable, to examine other methods of increasing the recruitment of Indians.

9. Possible methods of recruitment in India are—

(i) an increase in the number of listed posts;
(ii) nomination; and
(iii) a separate examination.

The Commission have recommended a reduction in the number of listed appointments open to members of the Provincial Services, chiefly on the ground that officers selected for these posts enjoy only an inferior status and that they are promoted so late in their career that they are practically

excluded from any chance of rising to the higher judicial and administrative appointments. The general force of these arguments will be recognised, but it is for consideration whether it would not be wiser for the present to defer the reduction proposed by the Commission. Several years must elapse before officers recruited at the foot of the cadre can attain to positions of trust and responsibility; and if Indians are to be placed in responsible offices in the near future, the maintenance of the present arrangements will for some years be necessary. It may even be found desirable, as a temporary arrangement, where suitable officers are available, to increase the number of listed posts, due regard being paid to the vested interests of officers already in the higher service.

10. The Public Services Commission of 1886-87 contemplated that one quarter of the listed posts would be filled by Indians who were not members of the Provincial Services, but in practice very few such appointments have been made. A source of recruitment for these appointments which has been indicated is the Bar. The Commission recommend that, in the first instance, forty posts of district and sessions judge should be filled from the Bar as soon as the present vested interests in them have been met. In their discussion of recruitment from the Bar, the Commission have not stated clearly what they had in mind in using this expression, but it seems doubtful whether they intended to confine recruitment to Barristers-at-Law, and in any case the question whether this new avenue to Government service should be thrown open to other branches of the legal profession deserves consideration.

11. It is necessary next to consider the means by which more Indians can be admitted in India to the service itself, as distinct from specified appointments in the service, on equal terms with officers recruited in England. The Commission recommended that direct recruitment should be made in India for 108 superior posts, and they calculated that this would permit the recruitment of nine officers a year. The Commission appear to have overlooked the fact that annual recruitment depends on the fluctuating annual strength of the cadre and that it may be affected by changes in the ratio fixed for leave and training reserve. The number of posts to be thrown open to direct recruitment in India will also have to be considered in the light of the decisions which may be reached in regard both to the percentage of Indian employment in the service and to the extent to which superior posts in the service should be allotted to officers promoted from the Provincial Services and to recruits from the Bar. When these questions are decided, the number of appointments to be offered annually in India will be a simple matter of calculation. The question for immediate consideration is the principle on which these appointments should be made. The Commission have examined this question in paragraph 19 of annexure X to the report, and have arrived at the conclusion that the balance of advantage lies in admitting the principle of open competition, subject to certain safeguards and reservations. They accordingly recommend that a separate examination should be conducted in India by the Civil Service Commissioners, and that recruitment through this examination should be supplemented by the nomination of a limited number of candidates, to give representation to young men of good family who are not intellectually quite in the front rank.

12. The safeguards proposed by the Commission are two in number. The more important of them is that a committee should be appointed for the area served by each university, to scrutinise the educational and other qualifications of the would be candidates and to advise the local Government as to who should be allowed to sit for the examination. To limit the total number of candidates and to afford an equal chance to the young men in each area, they suggest that twenty places should be allotted to each of the five existing universities. Should it be found that the successful candidates are coming too markedly from one particular area, they suggest, though reluctantly, that the examination should be held by groups of areas in rotation. The selection of university areas as the units from which a fixed number of candidates should be nominated for admission to the examination is open to

practical objections and also to the criticism that it involves a definite departure from the principle of open competition.

13. The object in view is to secure three results: (1) that the candidates should be physically and morally as well as intellectually suitable for employment in the service; (2) that the posts should be distributed as evenly as possible among the different provinces and communities; and (3) that the number of candidates shoud be kept within reasonable limits. The first of these objects could be attained by adapting to Indian conditions the rules framed by the Secretary of State under section 97 of the Government of India Act, 1915, prescribing the qualifications to be required of candidates for admission to the service. It might be found expedient to constitute provincial committees to assist the Civil Service Commissioners by making such enquiries as to the character and antecedents of the candidates as the Commissioners deemed necessary; but such enquiries would be limited to determining whether the applicants satisfied the conditions laid down in the rules and would not extend to any comparison of their respective merits. As to the second object, the superiority in educational calibre of certain provinces is bound to make itself felt in any system that is dependent on competition. It is problematical whether the limitation the Commission propose to place on the number of candidates from each university would have any appreciable effect in reducing this disparity, and it is clearly undesirable to impose any limitations, unless these can be relied on to secure the object in view. As a means of limiting the number of candidates appearing for examination, the Commission propose that candidates should be required to possess the B.A. degree, or its equivalent. If the possession of an Honours degree were made an essential qualification, it would probably be unnecessary to impose further restrictions. Such a condition might have the effect of excluding from the competition many candidates who were generally well qualified for admission to the service, but such men would have little or no chance in any case of succeeding in the examination, and their interests would best be safeguarded by a supplementary system of nomination such as the Commission proposed. The whole problem of adapting the competitive system to present Indian conditions is in fact beset with difficulties, and the foregoing remarks are merely designed to invite attention to possible points.

14. The Commission further propose that, in order to secure for the various provinces and communities fair representation in the services, two candidates should be nominated each year by the Secretary of State, on the advice of the Government of India, from amongst graduates of the various universities, of an age similar to that of the competitors at the examination. It is desirable to limit the number of such appointments, in order not to prejudice the success of the experiment of a separate examination; but the Commission's suggestion that the number should be limited to two a year is clearly dependent on the assumption that the total number of direct appointments made annually in India will be nine. If effect is given to the recommendation of His Excellency the Viceroy and Secretary of State the number of such appointments will be greater than was contemplated by the Commission, and it will increase progressively from year to year. To render the power of nomination an effective safeguard against the monopolisation of the service by particular races and castes, it will be advisable, therefore, to provide for a similar progressive increase in the number of direct nominations. This method of appointment would in any case be purely permissive; and the extent to which it should be used could best be determined by the results of the competitive examination.

15. **Systems of Examination.**—The most important of the Commission's recommendations in regard to the conditions of the competitive examination in England is their proposal to fix the age for competition at 17—19. This recommendation has been strongly criticised both by Indians and by the educational authorities in the United Kingdom. It is evident that advantages and disadvantages attach to both the high and the low age limits; but it must be remembered that the latter were tried from 1878 to 1891 and were then deliberately and after long consideration

discarded. The most substantial ground on which the Commission base their proposal is the admitted inadequacy of a course of probation extending over only one year to enable officers to go out to India trained in the law which they will be called on to administer in the languages which they will be required to talk, and in the history and habits of the people whose interests will be entrusted to their care. They have considered the possibility of extending the probationary period to two years, but have arrived at the conclusion that, in view of what is required of an officer of the service under modern conditions, nothing short of a three years' course is likely to be effective. Assuming, therefore, that recruitment must take place either at the school-leaving or at the graduation age, they have decided in favour of the former on the ground that it is undesirable to bring recruits out to India older than they are at present.

16. One objection which is urged to a reduction in the age limits for the examination in England is the fact that candidates recruited through examination in India would enter the service appreciably older than their colleagues appointed in England. The Commission have considered this objection solely with regard to its bearing on the arrangements proposed for the probationary course. It has, however, to be remembered that an Indian on the average ages sooner than an European : and a difference in the age of recruitment would probably operate as a handicap on Indians later in their service. The expediency of having a common age for all entrants to the service cannot, therefore, be ignored. The medical evidence before the Commission indicated that, while it was undesirable for men to go out to India before the age of 22, it was a matter of indifference at what age they went out between 22 and 25. On medical grounds, therefore, the age at which recruits now arrive in India does not seem to be too high, although it might be inadvisible to increase it. It would secure an extra year for probationary training with the minimum of disturbance of existing conditions both in this country and in England, if the examination age were reduced by approximately one year, the limit being fixed at 21—23, either on the first day of the examination, or, as was the case prior to 1906, on the 1st of the preceding January.

17. If the conclusion be accepted that the examination in England should be held at the graduation age, it is unnecessary to consider in detail the Commission's proposals for the revision of the existing scheme of the examination. The syllabus will be drawn up largely with reference to the requirements of higher education in England and will continue to be a test of general rather than specialised ability and education. The main question for consideration in the present connection is what modifications in the scheme should be demanded in the interests of Indian candidates. It is evident that candidates who have received their education in India must be at a disadvantage in any examination designed to test the results of English public school and university education as a whole ; and the only means of diminishing this handicap is the inclusion in the syllabus of the examination of subjects which are specially studied in Indian schools and universities. Sanskrit and Arabic have been included in the syllabus of the open competitive examination since the year 1855, and they are at present marked higher than any modern European language, though not so high as Greek or Latin. The Commission have not included these subjects in their draft scheme, presumably because they do not form part of the existing curricula of English schools. In March last, the Government of India, while reserving to themselves the right of making a further examination of the question, accepted a resolution moved in the Indian Legislative Council by the Hon'ble Mr. Srinivasa Sastri, recommending the inclusion among the subjects of examination, not only of Sanskrit and Arabic, but also of Persian and Indian History. The inclusion of Sanskrit and Arabic presents no serious difficulty ; they are included in the existing syllabus ; and the standard of examination in them, if not now on the same level as that of the examination in Greek and Latin, could almost certainly be raised to the necessary standard. Persian is a living language with an extensive literature, and it should be possible to frame an examination in it on the

same lines and up to the same standard as in modern European languages. The advisability of including Indian history as a subject in the competitive examination, is open to doubt. It is a compulsory subject in the existing final examination; and the Commission are emphatically of opinion that all civil servants should have a grasp of Indian history in the widest sense of that term. If candidates were allowed to offer the subject in the competitive examination, those who availed themselves of the opportunity would have an undue advantage over other probationers in the final examination.

18. As regards the separate examination to be held in India, the Commission recommend that the Civil Service Commissioners, in consultation with the educational authorities in India, should devise a scheme having the same relation to the Indian educational courses as the examination in England will, under their scheme, bear to the education given in the British secondary schools. The question will have to be further examined by experts, but if the range of subjects included in the examination in England is wide enough to be adapted to all varieties of university education, there should be no insuperable difficulty in instituting an examination on similar lines in India.

19. **Probation and Training.**—The Commission recommended that the probationary course should provide both for the completion of a liberal education and for specific training for work in India. The age limits suggested by the Commission have been discussed above. If, as suggested, they are raised so as to enable candidates to proceed to a degree before competing, it would seem unnecessary to extend the period of probation beyond two years. The subjects of study proposed by the Commission may next be considered.

20. A sound legal training may be regarded as essential. Almost from the moment of his arrival in India the young Civilian is required to apply an elaborate system of codified law to actual facts which come before him in his capacity as a Magistrate; it is essential that his executive actions should be in accordance with legal methods, and he is frequently confronted with an experienced and highly trained Bar possessing a specialised knowledge of the law which he is required to administer. The only training which he receives under the present system to equip himself to meet these conditions consists in studying the Indian Penal Code, the Code of Criminal Procedure and the Indian Evidence Act, which, it may be argued, is inadequate. A possible remedy is to be found in reverting to the system which obtained prior to 1892, under which the probationer was required, not only to make a close study of general jurisprudence, but also to acquire practical experience of procedure by attending the Courts in England and reporting cases.

21. The Commission's recommendation that the course of law prescribed should approximate to the honours school curriculum in the subject is probably dictated at least in part by the necessity, under their scheme, of framing for the probationers an honours course to which the universities would attach a degree. It is not known how far the existing courses would supply the special requirements of the Indian Civil Service candidate, but there are obvious advantages in utilising the ordinary facilities afforded by the universities, wherever these are suitable. The Commission also consider it desirable that probationers should get called to the Bar, and make special recommendations calculated to encourage them to do so. If, however, the probationers remain in England for only two years they will be unable to obtain a call, unless they have been admitted to one of the Inns before their selection. The actual call is, however, of no great importance in itself. And what is required is to provide suitable opportunities for legal study during the period of probation and to give probationers inducements to take the fullest advantage of them.

22. Next in importance to the study of law is the study of the principal vernacular of the province to which the probationer is assigned. It is difficult to over-rate the practical value of a good, and not merely a colloquial

knowledge of the vernacular, and this will rarely be acquired unless the literary grounding is supplied in England. The Commission's recommendation that Indians posted to a province, the language of which is their mother-tongue, or is derived from the same stock as their mother tongue, should take in its place a modern European language, has not the same practical arguments to support it. The suggestions, however, put forward by Mr. Abdur Rahim in paragraph 70 of his minute that Indian candidates should study economics, European history, constitutional law, the growth and working of municipalities, county councils and other similar institutions deserve consideration. There will no doubt be difficulty in equating dissimilar subjects; but this difficulty should not prove insurmountable. Similar considerations affect the Commission's recommendation that every probationer should be taught the elements of the classical language to which the principal vernacular language of his province is most closely allied. Apart from the study of law, which must be compulsory for all, there is much to be said in favour of varying the course to meet the requirements of probationers with reference both to their previous education and to the conditions of the province to which they are to be assigned.

23. Indian History, if not included in the syllabus of the open competition, should certainly be compulsory for all candidates, and its study should, as indicated by the Commission, be both wide and thorough, embracing the constitution and the development of the administration. Indian ethnology and religions, and the origin and growth of the various social systems. It is further suggested that the subject of Political Economy should be made compulsory for all candidates. It was included in the syllabus prior to 1892, and there can be no doubt as to the value of a proper grounding in the science to officers employed in the administrative and executive branches of the service.

24. The benefits of university residence, which are admitted on all hands, lead the Commission to deprecate the creation of a special institution for the training of probationers. This view, in practice, will necessitate a selection of universities, and it is evident that only those universities would be approved, which can satisfy the Civil Service Commissioners of their ability to provide adequate instruction. It would not, however, be necessary to insist on their providing a special degree course.

25. An important point for consideration is the method by which the seniority of the candidates should be determined. If some of the candidates are recruited by examination in England and others by a separate examination in India, while yet a third class may be appointed direct without examination, a feasible plan would to be to revert to the system which obtained prior to 1892, under which there was a final examination, supplemented by periodical tests, including the reporting of cases. It has accordingly been suggested that the seniority of the candidates should be decided by the marks obtained by them in the final examination and in the reporting of cases, and that a high value should be attached to the latter.

26. The Commission's recommendations in regard to the general training of recruits in India involve no great departure from existing practice. It will, however, be desirable to make the departmental examinations more practical, particularly if officers, while in England, have received a good grounding in principles in the course of their legal studies while on probation. The test of proficiency most required is one which will be limited to an examination of a man's ability, with the acts and rules at his disposal, readily to find the law governing a particular case and to apply it intelligently.

27. While, however, the proposed change in the period and character of the probationary training of the recruits may be expected to provide a remedy for the present legal deficiencies of executive officers, it will still, as indicated by the Commission, be necessary to provide additional facilities for training in law for those officers who elect or are selected for the judicial branch. One of the most important questions in this connection is the

period of service at which bifurcation between the executive and judicial branches should take place. The problem is a complicated one, but the Commission's recommendation is that the separation should be effected as soon as possible after the completion of the fourth, and, at latest, before the completion of the sixth, year of service.

28. For the subsequent training of officers who elect the judicial branch the Commission approve the existing arrangements, under which a certain number of officers of not less than five years' service are employed on civil judicial work for a period of about eighteen months. It is possible that many of the recruits who come out after two years' probation will have at any rate obtained the qualifications for a call to the Bar. To those who have not inducements may still with advantage be offered to undertake these courses of study later in their service. It is suggested that reading for examinations and attendance at lectures alone are insufficient to give an insight into the practical administration of law, and, although recruits under the proposed scheme will have acquired some knowledge of procedure by attending the Courts during their period of probation, they will still be able to profit greatly by reading in the chambers of a barrister.

29. **Salary.**—As regards the emoluments of the service, the Commission were satisfied that the rates of salary fixed for the superior posts in the most recently reorganized cadres were adequate in view, firstly, of the lower age at which, if their recommendations were accepted, officers would in future be appointed, and secondly, of the concessions which they recommended in the matter of leave and pension. They have, therefore, kept the range of the salaries for these posts much as at present, with the addition of exchange compensation allowance, making only such changes as are necessary to secure approximate equality of prospects as between one province and another. They recognize, however, that the graded system on which officers of the service are now paid is generally unsuitable, since, owing to blocks in promotion, legitimate expectations are in practice often disappointed. They accordingly recommend the introduction of an incremental scale of salaries on the compartment system.

30. The incremental system which the Commission advocate is framed to meet the conditions of the service, under which officers discharge for a number of years duties of minor importance, and are then promoted to charges of major responsibility, which constitute the real work of the service. Separate scales of pay are accordingly fixed for officers employed on each of these classes of duties; and it is laid down that an officer shall not be remunerated on the higher scale unless (1) he is declared fit for the more important work; and (2) a vacancy occurs in which he can be placed. The defect of the system is that, when promotion is retarded, an officer may receive no increments at all for an indefinite period, and the penalty often does not cease when he is promoted to the higher scale, but continues for the rest of his service, because he starts on the minimum of the higher scale, and until he reaches the maximum he is always drawing less than he has a reasonable claim to expect. On the other hand, if promotion is accelerated, an officer is promoted to the higher scale sooner than would normally be the case and attains the maximum too soon. The two factors to be taken into account in determining what is a fair rate of remuneration for an officer in a service constituted like the Indian Civil Service are: (1) the nature of the work he has to do; and (2) his seniority in the service. To give due recognition to both these factors, His Excellency the Viceroy and the Secretary of State have recommended in paragraph 319 of their Report that the inferior incremental scale should be continued until the superior post is actually attained, and that the higher responsibity of the superior post should be marked by the grant of an additional allowance over and above the time scale. Effect could be given to this recommendation by providing that there should be two overlapping scales of pay, the lower for the officer doing inferior work, and the higher for the officer doing superior work, so designed that the difference between the lower and the higher scales

would be a constant figure. The following table will serve to illustrate this proposal :—

Year of service.	Inferior scale.	Superior scale.
1	450	......
2	500	......
3	600	......
4	650	950
5	700	1,000
6	750	1,050
7	850	1,150
8	900	1,200
9	1,000	1 300
10	1,100	1,400
11	1,200	1,500
12	1,300	1,600
13	1,300	1,600
14	1,400	1,700
15	1,500	1,800
16	1,600	1,900
17	1,700	2,000
18	1,800	2,100
19	1,900	2,200
20	2,000	2,300
21	2,100	2,400

The figures are given solely for the purposes of illustration and opinion on them is invited. The inferior scale should be subject to some maximum, it may be advisable to fix a minimum for the superior scale, since an officer placed in charge of a district has to incur a certain minimum expenditure in order to maintain his position.

The merits of the scheme are—

(1) that it does away with all complications in the rules regarding acting allowances and progressive pay. An officer holding an inferior appointment will draw pay according to the inferior scale, subject to an efficiency bar, which might, as suggested by the Commission, be placed at Rs. 900 a month. An officer holding a superior appointment will draw pay according to the superior scale up to the point at which selection outweighs seniority ;

(2) that it equalises as far as possible the prospects of officers of the service in different provinces and at different times ; and

(3) that an officer will never lose more than Rs. 300 a month owing to the slowness of promotion. When he is promoted, he will be restored to the pay to which he would have attained had promotion been normal.

31. For the highly paid appointments in all provinces above the grades of collector and district judge the Commission have recommended the maintenance of the existing rates of salary with the addition of exchange compensation allowance, subject only to such slight modifications as are necessary to obtain round figures. Exchange compensation allowance must for the present be left out of account, and the main question for consideration is whether the pay of any of the higher posts requires revision.

32. There remains the question of the salaries to be paid to Indians. The Commission recommend that those who join the service through the door of the open competitive examination in London, or who are directly appointed in India, and go to Europe for the probationary course, should receive the same pay as their European colleagues, and that the same rates should apply to officers recruited from the Bar ; other officers, that is, in the main, officers promoted from the provincial services, should receive incremental salaries at rates lower than those fixed for members of the Indian Civil Service until they are selected to fill posts higher in rank than that of a collector or of a district and sessions judge, 2nd grade. Equality has always prevailed as

between European and Indian members of the service who have passed the open competitive examination in London, and the Commission's reasons for recommending the extension of the principle to officers directly recruited in India are doubtless those set forth in paragraph 57 of the report, namely, that it is illogical to treat statutory natives of India who are recruited in England differently from those who are recruited in India, and that such a policy must tend to retard the development of Indian education. They have assigned no reasons for their proposal to give higher pay to officers recruited from the Bar than to officers promoted from the provincial services; but some justification for the proposal may be found in the necessity of offering substantial attractions to successful members of the legal profession.

33. The principle enunciated by His Excellency the Viceroy and the Secretary of State in paragraph 322 of their report is that the standard scales of pay for all services should be those appropriate to Indians recruited in India, sufficient to attract the best men available and to give them an income appropriate to their position. To persons recruited by reason of special qualifications obtained in Europe an extra allowance should be given, to compensate them for the drawbacks and expenses of expatriation. The application of this principle to the Civil Service will present peculiar difficulties owing to the number of sources from which recruitment will be made. The principle that Indians recruited in Europe should receive the same rates as Europeans is ordinarily defended not only on the ground of the expense to which they have been put in obtaining an European education, but also because only those Indians will be successful who by every practicable test satisfy conditions designed to obtain the best class of Englishmen. While, however, lower rates may suffice to attract suitable candidates in India, it is at least possible that a differentiation in pay will be taken to indicate a difference of status and will give rise to soreness and dissatisfaction. Further a scale of salaries which in the aggregate offered sufficiently good prospects to a young man who had not yet entered any profession might be wholly insufficient to induce a capable lawyer to accept a judicial appointment. The rates of remuneration proposed by the Commission for promoted officers of the provincial service are slightly higher than those now in force for executive officers, but involve a diminution in the prospects of judicial officers in certain provinces.

34. **Leave.**—In the matter of leave, the Commission recommend the continuance of the present arrangements under which officers of the Indian Civil Service are subject to the general European service leave rules. The question of the revision of these rules is under separate consideration. So far as officers recruited in Europe are concerned, the Commission's recommendation seems suitable. The application of the European rules to officers directly recruited by examination or otherwise in India, is consistent with the general principles formulated in paragraph 78 of the Report, provided that the principle of equality of pay is also accepted. It appears to be unnecessary to prescribe special leave rules for judges recruited from the Bar, as they can appropriately be brought under the Indian rules. It seems likely that judges recruited from the Bar will join the service at a comparatively advanced age, and the question of prescribing special pension rules for these recruits will probably have to be considered.

35. **Pensions.**—The Commission have considered the possibility of applying to the Indian Civil Service, with suitable modification, the general pensionary rules obtaining in other departments of Government service. They have not elaborated any definite scheme, but suggest that the scale might be fixed in eightieths instead of sixtieths, with higher maxima and special additional pensions for officers who retire after holding appointments above the rank of collector or of district and sessions judge, 2nd grade. While they express the belief that a scheme on these lines would be in the interests of the service, they admit that the evidence before them did not disclose any desire on the part of the service to give up its annuity system. It may be contended that if the Indian Civil Service is to come under the ordinary rules at all, it must do so for all purposes; and, in particular, it must surrender the privilege of obtaining the full retiring pension after 25 years' service.

36. It has been suggested both by the Commission and by His Excellency the Viceroy and the Secretary of State that the pensions of officers of the Indian Civil Service should be free of contribution and that the 4 per cent. contributions of each individual officer should be funded for his benefit. While it is universally known that its members receive a pension of £1,000 a year, it is rarely known outside the service itself that they contribute towards it 4 per cent. of their pay throughout their service. This contribution was originally calculated to produce one-half of the pension. Before the war it was estimated that it produced only about one quarter; but, with the rise in the rate of exchange and in the rates of interest on public funds, the proportion will be considerably increased, and the amount of the pension paid by the State correspondingly diminished. This consideration affords additional support to the proposal of the Commission. The most important consideration in arriving at a decision on this question is whether the proposed concession is necessary in order to secure suitable candidates for the service in future.

37. The adequacy of the scale of invalid annuities is a subject which has frequently engaged the attention of the authorities. The scale was last revised in 1905; and the increase in the rates which was then sanctioned went some way towards relieving the hardships of officers compelled to retire on medical grounds before completing their service for annuity, particularly by raising the maximum from £450 to £700 a year. The Commission are of opinion that these rates are sufficiently liberal. There is, however, a disproportion between the full annuity and the pension admissible to an officer who is invalided after a period, and it is invalid retirements at the later stages that deserve consideration. The result of a ruling which penalises a small deficiency of service by a wholly disproportionate reduction of pension is that officers whose health has broken down struggle to the utmost to complete their full term of service; and it is not to the advantage of the State to offer strong inducements to a broken-down officer to remain in the service solely for the sake of securing his full pension. While, therefore, the existing scale may suitably be maintained for officers retiring with 19 years' or less service, the following scale has been suggested for service of 20 years and upwards:—

After 20 years' completed service	...	... 550
,, 21 ,, ,, ,,	...	... 610
,, 22 ,, ,, ,,	...	... 670
,, 23 ,, ,, ,,	...	... 730
,, 24 ,, ,, ,,	...	... 790
,, 25 ,, ,,	...	... 850

(of which less than 21 have been active service).

38. It is requested that any remarks or criticisms which any person or body of persons interested may desire to offer may be forwarded to the Chief Secretary to the Government of Bengal not later than the 30th April 1919, and it would materially facilitate their subsequent consideration of the different points involved were (to the extent to which comment upon them is contemplated) dealt with in the same order as is followed in this resolution and with reference to its paragraphs.

ORDER.—Ordered that a copy of the resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Benga

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR 1917-18.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education.

CALCUTTA, THE 10TH MARCH 1919.

RESOLUTION—No. 426Edn.

READ—

The Report on Public Instruction in Bengal for 1917-18.

THE work of the Education Department during the year under review suffered from the exigencies imposed by the war, the consequent restriction of expenditure and the paucity of superior staff. Altogether two-fifths of the European officers of the Indian Educational Service have been detached for duty in the Indian Army Reserve of Officers, in addition to officers on deputation to the Government of India or the University of Calcutta.

The growing demand for education among the people of Bengal and the natural growth of the population led to an increase in the number of educational institutions by over 2,500 and to an addition of 46,000 in the number of scholars. Nearly 2 millions were in various stages of education, there being approximately 1 girl at school to every 5 boys. The total expenditure on education amounted to nearly 255 lakhs, of which 82½ lakhs were contributed direct by Government, 14⅓ lakhs came from the funds of local bodies (nearly 11⅜ lakhs consisting of grants placed at their disposal by Government), 114 lakhs were derived from fees, and 44 lakhs were obtained from endowments, subscriptions and other sources. The expenditure on different branches of education is shown in the following statement, together with the number of scholars in the different classes of educational institutions :—

DIRECT EXPENDITURE.

	Rs.	Percentage of total.	Number of pupils on 31st March 1918.
Colleges	30,40,529	11·9	25,265
Secondary Schools ...	91,77,686	35·9	413,162
Primary „ ...	46,66,615	18·3	1,409,316
Special „	15,93,455	6·2	45,208

INDIRECT EXPENDITURE.

	Rs.	
University	15,84,408	6·2
Direction and inspection ...	10,85,004	4·2
Scholarships	4,04,366	1·6
Buildings, furniture and apparatus	25,44,238	10·0
Miscellaneous ...	13,97,238	5·5

2. **Collegiate education.**—Owing to the establishment of the Carmichael College at Rangpur, the number of arts colleges in Bengal increased to 34, or one-fourth of the total number in British India ; and there is a persistent demand for the creation of more. Some colleges have already more students than several of the British universities. The Ripon College, for instance, had 1,874 students in the year under review, the Vidyasagar College 1847, the City College 1,683, and the Bangabasi College 1,447. The Government colleges had more modest numbers, but the Presidency College had 1035 on its rolls ; the Dacca College, with 943 students, reached the limits of possible expansion, and there were 786 students on the rolls of the Rajshahi College. The average number in private colleges was nearly 500 and rose to over 900 in Calcutta. The concentration of students in Calcutta is as noticeable as ever,

the number on the rolls of colleges of all kinds being 2,375 more than in the previous year. The absence of recreation grounds is one of the disadvantages of college life in Calcutta, but when one is provided, the students do not always make good use of it. The Presidency College, for instance, has the use of a ground on the Maidan, but the Director reports: "A few enthusiasts represent the college in league matches. Practically no one plays cricket, football or hockey except those who constitute the college team." Thirty-four, however, of the students in the Presidency College, or 1 in every 30, joined the Indian Defence Force.

In view of the growing pressure in Calcutta the Governor in Council welcomes the establishment of the Carmichael College at Rangpur and takes this opportunity to express his appreciation of the spirit of the people of that district, who raised 5½ lakhs for the college in addition to large investments in the war loan and in spite of the exigencies created by the war. They were able to start the college without either assistance from Government or an assurance of assistance: and the Governor in Council desires to draw attention of other districts to this spirit of self-help.

Altogether 25,265 students were reading in the different colleges, including 191 ladies. Nearly one-third of the total number were Brahmans, while under one-tenth were Muhammadans.

3. **Secondary education of Indian boys.**—The increasing demand for secondary education and the unpopularity of schools in which the vernacular is the only medium of instruction are exemplified by the fact that there was an addition of 59 high and middle English schools, while the middle vernacular schools decreased by 35. The Director is of opinion that schools of the class last mentioned seem doomed to die out: the number of pupils in them is now only 18,587, or 4½ per cent. of the total attendance at secondary schools. On the other hand, during the last three years the number of high schools has advanced by 143 and in the year under review aggregated 731, the attendance at them being over 226,000. Altogether 21 schools conducted manual classes: the scheme is still in an experimental stage, but a satisfactory feature is the general keenness with which boys have taken to the work.

4. **Primary education of Indian boys.**—In his review of the progress of education in India for 1912—17, Mr. Sharp remarked: "The central and most unsatisfactory feature of primary education is the fact that the great majority of the children are in the lower primary classes and nearly half in the most rudimentary stage." This remark applies to Bengal as well as other provinces. The total number returned as attending boys' primary schools on 31st March 1918 was nearly 1,183,000, but all but 157,000 were reading in lower primary schools and 900,000 were in infants' classes. There was an increase in the attendance at lower primary schools by 26,000, but the number in upper primary schools fell by 3,000. The steady decrease of the latter schools during late years is attributed mainly to the unpopularity of a purely vernacular education in Bengal; in support of this explanation may be mentioned the fact that the pupils in the primary classes of secondary schools outnumber those attending upper primary schools. The growth in the number of pupils in lower primary schools was shared in by all parts of the Presidency except the Burdwan Division, where a slight decrease occurred, which is attributed to high prices and the straitened circumstances of the agricultural classes. The number of Hindu pupils in schools of both the upper and lower class fell by 1,000 and that of Muhammadans rose by 24,000. The Muhammadans under instruction outnumbered the Hindus by 35,000.

5. **The training of teachers for Indian schools.**—The David Hare Training College, Calcutta, and the Dacca Training College continued to do useful work in the training of English teachers for secondary schools. The students under training included not only teachers of Government and aided schools but also inspecting officers and outside candidates: the Dacca Training College had also on its rolls three officers who had been deputed for a course of training by His Exalted Highness the Nizam of Hyderabad. For the training of vernacular teachers for secondary schools and *guru*-training

schools there were five Government training schools (one in each of the five divisions), and one aided training school maintained by the Church Missionary Society at Krishnagar. The total number of *guru*-training schools was 119, of which 114 were managed by Government, 4 were aided institutions and 1 was unaided. Six of these schools were reserved for the training of *mualli̇ms*. The present facilities for training teachers of primary schools are recognized to be entirely inadequate, and a comprehensive scheme has been prepared in order to improve the quality and increase the supply of trained teachers.

6. **Professional and technical education.**—The demand for men trained in mechanical, electrical and mining engineering, due to the industrial development of the country during the war, led to a large increase in the number studying those courses at the Sibpur College, while there was a falling off in the number of candidates for admission to the civil engineering classes: there were not even enough to form a first year sub-overseer class. Not only are the mining, mechanical and electrical engineering classes more popular, but they are reported to attract students of a better type and greater promise. A scheme for linking up the apprenticeship system of railway and other workshops with the mechanical and engineering classes has been prepared and is now under consideration. Applications for admission to the Government Weaving Institute at Serampore continued to be largely in excess of the accommodation, and there was an improvement in the qualifications of the candidates. There were five weaving schools at outlying centres, and a scheme of peripatetic instruction has been started to supplement the work done at them. The popularity of the Government Commercial Institute in Calcutta, where the number of students fell to 116 in 1915-16, appears to have revived, 64 pupils joining the day classes and 207 the evening classes. Law continued to be as popular as ever, the attendance in law colleges and classes rising to 3,054, or approximately one-seventh of the number studying in arts and science in arts colleges.

7. **Education of Indian girls and women.**—The steady though slow expansion of female education continued, the number of public institutions rising to 10,189 and the number of girls under instruction to nearly 300,000. The actual increase in the latter was 14,000, of which the Muhammadans contributed 10,000 and the Hindus 4,000. There is now one Muhammadan girl to every five Muhammadan boys at school, and the Muhammadan girls receiving education are nearly as numerous as those of the Hindu community.

The great majority of the girls and women are in the primary stage of education, and there are numerous types of schools at which elementary education is given, such as model primary schools, urban schools, panchayati union schools, peasant schools and home schools conducted by elderly *zenana* ladies in their own homes. In addition to this, *zenana* education is given by *zenana* teachers specially engaged for the purpose. It is interesting to observe that a scheme which aimed at giving secondary education on lines different from those followed in boys' schools was introduced on an experimental basis for three selected schools under mission management but proved popular in only one school. Needlework is said by the Director to have received "a great impetus" in Eastern Bengal owing to the popularity of the Lady Carmichael diploma examination.

The chief needs at present are the provision of adequate rates of pay for teachers, facilities for training them, the strengthening of the female inspecting agency and the improvement of the schools themselves. The majority of the girls' primary schools are inefficient and badly housed, while local bodies, with inelastic incomes and growing demands on their resources, have not the means to make them efficient or to provide proper accommodation. Many schools are unable to maintain whole-time teachers; in others the salaries of teachers are so inadequate that the profession offers little attraction. Trained female teachers are necessary to replace the old and often inefficient *pandits* employed in girls' schools. Few teachers, however, will undergo training unless they are assured of an adequate pay; as in the case of male teachers, improvement in teaching capacity cannot be effected till a premium is put on the

services of those who are trained. Schemes for the establishment of training classes have been prepared, but want of funds has hitherto precluded their execution, and the same difficulty has prevented the introduction of other reforms. With the help, however, of the 9 lakhs grant given by the Government of India, the pay of whole-time teachers in girls' primary schools, aided by the District Boards, has been increased by Re. 1 a month, and a considerate portion of the subvention of 5½ lakhs recently given by that Government is to be devoted to the advancement of female education. This subvention enables the Government of Bengal to increase the pay of teachers in girls' schools in Municipal areas by Rs. 2 a month and in District Board areas by another rupee a month, to establish each year two model primary schools with quarters for female teachers and 30 panchayati union schools, to add to the female inspecting agency, and to establish in Calcutta, on an experimental basis, a school for training Moslem women teachers.

8. **Education of Europeans.**—There were 62 schools for general education and 18 for special instruction attended by 10,046 pupils, viz., 9,561 Europeans and Anglo-Indians and 485 non-Europeans. It is regrettable that more than half of the total number of teachers should be untrained, but at present there is only one institution in the Presidency for the training of female teachers and none for the training of male teachers. An attempt was made during the year, under the joint auspices of the Diocesan Board and the Young Women's Christian Association and with the assistance of the Education Department, to improve the technical qualifications of teachers, lectures being given for the benefit of the less qualified teachers in schools in Calcutta, and examinations in the theory and practice of teaching being held at the end of the course. The result was encouraging, and it is intended to continue the scheme. An endeavour is being made to develop the teaching of domestic science in girls' schools. At Dow Hill Girls' School a special domestic science block was started, the subjects being made compulsory for all girls in the upper classes; and a scheme for the upper classes of all grades of schools has been prepared.

9. **Education of Muhammadans.**—The aggregate number of Muhammadans at school and college rose to 899,679, or 46 per cent. of the total number of all creeds. The Muhammadans are still largely outnumbered in the arts colleges, where they represent only 10 per cent. of the students, and the ratio is only 7 per cent. in professional colleges and in law colleges and classes. It is considerably higher, however, in some Government arts colleges, being 21 per cent. at Dacca and 19 per cent. at Rajshahi. In order to secure to Muhammadans a fair number of vacancies in colleges and schools, orders have issued reserving for those who are qualified for admission 25 per cent. of the admissions to Government and aided arts colleges, while a prescribed proportion of places, rising in some cases to 50 per cent., has been reserved in every Government high school. At present Muhammadans account for one-fifth of the pupils in high schools and for one-third in middle schools, while the proportion rises to a half in primary schools. There was a small decrease in the number reading in secondary schools, which is attributed to Muhammadan agriculturists being compelled by straitened circumstances to withdraw their sons. The attendance at *madrasahs* rose slightly and there was a substantial increase of 34,000 in the attendance at *maktabs*.

The difficult question of housing Muhammadan students in Calcutta under suitable conditions was partly solved by the establishment of the Carmichael hostel and by the addition of two wings to the Baker hostel.

10. **General.**—To Mr. W. C. Wordsworth, who officiated as Director of Public Instruction, throughout the year, Mr. Hornell being on deputation as a member of the Calcutta University Commission, the thanks of the Governor in Council are due for his careful administration of the Department.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

RESOLUTION REGARDING AMENDMENT OF THE LAW FOR FACILITATING THE EXECUTION OF SMALL WORKS OF IRRIGATION AND DRAINAGE.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Land Revenue Branch.

CALCUTTA, THE 11TH MARCH 1919.

RESOLUTION—No. 2324L.R.

IN the Bengal Presidency, especially the Burdwan and Presidency Divisions, it is well known that there is a considerable demand for the execution of drainage projects for sanitary as well as agricultural purposes. The legal mechanism for such projects is contained in various Acts :—the Bengal Tenancy Act, the Land Improvement Loans Act, the Embankment Act, the Drainage Act, and the Sanitary Drainage Act ; but it cannot be said that any of these Acts provides machinery, which is both simple and effective. The application of the Embankment Act is limited ; the procedure of the Drainage Act is too cumbrous ; and the Sanitary Drainage Act, as its name implies, cannot be utilized for purely agricultural projects, in which questions of public health are not raised. Even if the Sanitary Drainage Act were applicable, its provisions as regards initiation are unsatisfactory, and as regards recovery of costs its arrangements are too rigid.

2. With the object of eliciting public opinion in the matter, the Bengal Government consulted their officers and several public bodies in May 1918, and the replies which have been received reveal a consensus of opinion that there is the need for alteration of the law. Opinions are divided as to whether such legislation should take the form of an amendment of the existing Sanitary Drainage Act, or whether an entirely new Act should be devised. The Governor in Council is provisionally of the latter opinion ; and, further, believes that it would be advantageous that the whole law on the subject should be consolidated ; that only essentials should form part of an Act, while details of procedure should be left to rules. He desires, therefore, that the whole subject should be examined by an expert committee. The main points which should obviously be covered are the following :—initiation ; preparation of a preliminary scheme ; final publication ; execution of scheme ; apportionment and recovery of cost ; control and maintenance. The Governor in Council, accordingly, directs that a committee consisting of the following gentlemen be convened :—

President.

The Hon'ble Mr. C. J. Stevenson Moore, C.V.O., I.C.S.

Members.

The Hon'ble Mr. F. A. A. Cowley, Chief Engineer, Irrigation Department.
The Hon'ble Mr. L. S. S. O'Malley, C.I.E., I.C.S., Secretary, Municipal Department.
The Hon'ble Mr. H. P. Duval, I.C.S., Legal Remembrancer.
The Hon'ble Mr. M. C. McAlpin, I.C.S., Secretary, Revenue Department.
The Hon'ble Raja Hrishikesh Laha, C.I.E., Chairman, District Board, 24-Parganas.

Members.

Mr. W. S. Hopkyns, O.B.E., I.C.S., Collector, Mymensingh, formerly of Howrah district.

Raja Manilall Singh Roy, Chairman, District Board, Burdwan.

Rai Biswambhar Rai Bahadur, M.R.E., Vice-Chairman, District Board, Nadia.

Babu Atal Bihary Sinha, Vice-Chairman, District Board, Midnapore.

Babu Hem Chandra Chatarji, Deputy Collector, 24-Parganas.

Secretary.

Mr. F. D. Ascoli, I.C.S., Secretary, Board of Revenue, Bengal.

The Committee will be requested to consider the material that has already been collected, and to advise Government on the legislation which is desirable to promote all types of drainage projects ; and, if they consider that a new Act should be passed, to submit a preliminary draft of the same together with proposed rules under the Act. It is hoped that it will be possible to place the report of the Committee in the hand of Government by the 30th June 1919.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE ROYAL COMMISSION ON THE PUBLIC SERVICES IN INDIA.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Miscellaneous.

CALCUTTA, THE 11TH MARCH 1919.

RESOLUTION—No. 2342Mis.

READ—

The Report of the Royal Commission on the Public Services in India.
Report on Indian Constitutional Reforms.

THE recommendations of the Public Services Commission made in Annexure I, concerning the Agricultural Department, are under the consideration of the Governor in Council and this Resolution is published in order to give the public interested an opportunity of expressing their views on the more important questions affecting the recruitment of the Indian and Provincial Agricultural Services and their salaries and allowances.

2. The three main problems which require consideration are the following :—

(1) The percentage of recruitment of Indians for the Imperial Agricultural Service ;
(2) the method of recruitment of officers for the Provincial Agricultural Service ; and
(3) the pay of the services.

3. The Royal Commission considered that every effort should be made to meet the normal requirements of the Imperial Service within a reasonable time by recruitment in India. They accordingly recommended that at the outset not less than one-half of the vacancies in the two branches into which the service is divided should be filled by statutory natives of India appointed in India. These two branches are the teaching and research and the agricultural branch proper. On the teaching and research side, recruits in India would be chosen who had gone through an advanced course at the Pusa Research Institute. On the agricultural side, recruits would be selected both from persons who had, amongst other qualifications, a University degree in science or a diploma of a recognised school of agriculture, and from members of the Provincial Service. The Commissioners were not, however, unanimous in their recommendations. It was pointed out by Sir Murray Hammick and Mr. (now Sir Frank) Sly in a note of dissent that the department was still in its infancy and the staff limited; that an enormous field had to be explored; and that there were great and promising possibilities in it for the advancement of Indian agriculture. In their opinion it was therefore necessary that the staff should be selected from candidates with the highest qualifications, but they did not consider that in the present state of agricultural education in India suitable candidates would be available in sufficient numbers. From this point of view, every effort should be made to obtain the best men available, whether European or Indian. Therefore, though it is desirable to Indianize the service, it may be argued that it is premature to lay down any rigid rules regarding the proportion of Indian recruitment, until the efficacy of the higher grade agricultural educational institutions in this country and their powers of attracting a suitable stamp of men have been proved.

4. But, whether a rigid proportion for the recruitment of Indians is laid down or not, it is clear that in order to give practical effect to the desire to

Indianize the service, some mechanism must be provided for utilising the educational institutions in this country for the instruction of the Indian recruit. It has therefore been suggested that the post-graduate courses, which have been opened at Pusa in agricultural chemistry, economic botany, mycology, entomology and agricultural bacteriology for training up to the highest standard, should be made available for this purpose. Not only would they be thrown open to selected students of provincial agricultural colleges with a view to their qualifying for posts in the agricultural branch proper, but also to distinguished graduates in science from Arts colleges who may be desirous of pursuing a particular branch of research with a view to appointment in the research branch. The Governor in Council wishes, however, to know whether students of either class are likely to avail themselves of these post-graduate courses.

5. The Commission recommended that the Provincial Service, which in this Presidency is composed at present of six posts of Superintendents should be ordinarily recruited direct and not by promotion of qualified subordinates. They, therefore, recommended that each provincial college should provide the necessary material for the instruction of students up to the standard required for direct admission to that service. In the case of Bengal there is an Inter-provincial college at Sabour, in the district of Bhagalpur. On the other hand, it may be argued that the department is undeveloped; the numbers in the Provincial Service are small; and that no amount of theoretical training can take the place of practical training in such a service as the Agricultural Service. It can, therefore, be urged that the recommendation goes too far in removing opportunities for advancement from a larger class of subordinates, who have distinguished themselves by practical work.

6. For the pay of Imperial Agricultural Officers recruited in India the Commission has recommended a scale of Rs. 350—35—1,050 a month. and for those recruited in Europe Rs. 500—50—1,500 a month. An alternative suggestion has, however, been made that, instead of a separate scale being fixed for the pay of officers recruited in Europe, an "overseas allowance" in addition to the pay fixed for Indian recruits should be given to them. This suggestion is in conformity with the recommendation made in paragraph 322 of the report of His Excellency the Viceroy and the Secretary of State on the Reforms. For Directors of Agriculture the Commission recommended a scale of Rs. 1,500—50—1,750. But it has been urged that in view of the high cost of living in Bengal this scale is inadequate for the Director of Agriculture of this province. The Commission recommend that the normal scale of salary in the Provincial Service should be Rs. 250—$\frac{40}{3}$—450—$\frac{50}{3}$—500 with a probationary rate of Rs. 150 a month and a limited number of selection posts carrying higher rates of salary according to need.

7. His Excellency in Council does not propose to deal specially with the other matters dealt with in the Commission's Report, so far as the agricultural services are concerned. It is requested that any remarks or criticisms which any person or body of persons interested may desire to offer, may be forwarded to the Revenue Secretary to the Government of Bengal, not later than the 1st April 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information and a copy sent to the leading associations in Bengal.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 8th March 1919.

Summary.—During the week light but scattered showers fell in some districts. Lands are being prepared for the cultivation of jute and *aus* paddy. The prospects of standing crops are generally reported to be unfavourable. The average price of common rice has risen by 1·5 per cent. as compared with that of the previous week. Distress prevails in Bankura and Brahmanbaria subdivision of the Tippera district. Gratuitous relief is being granted to 1,427 persons in Bankura. Agricultural loans are also being distributed in both the districts. About 3,040 and 500 persons are being put to relief work in Bankura and Tippera, respectively.

Serial No.	Districts and subdivisions	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta Block* in certain selected articles during the months of April, 1918 to January, 1919, as compared with the corresponding period of 1917-18 and 1916-17. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April, 1918 to January, 1919, amounted to 12,675,000 maunds as against 11,175,000 maunds in the corresponding period of the preceding year,—an increase of 13 per cent. There was an increase (15 per cent) in the imports of coal and coke (72,370,000 maunds as against 62,653,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 57 per cent, the total value amounting to Rs. 4,94,63,000 as against Rs. 3,14,72,000 last year. The quantity of indigo imported during the months of April, 1918 to January, 1919, decreased by 6,000 maunds, or 28 per cent, to 15,000 maunds. The imports of raw jute amounted to 4,283,000 bales as against 3,816,000 bales,—an increase of 12 per cent. The importations of gunny bags also showed an increase of 4 per cent (366 million bags as against 351 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 77 per cent from 3,665,000 maunds to 6,492,000 maunds. The imports of tea decreased by 19 per cent from 3,375,000 maunds to 2,724,000 maunds.

Exports.—The exports of cotton piece goods, foreign, from Calcutta* by all routes during the months of April, 1918 to January, 1919 increased by 7 per cent (Rs. 20,86,92,000 as against Rs. 19,40,30,000 last year). The exports of gunnybags (including the exports by sea to foreign countries) decreased from 1,161 million bags to 1,066 million bags, but the shipments of gunny bags to other Indian ports increased from 20 millions to 31 millions in number in the period under review. The quantity of kerosine oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 4,694,000 maunds to 4,017,000 maunds, or by 14 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

CALCUTTA, *the 31st March 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 27th March 1919.

Summary.—There was practically no rain throughout the Presidency. Preparation of lands for jute and paddy is being greatly retarded owing to continuous drought. Harvesting of spring crops continues. The condition of standing crops is generally reported to be unfavourable. The average price of common rice remains almost stationary. Distress continues to prevail in Bankura and Brahmanbaria subdivisions of the Tippera district. In Bankura 3,449 persons were in receipt of gratuitous relief and 4,415 persons were engaged in District Board work. In Brahmanbaria Rs. 1,11,665 has been distributed as agricultural loans up to date and 1,289 persons worked daily on an average in test works.

Serial No.	District and subdivisions.	Rainfall.	Price of common rice, in seers per rupee. This week.	Price of common rice, in seers per rupee. Previous week.	Character of the weather, condition of crops, etc.

AMENDMENT OF THE STATUTES OF THE STATE MEDICAL FACULTY OF BENGAL TO ALLOW STUDENTS OF RECOGNISED MEDICAL COLLEGES IN AMERICA TO APPEAR AT THE EXAMINATIONS OF THE FACULTY.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Medical Branch.

CALCUTTA, THE 7TH APRIAL 1919.

RESOLUTION—No. 1094Medl.

READ—

This Government Resolution No. 2545Medl., dated the 11th August 1914, and the Statutes of the State Medical Faculty of Bengal published therewith.

In the Resolution cited in the Preamble Government sanctioned the creation of State Medical Faculty in Bengal for the purpose of conducting examinations of medical students and of granting them diplomas of Membership or Licentiateship of the Faculty, with a view to their registration under

the Bengal Medical Act VI of 1914. In paragraph 6 of the Statutes referred to in the Preamble it is provided that the Governing Body of the State Medical Faculty shall arrange to hold at regular intervals examinations in all the recognised subjects of a complete medical curriculum for the admission of Members and Licentiates to the Faculty and in paragraph 7 thereof it is stated that only students, who undergo a course of study in medical science in Government medical schools or colleges or in schools or Colleges, which have been recognised in this behalf by the Bengal Council of Medical Registration, shall be allowed to present themselves for examination for Membership and Licentiateship of the Faculty. The Governing Body of the State Medical Faculty, at the instance of the Bengal Council of Medical Registration, now recommend that students, who have completed their courses of study in American medical schools or colleges, and obtained degrees of Doctor or Bachelor of Medicine or Surgery of an university in America recognised by the conjoint Examining Board of the Royal College of Physicians of London and the Royal College of Surgeons of England for the purpose of admission to their examination, may be allowed to come up for the Final Membership or the Final Licentiateship Examination of the Faculty, so that on their successfully passing one of these examinations they may be eligible for registration under the Bengal Medical Act, 1914. The Governor in Council accepts the above recommendation and directs that the following addition be made to the Statutes of the Faculty after paragraph 7 thereof :—

"8. Any Doctor or Bachelor of Medicine or Surgery of a University in America, recognised from time to time for the purpose of admission to their examination by the conjoint Examining Board of the Royal College of Physicians of London and the Royal College of Surgeons of England, who shall have passed such an examination or examinations at his University as shall comprise the subjects of the Primary, Intermediate and Final Examinations for the Membership or Licentiateship of the State Medical Faculty of Bengal, and who shall have completed the curriculum of medical study required by the rules in the schedule attached to these Statutes, shall be eligible for admission to the Final Examination for the Membership or Licentiateship of the Faculty, on payment of the prescribed fee and on production of his diploma. Any such candidate who shall have passed the Final Examination shall be entitled to receive the diploma of Member or Licentiate of the Faculty as the case may be."

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* for general information.

Ordered also that a copy of the Resolution be forwarded to the President of the State Medical Faculty of Bengal for information and guidance.

J. DONALD,

Secy. to the Govt. of Bengal

RESOLUTION ON THE REPORT OF THE ROYAL COMMISSION ON THE PUBLIC SERVICES IN INDIA.

GOVERNMENT OF BENGAL.

COMMERCE DEPARTMENT.

CALCUTTA, THE 1ST APRIL 1919.

RESOLUTION—No. 1505Com.

READ—

The Report of the Royal Commission on the Public Services in India.

THE Governor in Council has recently had under consideration the recommendations of the Royal Public Services Commission in respect of the Factory Inspection Department as contained in annexure V of their Report. This department was reorganised in 1912 as a result of the report of the Indian Factory Labour Commission, and the new scheme had been in operation for a short time only when the Public Services Commission made their enquiry. The Commission have in consequence suggested but few alterations in regard to this department. The Governor in Council, however, takes this opportunity of inviting the public to express their opinion on the proposals before he arrives at a final decision in the matter.

2. The Commission were of opinion that the inspection of factory work, in order to be efficiently done, (1) does not essentially require previous experience in Europe, and (2) is not such as necessarily to demand the appointment of Europeans, with the consequence that the department should be thrown open to Indians. They recommend that Inspectors of Factories should ordinarily be recruited in India after advertising vacancies, but that recruitment should not necessarily be confined to natives of India; further that, only if no qualified candidate is procurable locally should steps be taken for the appointment of officers from Europe, the selection being made after advertisement and with the advice of the Home authorities.

3. The Commission approved the existing arrangements by which candidates for inspectorships are expected to have a liberal education, and, in addition, a good theoretical training in engineering together with a thorough practical training in mechanical engineering; also to possess a general knowledge of the principles of sanitation. In the case of selections in India the Commission thought that it would suffice if candidates had practical experience of factories in this country and they did not consider that in their case experience in Europe was necessary.

4. All new officers, according to the Report, should be required to undergo a period of two years' probation before they are confirmed in their appointments, and further all Inspectors of Factories should be made to pass a colloquial test in the vernacular of a higher character than is ordinarily enforced in Government departments.

5. The present scales of pay of the Chief Inspector and other Inspectors of Factories in Bengal (who are all Europeans) are Rs. 800—50—1,000 and Rs. 400—30—700, respectively. The Commission considered that the salary of the Chief Inspector of Factories should be fixed at Rs. 1,000—50—1,250, whether he be a European or a statutory native of India, that the other (junior) Inspectors of Factories, if recruited in Europe, or if recruited in India, but not being statutory natives of India, should be graded on a scale of Rs. 400—30—900, and that a separate scale, viz., Rs. 300—25—700, should be allowed to statutory natives of India recruited locally.

6. In the matter of leave the Commission recommended that in future all (junior) Inspectors of Factories appointed at the higher of the two rates of pay should be allowed leave under the European service leave rules, while the Indian service leave rules should be applicable in the case of

others. The ordinary pension rules should apply to the whole of the Factory Inspection Department, subject to the proviso that Inspectors should be allowed to reckon as service qualifying for superannuation pension the number of complete years by which their ages at the time of appointment exceeded 25 years. The existing general practice in the department to recruit only such persons as are not more than 30 years of age should be made absolute.

7. As the Government of India desire to be furnished with the views of the Local Government as early as possible, it is requested that any criticisms or remarks which any persons or public bodies interested may desire to offer may be submitted to the Secretary to the Government of Bengal, Department of Commerce and Industry, not later than the 1st May 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

J. DONALD,

Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 3rd April 1919.

Summary.—With the exception of the Chittagong Division there was practically no ain throughout the Presidency where it is badly wanted for agricultural operations. Iarvesting of spring crops continues. The condition of standing crops are reported o be fair in some places. The average price of common rice has risen by 2 per cent.)istress continues to prevail in Bankura and Brahmanbaria subdivisions of the Tippera istrict. In Bankura 5,885 persons are already in receipt of gratuitous relief and 4,369 ersons are engaged on District Board work. In Brahmanbaria Rs. 1,59,953 has been istributed as agricultural loans up to date and 1,584 persons worked daily on an average n test works.

erial No.	District and subdivisions.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

		Inches			
1	24-PARGANAS	Nil	$6\frac{3}{4}$	$6\frac{3}{4}$	Land is being cultivated for the next crops. Rice is being imported into Calcutta in large quantities from Basirhat. Fodder and water are sufficient.
	Diamond Harbour.	(n)	(n)	$7\frac{1}{4}$	
	Barrackpore	Nil	6	6	
	Barasat ...	Nil	8	8	
	Basirhat ...	Nil	8	8	
2	NADIA ...	Nil	$6\frac{7}{16}$	$6\frac{5}{8}$	Lands are being prepared for *bhadoi* paddy. Rain is urgently wanted. Harvesting of *rabi* crops is almost finished. Prospects of standing crops are not favourable. Fodder supply is sufficient.
	Kushtia ...	Nil	7	7	
	Meherpur ...	Nil	$6\frac{3}{4}$	7	
	Chuadanga ...	Nil	$7\frac{1}{2}$	$7\frac{1}{2}$	
	Ranaghat ...	Nil	$6\frac{1}{2}$	$6\frac{1}{2}$	
3	MURSHIDABAD	Nil	7	7	Weather hot and dry. Prospects of standing crops are fair. Sowings of jute and autumn paddy have commenced and that of *til* has been finished; rain is wanted for further progress. Harvesting of *rabi* crops, wheat and sugarcane continues. Wheat is reported to be in better condition; harvesting and threshing are proceeding quickly. Harvesting of the crop will be completed within a fortnight and a fair yield is expected. There has been no change in the area last reported. Fodder is sufficient. No large import. Export of rice and pulses continues.
	Lalbagh ...	Nil	$6\frac{1}{2}$	(n)	
	Jangipur ...	Nil	7	7	
	Kandi ...	Nil	$7\frac{1}{2}$	$8\frac{1}{2}$	
4	JESSORE ...	Nil	$7\frac{1}{2}$	$7\frac{1}{2}$	Weather seasonable. Rain is badly wanted for agricultural operations. Standing crops are also suffering for want of rain. Lands are being prepared for jute and *aus* paddy. Fodder and water are sufficient.
	Jhenidah ...	Nil	9	$8\frac{1}{2}$	
	Magura ...	Nil	8	$7\frac{1}{2}$	
	Narail ...	Nil	$7\frac{1}{2}$	$7\frac{1}{2}$	
	Bangaon ...	Nil	7	7	
5	KHULNA ...	Nil	7	7	Lands are being prepared for jute and *aus* paddy. Fodder and water are sufficient.
	Satkhira ...	Nil	$7\frac{9}{16}$	8	
	Bagerhat ...	Nil	8	8	

(n) Not reported.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
6	BURDWAN ...	Nil	6¾	7	Weather warmer. Pressing of sugarcane and harvesting of wheat and other *rabi* crops are going on. Rain is urgently needed for vegetables. Ploughing of lands is being retarded for want of soil moisture. The export of rice is depleting the stocks, keeping the prices high, and is affecting the labourers and poor non-agricultural classes. Scarcity of water is reported from Mangalkot and Katwa.
	Asansol ...	Nil	6½	(*n*)	
	Katwa ...	Nil	7¼	7 7/16	
	Kalna ...	Nil	6⅝	6 15/16	
7	BIRBHUM ...	Nil	6	6	Pressing of sugarcane continues. The standing crops are doing well. Fodder and water are sufficient. Cattle-disease is reported from thana Nalhati.
	Rampurhat	Nil	7	7	
8	BANKURA ...	Nil	6¾	7	The *rabi* crops are in good condition. Cutting of sugarcane is finished. Stock of rice is sufficient. The export of rice has greatly increased. Fodder is sufficient but dear. Scarcity of water is prevalent at places. Distress continues. Land improvement and agricultural loans are being given: 5,885 persons are receiving gratuitous relief; 2,484 males, 1,525 females and 360 children are on District Board works in thanas Taldangra, Chatna, Simlapal, Ranibandh and Indpur. Emigration of labourers is proceeding to a small extent.
	Vishnupur ...	Nil	7¼	7¼	
9	MIDNAPORE	Nil	6	6 7/16	Fodder supply is sufficient. Water is sufficient except in some places at Contai. Prospects of tobacco and summer rice are fair. The outturns of linseed, rape and mustard are not good. Planting of sugarcane is going on. The general agricultural situation is fair.
	Ghatal ...	Nil	7¼	7¼	
	Tamluk ...	Nil	6½	6½	
	Contai ...	Nil	8	8	
10	HOOGHLY ...	Nil	6	6¼	The effect of weather is unfavourable. Rain is needed. The export of paddy is going on, the price is rising at Sadar. Fodder is sufficient. Cattle-disease is reported from Dadpur and Palba thanas.
	Serampore ...	Nil	6¼	6¼	
	Arambagh ...	Nil	7¼	(*n*)	
11	HOWRAH ...	Nil	6½	6½	Weather hot. The *boro* paddy is suffering for want of rain. Rain is wanted for ploughing. Pressing of sugarcane is nearly over. Fodder is sufficient.
	Ulubaria ...	Nil	6½	6¼	
12	RAJSHAHI (RAMPUR-BOALIA).	Nil	6½	6½	Prospects of standing crops are fair. Fodder is sufficient.
	Naogaon ...	Nil	(*n*)	6¾	
	Nator ...	Nil	7	7	

(*n*) Not reported.

Serial No.	District and subdivisions.	Rainfall.	Price of common rice in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
13	DINAJPUR ...	Nil	$7\frac{3}{16}$	7	Rain is badly wanted for cultivation of lands. Prospects of standing crops are fair. Scarcity of fodder is reported from Banshihari, Kushumundi and Itahar police-stations.
	Thakurgaon	Nil	9	9	
	Balurghat ...	Nil	7½	7½	
14	JALPAIGURI	Nil	7	7	Prospects of standing crops are fair. Rain is badly wanted. Fodder is sufficient.
	Alipur ...	Nil	7	7	
15	DARJEELING	0·07	6¾	6½	Weather seasonable. Wheat and sugar-cane are being harvested. Sowing of maize and potatoes are going on and they are growing at places. Cattle-disease is prevalent. Fodder and water are sufficient.
	Kurseong ...	Nil	6	6½	
	Siliguri ...	Nil	7	7	
	Kalimpong ...	Nil	6½	7	
16	RANGPUR ...	Nil	7	8	Weather seasonable. Sowing of jute and paddy is in progress in Gaibandha, Kurigram and Nilphamari, but is being retarded in the Sadar subdivision for want of rain. The price of rice is rising. Prospects of tobacco are good. Fodder and water are sufficient.
	Nilphamari	Nil	7½	7½	
	Kurigram ...	Nil	7¾	8	
	Gaibandha ...	Nil	7	7	
17	BOGRA ...	Nil	7	7	Agricultural operations are being retarded for want of rain. Jute and *aus* plants are withering in places. Fodder and water are sufficient except in flooded area.
18	PABNA ...	Nil	6¼	6¼	Agricultural operations are being retarded by continuous drought. Fodder is sufficient.
	Sirajganj ...	Nil	6½	6½	
19	MALDA ...	Nil	6½	6½	Weather hot and occasionally cloudy. Rain is badly wanted for agricultural operations. Export of rice and paddy is going on. Cattle-disease is reported from Gomastapur, Bholahat and English-bazar thanas. Fodder and water are sufficient.
20	COOCH BEHAR	Nil	6⅝	8	Cutting of tobacco leaves and harvesting of wheat continues. Sowing of *bitri* paddy and jute has commenced. Fodder and water are sufficient.
21	DACCA ...	0·00	6½	6¾	Weather extremely hot and dry, though somewhat cool at night. Sowing of jute and paddy is being retarded for want of rain. Prospects of *boro* rice and other standing crops are fair. Fodder is sufficient. There is insufficiency of water in certain parts of Narainganj and Sadar (north) subdivision.
	Manikganj ...	Nil	6½	6½	
	Narayanganj	Nil	6¾	6¾	
	Munshiganj*	(n)	6⅝	6¾	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

(n) Not reported.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches.			
22	MYMENSINGH	Nil	6½	7⅜	Continuous drought is seriously affecting the outturn of *boro* rice and is retarding the preparation of lands for and sowing of jute and autumn paddy.
	Jamalpur ...	Nil	8	8	
	Tangail ...	Nil	6⅜	6⅜	
	Netrakona ...	Nil	6¾	6¾	
	Kishorganj...	(*n*)	(*n*)	6½	
23	FARIDPUR ...	Nil	6¾	6¾	Weather sultry. Rain is badly wanted for the sowing of jute and paddy. Harvesting of wheat is finished; outturn is fair. Cattle-disease continues in Sadar subdivision. Fodder is available.
	Goalundo ...	Nil	7	7	
	Madaripur ...	0·04	6¾	6¾	
	Gopalganj*...	Nil	6½	6½	
24	BAKARGANJ (BARISAL).	0·40	7	7	Prospects of standing crops are good. Fodder is sufficient.
	Pirojpur ...	Nil	7	7¼	
	Patuakhali...	(*n*)	(*n*)	7	
	Dakshin Shabazpur (Bhola).	0·35	7	7	
25	CHITTAGONG	1·20	7	7½	Prospects of standing *rabi* crops are fair. Cultivation of *boro* rice is going on. *Panga* salt is selling at 13 seers per rupee at Sadar. Fodder is sufficient.
	Cox's Bazar	(*n*)	(*n*)	9	
26	TIPPERA (COMILLA).	1·01	6½	7	Weather hot. More rain is wanted. Prospects of *rabi* crops are bad. Stocks of rice and fodder are inadequate in Brahmanbaria and Chandpur subdivisions: Rs. 1,59,953 has been distributed as agricultural loans in Brahmanbaria subdivision up to date where 1,240 men, 194 women and 150 children worked daily on an average in test works. Cattle-disease is reported from Brahmanbaria and Sadar subdivisions.
	Brahmanbaria.	Nil	$7\frac{1}{9}$	7⅜	
	Chandpur ..	0·41	7	7	
27	NOAKHALI ...	1·18	7	7½	Weather seasonable. The recent rain has faciliated the sowing of jute and *aus* paddy. Prospects of standing crops are improving. Fodder is not sufficient in Feni subdivision. The prices have tendency of further rising.
	Feni ...	1·32	$7\frac{13}{16}$	8¼	
28	CHITTAGONG HILL TRACTS.	2·01	8	8	Prospects of standing crops are fair. *Jhum* burning continues. Fodder is sufficient.

* The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.

(*n*) Not reported.

CONTENTS.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR MARCH 1919.

I. **Character of the season.**—During the month the rainfall was everywhere below the normal. The usual statement is given below.

II. **Progress of agricultural operations.**—The harvesting of the spring crops and the preliminary field operations for the next autumn paddy and jute-crops were in progress. Sowings of paddy and jute were considerably retarded owing to lack of soil moisture.

III. **State of standing crops.**—The general condition of the unharvested spring crops was reported to be unsatisfactory.

IV. **Prospects and probable outturn.**—The outturn of the different spring crops is estimated to be much below normal. The prospects for the jute and broadcasted rice crops have been affected by the delay in sowings due to the continued dry weather.

V. **Damage to standing crops.**—No reports of damage to standing crops have been received during the month.

VI. **Condition of agricultural stock.**—The condition of live-stock was reported as fair. Cattle-disease was reported from places in the districts of the 24-Parganas, Murshidabad, Burdwan, Midnapur, Dinajpur, Darjeeling, Rangpur, Malda and Faridpur.

VII. **Failure of pasturage and fodder.**—The supply of fodder is reported to be insufficient in parts of Dinajpur and Bogra also in the Brahmanbaria and Chandpur subdivisions of Tippera and in the Feni subdivision of Noakhali. In Bankura, although the supply is reported to be adequate, prices for fodder rule high.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review the price of common rice rose in thirteen districts, fell in two and remained stationary in the rest, varying from 8 seers a rupee in the districts of Khulna, Jalpaiguri, Mymensingh and Jessore to 6½ seers a rupee at Rajshahi.

IX. **Condition of agricultural people.**—The condition of agricultural population was reported to be fair, but distress cont[illegible]l to prevail in Bankura and in the Brahmanbaria subdivision of Tippera. The necessary relief measures have been taken in hand.

S. MILLIGAN,
Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 17th April 1919.

Summary.—During the week light showers fell in places. More rain is urgently wanted for field operations generally. The sowings of autumn paddy and jute are now steadily progressing. The harvesting of spring crops is nearly finished. The prospects of summer rice are not favourable. The average price of common rice for the province has remained stationary as compared with that of the previous week. Distress in Bankura continues to exist. Besides the grant of land improvement and agricultural loans to the distressed people in Bankura 7,186 persons were in receipt of gratuitous relief. The number of persons engaged in the District Board work was 2,691 males, 1,370 females and 219 children.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

RESOLUTION ON THE REPORT OF THE ROYAL COMMISSION ON THE PUBLIC SERVICES IN INDIA, RELATING TO THE REGISTRATION DEPARTMENT.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Registration.

DARJEELING, THE 26TH APRIL 1919.

RESOLUTION—No. 60T.R.

READ—

The Report of the Royal Commission on the Public Services in India.

THE recommendations of the Public Services Commission concerning the Registration Department are contained in Annexure XX to their report.

The Commission restricted their immediate proposals to the Madras Presidency, but they contemplated the extension of the Madras system of organisation to other provinces as circumstances permitted.

2. The question in so far as Bengal is concerned is whether, as in Madras, the district officers should be relieved of all their legal and routine duties connected with registration and their places should be taken by district registrars chosen from the Registration Department. Owing to the present nature of the constitution of the department in Bengal, it is only possible to introduce the scheme tentatively. The Governor in Council has accordingly, with the sanction of the Government of India, decided to introduce it as an experimental measure in a few districts for which competent district registrars can be found from amongst the existing district sub-registrars. The scheme will be tried at first in the districts of Midnapore, Mymensingh, Chittagong, Dinajpur and Murshidabad. One district in each of the five divisions in this Presidency has been chosen so that the trial may be made under different local conditions. The appointments of the five officers of the department selected as district registrars are being gazetted separately. Each of these officers will receive in addition to his pay as district sub-registrar a duty allowance of Rs. 100 per mensem for so long as he holds the appointment of district registrar.

3. The officers of the Registration Department who are appointed as district registrars will be directly subordinate to the Inspector-General of Registration. Neither the district officer nor, as a general rule, the inspectors of registration will have any duties under the Indian Registration Act, 1908 (Act XVI of 1908), in the selected districts. The new district registrars will, however, continue to perform the ordinary duties, which have hitherto been performed by district sub-registrars, as well as those prescribed by the Registration Act and the Registration Manual for district registrars, subject to such modification of executive detail as may be found necessary.

4. His Excellency in Council desires it to be understood that the scheme is an experiment and will be discontinued if it is not successful. If it proves a success, such additional appointments will be gradually made hereafter as there are men capable of filling them, but not otherwise.

ORDER.—Ordered that a copy of this Resolution be published for general information and a copy forwarded to the Inspector-General of Registration for information and guidance.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 746Edn.—The 22nd April 1919.—The following report of the Bruce Institution for the year 1918 is published for general information.

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

REPORT ON THE BRUCE INSTITUTION FOR THE YEAR 1918.

I. **Control.**—(1) During the year under review, Mr. A. Mercer, Inspector of European Schools, whose term of office had expired, was reappointed to be a Governor.

(2) The Rev. Father A. Gille, S.J., officiated as a Governor for a period of about eleven months, during the absence of the Rev. Father T. Van der Schueren, S.J., from India.

(3) The Institution suffered a great loss by the death of the Most Rev. Dr. G. A. Lefroy, Bishop of Calcutta, who as an *ex officio* Governor, took a keen interest in its affairs.

(4) The following were the Governors at the end of the year:—

The Honble the Chief Justice of Bengal ... }
The Most Rev. the Lord Bishop of Calcutta ... }
The Surgeon-General with the Government of Bengal } *Ex officio.*
The Chairman of the Calcutta Municipality ... }
The Director of Public Instruction (*Hony. Secretary*) }
The Hon'ble Mr. Justice Richardson.
The Ven. W. K. Firminger (Archdeacon of Calcutta).
The Rev. G. S. Henderson.
The Rev. Father T. Van der Schueren, S. J.
A. Mercer, Esq. (Inspector of European Schools).
James Wyness Esq.
F. J. Robins, Esq.

II. **Capital and Income.**—The capital of the Institution stood, as in the previous year, at Rs. 10,59,400 of which Rs. 10,46,200 are in the form of a 3½ per cent. stock-certificate of the year 1865. The balance, viz., Rs. 13,200, is in Government securities. The annual interest on the capital amounts to Rs. 37,079, which is kept in the Bank of Bengal. The year opened with a balance of Rs. 19,708-13-1, and closed with a balance of Rs. 28,311-13-5.

III. **Election to vacancies, &c.**—(1) The Governors having found it necessary for financial reasons to reduce the number of foundationers, there was no election during the year.

(2) Of the 19 girls who left during the year, 15 had attained the age of 17 years, the limit ordinarily allowed under the rules, 3 were withdrawn for various reasons before they had attained that age, and one was removed from the fund because she had been withdrawn from the school in which she had been placed without the consent of the Governors.

(3) Of the girls who were withdrawn during the preceding year, and in respect of whom reports have been received during the year under review, one is employed as a stenographer, one as a clerk and [illegible]st, and one as an assistant teacher in the Kindergarten Department of the Loreto Day School, Sealdah. Two girls are being trained as teachers—one at Dow Hill, Kurseong, the other at Naini Tal. One girl who joined the Medical College, Calcutta, three years ago has passed her third-year examination. Of the girls who were withdrawn during the year under review, one is learning shorthand and typewriting, and one has joined the Dufferin Victoria Hospital, Calcutta, to be trained as a nurse.

(4) At the close of the year there were 97 girls on the fund against 116 in the previous year. They were distributed as follows:—

Loreto Convent, Entally	... { Boarding School—14 / Orphanage —15 }	...	29
Calcutta Girls' High School	... ...	...	23
Pratt Memorial School	... .	...	10
LaMartinière for Girls	... ...	...	8
Calcutta Free School	... ...	...	4
St. Paul's Mission Home	... ...	...	3
St. Agnes' School, Howrah	... ...	...	1
Loreto Convent, Asansol	... ...	...	11
St. Andrew's Colonial Homes, Kalimpong	...	...	2
Protestant European School, Cuttack	... ...	...	2
St. Joseph's Convent, Cuttack	... ...	...	1
Dow Hill School, Kurseong	... ...	...	1
Wynberg School, Mussoorie	... ...	...	1
Temporarily at Home	... ...	...	1
	Total	...	97

(5) The following table affords particulars as to the class and denomination of the foundationers at the close of the year:—

Class.	Roman Catholics.	Church of England.	Non-conformists.	Total.
1. Orphans, or deserted by their parents	12	7	9	28
2. Fatherless, or motherless, or deserted by their fathers or mothers	27	17	14	58
3. Those who have both parents alive	4	5	2	11
Total ...	43	29	25	97

(6) The health of the girls was generally satisfactory. There were no deaths during the year.

IV. **Education and Maintenance.**—(1) The nature of the education given to the girls on the fund was generally that prescribed for elementary and higher elementary schools under the Code of Regulations for European Schools in Bengal, and in few cases that for secondary schools.

(2) The Governors have decided that henceforth an attempt shall be made to estimate the capacities of the wards at the age of 14 or 15, and that the school shall be requested to co-operate in this matter, so that if special training is found desirable to fit a ward to earn her living, necessary arrangements may be made in good time. They have also prepared, and distributed to schools, a pamphlet showing what appointments and prospects are open to Anglo-Indian girls.

(3) Six girls were sent up for the Cambridge Local Examinations held in December 1917, of whom two passed—one the Senior and one the Junior. Four were presented for the Elementary School Certificate Examination, of whom one passed. One passed the City and Guilds Examination in plain needle-work and plain cookery. Several appeared at the Cambridge Local Examinations held in December last; the results are not yet known.

(4) Under the rules a girl is not ordinarily allowed to remain on the fund after she has attained the age of 17 years, when a parting grant of Rs. 100 is generally given. In cases where special training is recommended, or they are preparing for higher examinations, some extension of the period of benefit is generally allowed. Two girls received extensions for training as children's nurses,—one as a sick nurse and one for domestic work. Two were granted extension for higher school examinations.

(5) The monthly average cost for the education and maintenance of each girl on the fund amounted to Rs. 19-3-4 against Rs. 18-12-4 in the preceding year.

(6) The amounts paid under the different heads of expenditure were as noted below:—

		1918.			1917.		
		Rs.	A.	P.	Rs.	A.	P.
Education and maintenance	...	26,738	3	0	29,739	4	0
Office establishment	...	864	0	0	840	0	0
Contingencies	...	65	9	0	80	5	0
Advertisement and printing	...	45	12	0	69	0	0
Cost of outfits	...	560	0	0	950	0	0
Other charges	...	127	15	0	184	8	0
Total	...	28,401	7	0	31,863	1	0

V. **Inspection.**—Mr. F. J. Robins was appointed Visiting-Governor for the first half, and the Hon'ble Mr. W. C. Wordsworth for the second half, of the year. Mr. Robins reports that he saw the children at work and at play, and that generally speaking they seemed happy and well contended with their surroundings. Also that most of them looked healthy though not robust, but that there were some cases of apparently delicate health. He recommends that more attention should be given to training them technically,—for dressmaking millinery, child-nursing, etc., and less to preparing them for examinations, which some of them year after year fail to pass. The inspection of the second half-year was left incomplete, as the influenza epidemic rendered it impossible in many cases. In consequence Mr. Wordsworth was reappointed Visiting-Governor for the first half of 1919.

VI. **Meetings.**—Three meetings were held during the year, but there were no resolutions of general importance calling for special mention.

CALCUTTA, *the 28th April 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 24th April 1919.

Summary.—The rainfall was general and seasonable throughout the Presidency. It has improved the prospects of the standing crops. The sowings of jute and autumn paddy continue in full swing. The average price of common rice has risen by 5 per cent. as compared with that of the previous week. Distress continues in Bankura where in addition to the grant of land improvement and agricultural loans to the distressed people, 7,576 persons are in receipt of gratuitous relief and 4,430 persons are engaged on District Board works. In the Brahmanbaria subdivision of the Tippera district 1,329 persons worked daily on an average in test works.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.

6	BURDWAN ...	(n)	(n)	6½	Weather cloudy and cold. Ploughing and manuring of lands for jute and *bhadoi* paddy are going on. The export of rice is keeping prices high and affecting the labourers and poor non-agricultural classes. Fruits and vegetables have been benefited by the rain. Stocks in Asansol are reported to be insufficient. Scarcity of water is reported from Katwa.
	Asansol ...	0·20	6	6½	
	Katwa ...	0·01	6⅝	7¼	
	Kalna ...	(n)	(n)	6⅛	
7	BIRBHUM ...	0·53	6	6	Manuring of fields continues. The standing crops are doing well. Fodder and water are sufficient. Cattle-disease is reported from thana Nalhati.
	Rampurhat	Nil	6	6½	
8	BANKURA ...	0·15	6	6¼	The prospects of standing crops are fair. Outturn of *rabi* crops is fair. Stock of rice is sufficient. Planting of sugarcane continues. The export of rice is decreasing. Fodder is sufficient. Scarcity of water is still prevalent at places. Distress continues. Land improvement and agricultural loans are being given: 7,576 persons are receiving gratuitous relief; 2,638 males, 1,525 females and 267 children are on District Board works in thanas Taldangra, Chatna, Simlapal, Ranibandh, Bankura and Indpur. Emigration of labourers is proceeding on a small extent.
	Vishnupur ...	0·16	6⅝	7	
9	MIDNAPORE	0·32	5⅞	6	Fodder supply is sufficient. Prospects of *rabi* crops, tobacco and summer rice are fair. Seed-beds are being prepared for transplanted autumn rice. The general agricultural situation is fair.
	Ghatal ...	0·47	8½	7¼	
	Tamluk ...	1·58	$5\frac{5}{16}$	5⅛	
	Contai ...	Nil	7½	7½	
10	HOOGHLY ...	1·27	5½	(n)	The effect of weather is favourable. Export of paddy continues as before. Price is rising quickly. Fodder is sufficient.
	Serampore ...	1·12	6	(n)	
	Arambagh ...	0·18	6½	(n)	
11	HOWRAH ...	1·69	6½	6½	Weather seasonable. Land is being prepared for jute. Condition of *boro* paddy is not satisfactory. Rainfall has been beneficial to vegetables. Fodder is sufficient.
	Uluberia	2·08	6½	6½	
12	RAJSHAHI (RAMPUR-BOALIA).	0·32	7	7	Rain is wanted. Prospects of standing crops are fair.. Fodder is sufficient.
	Naogaon ...	Nil	6¾	6¾	
	Nator ...	Nil	6½	6½	

(n) Not reported.

		Inches			
13	DINAJPUR ...	0·16	7 3/16	7 3/16	More rain is wanted for cultivation. Prospects of standing crops are fair. Fodder and water are sufficient.
	Thakurgaon	Nil	9	9	
	Balurghat ...	Nil	7½	(n)	
14	JALPAIGURI	0·28	7	7	Weather hot and cloudy. Sowing of jute and *bhadoi* paddy and export of rice are going on. Fodder is sufficient.
	Alipur	2·54	6	7	
15	DARJEELING	0·64	6½	6¼	The effects of the rainfall on the agricultural situation are fair. Wheat and barley are being harvested. Maize and potatoes are growing. *Marua* is progressing. Preparation of lands and sowing of jute crops have commenced. Stock of food-grains, fodder and water are sufficient. Prices of food-stuff are rising.
	Kurseong ...	0·45	6	(n)	
	Siliguri ...	0·03	7	7	
	Kalimpong ...	0·10	6	6½	
16	RANGPUR ...	0·14	7	7	Weather seasonable. The recent rainfall has been beneficial to the standing crops. More rain is urgently needed. Sowing of jute and paddy and their weeding are still going on. The prospects of *aus* paddy are fair. Stocks of food grains and fodder and water are sufficient.
	Nilphamari	0·30	7½	7½	
	Kurigram ...	0·50	7¾	7¾	
	Gaibandha ...	0·24	7	8	
17	BOGRA ...	1·04	7¼	7¼	Rain in western parts is much less. Agricultural operations and sowing of jute and *aus* paddy have been resumed. Hailstones and storms have caused some damage to standing crops in some parts of the district.
18	PABNA ...	[illegible]	6	6	Rainfall has facilitated the sowings of jute and paddy. Fodder is sufficient.
	Sirajganj ...	0·55	6½	6½	
19	MALDA ...	0·60	6	6½	Weather seasonable. Rain has facilitated the agricultural operations. Cattle-disease is reported from Gomostapur thana. Fodder and water are sufficient.
20	COOCH BEHAR	Nil	8	7¼	Weather occasional[illegible]. [illegible]owings of *bitri* pa[illegible] and jute continue and their weeding has commenced in Tufanganj. Cattle-disease is report[illegible] from Tufanganj. Fodder and wate[illegible] sufficient.
21	DACCA ...	[illegible]·48	5¾	6½	Weather hot and seas[illegible]ble with nor'-westers; it is fav[illegible]able to cultivation and sowing [illegible] *aus* paddy and jute. Prospects [illegible]o paddy and chillis are fair. Cattle-disease is reported from Sadar subdivision. Fodder and water are sufficient.
	Manikganj ...	3·57	5¾	6¼	
	Narayanganj	4·62	5¾	6	
	Munshiganj*	5·92	5¾	6	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern [illegible] of the district rainfall figures for Kapasia thana are reported here.

(n) Not reported.

RESOLUTION ON THE REPORT OF THE ROYAL COMMISSION ON THE PUBLIC SERVICES IN INDIA RELATING TO THE CIVIL VETERINARY DEPARTMENT.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Miscellaneous.

DARJEELING, THE 8TH MAY 1919.

RESOLUTION—No. 332T.R.

READ—

The Report of the Royal Commission on the Public Services in India.
Report on Indian Constitutional Reforms.

THE Governor in Council is now considering the recommendations of the Public Services Commission concerning the Civil Veterinary Department which are contained in Annexure II of their report and this resolution is

published in order to give the public interested an opportunity of expressing their views on the more important questions involved.

2. The three main problems which require consideration are the following :—

(1) the method of recruitment of Indians for the Imperial Veterinary Service ;

(2) the method of recruitment of officers for the Provincial Veterinary Service ; and

(3) the pay of the above two services.

3. The Royal Commission considered that every effort should be made to meet the normal requirements of the Imperial Service within a reasonable time by recruitment in India. They accordingly recommended that classes teaching up to the higher standard of veterinary science should be established in India and that, when they were sufficiently developed, the Government of India should announce that not less than one-half of the number of vacancies in the Imperial Service should be filled by statutory natives of India who have been through the higher course. It is, however, obvious that the time has not yet come for making such an announcement. The establishment, moreover, of such an educational course, which would be in the form of an Imperial Veterinary College, is by no means free from difficulty. As pointed out by Mr. (now Sir Frank) Sly in his note of dissent, the very large expenditure which its establishment would involve would only be justified, if it were assured of an adequate supply of students. It is true this might be secured, if candidates for the Provincial Service were trained at the same institution ; but it is doubtful whether the two classes of services ought to be trained together or whether it is right to centralise the training of Provincial officers at the expense, it may be, of recruitment. An alternative would be to establish an Imperial College for the training of candidates only for the Imperial Branch of the service and of all men who are desirous of taking up the veterinary profession with a view to private practice or research. The Governor in Council would, therefore, be glad to learn whether, having regard to the future requirements for veterinary surgeons in the province, private students from Bengal would be likely to present themselves for training at such a college. Opinion is also invited on the question whether admission to the proposed Imperial Veterinary College should be confined to students who have already taken the provincial service course in a provincial veterinary college, or whether graduates in science (with or without honours) from arts colleges should also be admitted.

4. The Commission have also recommended that, pending the establishment in India of facilities for higher education, one of the opportunities—in addition to promotion from the Provincial Service of suitable persons who had been through a post-graduate course of study in Europe—for the appointment of statutory natives of India to the Imperial Branch should be provided by a system of state scholarships to enable likely young men to proceed to Europe with the object of gaining the diploma of the Royal College of Veterinary Surgeons ; but in such cases it should be made clear that the fact of having won a scholarship and obtained the British diploma should not give anyone preferential claim to be selected by the Secretary of State. His Excellency in Council therefore desires to know to what extent qualified candidates from Bengal might be expected to avail themselves of scholarships under the terms stated above with the object of gaining that diploma.

5. Regarding the Provincial Service the Commission recommended that it should consist only of Deputy Superintendents and officers of corresponding status in the College staffs. They further remarked that a really efficient Provincial Service cannot be mainly recruited from persons of a relatively low standard of education who entered the service as subordinates. They, therefore, recommended that the level of training in the Provincial Colleges which are maintained for the training of officers of the subordinate service should be raised and that in the future not less than half the vacancies arising in the Provincial Services should be filled by direct recruitment.

It is clear that at the same time the present low standard of the entrance qualification ought to be raised. But if this were done there would be a risk of endangering recruitment to the subordinate service, as the services are not yet popular with men with higher attainments. Direct recruitment in Bengal or the elimination of the practical training obtained in the subordinate service is not, therefore, at present a very practical proposition. The question therefore arises whether it would not be preferable to offer definite prospects of rapid progress through the grades of Veterinary Assistants and Inspectors to persons possessing higher educational qualifications than the ordinary entrance qualification, who have done exceptionally well at a College and studied a more advanced course.

6. For the pay of the Imperial Veterinary Officers recruited in India the Commission have recommended a scale of Rs. 300—30—600—50—1,000 a month, and for those recruited in Europe Rs. 500—50—1,400. Hitherto the terms of the Service applicable to the Imperial Veterinary officers have been materially more favourable than those of the Imperial Agricultural Officers in respect of both the minimum and maximum limits of the sanctioned time-scale pay and of eligibility for exchange compensation allowance. It is therefore suggested that the scale of Rs. 350—35—1,050 proposed for the Imperial Agricultural officers recruited in India might be suitably applied to Imperial officers of the Civil Veterinary Department recruited in India and that an overseas allowance in addition to this pay should be given to the officers recruited in Europe as suggested in the case of the Imperial Agricultural officers. The grant of an overseas allowance would be in conformity with the recommendation made in paragraph 322 of the report of His Excellency the Viceroy and the Secretary of State on the Reforms. The members of the Service will as hitherto be debarred from private professional practice in India. The Commission recommended that the normal scale of salary in the Provincial Service should be Rs. 250—$\frac{40}{3}$—450—$\frac{50}{3}$—500 with a probationary rate of Rs. 150.

7. His Excellency in Council does not propose to deal specifically with the other matters dealt with in the Commission's report, so far as the Veterinary services are concerned. It is requested that any remarks or criticisms which any person or body of persons interested may desire to offer, may be forwarded to the Revenue Secretary to the Government of Bengal, not later than the 1st June 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information and a copy sent to the leading associations in Bengal.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE PUBLIC SERVICES COMMISSION.

GOVERNMENT OF BENGAL.

PUBLIC WORKS DEPARTMENT.

DARJEELING, THE 10TH MAY 1919.

RESOLUTION—No. 1522E.

READ—

The Report of the Royal Commission on the Public Services in India.

THE Governor in Council has had under consideration the recommendations of the Public Services Commission, contained in Annexure XVIII, concerning the Public Works Department, and this resolution is published in order to give the public interested an opportunity of expressing their views on the more important questions involved.

2. The Department is divided into the Roads and Buildings Branch and the Irrigation Branch.

The Engineer personnel of the Department, which is common to both branches, may be divided as follows :—

(1) Engineers (Imperial Service and Provincial Service).
(2) Upper Subordinates.
(3) Lower Subordinates.

The Provincial Service of Engineers is open only to statutory natives of India; and its strength is maintained by the appointment by the Government of Bengal of a fixed number of students trained at the Civil Engineering College, Sibpur. The present rate of recruitment in Bengal is one officer in every alternate year from among the graduate students who have also undergone one year's practical training and have passed a practical examination at the end of the training. In addition, a selected qualified Upper Subordinate is promoted to the Provincial Engineer establishment periodically—hitherto at the rate of one in every fourth year.

The Upper Subordinate establishment is recruited by the Provincial Government either by the appointment of graduate students trained at the Civil Engineering College, Sibpur, and the Dacca School of Engineering, or by the promotion of selected Lower Subordinates and occasionally by the appointment of other suitable candidates.

The Lower Subordinate establishment is maintained at the required strength by the appointment by Superintending Engineers, under powers delegated to them, of students holding certificates of the Civil Engineering College and Schools and of other suitable candidates.

3. A summary of the recommendations of the Commission relating to the Public Works Department will be found in Chapter IX of Annexure XVIII of their Report; the following are the most important recommendations :—

(1) Amalgamation of the present Imperial and Provincial Services of Engineers into one superior service of engineers.

The present Provincial Service has its origin in the recommendations of the Public Services Commission of 1886-87. It was the intention of that Commission that the Imperial Service of the Department should include only those officers who were required for purposes of control and direction and for the carrying out of works calling for high engineering skill; while the Provincial Service would be responsible for works for which a lower standard of engineering skill was adequate. The recent Commission found on enquiry that officers recruited in India were engaged on work of the same importance and responsibility as officers of the same official standing recruited in England. The Commission therefore recommend that the present division into the Imperial and Provincial Services should be abolished and that for the future there should be only one superior engineering service.

In regard to the training of candidates for the superior service to be recruited in England, the Commission are definitely opposed to the re-establishment of a residential Engineering College as they consider that, by drawing on the resources of the large number of well equipped engineering institutions, better material for the service can be obtained than could be secured through the medium of a single agency. They therefore recommend that, subject to some modification in detail, the present arrangements should continue. They consider that candidates for appointment should be between the ages of 21 and 24; and that they should have obtained one of the University degrees specified in the regulations or an equivalent diploma or distinction in engineering; but that the fact of having passed the examination for the associate membership of the Institution of Civil Engineers should not in itself, without a collegiate training, be considered sufficient qualification for appointment. The Commission further recommend that a definite condition of appointment should be that candidates should have had at least twelve months' practical experience of engineering work.

As an alternative to the Commission's proposals, it has been suggested that candidates should be appointed in England under a system of combined selection and competitive examination immediately upon leaving college. Suitable candidates would in the first instance be selected to a number in excess of the number of vacancies, and these selected candidates should then be subjected to a competitive examination. It has been proposed that thereafter the successful recruits would be drafted direct to India for a practical training course extending to two years. A modification of this period of practical training has been suggested, viz., that the first six months should be spent in obtaining experience and training in England and about eighteen months in a probationary training course in India. At the end of the two years' training the probationers would be confirmed as Assistant Engineers if found suitable.

(2) Statutory natives of India should be eligible for selection in England; but the arrangement by which 10 per cent. of the vacancies filled in England are reserved for Indians should be abolished.

It has been a standing rule that natives of India shall be selected to the extent of 10 per cent. of the total number of Assistant Engineers recruited by the Secretary of State, if otherwise duly qualified. The Commission has recommended the abolition of this 10 per cent. rule, as officers of the Provincial Service in particular are opposed to the arrangement owing to the invidious distinction which it creates between statutory natives of India recruited in India on the one hand and in England on the other. The system is also open to the objection that it tends to arrest the development of the engineering colleges in India, which have been established and maintained by the Government of India at great expense.

(3) The selection of candidates from Indian colleges for appointment to the superior engineering service should, in all cases, be based partly on their record during the college course, partly on the result of the final examination and partly on the degree of their proficiency in practical work.

The Public Works Department Reorganization Committee have developed the Commission's recommendation as follows. At the end of their college course all students should be given two years' practical training in India. On the completion of their training an examination would be held in purely practical subjects, and the guaranteed appointments would be allotted as a result of the combined college and practical examination—a satisfactory report from the officer under whom the apprenticeship has been served being an essential qualification for appointment. It has been suggested that if the two years' practical training period is adopted, it will be unnecessary that recruits should undergo a further period of probation before being confirmed as Assistant Engineers. The Commissioners recommend that the maximum limit of age for admission to the service should be fixed at 27.

(4) Assistant Engineers should be appointed to executive charges after 8 years' instead of after 10 years' service as at present; and the cadre should be reduced accordingly.

The principal reasons advanced by the Commission are that the duties of an Assistant Engineer make little demand on engineering skill, and men who bring with them into the Department the complete equipment of an advanced engineering training cannot fail to lose both in keenness and in capacity if they are kept on such duties too long. The present period of service in the Assistant Engineer grade also necessitates the maintenance of large and unnecessarily expensive cadres.

The result of the Commission's recommendation would be that an Assistant Engineer would, in normal circumstances, receive officiating divisional charge in the sixth year of service. It is open to doubt whether five years is not too short a time for a thorough training, particularly in the more specialized duties of an irrigation engineer, and specially as it has been proposed that the powers of Executive Engineers should be materially enhanced. On the other hand, an officer who after appointment is employed for two years on a course of practical probationary training, before being confirmed as Assistant Engineer, will, on the date he completes eight years' service after confirmation, have been at work for a total period of ten years.

(5) The decrease in the number of Assistant Engineers should be made good by the appointment of an increased number of Upper Subordinates to subdivisional charges.

To this end the standard of qualification for the Upper Subordinate service should be raised; and, if necessary the scale of pay of that service should be improved. It is also recommended that the Upper Subordinate branch should be transformed into a service organised on the model of the Provincial Civil Services.

(6) Incremental scales of salaries for Chief and Superintending Engineers and separate incremental scales for Executive and Assistant Engineers should be established. Officers recruited in India should receive lower scales of salaries in the grades of Executive and Assistant Engineers than those laid down for officers recruited in Europe; but in the administrative grades the scale of salary should be the same for all officers.

The rates of salary recommended by the Commission for officers recruited in Europe are as follows:—

	Rs.
Assistant Engineers	380—40—700—50—750
Executive Engineers	800—50—1,250
Superintending Engineers ...	1,500—100—2,000
Chief Engineers	2,500—50—2,750

The rates of salary proposed for officers recruited in India are:—

	Rs.
Assistant Engineers	300—50-2—500—50—550
Executive Engineers	600—50—1,050
Superintending Engineers ...	1,500—100—2,000
Chief Engineers	2,500—50—2,750

In paragraph 322 of their Report on Indian Constitutional Reforms, His Excellency the Viceroy and the Secretary of State have suggested as a general principle that the standard scales of pay of the services generally should be fixed with reference to Indians recruited in India at rates sufficient to attract the best men available and to give them an income appropriate to their position, while persons recruited, by reason of superior qualifications, in Europe should be given an extra allowance to compensate them for the drawbacks and expenses of expatriation.

With a view to adopting this suggestion it has been proposed that the scale suggested by the Commission for officers recruited in India should be held to be the common scale of pay for both branches, while for the engineers whose domicile is in Europe there should be an expatriation allowance of Rs. 150 for the first eight years of service and Rs. 200 thereafter until administrative rank is reached.

It appears doubtful whether, in view of the great changes which have taken place since the report of the Public Services Commission was written, these salaries and expatriation allowances are sufficient at the present time; and it has been suggested that the scale should be fixed as follows :—

For officers recruited in Europe :—

	Rs.
Assistant Engineers	500—50—850
Executive Engineers	1,000—50—1,600
Superintending Engineers ...	2,000—80—2,400
Chief Engineers	3,000

For officers recruited in India :—

	Rs.
Assistant Engineers	300—35—545
Executive Engineers	650—50—1,250
Superintending Engineers ...	1,600—80—2,000
Chief Engineers	2,500

These scales exhibit a difference at each period of an officer's service which would be granted to officers recruited in Europe as an expatriation or "overseas" allowance according to the following scale :—

	Rs.
Assistant Engineers	200—15—305
Executive Engineers	350
Superintending Engineers ...	400
Chief Engineers	500

(7) The Committee appointed to select candidates in England for the Superior Engineer Service should be enlarged.

The Commission recommended that the Committee at the India Office should consist of a representative of the India Office; two eminent Engineers nominated by the President of the Institution of Civil Engineers; a retired member of the Public Works Department; a retired member of the Indian State Railway Department and an Indian in touch with the Indian community in the United Kingdom.

It has been proposed that the representative of the India Office should be an officer with general administrative experience in India.

(8) Officers who, when they enter the Department, receive salaries at the rates fixed for persons recruited in Europe, should be subject to the European Service leave rules; other officers should be subject to the Indian Service leave rules and should continue under those rules throughout their career.

4. His Excellency in Council does not propose to invite opinion specifically on the other matters dealt with in the Commission's Report so far as the Department is concerned. It is requested that any remarks or criticism which any person or body of persons interested may desire to offer on the matters discussed in this resolution may be forwarded to the Secretary to the Government of Bengal, Public Works Department, not later than the 15th June 1919.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE ROYAL COMMISSION ON THE PUBLIC SERVICES IN INDIA IN REGARD TO THE BOILER INSPECTION DEPARTMENT.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 12TH MAY 1919.

RESOLUTION—No. 1618Marine.

READ—

(1) The Report of the Royal Commission on the Public Services in India.

(2) The Report of the Indian Industrial Commission.

The Governor in Council has had under consideration the recommendations of the Public Services Commission in Annexure V of their Report, in regard to the Boiler Inspection Department, and this resolution is published with the object of enabling the public interested in the matter an opportunity of expressing thor views on the more important questions raised in the report, which are noted below.

2. **Reorganization of the Department.**—The Commission have recommended a reorganization of the Department on the following lines :—

(*i*) that the Boiler Inspectors should be made Government servants ;

(*ii*) that salaries and pensions should be paid from general revenues, irrespective of fees earned under the Bengal Steam-Boilers and Prime-Movers Act, which constitute the present Boiler Fund ;

(*iii*) that there should be expert supervision of inspection staff ;

(*iv*) that the existing system of administration by an officer of the Indian Civil Service or the Indian Police Service together with the representatives of interests to be inspected (*i.e.*, the present Boiler Commission) should be abolished ; and

(*v*) that there should be an officer who should be responsible for the effective working of the inspection staff, to be called either the Chief or the First Inspector.

The Indian Industrial Commission, who have also considered the question of the constitution of the Boiler Inspection Department in their report, are in complete agreement with the above views ; and have, in addition, suggested that the Boiler Inspection Department should be placed under the control of the Provincial Department of Industries.

3. **Recruitment.**—The Public Services Commission have held that it is not necessary on grounds of policy to go outside India for recruits, and that it is not necessary to do so in order to obtain candidates with the necessary qualifications, also that the recruitment should continue to be made as at present in this country.

In the Bengal Presidency statutory natives of India are not ordinarily candidates for appointment as Boiler Inspector and have not so far been appointed. The reason is that Boiler Inspectors are usually recruited from Engineers of the Mercantile Marine Service, holding extra first class Board of Trade certificates ; and consequently, Bengalis with the requisite educational qualifications who practically never follow marine engineering as a profession, do not appear as candidates.

The Commission, however, have advised that there should be no limitation in the employment of non-Europeans ; and that when the Department is reorganised, it should be made clear that qualified Indians are eligible for appointment.

At present the qualification required of a candidate is the possession of a first class Board of Trade certificate. In this connection the Commission have pointed out that, although the above qualification is generally regarded as satisfactory, the Mill Owners' Association in Bombay hold that a candidate should have special experience of land as well as of marine boilers. The Commission have, however, left this point to be considered by the Local Government and their expert advisers along with the question of the reorganisation of the Department when it is taken up.

Furthermore, the Commission are of opinion that appointments should be made direct as at present and that there should be a fixed age for recruitment.

4. **Salary.**—The present scale of salary of the Boiler Inspectors is as below:—

		Rs.
1 Senior Inspector	... ...	500—20—600
2 Inspectors	... ...	450—10—500
4 Ditto	... ...	350—10—450

The Commission have suggested that questions relating to the salary of these officers should be determined by the local Government when the reorganization of the Department is taken up. They consider that an incremental system of salary is suitable for these officers and that it should be continued.

The Commission have also recommended the creation of the post of a Chief Inspector on Rs. 1,000—50—1,250. This Government have already had under consideration the question of the appointment of a Chief Inspector on the aforesaid salary.

5. **Strength of the staff.**—The Commission have advised that the cadre of the Boiler Department should be expanded to keep pace with the work to be done. At present there are seven permanent and one temporary Inspectors; and the demand of the Department, in view of the extension of the Act and of the increase in the number of boilers inspected, is for one Chief Inspector and nine Inspectors.

6. **Leave.**—The Commission have recommended that as the service is wholly recruited in India all future entrants to the Boiler Inspection Department should be under Indian Service leave rules, and that no distinction should be made in favour of officers who are not statutory natives of India.

Under the existing rules regulating the grant of leave to Boiler Inspectors, officers with a European domicile already enjoy the benefits of the European Service leaves rules, while those with a Indian domicile are under the Indian Service leave rules.

7. It is requested that any remarks or criticisms which any person or body of persons interested may desire to offer on the points discussed in this resolution may be forwarded to the Secretary to the Government of Bengal, Marine Department, not later than the 30th May 1919.

ORDER.—Ordered that a copy of the resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

THIRD AND FINAL FORECAST OF THE SPRING OILSEED CROPS OF BENGAL, 1918-19.

(NOTE.—On an average of the 5 years ending 1916-17, the area under linseed in Bengal has represented about 5·8 per cent. and that under rape and mustard 29·5 of the total area under these crops in British India.)

Character of the season.—As already reported in the preceding forecasts dealing with the spring oilseed crops, the season was unfavourable at sowing time and for the subsequent growth of the crop owing to continued drought from October to December. The rainfall of January and February came too late to materially affect the outturn. The latter was therefore much below the normal.

Area sown.—The total area under oilseed crops (excepting sesamum, returned by District Officers) amounts to 1,304,800 acres as against 1,333,500 acres of last year, representing a decrease of 2·1 per cent. The decrease is due to the unfavourable weather conditions prevailing at sowing time.

Outturn.—According to the estimates of District Officers the outturn of the different kinds of oilseed crops, for the Province as a whole (excepting sesamum) worked out at 66 per cent. against 82 per cent. of the normal last year.

Taking 6 maunds per acre as the normal rate of yield for linseed, 5¼ maunds for rape and mustard and 4½ maunds for other oilseeds, the total yield of all kinds of spring oilseeds is estimated at 1,868,000 tons against 237,500 tons last year.

S. MILLIGAN,
Director of Agriculture, Bengal.

CALCUTTA,
The 12th May 1919.

APPENDIX I.

Final Forecast of the Spring Oilseed Crops of Bengal, 1918-19.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1917-18).	Estimated area under spring oilseeds. This year (1918-19).	Taking 100 to represent the normal, what would be the average outturn per acre cropped. Last year.	Taking 100 to represent the normal, what would be the average outturn per acre cropped. This year.	Date by which the harvesting generally commenced this year, and whether that date was early normal or late.	Remarks by District Officers.
		Acres.	Acres.	Acres.				
24-Parganas	Linseed	1,600	600*	600*	100	67	December to February. Normal	The weather has not been favourable for want of timely rain. Damage to the extent of 50 per cent. is reported from Basirhat. In Barrackpore Subdivision also the damage by drought and insects was considerable. The outturn is therefore anticipated to be below the normal.
	Rape and mustard	1,500	800*	800*	108	67		
	Other oilseeds (excepting *til*)	300	300	300	83	83		
	Total	3,[illegible]	[illegible]	1,700	101	70		
Nadia	Linseed	55,700	34,700	[illegible],200	50	33	End of December to February	The decrease in area as compared with last year was due to drought at the time of sowing. The weather has not been favourable. Damage has been caused by drought which has reduced the outturn considerably.
	Rape and mustard	23,500	14,600	14,100	43	33		
	Other oilseeds (excepting *til*)	18,900	3,500	3,300	50	33		
	Total	98,100	52,800	49,900	48	33		
Murshidabad	Linseed	20,800	14,[illegible]00	13,000	67	50	February to March. Normal	The decrease in area was due to unfavourable weather condition at sowing time. The weather has not been favourable owing to continued drought, which has caused damage to the crops by about 49 per cent.
	Rape and mustard	18,900	13,200	12,300	75	50		
	Other oilseeds (excepting *til*)	8,700	3,500	3,100	75	58		
	Total	48,400	31,400	28,400	71	51		
Jessore	Linseed	24,000	9,600	9,400	75	75	January. Normal	The weather has not been favourable. The crops were considerably damaged for want of rain. Hence the low outturn.
	Rape and mustard	49,660	19,600	18,000	58	67		
	Other oilseeds (excepting *til*)	3,300	1,600	1,900	50	50		
	Total	76,900	30,800	29,300	63	68		
Khulna	Linseed	900	200	100	92	31	End of January. Normal	The weather has not been favourable. The outturn is expected to fall below the normal for want of timely rain.
	Rape and mustard	29,700	19,500	18,600	100	85	End of December. Normal	
	Other oilseeds (excepting *til*)	100	500	500	100	92	February. Normal	
	Total	30,700	20,200	19,200	100	77		
Burdwan	Linseed	22,500	11,200	7,700	83	67	Middle of February to end of February.	The decrease in area as compared with last year is due to drought. The weather has not been favourable. The drought has affected the growth of the crops and has caused some damage. The outturn is likely to be much below the normal.
	Rape and mustard	21,100	14,700	8,100	75	58	End of January	
	Other oilseeds (excepting *til*).	1,500	800	100	75	58	End of February	
	Total	45,100	26,700	15,903	78	62		
Birbhum	Linseed	800	800*	800*	83	58	March. Normal	The weather was not very favourable owing to want of rain from the sowing time up to middle of January. The damage done by drought has been considerable.
	Rape and mustard	2,000	2,000*	2,000*	75	58		
	Other oilseeds (excepting *til*).	300	200	200	58	50		
	Total	3,000	3,000	3,000	76	57		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds — Last year (1917-18).	Estimated area under spring oilseeds — This year (1918-19).	Taking 100 to represent the normal, what would be the average outturn per acre cropped. — Last year.	Taking 100 to represent the normal, what would be the average outturn per acre cropped. — This year.	Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Acres.	Acres.	Acres.				
Bankura ...	Linseed	1,000	1,000*	1,000*	100	67	End of February. Normal.	The decrease in area was due to want of rainfall at sowing time. Recent rains have done much good to the crop. The outturn is anticipated to be 67 per cent. only as the crops suffered from drought.
	Rape and mustard	7,000	4,100	3,700	100	67		
	Other oilseeds (excepting *til*).	8,000	4,500	3,600	100	67		
	Total ...	16,000	9,600	8,300	100	67		
Midnapore ...	Linseed	15,000	11,500	11,500	90	50	End of January.	The weather has not been favourable. Want of rain in November and December and untimely rain in January has caused damage to the crops to the extent of about 50 per cent.
	Rape and mustard	31,000	11,500	11,000	90	50		
	Other oilseeds (excepting *til*).	14,500	13,100	14,000	90	50		
	Total ...	60,500	36,100	36,500	90	50		
Hooghly ...	Linseed	800	700*	700*	50	54	March. Late ...	The decrease in area under rape and mustard as compared with that of last year is due to want of rain at proper time. The outturn has fallen considerably below the normal owing to unfavourable weather at sowing time.
	Rape and mustard	7,900	4,000	3,800	53	55		
	Other oilseeds (excepting *til*).	2,700	700	700	50	54		
	Total ...	11,400	5,400	5,200	52	55		
Howrah ...	Linseed ...	2,000	400	200	71	50	Middle of February. Normal.	The decrease in area as compared with last year was due to deficient rain at sowing time. The weather has not been unfavourable. Owing to drought the outturn has fallen much below the normal.
	Rape and mustard	1,100	800	400	65	50		
	Other oilseeds (excepting *til*).	100	100	100	67	50		
	Total ...	3,200	1,300	700	67	50		
Rajshahi ...	Linseed	28,000	5,400	14,300	60	50	First part of March. Normal.	The increase in area is due to extension of cultivation. The weather has been fair since the submission of the second forecast. The low outturn is due to unfavourable weather at sowing time and during the period of growth. The outturn is likely to fall much below the normal owing to unfavourable weather conditions prevailing at sowing time and thereafter.
	Rape and mustard	74,000	44,200	57,800	67	50	Latter part of January. Normal.	
	Other oilseeds (excepting *til*).	400	1,700	2,000	55	33	First part of March Normal.	
	Total	102,400	51,300	74,100	66	50		
Dinajpur ...	Linseed	(40)	(40)*	(30)*	70	70	By the end of January. Normal.	The decrease in area this year was due to unfavourable weather condition at sowing time. The growth of the crops has not been satisfactory owing to want of rain at sowing time and after it. Hence the outturn is much below the normal.
	Rape and mustard	70,000	65,800	50,500	75	50		
	Other oilseeds (excepting *til*).	...	100	100	60	60		
	Total ...	70,000	65,900	50,600	75	50		
Jalpaiguri ...	Rape and mustard	53,600	51,900	51,400	95	92	Latter part of January. Normal.	The weather has not been favourable owing to drought which has caused some damage. The outturn is therefore anticipated to be below the normal.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	53,800	52,100	51,600	95	92		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1917-18).	Estimated area under spring oilseeds. This year (1918-19).	Taking 100 to represent the normal, what would be the average outturn per acre cropped. Last year.	Taking 100 to represent the normal, what would be the average outturn per acre cropped. This year.	Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Acres.	Acres.	Acres.				
Darjeeling ...	Rape and mustard	7,[illegible]	3,300	2,800	92	100	Second week of January. Normal.	The weather has been favourable. A normal outturn is anticipated.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	7,900	3,500	3,000	92	100		
Rangpur ...	Rape and mustard	160,000	140,000	118,000	100	80	Ditto ...	The decrease in area as compared with last year was due to unfavourable weather at sowing time. The weather was not favourable owing to drought which hampered the growth of the crops. The outturn is expected to fall 20 per cent. below the normal.
	Other oilseeds (excepting *til*).	1,100	200	200	100	100		
	Total ...	161,100	140,200	[illegible]18,200	100	80		
Bogra ...	Linseed	1,000	1,500	1,600	50	68	Middle of March ...	The low outturn is due to the continued drought.
	Rape and mustard	60,000	12,000*	12,000*	50	60	End of January.	
	Other oilseeds (excepting *til*).	...	200	200	25	40	End of December.	
	Total ...	61,000	[illegible],700	13,800	50	61		
Pabna ...	Linseed	7,600	8,500	8,500	70	55	March. Normal.	The weather was favourable for cultivation but defective rainfall since October last has retarded the growth of the crops and has adversely affected the outturn. There has been some rainfall since the submission of the second forecast but it was inadequate. About 45 per cent. of the crops has been damaged by drought.
	Rape and mustard	110,000	114,500	114,500	70	55	Middle of January. Normal.	
	Total ...	117,600	123,000	123,000	70	55		
Malda ...	Linseed	6,000	4,500	3,500	70	45	January and February Normal.	The decrease in area under linseed and rape and mustard as compared with last year was due to unfavourable weather at sowing time. The growth of the crops was interfered with owing to absence of rain since September, which has caused considerable damage. Hence the outturn is expected to fall much below the normal.
	Rape and mustard	30,000	20,000	10,000	70	45		
	Other oilseeds (excepting *til*).	2,500	1,200	1,200	70	40		
	Total ...	38,500	25,700	[illegible]	70	45		
Dacca ...	Linseed	4,800	4,600	4,600	75	75	Second week of January.	The weather has not been favourable. About 34 per cent. of the crops has been damaged by continued drought.
	Rape and mustard	82,400	58,000	74,900	57	65	End of January. Normal.	
	Total ...	87,200	62,600	79,500	58	68		
Mymensingh ...	Linseed	13,800	13,800	13,800	75	50	Middle of March. Normal.	The weather has not been favourable for want of rain during the latter part of November. Damage by drought and insects is reported from the Kishoreganj and Netrokona subdivisions to the extent of 50 per cent. and 40 per cent. respectively.
	Rape and mustard	430,700	472,300	472,300	90	70	Middle of January. Normal.	
	Other oilseeds (excepting *til*).	300	300	300	100	75	End of March. Normal.	
	Total ...	444,800	486,400	486,400	90	70

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Wheat Crop in Bengal, 1918-19.

(Note.—On an average of the five years ending 1916-17 the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the Territory now reported on, has in the five years ending 1916-17, averaged (a) 41·1 per cent. and (b) 16·7 per cent. respectively).

Character of the season.—As already reported the crop suffered considerably owing to the early cessation of the monsoon, and the consequent lack of soil moisture at the time of sowing and in its early stages. There was no rain in October, November and December. The rainfall in January and February though beneficial was too late to secure a normal crop.

Area sown.—The total area sown this year is estimated at 114,500 acres against 124,000 acres last year. The decrease in area is due to want of moisture at sowing time.

Outturn.—An yield of 70 per cent. and upward is reported from the districts of Dacca, Faridpur, Midnapore, Rajshahi, Jalpaiguri, Darjeeling and from 50 to 67 per cent. in Murshidabad, Jessore, Burdwan, Birbhum, Bankura, Hooghly, Malda and Pabna, while Nadia and Dinajpur return percentages below 50.

According to the estimates of the District Officers the provincial outturn works out to 61 per cent. of the normal against 69 per cent. of the last year.

Taking the normal yield at eight-half maunds per acre, the total yield for province works out to 21,800 tons against 33,002 tons last year, showing a decrease of a little over 33 per cent.

At the end of April the wholesale average price of the wheat at the principal marts of the province was Rs. 6-15-3 per maund or about 30 and 33 per cent. higher than the current prices at the corresponding period of last year and in the year preceding, respectively. The average wholesale price of common rice in the principal marts at the end of April was Rs. 6-6-6 per maund or about 85 per cent. and 40 per cent. higher than the rates in the corresponding periods of last year and the year preceding.

S. MILLIGAN,
Director of Agriculture, Bengal.

CALCUTTA,
The 12th May 1919.

APPENDIX I.

Final Forecast of the Wheat Crop of Bengal, 1918-19.

District.	Approximate normal area under the wheat crop in acres.	Approximate area under wheat last year (1917-18).	Estimated area under wheat this year (1918-19).	Taking 100 to represent the normal, what would be the average out-turn per acre dropped. Last year.	This year.	Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
1	2	3	4	5	6	7	
	Acres.	Acres.	Acres.				
Nadia ...	23,100	13,800	9,400	67	33	End of February to March. Normal.	The weather has not been favourable. Considerable damage has been caused by drought. The outturn is much below the normal sowing to want of timely rainfall.
Murshidabad ...	69,3800	31,200	23,600	67	50	March. Normal ...	The weather was not favourable at first [illegible] continued drought after sowing which damaged about half the crop, but the rainfall in February has done some good.
Jessore ...	2,300	1,100*	1,100*	75	58	Ditto ...	The weather has not been favourable. About 42 per cent. of the crop has been damaged by drought.
Burdwan ...	2,000	2,000*	2,000*	83	58	Middle of March. Normal.	The weather was unfavourable up to middle of January owing to drought. The rainfall in January did some good to the crop. Since then the weather has been favourable except at Katwa. Late sowing and want of moisture at sowing time and subsequent drought account for the low outturn.
Birbhum ...	5,600	4,100	4,100	83	67	End of March. Normal.	About 33 per cent. of the crop has been damaged owing to continued drought at sowing time, but since the rainfall in January the prospects have been fair.
Bankura ...	3,600	3,600*	3,600*	83	67	End of February. Normal.	The weather has been fair since the submission of the second forecast. The low outturn is due to drought and insufficient rain.
Midnapore ...	1,200	1,200*	1,200*	100	70	Middle of March. Normal.	The weather has been favourable since the submission of the second forecast. But the growth of the crop has not been good owing to want of timely rain. The outturn is expected to be much below the normal.
Hooghly ...	2,400	1,700*	1,700*	50	50	Beginning of March. Normal.	The weather has been unfavourable. About half the crop has been damaged by drought.
Rajshahi ...	8,500	7,800*	6,500	[illegible]	70	Middle of March. Normal.	The decrease in area was due to want of rain at sowing time. The outturn is anticipated to be below the normal owing to absence of rain which has injuriously affected the crop.
Dinajpur ...	[illegible]	1,[illegible]0*	1,300	52	4[illegible]	Ditto ...	The weather condition has not been favourable owing to absence of rain.
Jalpaiguri ...	800	500	500	75	85	By the end of March. Normal.	The weather has not been favourable. The crop is poor owing to continued drought.
Darjeeling ...	4,500	2,500	2,500	100	100	March ...	The weather has been favourable.
Rangpur ...	3,000	3,400*	3,400*	100	80	First week of March. Normal.	The outturn is expected to fall 20 per cent. below the normal owing to continued drought.
Pabna ...	16,000	12,000	12,000	70	60	Middle of March. Normal.	The weather was favourable at the time of cultivation, but continued drought since October last retarded the growth of the crop and caused damage to the extent of about 40 per cent. The rainfall in February has improved the condition of the crop to some extent.
Malda ...	60,000	35,000	35,000	60	65	First week of March. Normal.	The dry weather since sowing time to January hampered the growth of the crop. About 30 per cent. of the crop has been damaged by drought. The slight rain that fell since the submission of the second forecast improved the prospects of the crop slightly.
Dacca ...	4,100†	...	3,900	...	75	Beginning of March. Normal.	The weather has not been favourable. The outturn is expected to be below the normal as a result of continued drought.
Faridpur ...	2,700	2,700*	2,700*	83	87	March. Normal ...	The weather has been unfavourable. Want of rain has affected the growth of the crop and has caused the outturn to fall below the normal.
Total ...	209,500	134,000	114,500	69	61		

* Conventional area.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th May 1919.

Summary.—The rainfall was general throughout the province. More rain is, however, wanted, especially in Northern Bengal. The sowing and weeding of jute and autumn paddy continue. In some of the eastern districts sowings are approaching completion. The harvesting of summer rice is almost finished. The outturn is tolerably fair. The standing crops are generally thriving under favourable weather conditions. The prospects are hopeful. The average price of common rice for the province has risen by about 4·6 per cent. as compared with that of the previous week. Distress continues in Bankura, where 8,979 persons were in receipt of gratuitous relief and 5,000 persons were engaged daily on an average on District Board works. Agricultural loans were also given. In the Brahmanbaria subdivision the average number of persons engaged daily on test works was 797.

Serial No.	Districts and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
6	BURDWAN ...	2·73	5½	5½	Weather cloudy. Ploughing and manuring of lands and sowing of jute are going on. The vegetable crops have improved by the recent rainfall. More rain is, however, wanted in the Asansol subdivision for agricultural operations. The export of rice has depleted the stock and consequently the prices have risen abnormally high. Stock in Asansol is reported to be insufficient. Scarcity of water is reported from Katwa. Cattle-disease is reported from Barabani and Ondal. Prices of foodstuffs are still rising.
	Asansol ...	0·71	5	6	
	Katwa ...	2·34	6 7/16	6 7/16	
	Kalna ...	4·02	5⅝	5 7/16	
7	BIRBHUM ...	1·77	5¼	5½	Ploughing and manuring of fields continue. The standing crops are doing well. Fodder and water are sufficient.
	Rampurhat	1·37	6	6	
8	BANKURA ...	5·42	5¾	6	Standing crops have been benefited and water scarcity removed by the recent rain. Outturn of *rabi* crops is fair. Stock of rice is sufficient but threatened by active export. Large purchases for export trade entirely stopped retail sale at Simlapal for some days. Measures have been taken for sending rice from Bankura. Fodder is sufficient but large export is going on. Planting of sugarcane continues. Distress continues. Land improvement and agricultural loans are being given : 8,979 persons are receiving gratuitous relief; 2,923 males, 1,607 females and 470 children are on District Board works.
	Vishnupur ...	2·20	6¼	6 5/16	
9	MIDNAPORE	5·17	5½	5⅞	Fodder supply is sufficient. Outturn of summer rice, other *rabi* crops, and sugarcane is fair. The sowings of jute, autumn rice, *bhadoi til* and broadcast winter rice are going on. The general agricultural situation is fair. Cattle-disease is reported from thana Contai.
	Ghatal ...	2·04	5⅞	6	
	Tamluk ...	2·11	5 5/16	5 5/16	
	Contai ...	8·17	6	7	
10	HOOGHLY ...	2·98	5⅝	5½	The effect of weather is favourable. State of rice market is steady. Fodder is sufficient.
	Serampore ...	1·42	5⅛	5½	
	Arambagh ...	1·48	6½	6½	
11	HOWRAH ...	4 05	5⅜	6	Weather is cool. Rainfall is beneficial to the vegetable crops. Sowing of jute and *aman* paddy continues. Fodder is sufficient.
	Uluberia ...	3·64	5½	6	
12	RAJSHAHI (RAMPUR-BOALIA).	0·28	6	7	More rain is wanted. Prospects of standing crops are fair. Fodder is sufficient. Sowings of jute and *aus* paddy continue. There is no cattle-disease.
	Naogaon ...	Nil	6	6¾	
	Nator ...	0·05	6½	6½	

Serial No.	District and subdivisions.	Rainfall.	Price of common rice in seers per rupee. This week.	Price of common rice in seers per rupee. Previous week.	Character of the weather, condition of crops, etc.

		Inches			
13	DINAJPUR ...	0·42	7 13/16	7 13/16	Sowings of jute and *bhadoi* are in progress. Scarcity of fodder is reported from Kaliagunj.
	Thakurgaon	0·40	7	9	
	Balurghat ...	(*n*)	(*n*)	7¼	
14	JALPAIGURI	0·67	6	6	Rainfall has facilitated the sowings of jute and *bhadoi* paddy. Hailstorms have done some damage to jute seedlings in Mainaguri Tashil. Export of paddy and rice is going on. Fodder is sufficient.
	Alipur ...	0·73	6	6	
15	DARJEELING	3·46	5½	4½	Maize and potatoes are growing Wheat and *boro* are being harvested. Fodder and water are sufficient. No outbreak of cattle-disease.
	Kurseong ...	0·78	5½	5½	
	Siliguri ...	0 58	6½	6½	
	Kalimpong ...	0·65	6	6	
16	RANGPUR ...	0·37	6	7	Weather seasonable. Rainfall is inadequate; more rain is urgently needed. Sowing of jute is finished; weeding of *aus* paddy and jute is still going on. The prospects of standing crops are fair. Stocks of food-grains and fodder and water are sufficient. Some damage to jute plants by hailstorm has been reported from Kaunia. Price of rice is showing a marked rise owing probably to heavy exports to other districts.
	Nilphamari	0·71	6½	7½	
	Kurigram ...	0·24	6	7¾	
	Gaibandha ...	1·55	6⅞	7	
17	BOGRA ...	0·48	6⅜	7¼	More rain is badly wanted especially in western part where standing crops are withering in places and agricultural operations are being retarded. Sowing of jute and *aus* paddy continues in eastern part.
18	PABNA ...	0·59	5¾	6	Weather is partially hot and cloudy. More rain is wanted for the growth of *aus* paddy and jute.
	Sirajganj ...	0·13	6	(*n*)	
19	MALDA ...	0·61	5½	6	Weather hot and cloudy. Rain is wanted in places. The sowing of paddy and jute continues. Harvesting of *boro* paddy continues. Fodder and water are sufficient. Prices of food-stuffs are rising. Cattle-disease is reported from Gomastapur thana.
20	COOCH BEHAR	0·34	8	8	Sowings and weeding of *bitri* paddy and jute continue. No cattle-disease reported. Fodder is sufficient.
21	DACCA ...	0·79	5½ to 6	5½ to 5¾	Weather seasonable and favourable to the growth of standing crops The norwesters are facilitating the weeding of both jute and paddy and are therefore favourable to their growth. Harvesting of *boro* paddy continues; the outturn is expected to be only eight annas. A fair outturn is expected. The condition and prospects of standing crops are good to fair. Cattle-disease is reported from Sadar North, Manikganj and Narayanganj subdivisions. Fodder and water are sufficient.
	Manikganj ...	0·66	6	5¾	
	Narayanganj	1·35	5½ to 5¾	5½ to 5¾	
	Munshiganj*	0·30	5¼	5¼	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

(*n*) Not reported.

REPORT ON DISTRESS IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 10th MAY 1919.

Famine or scarcity has not yet been formally declared.

Rainfall was satisfactory. Twenty-two test works were in progress during the week, 4,691 workers having been employed on the works on the last day of the week. The decline in numbers on works is temporary, being due to inception of agricultural operations. Works are being opened in new areas owing to the return of emigrants. Private works have been undertaken on a small scale. Gratuitous relief is being given in 51 unions; the number of persons relieved during the week was 11,807, including 391 weavers relieved by the Co-operative Industrial Union and the Weavers' Relief Committee and 299 persons relieved by the grant of paddy husking advances; besides 189 better class poor were relieved. Distress is gradually extending to new areas owing to the exhaustion of local resources and private charity. Landless classes, and especially the old and infirm, widows and orphans and dependants of emigrants are the most affected. The relief measures are adequate. The physical condition of workers and public health are satisfactory. Crime is normal. No wandering is reported. Emaciation is noticeable. Fodder and water are adequate. Cloth is being distributed to the destitutes Loans are being advanced. The price of common rice has risen and varies from 5¾ to 6¼ seers per rupee. The stocks of rice are much reduced. Steps are being taken to import Rangoon rice.

Secy. to the Govt. of Bengal.

DARJEELING, *the 16th May 1919.*

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 14208.R.

Dated Calcutta, the 15th May 1919.

THE following report on the state of the salt market for the fourth quarter of the year 1918-19, comprising the months of January, February and March 1919, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 3,476,150 maunds (including 2,816,033 maunds issued under the credit system), as compared with 1,723,634 maunds (including 1,251,101 maunds issued under the credit system) in the previous quarter and 3,037,549 maunds (including 2,463,392 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 33,64,657 (including Rs. 25,81,104 adjusted under the credit system), as against Rs. 15,67,559 (including Rs. 9,84,751 adjusted under the credit system) in the previous quarter, and Rs. 36,51,296 (including Rs. 29,71,073 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

Total	2,357,697	2,565,904	2,256,076	2,726,884	3,152,681*	3,185,740*

* Inclusive of 2,816, 033 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1916-17, importations were more by 39·7 and 33·7 per cent., respectively, and clearances by 14·9 and 22·2 per cent., respectively. The increased imports from the United Kingdom, Aden, Bombay and Massowah, the absence of imports from Madras and the decreased imports from Port Said and Spain, are specially noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters:—

Table II.

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were less by 40·4 and more by 9·5 per cent., respectively.

By order of the Governor in Council,

C. F. PAYNE,

Secretary to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR APRIL 1919.

1. **Character of the season.**—During the month light to moderate rain fell throughout the province. Thirteen districts reported figures below the normal, the fall being insufficient in Burdwan, Bogra and in the Brahmanbaria subdivision of the Tippera district. The usual statement is given below.

2. **Progress of agricultural operations.**—The harvesting of spring crops was almost completed. Considerable sowings of autumn paddy and jute were made in the second half of the month in Eastern and Northern Bengal.

3. **State of standing crops.**—The condition of autumn paddy and jute was, on the whole, satisfactory. The condition of the unharvested *boro* paddy was reported to be not good.

4. **Prospects and probable outturn.**—The outturn of the different spring crops was below the normal. Prospects of the autumn crops have been much improved by rainfall.

5. **Damage to standing crops.**—No damage of any importance was reported.

6. **Condition of agricultural stock.**—Cattle disease was reported from places in the districts of Burdwan, 24-Parganas, Murshidabad, Rangpur, Midnapore, Birbhum, Nadia, Jessore, Dinajpur, Malda, Darjeeling, Cooch Behar, Dacca and Faridpur.

7. **Failure of pasturage and fodder.**—The supply of fodder was sufficient all over the province.

8. **Prices of food-grains.**—During the second fortnight of the month under review, the price of the cheapest variety of rice rose in all but five districts, in three of the latter it remained stationary and the remaining two reported a fall. The prices in the different districts varied from 5 seers and 8 chittaks per rupee at Burdwan to 8 seers a rupee at Rajshahi.

9. **Condition of agricultural people.**—Distress continued in the Bankura district and in the Brahmanbaria subdivision of the Tippera district. Relief measures are being taken.

ROBERT S. FINLOW,
Offg. Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 15th May 1919.

Summary.—Light to moderate rainfall throughout the province greatly facilitating the jute sowings. Alternate rain and sunshine are favourable to the standing crops. More rain is, however, wanted in some places including Northern Bengal. The weeding of autumn paddy and jute continues. The sowings of broadcast winter paddy and for seedlings for the transplanted variety have commenced in some districts. The average price of common rice for the province has risen by about 1·8 per cent. as compared with that of the previous week. Distress continues in Bankura and the Brahmanbaria subdivision of the Tippera district. The average number of persons engaged daily on test works in the Brahmanbaria subdivision was 818.

	Arambagh ...	(n)	(n)	6½	
11	HOWRAH ...	0·68	5½	5⅜	Weather is seasonable. Sowing of jute and paddy continues. The vegetable crops are doing well. Fodder is sufficient.
	Ulubaria ...	1·38	5	5½	
12	RAJSHAHI (RAMPUR-BOALIA).	0·62	6	6	Prospects of standing crops have been improved by the rainfall. Fodder is insufficient. Sowings of jute and *aus* paddy continue.
	Naogaon ...	(n)	(n)	6	
	Nator ...	1·14	6	6½	

(n) Not reported.

Serial No.	District and subdivisions.	Rainfall.	Price of common rice in seers, per rupee. This week.	Price of common rice in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
13	DINAJPUR ...	1·65	6	$7\frac{13}{16}$	Sowings of jute and *bhadoi* are in brisk progress. More rain is wanted.
	Thakurgaon	0·48	6	7	
	Balurghat ...	(*n*)	(*n*)	(*n*)	
14	JALPAIGURI	1·24	$6\frac{1}{3}$	6	Weather hot. Sowings of jute and autumn paddy continue. Cattle disease is reported from Chengmarhi in Mainaguri tehsil. Export of paddy and rice is going on. Fodder is sufficient.
	Alipur ...	1·94	6	6	
15	DARJEELING	2·70	5	$5\frac{1}{2}$	Harvesting of barley and wheat is over. Maize and potatoes are slightly damaged by hail-stones. Preparation of lands for the jute crop continues. The supply of fodder and water is sufficient. Stock of food-grains is insufficient. The prices are rising.
	Kurseong ...	1·63	$5\frac{1}{2}$	$5\frac{1}{2}$	
	Siliguri ...	3·15	5	$6\frac{1}{2}$	
	Kalimpong ...	0·82	5	6	
16	RANGPUR ...	2·35	$5\frac{3}{4}$	6	Weather seasonable. The recent rainfall has benefited the jute and paddy crops; more rain is urgently needed. Weeding of *aus* paddy and jute continues. The prospects of standing crops are fair. Stocks of food-grains and fodder and water are sufficient. Slight damage to jute plants by hailstorm has been reported from the Sadar subdivision. Price of rice is rising.
	Nilphamari	2·13	6	$6\frac{1}{2}$	
	Kurigram ...	3·36	6	6	
	Gaibandha ...	1·36	6	$6\frac{7}{8}$	
17	BOGRA ...	0·77	6	$6\frac{3}{8}$	More rain is the south wanted especially in the south-western part where agricultural operations are being retarded. Sowing of jute and *aus* paddy continues. Fodder and water are sufficient except in flooded area.
18	PABNA ...	0·64	$5\frac{1}{2}$	$5\frac{3}{4}$	More rain is wanted for the growth of paddy and jute. The recent showers have done good to both paddy and jute. Fodder is sufficient.
	Sirajganj ...	1·40	$5\frac{1}{2}$	6	
19	MALDA ...	3·80	$5\frac{1}{2}$	$5\frac{1}{2}$	Weather hot and occasionally cloudy. Rain has facilitated ploughing and has benefited jute and other *bhadoi* crops. The sowing of paddy and jute continues. Harvesting of *boro* paddy continues. Fodder and water are sufficient. Prices of food-stuffs are rising. Export continues. Cattle-disease is reported from English Bazar thana.
20	COOCH BEHAR	1·15	$7\frac{1}{8}$	8	Sowings of *bitri* paddy and jute are finished; weeding continues. Fodder is sufficient.
21	DACCA ...	2·58	$5\frac{1}{2}$ to $5\frac{3}{4}$	$5\frac{1}{2}$ to 6	Weather seasonable and favourable to the weeding of jute and paddy. The outturn of *boro* paddy is reported as poor. The prospects of standing crops are good; but insects are reported to be causing damage to jute in some unions of Manikganj subdivision. Rinderpest has appeared in some parts of the Sadar subdivision.
	Manikganj ...	2·32	$5\frac{3}{4}$	6	
	Narayanganj	3·51	$5\frac{1}{2}$ to $5\frac{3}{4}$	$5\frac{1}{2}$ to $5\frac{3}{4}$	
	Munshiganj*	1·71	6	$5\frac{1}{4}$	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

(*n*) Not reported.

CONTENTS.

REPORT ON DISTRESS IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 17th MAY 1919.

Rainfall was general and cultivation was in progress during the week. Thirty-two test works were open during the week, 5,437 workers having been employed on them. The increase in the number of workers was due to the opening of new works. More works are being opened. Petty private works are continuing. Gratuitous relief is being given in 56 Unions; the number of persons relieved by cash doles was 1,938, and 443 weavers were relieved by the Co-operative Industrial Union and the Weavers' Relief Committee, 2,066 persons by the grant of paddy husking advances and 298 better class poor. The total number of persons on gratuitous relief was 12.545. The decrease in the number of persons relieved by doles is due to fit persons being sent to works. Distress is spreading owing to high prices and the contraction of credit and private charity. The relief measures are adequate. The physical condition of workers and public health are satisfactory. Crime is normal. Fodder and water are adequate. Cloth is being distributed to the destitute. The price of common rice varies from 6 to 6¼ seers per rupee. Arrangements have been made for the importation of Burma rice.

M. C. McALPIN.
Secy. to the Govt. of Bengal.

DARJEELING :
The 22nd May 1919.

ANNUAL REPORT OF THE ROYAL BOTANIC GARDEN AND THE GARDENS IN CALCUTTA AND OF THE LLOYD BOTANIC GARDEN, DARJEELING, FOR 1918-19.

ROYAL BOTANIC GARDEN.

1. **General.**—Weather conditions during the year were somewhat trying to the garden, heavy bursts of rain alternating with prolonged spells of hot dry weather. From October 1918 to the end of March 1919 very little rain fell, so that many plants suffered from the drought. The display of annuals in the flower garden, although rather late owing to the weather conditions, was above the average. The show of orchids, however, during March and April was the poorest for many years, as owing to conditions in Europe and tribal disturbances in the collecting areas in the hills bordering Assam and Burma, the garden stock could not be replenished.

Three new vistas were opened out—one from the bridge on the Jacquemont Path north-westwards to the Roxburgh Avenue looking across Prain Lake, another from Kyd's Monument across King Lake to the Great Banyan Tree and the third from that monument northwards along Janardan Lake to the Small Banyan Tree. These vistas help to correct the "closed in" effect of too dense masses of vegetation, while two of them open out pleasing glimpses of Banks' beautiful piece of sculpture. Over 1,000 feet of length of the Kurz Avenue in the north-west of the garden and about 500 feet of length of the Hooker and Banyan Avenues were taken up and re-made.

Over 200 young trees and shrubs, of which about a-third are species hitherto unrepresented in the garden, were planted out.

A fair number of economic species were also planted in the economic garden, but it is impossible to do justice to this section, which could quite well occupy almost the whole time of one officer under present conditions. Even in its elementary stage this section has begun to appeal to popular interest. Quite a number of thefts of the more edible and readily utilisable species has occurred.

2. **Plant and Seed Exchange.**—Over 36,[illegible]0 young trees and shrubs were distributed to Government departments and institutions, municipalities, railways, etc. Over 500 plants were received.

Over 400 packages of seed, mostly trees and shrubs, the packages varying from 2 ounces to 120 lbs. in weight, were distributed over a wide range. A very large quantity went to the new Delhi and to Mesopotamia. Other places were such as Persia, Egypt, Nigeria, Hawaii, England, West Indies, United States, New Zealand, South Africa, France, Java.

Nearly 400 packets of seed were received, exclusive of 18 bags of *Phœnix rupicola* seed from Mr. R. S. Lister of Pashok Tea Estate in the Darjeeling district.

3. **Herbarium and Library.**—Work was carried out along the usual lines throughout the year, aid in herbarium work being given by Messrs. Debburman and Narayanswami, of the Botanical Survey Department. Over 6,000 specimens were added to the herbarium, the chief additions being a collection of over 3,000 sheets of Philippine specimens presented by the Bureau of Science. Of Indian contributions the most interesting was a collection of nearly 200 excellently prepared specimens collected by Mr. C. G. Rogers, I. F. S., Chief Conservator of Forests, Burma, in the Tavoy district of that province. This has been supplemented by a collection made by the

Superintendent of the garden and Mr. P. T. Russell early in 1919 in the same district, when exploring Northern Tavoy for sites for new cinchona plantations.

Distribution of specimens has been to a great extent still in abeyance but should be resumed next year.

About the usual additions were made to the library.

4. **Publications.**—The letter-press of Part II of Vol. XII of the Annals of the Royal Botanic Garden, Calcutta, issued from the press during the year. It is devoted to Signor Beccari's account of the Lepidocaryeæ palms, belonging to genera other than *Calamus* and *Dæmonorops*. Distribution of this part has been postponed until the plates, which have not yet reached India, can be issued along with the letter-press.

5. **Financial.**—The revenue was Rs. 2,308-8-8, against an estimate of Rs. 500, the excess over estimate being due to part of the eastern end of the garden foreshore being rented out for storage of timber. There was a saving of Rs. 6,978-2-9, mostly on salary and establishment, out of the total allotment of Rs. 1,05,576.

6. **Staff.**—During the year, as for several years past, the garden was understaffed. Mr. (now Captain) C. C. Calder was Curator of the herbarium until the 14th November, 1918, when he left on military service as an officer of the Indian Army Reserve. Apart from the herbarium, the staff throughout the year was reduced to the Superintendent, the Curator of the garden, Mr. G. T. Lane, and one Overseer, Mr. N. Mitra. There was no Probationer-Gardener and the Second Overseer, Mr. M. Jones, was on military service. Babu Devendranath Basu was head clerk throughout the year. All executive officers and the clerical staff performed their duties to the satisfaction of the Superintendent.

CALCUTTA GARDENS.

Work in these gardens, which include the Eden Gardens, Dalhousie Square and Curzon Gardens, was mostly of a routine character. The staff was below normal throughout the year, there being no European Assistant Curator. As it was impossible to obtain hose, most of the lawns suffered badly from lack of efficient watering. During the Armistice Celebrations most of the annuals in the Curzon and Dalhousie Square gardens were destroyed by the feet of the rejoicing crowds, and both gardens had to be replanted. A few flowering trees have been added to all three gardens.

Mr. S. Basu officiated as Assistant Curator in charge and Babu K. C. Maity as Overseer throughout the year and both performed their duties conscientiously. There was a saving of Rs. 4,291-13-2, almost entirely on salaries and establishment, from the total allotment of Rs. 44,395. The revenue, mostly from fees for fishing in the Dalhousie Square tank, was Rs. 300.

LLOYD BOTANIC GARDEN, DARJEELING.

Under Mr. G. H. Cave's competent Curatorship, this garden was kept up to the standard of past years, despite labour being both scarce and expensive.

Over 170 species new to the garden were planted out during the year. The limit of space for development of the garden in the enrichment of species has now almost been reached; nearly 5,000 plants, over 45,000 seedlings, about 470 bulbs and tubers and over 7,000 packets of seed were distributed.

Over 47,500 persons visited the garden during the year. There was a small saving of Rs. 213-12-10, almost entirely on travelling allowance, from the total allotment of Rs. 14,553.

A. T. GAGE, LIEUT.-COL., I.M.S.,
Superintendent.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 22nd May 1919.

Summary.—During the week weather was hot and rainfall was generally scanty. More rain is needed to facilitate the growth of standing crops and for agricultural operations generally. Sowing of autumn paddy and jute are still in progress in some parts of West Bengal. Weeding is proceeding. Preparatory tillage for winter paddy and sowings for seedlings in nurseries continue. The average price of common rice for the Province has risen by about 1·9 per cent. as compared with that of the previous week. Distress continues in Bankura and in the Brahmanbaria subdivision of the Tippera district. The average number of persons engaged daily on test works in the Brahmanbaria subdivision was 966.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.

DACCA,
The 26th May 1919.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta Block* in certain selected articles during the twelve months, April, 1918, to March, 1919, as compared with the corresponding period of 1917-18 and 1916-17. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the twelve months, April, 1918, to March, 1919, amounted to 19,973,000 maunds, as against 15,354,000 maunds in the corresponding period of the preceding year,—an increase of 30 per cent. There was an increase (15 per cent) in the imports of coal and coke (87,731,000 maunds as against 76,402,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 67 per cent, the total value amounting to Rs. 6,13,85,000 as against Rs. 3,67,94,000 last year. The quantity of indigo imported during the period under review decreased by 6,000 maunds, or 25 per cent, to 18,000 maunds. The imports of raw jute amounted to 4,867,000 bales as against 4,562,000 bales,—an increase of 7 per cent. The importations of gunny bags also showed an increase of 3 per cent (446 million bags as against 434 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 68 per cent from 4,304,000 maunds to 7,250,000 maunds. The imports of tea decreased by 19 per cent from 3,836,000 maunds to 3,095,000 maunds.

Exports.—The exports of cotton piece goods, foreign, from Calcutta* by all routes during the twelve months, April, 1918, to March, 1919, increased by 13 per cent (Rs. 27,03,13,000 as against Rs. 23,97,44,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,455 million bags to 1,276 million bags, but the shipments of gunny bags to other Indian ports increased from 35 millions to 49 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased by 14 per cent. from 5,420,000 maunds to 4,684,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

Vholesale prices-current of food-grains, salt, etc., in the undermentioned marts of Bengal for the first-half of May 1919.

DACCA,
The 26th May 1919.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta Block* in certain selected articles during the twelve months, April, 1918, to March, 1919, as compared with the corresponding period of 1917-18 and 1916-17. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the twelve months, April, 1918, to March, 1919, amounted to 19,973,000 maunds, as against 15,[illegible]54,000 maunds in the corresponding period of the preceding year,—an increase of 30 per cent. There was an increase (15 per cent) in the imports of coal and coke (87,731,000 maunds as against 76,402,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 67 per cent, the total value amounting to Rs. 6,13,85,000 as against Rs. 3,67,94,000 last year. The quantity of indigo imported during the period under review decreased by 6,000 maunds, or 25 per cent, to 18,000 maunds. The imports of raw jute amounted to 4,867,000 bales as against 4,562,000 bales,—an increase of 7 per cent. The importations of gunny bags also showed an increase of 3 per cent (446 million bags as against 434 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 68 per cent from 4,304,000 maunds to 7,250,000 maunds. The imports of tea decreased by 19 per cent from 3,836,000 maunds to 3,095,000 maunds.

Exports.—The exports of cotton piece goods, foreign, from Calcutta* by all routes during the twelve months, April, 1918, to March, 1919, increased by 13 per cent (Rs. 27,03,13,000 as against Rs. 23,97,44,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,455 million bags to 1,276 million bags, but the shipments of gunny bags to other Indian ports increased from 35 millions to [illegible]9 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased by 14 per cent. from 5,420,000 maunds to 4,684,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles for the twelve months, April, 1918, to March, 1919, compared with the corresponding months of 1917-18

APPOINTMENT OF A COMMITTEE TO CONSIDER THE QUESTION OF CHILD WELFARE WORK IN BENGAL.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Sanitation Branch.

CALCUTTA, THE 28TH MAY 1919.

RESOLUTION—No. 72T.-San.

THE Governor in Council has decided to appoint a representative committee consisting of the following ladies and gentlemen to advise Government

on the measures which should be taken to promote child welfare in Bengal, with special reference to the reduction of infantile mortality :—

1. The Hon'ble Dr. Sir Nilratan Sircar, KT., M.D., President.
2. The Hon'ble Babu Mohendra Nath Roy, C.I.E.
3. The Hon'ble Babu Brojendra Kishore Roy Chaudhuri.
4. The Hon'ble Dr. Abdulla-al-Mamun Suhrawardy.
5. Dr. C. A. Bentley, M.B., D.P.H., D.T.M. & H.
6. Dr. W. J. Lubeck, M.R.C.S., L.R.C.P., D.P.H.
7. Dr. Haridhan Dutt, Rai Bahadur.
8. Dr. S. K. Mullick, M.S., M.D., O.B.E., C.B.E.
9. Dr. Sundari Mohan Das, M.B.
10. Dr. B. D. Mukherji.
11. Babu Sarat Chandra Chakrabarti.
12. Lady Mukherji.
13. Mrs. P. K. Roy.
14. Mrs. P. K. Mazumdar.
15. Miss Bidhumukhi Bose, M.B.
16. Dr. Miss G. Iles, M.D., B.S.

By order of the Governor in Council,

L. S. S. O'MALLEY.

Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 29th May 1919.

Summary.—Light rain fell almost throughout the province. More rain is urgently wanted to help the growth of standing crops and for field operations generally. Weeding of autumn crops is proceeding. Ploughing of fields for winter rice and sowings for seedlings continue. The average price of common rice for the province has risen by about 2·4 per cent. as compared with that of the previous week. Distress continues in Bankura and in the Brahmanbaria subdivision of the Tippera district. The average number of persons engaged daily on test works in the Brahmanbaria subdivision was 990.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

Jails.

DARJEELING, THE 6TH JUNE 191

RESOLUTION—No. 105P.J.D.

READ—

The Report on the Administration of the Jail Department in the Presidency of Bengal for the year 1918.

READ ALSO—

The Reports for the years 1917 and 1916 and the Resolutions of Government recorded thereon.

THE total number of prisoners admitted to the Bengal jails during the year was 83,207, or 1,509 less than in 1917, but the average daily population in 1918 was 16,761, or 832 more than in the previous year. There was

therefore overcrowding at times in nearly all jails, and there are no signs, so far, that the increase in criminality which occurred after the outbreak of the war is subsiding. If it persists, the problem of providing additional jail accommodation will have to be faced. Some relief will, however, be given by the jails which will be built at the headquarters of the new districts which are to be created in Midnapore and Mymensingh.

2. It is satisfactory to find that, in spite of overcrowding, the number of jail offences of all kinds was substantially less than in the previous year, the ratio of total punishments to daily population being 142 against 166 in 1917. The penalty of whipping was inflicted in 42 cases as compared with 51 in the previous year.

3. General health conditions were unfavourable, especially during the last six months of the year, when influenza was prevalent throughout the country. The daily average number of prisoners in hospital was 963 as compared with 825 in the previous year, and the death rate rose from 15·8 per mille in 1917 to 21·3 per mille. The latter figure is, however, only slightly above the quinquennial average, and is one per mille less than in 1916. It is a curious fact that the jails suffered much more from the earlier outbreak of influenza in July and August than from the outbreak at the end of the year which proved so fatal among the general population. During November and December, when Calcutta was suffering severely, the Presidency and Alipore jails were practically free from the disease. Altogether 3,426 cases of influenza occurred in the Bengal jails, and of these 53 proved fatal. There was a marked improvement in the health of the prisoners in the Barisal and Barasat jails, which have caused anxiety in previous years, but high death rates are reported from Rangpur, Khulna, Jalpaiguri and Bogra. Serious outbreaks of dysentery occurred in the Rangpur and Jessore jails, where the inexperience of the staff added to the difficulty of combating the disease. The Governor in Council notices with regret the neglect of the sanitary condition of the Khulna jail which led to an outbreak of cholera. The Superintendent responsible has been removed. The death rates in all the Central jails except Midnapore were below the provincial average, and Midnapore has shown improved results as compared with the previous year.

4. The popularity of the wheat scale dietary continues to increase. Three-fifths of the total number of prisoners have voluntarily adopted this scale, and the statistics furnished by the Inspector-General again show its satisfactory effects on their general health. The average cost of this diet is the same as that of the ordinary rice diet.

The special ward for tuberculosis cases at Suri has proved useful. The construction of a ward in the Comilla jail for the reception of similar cases from the jails in Eastern Bengal has recently been completed.

5. The Juvenile Jail at Alipore continues to do excellent work. Further improvements have been made in the school where reading, writing, arithmetic and freehand drawing are now taught by a competent staff, while the physical training has produced an excellent effect on the health and spirits of the boys. Moral and religious instruction is given daily; discipline is good and the number of petty offences and punishments is decreasing. After experiencing considerable difficulties, Sir Walter Buchanan has succeeded in forming an After-care Association in Calcutta, which has found work for several of the boys on their release. There is scope for much useful work in this direction, and His Excellency in Council trusts that philanthropic gentlemen will interest themselves in this sphere of social reform.

The manufacture of quinine tablets and treatments continues to be the most important industry in the jail. The value of the quinine sold by the jail during the year amounted to over Rs. 3½ lakhs, and the profit exceeded a lakh.

6. The outturn of jail manufactures was again satisfactory, though there was a fall in the net cash earnings, due to the larger stock of raw materials and manufactured goods remaining in hand at the close of the year, as compared with the previous year, and also to larger outstandings due to the jails. The Presidency Jail increased its outturn of gunny cloth and was able to make a substantial profit, owing to the low price of raw jute at the beginning of the year. The Midnapore central jail had to meet exceptionally large demands for cotton uniforms and durries from the Police Department, while the blanket factory at the Dacca central jail was engaged all the year in manufacturing blankets for the army. The Rajshahi jail increased its output of castor oil, which yielded a considerable profit.

7. The jails in Bengal continued to help in war work. As in previous years, prisoners volunteered during 1918 for service as sweepers, dhobis and artisans in Mesopotamia, and 27 were conditionally released and made over to the military authorities. The jails supplied to the army large quantities of bandages, dusters and doosuty cloths, besides a number of other articles.

8. The conduct of the warder staff was on the whole satisfactory, and there was a considerable decrease, in the number of departmental punishments. Resignations, however, show a tendency to increase, and the rise in prices and the competition of private firms are adding to the difficulties of recruiting suitable men.

9. The Governor in Council has read with pleasure the tribute paid by Sir Walter Buchanan to the officers of the Department. Lieutenant-Colonel Thompson has been awarded the Order of an Officer of the British Empire in recognition of his services in connection with the war at the Presidency jail, while Mr. M. Leach has been made a member of the same Order for similar services at the Dacca jail.

To Sir Walter Buchanan, who has recently retired from the service, the special acknowledgments of Government are due, not only for the work of the year, but also for his successful and efficient management of the Department during his seventeen years' tenure of the post of Inspector-General of Prisons, Bengal. It is a matter for satisfaction that his long experience of Jail administration is not lost to the country but will be available to the forthcoming Jail Commission, of which he has been appointed a member.

ORDERED that a copy of this Resolution be forwarded to the Inspector-General of Prisons, Bengal, for information.

ORDERED also that a copy of this Resolution and a copy of the report be submitted to the Government of India in the Home Department.

ORDERED also that the Resolution be published in the *Calcutta Gazette*.

By Order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Bengal.

TRIENNIAL RESOLUTION ON THE WORKING OF THE CALCUTTA MUNICIPALITY DURING THE THREE YEARS ENDING 31ST MARCH 1918.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal.

DARJEELING, THE 4TH JUNE 1919

RESOLUTION No. 281T.—M.

READ—

The reports on the municipal administration of Calcutta for the years 1915-16 1916-17 and 1917-18 together with the reviews of the reports recorded by the General Committee and the Corporation.

THIS resolution deals with the administration of the Corporation of Calcutta during the three years ending the 31st March 1918. In view of the economic strain caused by the war, it might have been expected that this period would have caused grave embarrassment to the Calcutta Corporation, with a deficient sinking fund invested in its own debentures, which could only be realized in any considerable amount at a heavy loss. The accretion of large revenue balances, on which the previous resolution commented, enabled the Corporation, however, to surmount financial difficulties. Loans amounting to over 95 lakhs were repaid during the period under review, and although the Corporation provided more than 60 lakhs for this purpose from its revenue funds, it possessed a closing balance at the end of 1917-18 of no less than 45 lakhs—a fact significant of its financial strength.

2. **Elections.**—The sixth general election of Ward Commissioners under the present Act was held on the 20th March 1918. There were 35,153 voters with 90,907 votes, as compared with 38,412 voters with 95,492 votes at the time of the previous election. The votes actually given at the election represented 53 per cent. of the voting power as compared with 57 per cent. in 1915. The decrease is ascribed to recent amendments in Schedules IV and V of the Calcutta Municipal Act which abolished voting by proxy and required firms, companies, etc., to apply in time (which many failed to do) for the insertion of the name of a representative in the election roll. The newly-constituted body of Ward Commissioners consists of 19 Hindus, 2 Englishmen, 2 Jews, 1 Anglo-Indian and 1 Muhammadan. A novel feature of the election was the interest shown by the European and Anglo-Indian rate-payers, of whom nine offered themselves for election as against two in 1912 and 1915. In the contested wards keener interest than ever was shown in the election, but the Chairman remarks that there are still no signs of elections being fought on principles as opposed to purely [illegible]ations.

[3.] **Accounts.**—The accounts department has been reorganized, the complex system of the Corporation accounts simplified and the accounts code revised. According to the statement of revenue funds, actual receipts rose from Rs. 1,14,44,080 in 1915-16 to Rs. 1.23,49,448 in 1917-18, or by nearly 7·9 per cent., while payments fell from Rs. 1,10,98,520 to Rs. 1,10,88,037, the triennium closing with an actual balance of Rs. 55,52,903. On the basis of the accounts of income and expenditure, the income in 1915-16 was Rs. 1,14.30,725 and the expenditure Rs. 1,10,64,871, while in 1917-18 they amounted to Rs. 1,23,18,132 and Rs. 1,12,20,812, respectively, the closing balance being Rs. 45,13,541.

Owing to financial exigencies, the Corporation was compelled to curtail expenditure on capital works and to husband its resources in order to meet its loan liabilities. A loan of 28 lakhs obtained in 1917 from the Bank of Bengal, however, eased the situation, and the Corporation has still its large

revenue balance intact. This balance consists largely of municipal securities which may not be immediately realisable except at a discount, but the Governor in Council trusts that, as soon as may be practicable, the Corporation will utilize its surplus for the execution of long-pending schemes and works of which the cost may legitimately be defrayed from revenue funds.

4. **Loans.**—Of the loan of 35½ lakhs which the Government of India authorized the Corporation to raise in 1914-15 debentures to the face value of Rs. 13,94,300 were issued in 1915-16, but the raising of the balance was suspended under orders of Government. Loans, however, to the extent of Rs. 95,01,900 had to be redeemed, and as the accumulation in the sinking fund only amounted to Rs. 38,39,577 (mainly in debentures of other loans) the balance had to be borrowed by the Corporation for their redemption, and debentures to the extent of Rs. 20,32,700 were subscribed for by it at par owing to the unfavourable state of the money market. With the exception of the sum of Rs. 13,94,300 mentioned above, no loan was raised for capital works during the triennium.

The loan funds opened with a balance of Rs. 9,40,811 on the 1st April 1915. The total receipts during the three years (*e.g.*, on account of loan receipts, sale of surplus land, etc.) amounted to Rs 80,77,782 and the expenditure to Rs. 84,03,796. The balance left at the end of the triennium amounted to Rs. 6,14,797.

The net indebtedness of the Corporation on the 31st March 1918, excluding the accumulations in the sinking fund, was Rs. 4,42,82,919 as against Rs. 4,58,80,234 on the 31st March 1915. It is satisfactory to note that this represents a decrease of Rs. 15,97,315 in the debts of the Corporation compared with an increase of Rs. 20,89,102 in their liability during the preceding triennium.

5. **Sinking fund.**—The balance at the credit of the sinking fund on the 31st March 1918 was Rs. 607 in cash, and securities of the face value of Rs. 38,99,600. To make good the temporary depreciation in the value of those securities, the Corporation was required to pay a sum of Rs. 5,87,220 into the fund during the period under review. The liabilities for interest and sinking fund charges on account of the total outstanding debt of the Corporation on the 31st March 1918 amounted to Rs. 31,82,980.

6. **Assessment.**—The assessed annual valuation of the city continued to increase and stood at the end of the year 1917-18 at Rs. 4,80,98,516 as compared with Rs. 4,34,00,000 at the end of the year 1914-15. A large increase was obtained by the general revaluation of the Port Commissioners' property. The Corporation is of opinion that the assessment department is apt at a general revision to enhance assessments on principle, even if the facts may not justify increase. The Governor in Council is not in a position to test the accuracy of this view; the only criteria which the administration reports furnish, viz., the small percentage of appeals decided against the department and the high prices realized by the sale of surplus lands, though not conclusive, point in the other direction.

7. **Collections.**—The collection and license departments maintained record of efficiency. Both in 1916-17 and 1917-18 the percentage of collections for the consolidated rate calculated on the net demand reached the record figure of 99·8, while the collections of the license department in 1917-18 were the highest on record. The increase of fees from trades and professions appears to point to the continued prosperity of the city during the war.

8. **Water-supply.**—The average quantity of water supplied to the city during the last year under review rose to 62½ milion gallons per day (36 filtered and 26½ unfiltered), with an average consumption of 39 gallons of filtered and 29½ gallons of unfiltered water per head per day. Judged by European standards and compared with the allowance which suffices in smaller Indian municipalities enjoying a pipe supply, this quantity would not appear to be insufficient, but the public complains of its inadequacy and

clamours for a continuous supply, while often oblivious to the necessity of measures for the prevention of waste. A committee has been considering the whole question of filtered water-supply, and its final recommendations will shortly be laid before the Corporation. The experiment of metering houses in certain areas where the consumption is very high has given good results. Complaints regarding the supply of unfiltered water appear to be well founded, and in view of the danger to the public health which must arise where the pressure for flushing purposes in an underground drainage system is insufficient, the Governor in Council is glad to learn that the adequacy of supply and of the pumping plant is now under examination.

9. **Drainage.**—The anxiety to which the silting of the Bidyadhari river had given rise, as threatening the efficiency of the whole drainage system of Calcutta, has been relieved for the present by the adoption of Mr. Addams-Williams' spill area scheme. Land has been acquired near the Salt Lakes to serve as a spill area for the river, and although full effect has not been given to the scheme, recent observations show that deterioration has been largely arrested. The project for the installation of pumping plant at Palmer's Bridge pumping station, which was designed to make the outfall works independent of the silting of the reservoir, has consequently been deferred for the present.

The extension of its underground drainage system into the suburbs is perhaps the most pressing task which now confronts the Corporation. The insanitary conditions which prevail in the outlying parts of the municipality call for early remedies, and in recognition of this fact, the Corporation is undertaking a combined drainage scheme for Wards XIX and XX, to form a part of the Park Street extension scheme of the Improvement Trust. The canal area drainage scheme has given good results, and the sewering of the roads west of Tolly's Nullah—a long-delayed reform which is now to be financed from revenue funds—together with the sewerage and drainage schemes for Ward XXI and the Tangra area, should also improve the public health.

10. **Roads and Lighting.**—The Corporation is to be congratulated on the success of its asphaltum pavement. The Governor in Council will watch with interest the extension of this pavement to the northern parts of the city, where its durability will be even more severely tested than in Chowringhee. The Corporation has made patient experiments to discover the most suitable pavement for heavy bullock cart and motor lorry traffic, and its decision to spend 5½ lakhs on paving with stone setts, cement jointed, appears to be justified by experience.

The Governor in Council observes with pleasure the commendation of the Chairman on the administration of the lighting department. He agrees, however, with the statement of the Corporation in its review on the administration report of 1917-18, that oil-lamps are anachronistic in a modern city, and trusts that the installation of a better form of lighting in narrow lanes and passages will not be delayed. The replacement during three years of only 295 oil-lamps by gas lighting is *primâ facie* not a striking record of progress in this direction.

ts.—The reorganization of establishment in the Sir Stuart has been a useful reform, while the rebuilding of a portion of the market which was destroyed by fire and the remodelling of other blocks proved a remunerative investment. The scheme, which is already in hand, for the expansion of the market towards Free School Street appears to be sound and judicious. The new College Street Market also promises to be a financial success. Most of the private markets of Calcutta, however, still lag far behind modern requirements of sanitation, the control of the Corporation over markets registered under Act VII of 1871 being at present quite inadequate.

12. **Improvement works.**—The Kalighat improvement scheme has made considerable progress, while the cattle stock-yard and central stores are new works of importance. Much has been done to improve the amenities of city life by setting up apparatus for children's games in public squares. The Corporation has taken in hand several minor street schemes with excellent results. Such schemes are of distinct benefit to public health, and the

Governor in Council desires to commend this form of activity to the Corporation, which can thus supplement the larger operations of the Calcutta Improvement Trust.

13. **Sanitary improvements.**—The enforcement of private sanitary improvements during the triennium was to some extent suspended owing to the high price of materials. The Governor in Council trusts that, with improved conditions, the Corporation will resume an active policy in his direction. It is hardly necessary to remark that one of the most important duties of a health department is the inspection and abatement of nuisances or insanitary conditions, which are liable to prove detrimental to the health, comfort and convenience of citizens. The Mallanga Lane experiment, in which the Corporation has taken a small congested block of houses and aimed at utilizing its full sanitary powers in respect of each dwelling, is an interesting recognition of this fact.

14. **Conservancy.**—The Governor in Council is glad to observe that the Corporation definitely intends to remove as early as possible the refuse railway, which has long been a scandal and reproach to Calcutta. He recognizes that it has been impossible to substitute a motor traction system during the war, but the disrepair into which the permanent way and the locomotives have fallen, and the serious breakdown in the service on two recent occasions, make improvement imperative; and it is to be hoped that the Corporation will translate its intention into action without any avoidable delay.

15. **Hackney carriages.**—The number of carriages licensed by the Corporation increased from 3,060 in 1915 to 3,123 in 1918 in spite of a decrease in the number of 3rd class carriages. Under the Hackney Carriage Act recently passed into law, the control of the hackney carriage service is to be transferred to the Commissioner of Police, Calcutta.

16. **Public health.**—The health of the city showed a remarkable improvement during the triennium, the death-rate falling from 28·5 per mille in 1915 to 22·8 in 1917, while the birth-rate rose from 18·5 to 20·9 per mille. It is probable that the improvement in the birth-rate is due to some extent to the introduction of a more systematic house-to-house visitation and to increased activity on the part of the registration staff. The result of an investigation made in a typical ward in order to ascertain whether the low birth-rate was due to defective registration showed that 93 per cent. of the children under three years of age had been registered. The number escaping registration may, therefore, be assumed to be comparatively small.

It is a matter for congratulation that the rate of infantile mortality fell from 287·6 in 1915 to 239 per mille in 1917, but it must not be forgotten that the average rate in the United Kingdom is about half this figure. In Jogra-bagan with its densely populated slum areas, the rate was still 374 per mille in 1917. Excellent work has been done by the Lady Health Visitors and the midwives under them; and with the improvement of suburban drainage and the opening up of the more congested parts of the city by the Improvement Trust, a reduction of the present high rate may perhaps be expected. It also seems probable that "health visiting" or the periodical inspection of infants, combined with antenatal visiting and good midwifery, may lead (as it has led in England) not only to a reduction in immature births, but to the healthy up-bringing of children. The problem is, however, one of considerable complexity, and the Governor in Council trusts that its solution may be facilitated by the deliberations of the large representative committee which he has recently appointed to advise on the measures which should be taken to promote child welfare and to reduce infantile mortality.

The inequality of the death-rate among males and females continued, the ratio for the former being 19·8 per mille in 1917 and for the latter 32·1 per mille. The death-rate among females compares favourably with that for

the rest of Bengal, while the mortality among males is abnormally low. The explanation is to be found probably in the more fixed and stable character of the female population, whereas the males are largely a floating population with a large proportion of adults in the prime of life.

	Plague.	Small-pox.	Tuberculosis.
1915 ...	191	2,560	1,920
1916 ...	78	54	1,733
1917 ...	81	28	1,539

The marginal figures show the mortality from plague, small-pox and tuberculosis: the high mortality from small-pox in 1915 was due to a severe epidemic, which fortunately did not recur in the two subsequent years. Mortality from cholera and malaria, which averaged, respectively, 1,277 and 1,123 a year, showed a tendency to decline. Much of the cholera is imported, but there is reason to believe that the use of river water by Hindu widows and the more orthodox sections of the Hindu community is a frequent source of infection. The use of the unfiltered water-supply and recourse to doubtful sources, such as tanks, in the absence of a continuous supply of filtered water, may also have been responsible for a certain number of cases.

The law relating to food and drugs was amended by the Calcutta Municipal (Amendment) Act, 1917, which enables the Corporation to control places of manufacture and storage of ghee in the city as well as ghee in course of transit, and to make the keeping of adulterants penal. Over 400 maunds of adulterated ghee were seized during the year, and since the passing of the Act there appears to have been on the whole an improvement in the quality of ghee sold.

17. **Education.**—The total extent of aid given by the Corporation to educational institutions of all kinds increased from Rs. 77,030 in 1915-16 to Rs. 85,528 in 1917-18. Grants to primary and technical schools amounted in the last year to Rs. 66,057, including Rs. 26,253 representing exemption from the rates; rates amounting to Rs. 17,068 were also remitted in favour of certain colleges and schools conducted as charitable institutions. The Deaf and Dumb School was given an annual grant of Rs. 2,400 and grants to free libraries amounted to Rs. 5,375. Government has completed an educational survey of the city and the whole question of the improvement of its primary education is now under consideration.

18. **Personnel.**—The Chairmanship was held by Mr. C. F. Payne, I.C.S., except, during his absence on leave, from the 18th November 1916 to the 31st October 1917, when Mr. Goode officiated. Mr. Payne vacated his office in April 1919 for reasons of health and the Governor in Council desires to take this opportunity of recognizing the valuable services which he has rendered to the Corporation. He has been associated with the Corporation as Deputy Chairman and Chairman since the year 1904 and has administered its affairs with conspicuous success, a result due to his initimate knowledge of the details of municipal work, his sound judgment and administrative ability, no less than to his cordial relations with the Commissioners. Mr. S. K. Sawday continued to hold the appointment of Deputy Chairman and Mr. R. M. Chatterjee that of Vice-Chairman. The Governor in Council also desires to record his appreciation of the excellent work done by both these officers.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

CERTAIN ASPECTS OF THE ORGANISATION AND POLICY OF THE AGRICULTURAL DEPARTMENT IN BENGAL.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture.

DARJEELING, THE 7TH JUNE 1919.

RESOLUTION—No. 631T.-R.

As it is desirable to place the public in possession of the intentions and policy of the Agricultural Department in the agricultural development of the Bengal Presidency, the Governor in Council deems it advisable to explain in some detail certain aspects of the organisation of the Department, together with some suggestions derived from the experience of other countries as to how the people can best benefit from its activities.

2. **The necessity for private effort.**—The two main branches of the Department are the research and demonstration branches. It is, however, clear that the activities of the Department in respect of the demonstration of the results of the investigations of the research branch cannot be expected to reach more than a fringe of the agricultural population without the help of the public. On the one hand, the extent of such activities is conditioned by financial considerations; on the other hand, any development of the kind is of no avail if the people are not ready or cannot arrange to take advantage of it. Individually the agriculturist is ready; experience in this country has shown that if he can see with his own eyes the value of an improvement he will adopt it. But if all are to benefit, experience in other countries shows that the agriculturists must meet Government half-way in the matter. It has been found in those countries that, if small associations of agriculturists are formed to test and adjudicate on suggested improvements, to discuss their successes and failures with each other and to bring their needs to the notice of the Agricultural Department, then not only is the practical problem of how to reach the whole agricultural population solved, but there is hardly any limit to advancement in the direction of improved production, economic distribution, improvement of breed, and indeed in all mental and moral development. In the words of an American Professor of Political Economy, Dr. J. A. Ryan, "The transformation in the rural life of more than one European community through co-operation has amounted to little less than a revolution. Higher standards of agricultural products and production have been set up and maintained, better methods of farming have been inculcated and enforced, and the whole social, moral and civil life of the people has been raised to a higher level. From the view-point of material gain, the chief benefits of agricultural co-operation have been the elimination of unnecessary middlemen, and the economies of buying in large quantities, and selling in the best markets, and employing the most efficient implements."

An essential condition, however, for the success of such associations is that they should be conducted on the basis of self-help. It is desirable for Government to assist such associations by teaching and exercising close control; but interference with their management or the grant of pecuniary aid by Government impairs the fundamental principle of self-reliance.

3. **Formation of small Agricultural Associations in Bengal.**—What precise form private effort should take in Bengal, it is perhaps too early to

prophesy. But undoubtedly there is every reason to believe, from the experience gained in other countries, that the formation of small agricultural associations should prove successful, whether as simple associations formed for the purpose mentioned in the preceding paragraph, or as co-operative societies dealing with the purchase of seeds and implements or with the distribution of agricultural produce. There is probably room for associations combining one or more of these functions. Apart from foreign experience and experience in other Provinces in India, there is also the definite fact that such simple associations, serving thanas, or even smaller areas, have met with marked success in the district of Birbhum in the Bengal Presidency. By the co-operation of official organisation and private effort of this nature not only will the successes obtained by experiment be brought to fruition in the interior, but Government will be furnished with a first-hand agency for ascertaining the real needs and the wishes of the agricultural population.

His Excellency in Council hopes, therefore, to see a further extension of this experiment throughout the Province, particularly in those districts in which demonstration farms already exist or are about to be established, as it is in those districts that the Agricultural Department can give the most help. The formation of such associations rests, however, with the public; and they will only be successful if they are financed and managed by the people. The principle accepted as essential by the Board of Agriculture in India, at their seventh meeting in 1911, was that those who are associated should all be agriculturists, really interested in local agricultural improvement.

The officers of the Departments of Agriculture and Co-operative Societies will be ready at all times with their advice and counsel.

4. **Functions of existing Associations.**—The extension of such small associations, if carried into effect, will inevitably involve some alteration in the functions of the existing provincial, district and divisional agricultural associations. The district associations may, for example, find, as time goes on, that their executive functions are being gradually absorbed by the working village societies. For the present, they may find that their duties are devoted to the organisation of such societies. The development will of necessity be a gradual process, and the present associations will doubtless adapt themselves to changing circumstances or give way to a different organisation if they cease to satisfy a real need.

The divisional associations, in particular, may not be required, while experience may show that the functions at present discharged by the provincial association can be more effectively performed by the new Board of the Agricultural Department which has been created.

5. **Establishment of demonstration and seed farms.**—The research work of the Department, or, more properly speaking, the investigation work, is mainly conducted at the Dacca Agricultural Station, which is the headquarters of the chemical, botanical and fibre sections, while there is a smaller investigating centre in West Bengal at Chinsura. At these centres problems of practical utility to Bengal agriculturists are investigated, such as the production of improved rice, jute and sugarcane, the suitability of various fertilizers, the prevention of insect pests and so on; and not, as there is a tendency in some quarters to believe, research work of a purely academic interest. For the purpose of testing the results obtained at these research stations and demonstrating their value, smaller stations or farms have been established at Rajshahi and Rangpur. Private farms at Burdwan and Kalimpong are also managed by the Department. The utility of these stations has been fully proved and the necessity for small farms in every district accentuated, owing to the success attained in the plant-breeding sections of the Department. It has thus become necessary to arrange for the establishment of a demonstration and seed farm in each district, for the dual purpose of adjusting the results of scientific investigations at the central research stations to local conditions and of taking up the study of purely local

problems. Each farm will form a centre for the demonstration of such items as have been found by actual tests to be suited to local conditions. A programme is, therefore, under contemplation for gradually providing every district in Bengal with a demonstration and seed farm as soon as practicable, whilst official sanction has already been accorded to the establishment of such farms at Mymensingh, Bogra and Comilla.

6. **Co-operation of District Boards in establishment of farms.**—In view of the popular interest in agriculture, it has also been considered desirable to enlist the interest of the District Boards by requesting them to co-operate in the establishment, maintenance and management of the farms, subject to the professional control of the Agricultural Department.

In the view of His Excellency in Council the forms which the assistance from District Boards may legitimately take are as follows :—

(1) Provision of land or of money towards the acquisition of the land or towards the necessary buildings.
(2) Provision for the whole or a portion of the recurring expenditure on farm.

The Governor in Council holds that District Boards should possess a voice in the management of the farms to the extent to which they contribute, subject to the professional control of the Department. Certain District Boards have already agreed to co-operate on these lines.

7. **Demonstrators.**—For the purpose of advertising the results obtained at the central research stations and on these farms and in advising the small agricultural associations which are expected to come into being, definite circles, such as the area of a police station, are necessary for demonstration work in charge of demonstrators working under the supervision of agricultural officers. Twenty-six district agricultural officers, *i.e.*, one for each district in the Presidency, have now been sanctioned ; five additional agricultural officers have also been appointed for special work ; and there are at present altogether 79 demonstrators. It is contemplated that, with the completion of the programme for the construction of farms and the multiplication of small agricultural associations, the number of these demonstrators will be gradually but largely increased, until there is one for each police station in Bengal.

8. **Seed-stores.**—Experience in Bengal has shown that the immediate result of successful demonstration at any of the farms already in existence is a demand for improved agricultural appliances, and for seed of a new crop or of a new variety of crop. In fact, agricultural improvement in India necessitates in nearly every case the use of some new thing, whether it be seeds, fertilizers, implements or insecticides. This is exemplified by the insistent and growing demand for seed-stores in those districts where seed of a new crop variety has been issued. One seed-store will not be sufficient in a district ; but seed-stores should be established also at every subdivisional head-quarters and at all demonstration centres. To produce the best results such seed-stores should, however, be established and maintained by such bodies as agricultural associations or co-operative societies or local authorities. It is not, therefore, the policy of Government to establish and maintain such seed-stores themselves for areas smaller than a subdivision. Not only would this involve too large a commercial undertaking for a Government—where attempted in other countries, it has ultimately been abandoned for this reason—but it would involve too great an encroachment on the sphere of private effort. There are already 30 stores in existence under the auspices of Government, and 71 are being created under local organisations.

9. **General Policy.**—By the continuance of investigation for practical ends at the central farms, by the creation of demonstration farms in every

district and seed-stores in every subdivision, by the appointment of a staff of agricultural officers and demonstrators in sufficient numbers to aid District Officers and the Department on the one hand, and the agriculturists, either individually or in association, on the other, the Bengal Government are aiming at the solution of the two problems which the Agricultural Adviser to the Government of India has declared to dominate the whole situation : the first is the provision of the best obtainable seed for any type of agricultural produce, and the second the creation of an agency for its distribution.

ORDER.—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th June 1919.

Summary.—Light to moderate rain was general and was beneficial for standing crops. More rain is needed for agricultural operations generally. Weeding of autumn crops still continues in some districts. Preparation of land for winter rice is progressing favourably. The average price of common rice for the province has risen by about 2·3 per cent. as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of the Tippera district was 1387.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

RESOLUTION REVIEWING THE REPORTS ON THE OPERATIONS OF THE CALCUTTA IMPROVEMENT TRUST FOR THE THREE YEARS ENDING 31st MARCH 1918.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal.

DARJEELING, THE 7TH JUNE 1919.

RESOLUTION No. 330T.—M.

READ—

The reports on the operations of the Calcutta Improvement Trust for the years 1915-16, 1916-17 and 1917-18.

THE Board of Trustees for the Improvement of Calcutta has now been at work for more than six years. A Resolution on its work during the first three years was recorded in 1915, and it is now proposed to review briefly its operations during the subsequent three years. The work of the Trust

during this period was retarded by several adverse circumstances. Its investments in Government securities were depreciated by the war; engineering materials not only rose greatly in price, but were frequently almost unobtainable; the floatation of loans, on which the Trust must rely to finance some of its most costly schemes, was impossible. Another disturbing factor was the prolonged litigation which arose concering the right of the Trust to acquire surplus lands. In spite, however, of these difficulties, the Trust made steady progress with its important task. Large areas which were formerly congested and insanitary slums have now been transformed beyond recognition; and a system of main streets for Calcutta proper has been adopted, and for the most part sanctioned by Government, in the form of either improvement schemes or alignments.

2. **Improvement schemes.**—Of 16 improvement schemes submitted to Government during the last three years, 12 have received sanction, one is under consideration, while three have been abandoned or modified. The Surtibagan scheme has been a striking success. The Trust intervened at an opportune moment, when bustee conditi[illegible] beginning to give way before the speculative builder, and the high prices realized for surplus lands enabled it to recover the cost of the scheme, which has converted the congested insanitary area into a good residential locality. Equally noticeable are the changes effected by the Shambazar bridge road and Cornwallis Street widening schemes at the northern extremity of the city, by the widening of Old Post Office Street, by the conversion of Russa Road into a splendid highway, by the transformation effected in Bhowanipur, and by the progress made with the great north and south thoroughfare (Central Avenue) which carries on the design of the town planners of 1856. It is an interesting fact that, whereas the thoroughfare, 3 miles long, which was planned in that year, but ended with the first instalment known as Halliday Street, was constructed at a cost of 11 lakhs, the acquisition of land for the Central Avenue will alone involve an expenditure of some 200 lakhs gross and 50 lakhs nett. It is unnecessary to describe the details of this great project, but some reference must be made to the controversy which has centred round the linking up of the Avenue with Chowringhee. No less than eight designs were prepared by the Chief Surveyor to the Trust, and the Board eventually submitted for sanction one of which Government could not approve, as it [illegible]erior, as regards both facilities for traffic and architectural effect, to a plan under which the Avenue passes on both sides of the Dharamtollah mosque, and an alternative plan based on the views of Mr. Lanchester, the town-planning expert, in which the road is aligned to the west of the mosque. The Board was accordingly requested to give further consideration to the two latter plans.

One of the most ambitious schemes of the Trust is that for the construction of a fine thoroughfare to connect the Howrah bridge with the centre of commercial Calcutta. The estimated nett cost of the scheme is nearly 75½ lakhs, and it will be necessary to raise funds by the issue of debentures. In the meantime, the alignment of the proposed public street has been published in order to prevent the erection of new buildings on the road-line.

3. **Squares and parks.**—The Trust resolved in 1914 to earmark 10 lakhs for the purpose of forming open spaces and squares in congested areas, and three schemes have now been sanctioned, viz., the Ripon Street triangle, the Marcus Square extension and the St. James' Square. The Shambazar Park scheme is a project of greater importance, providing as it does for a park extending over 53 bighas, which, in combination with the fringe area scheme of the Corporation, will provide splendid recreation grounds for the youth of northern Calcutta.

4. **Improvement of Barabazar.**—The report for 1916-17 points out that the improvement of Barabazar, the Indian business centre of Calcutta, is in many ways a problem by itself. Lofty buildings, into which light and air in many cases hardly penetrate, abut on narrow roads thronged with heavy cart traffic, or on noisome gullies, which defy the efforts of the conservancy staff. The opening up of wide streets and the abatement of insanitary conditions are required both on grounds of public health and in order to facilitate the operations of trade. The high price of land, however, the

large vested interests involved, and the substantial character of the buildings render an improvement scheme for this area one of peculiar difficulty. Both the Board and the Corporation have carefully examined the problem. and a thorough survey of the buildings in the area has been carried out by the Trust. It is reassuring to learn that the result of these enquiries is to indicate that "improvement schemes can be carried out in Barabazar without incurring prohibitive expenditure, and that the best method of dealing with the problem is to carry out such schemes under the powers conferred by the existing Act"

5. **Extension of operations to suburban municipalities.**—"Howrah and the suburban municipalities," writes Mr. Bompas in [illegible] report for 1915-16, "are now much in the state in which the north of Calcutta was 60 years ago: they will eventually have to be furnished with main thoroughfares and adequate open spaces. It is to be hoped that Calcutta's lesson of the costliness of delay will be laid to heart." Accordingly, the Trust has had under contemplation several schemes for developing the neighbouring municipalities in order to provide for the [illegible] of Calcutta and render them fit to receive the overflow of its population A scheme for the creation of a garden suburb in Cossipore-Chitpur has been prepared, but has had to be held in abeyance owing to a proposal to align the Grand Trunk Canal through the area selected by the Trust for development. An improvement scheme has been prepared for Maniktollah. which will, when properly drained, form the most natural area for the expansion of northern Calcutta. The question of extending its operations to Howrah has been the subject of prolonged discussion by the Trust, which has come to contradictory decisions on the subject. In March 1916, it resolved by a majority of 7 to 2 that its operations should be extended to Howrah. A rough scheme and estimate were then prepared and submitted to the Board of Trustees, and after considering them it resolved by a majority of 6 to 5 against an extension of the Act to Howrah. The proposal has, however, been welcomed by the Municipal Commissioners of Howrah. In view of the urgent necessity of improving Howrah and preventing the growth and propetuation on the west bank of the Hooghly of conditions which can hereafter be remedied only at enormous expense. Government is considering the introduction [illegible] legislation to enable its improvement to be taken up.

6. **Excavation area.**—The suburban area is studded with tanks which must be filled up, both for sanitary reasons and in order to provide building sites; and [illegible] of the greatest obstacles to town planning operations is the practical difficulty of obtaining earth for the purpose. The Governor in Council congratulates the Trust on the foresight with which it has handled this problem by acquiring some [illegible] bighas of land in Ward XXI, from which an adequate supply of earth will be obtained, while the excavation area will gradually be transformed into a spacious park and lake.

7. **Re-housing schemes.**—One of the objects of the Calcutta Improvement Act is the re-housing of persons of the poorer and working classes displaced by the execution of improvement schemes, but so far the action taken by the Trust to carry out this object does not appear to have been either adequate or satisfactory in its results. It has undertaken only one re-housing scheme which cannot be said to have been a success. The buildings erected by the Trust consist of a block of tenement dwellings (like the chawls set up by the Bombay Improvement Trust) which have not attracted the class for which they were intended. They are now largely occupied by men of the poorer *bhadralok* class, students and others living without their families, who have not been displaced by the operations of the Trust. The whole question has recently been reviewed by the Board of Trustees and by Government, and the Governor in Council is pleased to observe that the Trust is contemplating the provision of housing facilities for those who are rendered homeless by the removal of bustees.

8. **Proposed public streets.**—The execution of large street schemes involving extensive engineering works, has, for obvious reasons, to be spread over several years, while in the meantime old buildings make room for new and more costly structures. The consequent necessity of vesting the Trust

with powers, similar to those al[illegible] enjoyed by the Corporation, of preventing important schemes being blocked [illegible] the erection of new buildings was soon realized after the Trust [illegible] its operations, and the Calcutta Improvement Amendment Act (III B. C. of 1915) gave it authority to lay down the lines of projected public streets and to prohibit the erection of new buildings within such lines. Altogether 31 important alignments were published by the Trust in the period under review; and 21 have been sanctioned by Government, thus largely setting at rest the uncertainty caused to intending builders by the operations of the Trust.

9. **Finance.**—The total receipts under the capital account during the three years ending the 31st March 1918 amounted to 58½ lakhs (against 43 lakhs accrued during the previous three years). The sale and lease of lands and buildings accounted for 48½ lakhs; the remaining 10 lakhs was the second instalment of the Government grant of 50 lakhs in aid of the capital account of the Board. The expenditure under the capital account during the same period on account of acquisition of land and engineering works amounted to 117½ lakhs against 52 lakhs spent during the [illegible] three years. The deficit of 59 lakhs was met from the surplus available under the revenue account.

The revenue account opened in 1915-16 with a balance of [illegible] lakhs and the receipts during the three years under review amounted to [illegible] lakhs, against 75 lakhs during the previous three years. This sum includes [illegible]4½ lakhs derived from taxation, viz., the duty on transfers of property, the terminal tax and the duty on jute, 26 lakhs contributed by the Calcutta Corporation (partly in municipal debentures at their face value), a recurring grant of 4½ lakhs from Government, 6½ lakhs obtained from interest on investments and 4 lakhs derived from rents and miscellaneous receipts. The expenditure under the revenue account during the same period amounted to 14 lakhs on account of establishment and rents, rates and taxes, and 8 lakhs on account of depreciation of investments. The account closed on the 31st March 1918 with a surplus balance of 130½ lakhs, including two sums of 9 lakhs and 59 lakhs transferred to the capital account.

The actual commitments of the Trust on schemes already undertaken are considerable, while 30½ lakhs of the balance consists of depreciated Government securities. It seems clear that at the present rate of work the cash balances, in spite of the accretion of the capital account by the sale of land, will be largely depleted by the execution of important works now in hand, while the sanctioned schemes not yet begun will involve in the near future a large cash expenditure on the acquisition of land (which will subsequently, however, be recouped in a considerable measure) and a large outlay on engineering works.

10. **Attitude of the public towards the Trust.**—The misgivings and even hostility with which some sections of the public viewed the creation of the Trust appear to have given place to a juster appreciation of the public good. Evidence of its work for the betterment of Calcutta is visible in many quarters, and the citizens of Calcutta have begun to realize the value of its operations in spite of the necessary conflict with private interests which they involve. This change of view appears to be due both to the good sense of the people and to the tact and sympathy which the Trust and Land Acquisition Officers have shown in their dealings with the public. Residents of insanitary localities now generally either welcome or acquiesce in its intervention. A significant instance of this altered attitude is afforded by the resolution passed unanimously by the Municipal Commissioners of Howrah that the provisions of the Calcutta Improvement Act should be extended to that municipality without further delay. The complaint that the south of Calcutta has received more attention than the north, and the demand that the Trust should give preference to the latter, are in themselves an admission of the beneficent work of the Trust. The Governor in Council is disposed to think that the complaint, less common than it used to be, has no justification in fact. The Russa Road and Bhowanipur schemes find a worthy counterpart in those for Shambazar, Surtibagan and the Central Avenue. An examination of the programme of the Trust, moreover, gives convincing proof that it has

been guided and influenced by a broad-minded conception of the needs of Calcutta as a whole.

11. **Conclusion.**—In congratulating the Trust on the work it has done, on the large yet prudent policy it has followed, and on the steady prosecution of its programme, in spite of financial stringency and costly litigation, the Governor in Council desires to offer his special thanks to Mr. Bompas, who will, he understands, be shortly retiring. It fell to the lot of Mr. Bompas, as the first Chairman of the Trust, to lay down the broad lines of its work. Presented with large funds, and asked in consultation with his co-trustees to improve Calcutta, he had to assume large responsibilities. Initial mistakes in financial policy and in misunderstanding of Calcutta's needs must have had serious consequences. The Governor in Council believes that Mr. Bompas' colleagues and the public of Calcutta will share his view that the lines of policy were well and truly laid by Mr. Bompas. The Governor in Council desires also to thank Mr. J. C. K. Peterson, C.I.E., and Rai Bangshidar Banerjee Bahadur, C.I.E., for their excellent work as Land Acquisition Officers and to acknowledge the valuable services of Mr. Shrosbree, late Chief Valuer and Surveyor, and of Mr. Maden, late Chief Engineer.

By order of the Governor in Council,

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR MAY 1919.

1. **Character of the Season.**—During the month under review the rainfall was practically normal in the Burdwan and Presidency Divisions; elsewhere it was in more or less marked defect. The usual rainfall statement is given below.

2. **Progress of Agricultural Operations.**—Sowings of autumn crops were practically completed in most districts and weeding was generally in progress. Preparatory tillage for winter paddy and sowings for seedlings in nurseries were proceeding.

3. **State of Standing Crops.**—The condition of jute and other standing crops was generally satisfactory, but more rain was very urgently needed.

4. **Prospects and Probable Outturn.**—Prospects of autumn crops, sugarcane and deep-water winter paddy were generally hopeful.

5. **Damage to Standing Crops.**—Slight damage by drought to *aus* paddy is reported from Rajshahi, Bogra, Chittagong and Tippera.

6. **Condition of Agricultural Stock.**—Cattle-disease was reported from places in the districts of the Presidency Division and the districts of Burdwan, Midnapore, Jalpaiguri, Malda, Cooch Behar, Dacca, Faridpur and Tippera.

7. **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient all over the province.

8. **Prices of Food-grains.**—During the second fortnight of the month, the prices of the cheapest variety of rice rose in 17 districts, fell in two and remained stationary in the rest. The prices in the different districts varied from 5 seers and 4 chittaks to 6 seers and 8 chittaks a rupee.

9. **Condition of Agricultural People.**—Distress continued to prevail in Bankura and in the Brahmanbaria sub-division of the Tippera district. Relief measures are being taken.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 12th June 1919.

Summary.—Moderate to heavy rain was general throughout the Province. The standing crops which suffered previously from lack of soil moisture have been greatly benefited by the recent rainfall. Preparatory tillage for winter paddy is progressing briskly. The average price of common rice for the Province has risen by about 1·5 per cent. as compared with that of the previous week. Distress is apprehended in parts of Murshidabad district and scarcity is reported from Bohmong circle of the Chittagong Hill Tracts. The average number of persons engaged daily on [illegible] works in the Brahmanbaria subdivision of the Tippera district was 2,650.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

	Kurigram ...	4·40	6	6	
	Gaibandha ...	3·73	6	6	
17	BOGRA ...	1·06	$5\frac{1}{4}$	$5\frac{7}{16}$	The prospects of standing crops are fair. Fodder and water are sufficient except in flooded area. The stocks of rice are insufficient.
18	PABNA	1·92	$5\frac{1}{4}$	$5\frac{1}{4}$	Recent rainfall has done good to the standing crops. Prospects of jute and paddy are hopeful. Fodder is sufficient.
	Sirajganj ..	2·31	5	5	
19	MALDA ..	2·53	5	5	Weather seasonable. Recent rain has improved the condition of jute and *aus* paddy. Harvesting of *boro* paddy is nearly finished. More rain is wanted. No want of fodder and water. Export of rice still continues. Cattle-disease is reported from Bholahat thana.
20	COOCH BEHAR	9·20	$6\frac{5}{16}$	$6\frac{1}{16}$	Weather cloudy and rainy. Sowing of *haimanti* seeds continues. Weeding of *bitri* paddy and jute is finished. Preparation of lands for winter paddy has commenced. Fodder is sufficient.
21	DACCA ...	2·09	$5\frac{1}{2}$ to $5\frac{3}{4}$	$5\frac{3}{4}$	Weather seasonable. The frequent showers of rain are favourable to the growth of jute and *aus* paddy. The prospects of standing crops are good and a fair outturn is expected. The rivers are rising gradually.
	Manikganj ...	1·11	$4\frac{1}{2}$	(*n*)	
	Narayanganj	3·84	$5\frac{1}{2}$	$5\frac{1}{2}$	
	Munshiganj*	(*n*)	(*n*)	(*n*)	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

(*n*) Not reported.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches			
22	MYMENSINGH	1·10	5½	5½	Weather hot. More rain is wanted. Fodder and water are sufficient. Export of rice is reported from Jamalpur subdivision.
	Jamalpur ...	2·12	5¾	5¾	
	Tangail ...	[illegible]	5	5	
	Netrakona ...	(n)	(n)	5½	
	Kishorganj...	3·72	5½	5½	
23	FARIDPUR ...	1·43	5½	$5\frac{11}{16}$	Whether seasonable. The effects of weather are favourable to the crops. W[illegible]rations continue. Prospects of crops are hopeful. Fodder is sufficient.
	Goalundo ...	1·26	6½	6⅛	
	Madaripur ...	7·13	5½	5⅝	
	Gopalganj* ...	4·51	5¼	6	
24	BAKARGANJ (BARISAL).	8·11	5½	5¾	Fodder is sufficient. Prospects of standing crops are good.
	Pirojpur ...	8·81	5	5½	
	Patuakhali...	12·60	5½	5½	
	Dakshin Shabazpur (Bhola).	17·09	5½	(n)	
25	CHITTAGONG	9·75	6	6	Prospects of standing crops are fair. Sowing of *aus* paddy is in progress. *Panga* salt is selling at 11 seers per rupee at Sadar and 9 seers at Cox's Bazar. Fodder is sufficient.
	Cox's Bazar	15·43	6	6	
26	TIPPERA (COMILLA).	9·14	5	5½	Weather rainy. The prospects of *aus* paddy and jute have improved by the rain: 2,218 men, 232 women and 200 children worked daily on an average in test works in Brahmanbaria sub-division. Cattle-disease is reported from Brahmanbaria subdivision.
	Brahmanbaria.	2·73	$5\frac{15}{29}$	$5\frac{17}{29}$	
	Chandpur ...	9·23	5	6	
27	NOAKHALI ...	11·50	{4⅞, 6*}	5	Weather seasonable. Prospects of standing crops are good. Stocks of rice are not sufficient. Prices shew tendency to further rise. Fodder sufficient.
	Feni ...	11·52	{4⅞, $6\frac{9}{16}$*}	$5\frac{11}{16}$	
28	CHITTAGONG HILL TRACTS.	5·99	5	6	Great scarcity is reported from Bohmong circle. Loans are being given. Fodder is sufficient.

* The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.
(n) Not reported.
† Rangoon rice.

ROBERT S. FINLOW,

CALCUTTA,
The 24th June 1919.

G. J. ST. C. SEDGLEY,
Under-Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the [illegible] June 1919.

Summary.—Moderate general rain which fell throughout the province further improved the prospects of standing crops. Harvesting of jute and autumn paddy has begun in the lower lying tracts of some of the eastern districts. The preparation of lands for the next winter rice crop is progressing favourably. Transplanting has also commenced in places. The average price of common rice for the province has risen by about 2·2 per cent. as compared with that of the previous week. Scarcity continues to be reported from Bohmong circle of the Chittagong Hill Tracts. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of the Tippera district was 2602.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

Police Branch.

CALCUTTA THE 27TH JUNE 1919.

RESOLUTION—No. 2211P.J.

READ—

THE Annual Report on the Police Administration of the town of Calcutta and its suburbs for the year 1918.

MR. R. CLARKE, C.I.E., held charge of the office of the Commissioner of Police throughout the year, except for a period of one month and thirteen days, when he was on leave, and Mr. J. S. Wilson acted for him in addition to his own duties as Deputy Commissioner in charge of headquarters.

2. Important changes in the superior staff of the Calcutta Police were made during the year. Three Superintendents' posts were converted into

Provincial Assistant Commissionerships on a time scale of Rs. 400—25—50[illegible]. The charge of the Training School will in future be held by an Assistant Commissioner of the Calcutta Police instead of by an officer of the Indian Police, as hitherto, and it has been decided to reserve one [illegible] of Deputy Commissioner for Provincial Assistant Commissioners. It has given the Governor in Council much pleasure to secure for the officers of the Calcutta Police this improvement in their prospects, which they have fully merited by their good work and devotion to duty.

The only important addition to the force during the year was that of 22 posts of head constables in connection with a scheme for the reorganization and increase of the traffic police, which has been rendered necessary by the development of the city of Calcutta.

3. The general increase of two rupees a month in the pay of constables, sanctioned by the Secretary of State, has not appreciably improved recruitment. Despite fewer resignations, the total number of vacancies [illegible] the rank and file at the close of the year was 560, and recruitment [illegible] not sufficient to fill the annual casualties. These recruiting difficulties [illegible] largely due to the war, and it is hoped that, as demobilization progresses, it will be possible to secure a fair number of recruits during the present year; but it will be some time before the force can be brought [illegible] strength with properly trained men.

4. The new police headquarters were occup[illegible] N[illegible]ber, and since the close of the year land has been acquired fo[illegible] 1.27 ext[illegible] to provide quarters for married European inspectors and sergeants. The old Police Hospital in Amherst Street, which was unsuited for modern requirements, has been sold, and a site for a new hospital has been acquired at Bhowanipur. Owing to the financial stringency, it was not possible to do much during the year towards solving the difficulty of housing the police in Calcutta. The yearly rent paid to private owners rose from Rs. 2,83,178 in 1917 to Rs. 2,99,474 in 1918. The existing arrangement under which 75 per cent. of the force is accommodated in rented buildings is uneconomical, and the Governor in Council awaits the proposals which the Commissioner of Police expects to submit to Government shortly.

5. The total number of true cognizable cases, including petty cases under all Acts, reported during the year was 85,324, as compared with 106,540 in the previous year. The decrease was mainly in offences under special and local laws, and was due to the issue of orders requiring a stricter scrutiny of petty offences under the Police Acts, and restricting prosecutions in certain cases. There was a slight increase in serious crime, but excise cases showed a further marked fall. The number of cognizable cases disposed of by Honorary Magistrates was 56,726, an increase of 5[illegible]55 over the previous year. There was a slight decrease in the number of cases committed to the sessions. As many as 1,396 old offenders were reconvicted. In view of the unsuitability of the provisions of section 565 of the Criminal Procedure Code to the conditions of a large city like Calcutta, the Commissioner of Police has proposed certain amendments, which are now under the consideration of Government, in connection with a draft Calcutta Police Bill. At the close of the year there were in the city 165 registered members of criminal tribes, of whom 18 were prosecuted for offences against the Criminal Tribes Act, 1911. All the cases ended in conviction.

The Detective Department investigated 164 cases and assisted the local police in 97 other cases. Mr. Clarke has furnished interesting details of some of these offences, which included several cases of abduction of minor girls for the purpose of prostitution.

6. Of the 1,131 juvenile offenders convicted during the year, 1,032 were tried in the special court attached to the House of Detention. Twenty-five were sentenced to imprisonment in the Juvenile Jail and 46 were sent to reformatories. In the cases of the remainder, milder punishments were inflicted. Apart from juveniles, 161 persons were dealt with as first offenders under section 562, Criminal Procedure Code, against 127 and 153 in the two previous years.

7. For the first time since 1912, Calcutta was free from open revolutionary crime. The officers of the Special Branch are to be congratulated on this successful result of their long struggle with the revolutionary conspiracy. A number of prominent revolutionaries were arrested in hiding places in the city during the year, and some significant seizures of arms and seditious literature were made.

8. The number of motor vehicles running in the city continues to increase and is now estimated at over 5000, including 863 motor-cycles. There was a regrettable increase in the number of street accidents, 66 of which proved fatal, as compared with 54 in the previous year. The increase is attributed by the Commissioner in part to the reduction of street lighting. Several gentlemen gave valuable assistance as Special Constables in the control of motor traffic, and the institution of a special Bench of Honorary Magistrates for the trial of motor cases has helped to expedite the proceedings and to save time and trouble to the public.

Under [illegible] provisions of the Calcutta Hackney Carriages Act, 1919, the control of hackney carriages will shortly be transferred from the Calcutta Corporation to the Calcutta Police, and the Government of India have recently sanctioned, pending the final orders of the Secretary of State, the creation of [illegible] department, to be called the Public Vehicles Department, comprising two [illegible] one for motor vehicles and the other for hackney carriages, each [illegible] establishment in charge of an Assistant Commissioner of Poli[illegible] the [illegible] department being administered by a Deputy Commissioner of Police.

9. The Cinematograph Act, passed by the Imperial Legislative Council during the year, has not yet been brought into force, but the voluntary censorship boards established in Calcutta have continued to do valuable work, and their control and advice are readily accepted by bioscope proprietors. There are, however, obvious objections to a voluntary system applicable only to a single city and with no legal basis for its operations, and it is hoped that the issue of regulations under the new Act will not be long delayed.

10. The working of the Calcutta Fire Brigade continues to be satisfactory, but the loss of property due to damage by fire and water was large, owing to several big jute fires during the early part of the year, in which delay occurred in giving the alarm to the Fire Brigade. The Brigade was called out on [illegible]26 occasions, as compared with 377 in the previous year.

11. The peace of the city was unfortunately broken by an outbreak of rioting which occurred on the 9th and 10th September and resulted in a lamentable loss of life. The causes which led to the disturbances were fully reviewed at the time, and it is unnecessary to re-open the matter. The police force of Calcutta were subjected to a severe strain, many of the officers and men being on duty for forty-eight hours at a stretch, and it is a matter for the highest satisfaction that no authenticated case of misconduct of any kind on the part of the police was brought to notice, while commendations of their behaviour during the riots were received from many varied sources.

12. The Governor in Council has read with pleasure the list of officers who have been commended by the Commissioner of Police for good work. To Mr. Clarke himself the special thanks of Government are due for his administration of the Calcutta Police during a year of unusual stress and difficulty.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, the Chief Presidency Magistrate, Calcutta, and the Commissioner of the Presidency Division, for information.

Ordered, also, that a copy of the Resolution and a copy of the Report be submitted to the Government of India in the Home Department.

Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

J. H. KERR.

Chief Secy. to the Govt. of Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the month of April, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the month of April, 1919, amounted to 2,557,000 maunds, as against 1,237,000 maunds in the corresponding period of the preceding year,—an increase of [illegible] per cent being chiefly due to the larger imports of rice from Burma. [illegible] was an increase (103 per cent) in the imports of coal and coke [illegible] maunds as against 4,498,000 maunds last year). The value of the i[illegible]s [illegible] rail, river, road and sea (coastwise) of Indian cotton piece-go[illegible] show[illegible] increase of 188 per cent, the total value amounting to Rs. 53,58,000 as against Rs. 18,61,000 in 1918. The quantity of indigo imported during the month of April, 1919, decreased by 1981 maunds or ·94 per cent to 104 maunds. The imports of raw jute amounted to 222,000 bales as against 336,000 bales,—a decrease of 34 per cent. The importations of gunny bags also showed a decrease of 6 per cent (28 million bags as against 30 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 29 per cent from 549,000 maunds to 708,000 maunds. The imports of tea increased by 12 per cent from 137,000 maunds to 153,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the month of April, 1919, increased by 9 per cent (Rs. 2,63,87,000 as against Rs. 2,42,75,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) increased from 77 million bags to 99 million bags, and the shipments of gunny bags to other Indian ports increased from 5 millions to 7 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 404,000 maunds to 369,000 maunds, or by 9 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

DEPARTMENT OF STATISTICS, INDIA,   G. FINDLAY SHIRRAS,

June 28, 1919.   *Director of Statistics*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 26th June 1919.

Summary.—Seasonable rain generally fell throughout the province and the weather was favourable for standing crops and agricultural operations. More rain is, however, needed for transplanting of paddy seedlings. The average price of common rice for the province shows a slight tendency to fall as compared with that of the previous week. Distress continues to be reported from parts of Murshidabad, Tippera and the Chittagong Hill Tracts. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of the Tippera district was 2,456.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
1	24-PARGANAS	0·[illegible]	[illegible]	5 13/16	Transplanting of *aman* paddy and sowing of winter rice continue. Fodder and water are sufficient.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 28th JUNE 1919.

During the week there was insufficient rainfall which retarded the agricultural operations. Sixty-six relief works were open during the week. The number of persons relieved on works was 7,305. The number of persons in receipt of gratuitous relief was 19,623, viz., 14,910 on cash doles, 3,427 on paddy-husking advances, 759 weavers and 527 better class poor. The total number of persons relieved was 26,928. The decrease in the number of persons on relief works was due to agricultural operations, while the increase in numbers on gratuitous relief was due to the opening of new relief centres. Four charitable societies relieved 1,894 persons by rice doles. Offences against property are increasing. The physical condition of workers and public health are good. Fodder and water are sufficient. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice is stationary and varies from 5 to 5¼ seers per rupee.

PRELIMINARY FORECAST OF THE JUTE CROP, 1919.

Consolidated Statement for Bengal, Bihar and Orissa, and Assam.

(This Forecast deals with estimates of areas only. Estimates of outturn are dealt with in the Final Forecast.)

Area.—The estimated area under jute in the three Provinces is 2,749,120 acres. an increase of 248,738 acres, or about 9·9 per cent on last year's final figures

The consolidated figures are as follows :—

Name of Province	Estimated acreage under jute.			Difference [illegible] final	
	1918		1919		
	Preliminary	Final	Preliminary	Increase	
Bengal (including Cooch Behar).	2,250,836	2,249,026	2,431,063	[illegible]	......
Bihar and Orissa ...	150,567	149,256*	202,757	53,501	......
Assam ...	[illegible]0,300	102,100*	115,300	13,200	......
Total ...	2,491,703	2,500,382	2,749,120	248,738	......

* Revised.

The Departmental Preliminary Forecasts for each of the three Provinces are appended

R S FINLOW,

Officiating Director of Agriculture, Bengal.

CALCUTTA,

The 8th July 1919.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the Jute Crop in Bengal, 1919.

(NOTE.—On an average of five years ending 1917-18, the area under jute to which this forecast relates represents 87·7 per cent. of the total area under jute in British India.)

THIS forecast deals with the estimates of area sown and the present condition of the crop, based on information received through the agency of the panchayats, as in previous years.

Area Sown.—The returns show a total area sown of 2,431,063 acres, being [illegible]rease of 182,037 acres, or about 8 per cent. over the final figures [illegible] The increase may be attributed largely to the high prices ruling [illegible]nd [illegible]ticipation, on the part of cultivators, that good prices will be p[illegible]d during the present season. Favourable weather conditions [illegible]raged increased sowings in the Presidency and Burdwan d[illegible]s.

[illegible]aracter of the Se[illegible].—In January rainfall was generally above normal in West[illegible] and Northern Bengal, but below normal in Eastern Bengal. In February, March and the beginning of April there was a prolonged drought, and the rainfall was considerably below normal, especially in Eastern Bengal. The drought was so severe that some early sown jute flowered in late April and early May. In the latter part of April there were good showers, on which a very large area was sown. The subsequent moderate rainfall in May, which was generally less than normal, and markedly so in Eastern Bengal, has been beneficial, on the whole, to the later sown crop, especially on low-lying lands. The tardy rise of the rivers has also helped the later sown low-land jute. There has so far been comparatively little damage by insect pests.

Present State of the Crop.—While not so good at present as that of 1917, at the time of the preliminary forecast, this year's crop promises better than that of 1918.

Stocks in Hand.—The reports indicate that stocks of old jute are generally small.

R. S. FINLOW,

Officiating Director of Agriculture, Bengal.

CALCUTTA,

The 8th July 1919.

APPENDIX I.

Preliminary Jute Forecast of 1919.

District	Estimated area under jute— Last year. (Final figures.)	This year.	Whether much, little or no jute remains in the district from the crop of 1918.	Date by which the sowing of the crop generally commenced this year, and whether the date was early, normal or late.	Remarks by District Officers
1	2	3	4	5	6
	Acres	Acres			
24-Parganas ...	44,425	61,619	Very little	Middle of April, normal	The increase in area is due to favourable weather [illegible] during the sowing season, [illegible] also to the [illegible] obtained last year and the further rise [illegible] Weather has been favourable on th[illegible] to the crop on low lands is reporte[illegible]
Nadia . ..	50,373	67,233	Little in all subdivisions, except in Sadar, where some jute remains.	Middle of April, normal.	Increase in area [illegible] to h[illegible] year The weath[illegible] been [illegible] condition of the [illegible] is goo[illegible]
Murshidabad	12,189	17,180	Some jute in Jangipur and Lalbagh subdivisions, but none elsewhere.	May to June, late ...	The increase in area is d[illegible] to ex[illegible] [illegible]ing to the [illegible]ination of the [illegible] [illegible]vourable a[illegible] p[illegible] condition of [illegible]
Jessore	53,034	79,025	A small quantity only	Second week of April, normal.	The increase in area is due to the prospects of a better market. Insects are reported to have caused some damage in Kalia and Lohagara thanas.
Khulna ...	22,805	19,735	Little —	April and May, normal	The decrease in the area sown as compared with that of last year is due to the fact that there was no rain at the time of sowing The recent rains have improved the condition of the crop although the growth was somewhat retarded owing to insufficiency of rainfall at the outset.
Burdwan . ..	5,605	6,281	Little . .	Second week of April, normal.	The increase in area is due to favourable weather condition at sowing time Some damage was done to the crop in the Sadar subdivision by the Damodar flood in June The present condition of the crop in Kalna subdivision is good
Midnapore	10,655	10,598	Nil	May, normal	Slight damage was done to the crop by excessive rainfall in June The present condition of the crop is fair
Hooghly	27,235	31,170	Little .. .	Beginning of May, normal	The increase in area [illegible] compared with that of last year is due to timely rain[illegible] and expectation of a high price of jute Slight damage by insects as well as by recent heavy rains has been reported from the Serampur subdivision
Howrah ..	7,266	9,991	Litt.	First week of May, normal	The increase in area sown this year is due to timely rainfall Character of weather at sowing time and up till now has been favourable but not so in the Uluberia subdivision The condition of the crop is good in Sadar but fair in Uluberia.
Rajshahi ...	74,300	65,955	Littl	March to middle of April, normal	The decrease in area sown is due to drought at sowing time The crop is poor on high lands but on low lands its growth is good
Dinajpur ...	60,000	60,378	Little ...	End of April, lat .	Increase in area is due to the improvement in the jute market last year Weather was not favourable at sowing time but subsequent rainfall much improved the situation Young early sown plants somewhat suffered from drought
Jalpaiguri .. .	45,[illegible]90	49,316	Little . .	Middle of April, normal	The weather has been favourable and the present condition of the crop is good.
Darjeeling	2,000	2,290	Practically nothing remains	Middle of April, late	Better prices stimulated jute sowing this year Weather was not favourable at sowing time but subsequently it turned better. The present condition of the crop is good
Rangpur ..	200,173	207,664	Little	March, normal	The increase in area is due to the prospects of a better market The sowing time was marked by drought, but subsequently the weather turned more suitable and is at present favourable The recent favourable weather has more or less counteracted the damage done by drought in the beginning of the season
[illegible] .	66,438	69,945	Little	March, normal ...	Increase in area sown this year is due to rise in the price of jute. The weather was unfavourable at sowing time and for some time after, but gradually it became favourable and is so now The present condition of the crop is fair
Pabna	105,102	102,011	Some ...	A little late	The weather was not favourable at sowing time, but it turned favourable afterwards. Slight damage has been done by insects The present condition the crop is on the whole favourable.

DISTRICT.	ESTIMATED AREA UNDER JUTE— Last year. (Final figures.)	This year.	Whether much, little or no jute remains in the district from the crop of 1918.	Date by which the sowing of the crop generally commenced this year, and whether the date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
1	2	3	4	5	6
	Acres.	Acres.			
Malda	29,000	[illegible]400	Little	Middle of May; a little late.	The decrease in area is due to unfavourable weather at the time of sowing. The sowing on high lands was delayed owing to the late rainfall. The present condition of the crop is promising, although slight damage was caused by drought.
[illegible] ...	292,4[illegible]	283,51[illegible]	Very little	End of March and beginning of April; late.	The decrease in area is due to continued drought at sowing time. Weather was not favourable at the beginning, but it improved subsequently. Slight damage has been caused by insect pests and drought. The present condition of the crop is fair.
[illegible]	[illegible]	62[illegible]4	Little	Beginning of April; late.	The increase in area is due to the high prices obtained last year and to the expectation of a good market this year also. The weather was not favourable at sowing time, but it is generally favourable now. The present condition of the crop is hopeful, although drought somewhat retarded the growth of the crop at the beginning of the season.
Faridpur ...	[illegible]18,100	258,[illegible]	Little	Middle of April; a little late.	The increase in area is due to high price of jute. Drought delayed sowings, and affected the growth of the crop to some extent. The present condition is fair.
Bakarganj	50,227	56,633	Nil	April and early part of May; late.	The increase in area is due to good prices of jute obtained last year. The weather was somewhat unfavourable at the time of sowing and afterwards a long spell of dry weather in May retarded the growth to some extent, but no permanent injury was caused. The weather in June was very favourable. The present condition of the crop is good.
Chittagong	[illegible]00	200	Nil	Last week of May; late.	Sowings were late for want of timely rainfall. The present condition of the crop is good.
Tippera	227,521	235,29[illegible]	Some	April and May; somewhat late.	The slight increase in area is attributable to the high price of jute prevailing in the previous year. The weather was unfavourable at the time of sowing. Lack of rainfall early in the season also impeded the growth of the plants, but the rainfall in June improved the situation. The present condition of the crop is satisfactory.
Noakhali	37,500	41,400	Nil	March; normal ...	The increase in area is due to the high price obtained last year. The weather was not favourable at the time of sowing. The drought affected the growth of the crop at the beginning, but the present condition of the crop is on the whole good.
Total for Bengal ...	2,219,212	2,391,873			
Add—for Cooch Behar	29,814	39,1[illegible]0	Little ..	March; normal .	The increase in area sown this year is due to high price of jute obtained last year, and also to the favourable weather at the sowing season. The effects of the weather have been on the whole favourable to the growth of the crop. The plants appear to be healthy.
GRAND TOTAL ...	2,249,026	2,431,063

NOTE.—The figures given above are the averages for all the rainfall-registering stations in each di[illegible]

* The figures in this column are taken from Weekly Weather and Crop Reports and are subject to rev[illegible]

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Preliminary Forecast of the Jute Crop of Bihar and Orissa, 1919.

(NOTE.—On an average of the five years ending 1917-18, the area under jute to which the Bihar and Orissa forecast relates represents about 9·1 per cent. of the total area under jute in British India.)

[illegible]HE present forecast deals only with the estimated area sown. It gives [illegible]neral survey of prospects, but makes no reference to the probable [illegible] either in percentage figures or in bales.

[illegible] **Acreage.**—The estimated area sown during the current and four [illegible] round numbers is given below :—

Year.			Acreage.
19[illegible]	...	...	188,100
[illegible]916	...	...	224,000
1917	...	...	223,300
1918	...	...	149,300
1919	...	...	202,800

3. **Weather Conditions.**—In March and April the rainfall was below the normal in all jute districts except Cuttack and Balasore, where it was above the normal in the latter month. In May the rainfall was below the normal everywhere except Balasore, where it was above the normal. In June the rainfall was above the normal in Champaran, Bhagalpur, Purnea and Balasore and below the normal elsewhere; it was excessive in Balasore.

4. **District Returns.**—The total area under jute as reported by the District Off[illegible]rs is estimated in round numbers at 202,800 acres as compared with 150,600 acres shown in the corresponding forecast of last year and 149,300 acres, the revised final figure of last year. The increase is due to better prices obtained last year.

5. **Condition and Prospects.**—The condition of the crop is fair in Purnea and generally good elsewhere.

6. **General.**—The quantity of jute which remains from the crop of 1918 is small.

The statement below compares the area under jute in this Province this year with the preliminary and final figures of last year :—

Name of Province.	Estimated acreage under jute.			Difference between the preliminary forecast, 1919, and final forecast, 1918.	
	1918.		1919.		
	Preliminary.	Final.	Preliminary.	Increase.	Decrease.
1	2	3	4	5	6
Bihar and Orissa ...	150,600	149,300*	202,800	53,500	......

* Revised.

A. C. DOBBS,
Officiating Director of Agriculture, Bihar and Orissa.

RANCHI,
The 3rd July 1919.

APPENDIX I.

First Forecast of the Jute Crop of Bihar and Orissa, 1919.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Estimated normal area under jute. (This figure has been arrived at by taking the average of 10 years immediately preceding the year to which this forecast relates.)	Estimated area under jute. Last year (1918).	Estimated area under jute. This year (1919).	Whether much, little or no jute remains in the district from the crop of 1918.	Date by which the sowing of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
1	2	3	4	5	6	7	8	9	
		Acres.	Acres.	Acres.	Acres.	Acres.			
Tirhut ...	Champaran	2,259,840	1,430,200	1,600	2,400	2,400	......	......	
	Muzaffarpur	1,949,724	1,627,000	1,700	1,800	2,900	Little	March ...	The w[illegible] been [illegible] of the [illegible] were n[illegible] been complet[illegible]. Increase in area is due to expectation of better prices this year and the advances given by one of the factories in the Sadar subdivision for cultivation of this crop.
Bhagalpur	Bhagalpur	2,661,020	1,684,100	1,257(a)	856 (b)	1,257	Little	May to June ...	The estimate of normal area has recently been revised. The figure for column 6 has been proportionately reduced in reference to the revised estimates of normal area. Prac[illegible]lly the normal area has been put under jute crop this year.
	Purnea ...	3,196,153	1,694,400	210,000	122,000	175,000	Not much ...	March ...	The weather conditions have not been favourable owing to lack of rain in May. The condition of the crop is fair, so far. The date of sowing was a little late. Sowing has been completed. The crop is expected to be better than that of last [illegible] The increase in area [illegible] due to the better price obtained last year and rise in [illegible] of all necessities of life for which people require more money. It is also due to small stock remaining in the hands of cultivators.
	Santal Parganas.	3,466,100	1,698,200	3,050	1,300	1,200	......	......	The condition of the crop is good.
Orissa ...	Cuttack ...	2,310,307	1,223,500	16,400	18,700	18,500	Very little ...	Last week of April.	The rainfall has been favourable for the growth of the crop. The present condition of the crop is satisfactory. Sowings have been completed. The decrease in area sown this year as compared with that of last year is small and calls for no remarks. The date of sowing was normal.
	Balasore ...	1,339,621	932,200	2,800	2,200	2,200	Very little ...	Second week of May.	The weather and rainfall have been favourable for the growth of the crop sown early. The condition of the crop is good. The sowing was early and it has been completed. The crop of this year is expected to be better than that of last year. Jute sown late was to a certain extent damaged owing to excessive rain.
	Total ...	17,198,365	10,289,600	246,037 or in round numbers 246,100	149,256 or in round numbers 149,300	202,757 or in round numbers 202,800			

(a) Recently revised by the Collector.
(b) Revised with reference to revised normal area.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

Preliminary Forecast of the Jute Crop in Assam, 1919.

(NOTE.—On the average of the five years ending 1917-18 the area under jute in Assam represents some 3·3 per cent. of the total area under jute in British India.)

1. **Character of the Season.**—There was very little rain in February and March. April and May were more favourable for sowing and the seasonable rains in June have facilitated growth to a considerable ext[illegible] In spite of the unfavourable weather at the beginning the condition [illegible] crop is generally good and prospects are better than in last yea[illegible] districts.

2. **Area sown.**—The total area under jute as estimat[illegible] Commissioners is 115,300 acres or about 12 per cent. more than the [illegible] of last year. The principal increase, 11,400 acres, is reported fro[illegible] where want of rain at the time for sowing the pa[illegible]y crop [illegible] said to be [illegible] sible for the large increase, as the people turned to jute instead. The increase in the Brahmaputra Valley is due mainly to the extension of cultivation by settlers from Mymensingh.

3. **Stocks.**—According to the reports of the Deputy Commissioners there is little jute in stock from last year except in the Sadar subdivision of Goalpara, where a considerable quantity remained with the traders on account of the low prices offered.

J. McSWINEY,

Director of Land Records and Agriculture, Assam.

SHILLONG,

APPENDIX 4

[illegible]t of the Jute Crop of Assam for 1919.

[illegible]	[illegible]	JUTE.		Difference between the figures now estimated for 1919 and the final of 1918.		Whether much, little or no jute remains in the district from the crop of 1918.	Date by which the sowing of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
		[illegible]nal of 1918.	Now estimated for 1919.	Increase.	Decrease.			
[illegible]	[illegible]	3	4	5	6	7	8	9
	Acres.	Acres.	Acres.	Acres.	Acres.			
Cachar ...	800	100	200	100	......	No	Early April; normal.	The weather was favourable at the time of sowing and up till now; hence the increase in area, and the crop is expected to b· better than last year.
[illegible]	[illegible]	13,600	25,000	11,400	......	Very little ...	Early April; late	The want of rain at the time of sowing paddy has compelled people to take to jute cultivation. The weather up till now has been favourable for the growth of the crop, although it suffered a little from drought at the beginning.
[illegible]	[illegible]	50,000	[illegible]2,900	[illegible]	......	Much remained in the hands of traders on account of low price.	March-April; late	The increase in area is due to extension of cultivation. In the beginning the weather was unfavourable for want of rain, but improved subsequently. The present condition of the weather is good and the crop promises a good outturn and better than last year. Insects caused some damage to the crop in Goalpara subdivision at sowing time.
Kamrup ...	8,100	13,100*	12,900	......	200	Little	1st April; normal	The difference in area is slight. The weather has been favourable to the crop and the prospects are likely to be better than last year. Little damage has been done to the crop by insects.
Darrang ...	7,000	8,300	9,100	800	......	Little	Middle of April; normal.	The increase in area is due to favourable weather and influx of Mymensingh settlers and also to high price of jute. The character of weather up till now is good and the condition of the crop is good and better than last year.
Nowgong ...	5,700	10,900*	11,700	800	......	Very little ...	Early April; normal.	The increase in area is due mainly to extension of cultivation by foreign settlers. The weather at the time of sowing was unfavourable, but improved subsequently. At present it may be called favourable, and the outturn is expected to be better than last year.
Sibsagar ...	300	400	400	......	......	Little ...	First week of April; normal.	The weather was not favourable at the time of sowing, but is favourable now, and the outturn is expected to be the same as last year.
Lakhimpur ...	200	200*	100	......	100	Little	1st April; normal	The decrease in area is reported to be due to unhealthiness amongst the cultivators. The weather has been favourable and the prospects of the crop are fair.
Garo Hills ...	4,100	4,600	3,000	......	1,600	Little	Middle of April; late.	The decrease of area sown this year is due to want of timely rainfall and to low price of jute since the beginning of the war. The weather was not favourable at sowing time, but it is better now. Some damage was done to the crop by drought. The present condition of the crop is worse than in last year.
Total ...	84,100	102,100*	115,300	15,100	1,900			

* Revised on the basis of crop abstract.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 3rd July 1919.

Summary.—The rainfall throughout the Province was generally light to moderate. More rain is needed in some districts for the growth of standing crops and for the transplantation of winter paddy seedlings. Weeding of jute and *aus* paddy is still proceeding in some western districts. Prospects of standing crops are generally hopeful. The average price of common rice for the Province has fallen by about 1·5 per cent. as compared with that of the previous week. Scarcity is reported from the Serajganj subdivision in Pabna and from the Bohmong and Chakma circles of the Chittagong Hill [illegible] The average number of persons engaged daily on test works in the Brahmanbaria [illegible] of Tippera was 2,536.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal 56·46 ft. above M. S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56·319 ft. above M. S. L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge is 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L. it is 1·509 ft above M.-S.L.

(c) From the 25th January 1916 the zero of gauge at Berhampore was 30·99 ft. above M.S.-L. From the 5th April 191

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49 00 ft above M.S.-L. was erected a

The 5th July 1919.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 5th JULY 1919.

During the week the rainfall was general. Transplantation of *aus* and *aman* paddy is proceeding. Seventy-two relief-works were open during the week. The number of persons relieved on works was 6,492. The number of persons in receipt of gratuitous relief was 20,039, *viz.*, 15,251 on cash doles in 114 Unions, 3,479 on paddy husking advances, 782 weavers and 527 better class poor. The total number of persons relieved was 26,531. The decrease in the number of persons on relief-works was due to heavy rains and active agricultural operations, while the increase in numbers on gratuitous relief was due to the opening of new relief centres. The number of persons relieved on private works was 2,000. Also four Charitable Societies relieved 1,799 other persons by rice doles. Offences against property are increasing. The physical condition of workers and public health are good. Fodder and water are sufficient. Cloth is being distributed to [illegible]. The relief measures are adequate. The price of common rice [illegible] per rupee. About 900 maunds of Burma rice were imported for sale in the district.

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE PROPOSED CURRICULUM OF SCHOOLS IN BENGAL.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education Branch.

CALCUTTA, THE 14TH JULY 1919.

RESOLUTION—No. 1123Edn.

READ—

Letter from the Director of Public Instruction, Bengal, No. [illegible], dated the [illegible] May 1919.

The question of the simplification and unification of the different curricula for primary schools which are now in force in West and in East Bengal has for some time past been under the consideration of the Director of Public Instruction. The matter was considered by a Conference of educational officers and by a subsequent Conference of Inspectors of Schools, after which detailed syllabuses of study, covering the whole of the primary school course, were drawn up. The Director of Public Instruction has now submitted these syllabuses to Government with a recommendation for the adoption of a simple and uniform cirriculum for the whole Presidency. The whole course which extends over 5 years, has been so arranged that pupils who desire to proceed to middle and high schools can do so without inconvenience at the close of class IV. The work of class V will be of a vocational nature and is intended to suit the requirements of those boys whose studies would ordinarily not extend beyond the primary stage.

2. The curriculum now proposed includes a wide range of subjects, but three only in which alone a fair standard of teaching may be expected from the average teacher, will be compulsory, viz.,

(1) Bengali (beginning with the alphabet and ending with simple composition and elementary grammar),
(2) Bengali handwriting,
(3) Arithmetic.

The primary scholarship examination will be confined to these three subjects.

The optional subjects will be as follows :—

(1) **History.**—This subject will not be formally taught below class V. The readers used in the lower classes will, however, contain stories culled from history, and the teachers will supplement the grounding thus given by the verbal narration of historical incidents.

(2) **Science.**—In stages I and II the pupil will be taught to observe plants, animals, birds, etc. In stage III he will be taught to observe accurately such phenomena as clouds, rainfall, &c., and to record his observations. In stage IV the principles of growth will be explained. In stage V the children in mufassal schools will learn to make observations of nature and weather, while children in town schools will learn measuring, weighing &c.

(3) **Manual work.**—The children will be encouraged to do independent work.

(4) **Geography.**—The children will begin with the recognition of simple geographical phenomona and end with a detailed study of the geography of India.

(5) English.—English is excluded from the preparatory stage and will be confined to class V, so as to keep the primary school organization in touch with that of secondary schools.

(6) **Drawing.**—The object of the syllabus is to train pupils in the art of accurate observation and correct expression.

(7) **Music.**— } Details are given in the syllabus.
(8) **Drill.**— }

(9) **Hygiene.**—The necessity of personal cleanliness and healthy surroundings is to be impressed upon the children.

(10) Domestic economy and needlework (for girls' schools only).

3. The syllabuses for the different subjects enumerated above are published for general information and the Governor in Council will be glad of criticisms or suggestions on the following points, namely :—

(1) whether the syllabuses as regards compulsory and optional subjects are sufficiently comprehensive ;

(2) whether they are suited to the capacity of the pupils for whom they are intended ;

(3) whether they are likely to fulfil the objects for which they have been drawn up ;

(4) whether the length proposed for the primary school course is adequate or whether its duration should be made longer or shorter ;

(5) whether sufficient or suitable differentiation has been made between urban and rural schools ;

(6) whether the number of hours to be devoted to each subject is adequate ; and

(7) whether any of the optional subjects included in the curriculum should be begun earlier or later.

4. All communications on the subject should be addressed to the Director of Public Instruction, Bengal, Writers' Buildings, Calcutta, within three months of the publication of this Resolution in the *Calcutta Gazette*.

Order.—Ordered that the Resolution together with the draft syllabuses be published in the *Calcutta Gazette*, that a copy of it be forwarded to the Director of Public Instruction, Bengal, for information, that copies be forwarded to the newspapers with the request that they will be so good as to publish the Resolution, and to Commissioners of Divisions (with spare copies) with the request that they will invite all District Boards and Municipalities in their divisions to consider the syllabuses and to forward their suggestions, if any, to the Director of Public Instruction, Bengal, by the due date.

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal

PROPOSED CURRICULUM FOR [illegible] IN BENGAL.

Bengali.

Course.	Text-books.	Number of hours.
Class I.—Association between names and forms of letters. Building and spelling of words. Distinct articulation to be aimed at.	Alphabet-book.	5
Class II.—Intelligible reading of sentences from readers. Conversation on common objects, primary colours, etc. Learning of easy poems. First instruction in writing.	A Reader of 20 pages.	5
Class III.—Reading short tales about animals, etc. Reproduction of the stories, etc., in child's own words. Conversation on common objects. Practice in the structure of simple sentences and easy dictation. Learning of easy poems. Writing from copy on blackboard.	A Reader [illegible] pages.	5
Class IV.—Reading, including character sketches and dialogues. Oral description and development of the power of expression. Recitation of poetry. Writing of letters to teachers and parents. Practice in written composition and transcription from blackboard and other copies. Reading and writing of easy specimens of kabuliats, jamakharach, etc. (*Vide* History syllabus also.)	A Reader of 40 pages.	6
Class V.—Reading, including lives of men of eminence (Hindus and Muhammadans and others connected with the history of India) and national legends, children's magazines, etc. Learning of 40 lines of poetry. Simple composition, elementary grammar. Writing of letters with proper forms of address to landlords and business people.	A Reader of 50 pages.	
Useful information about the work of Co-operative Societies, District Boards, Municipalities, Chaukidari system, law of landlords and tenants.	A supplementary Reader to be published by the Department.	

Handwriting.

The Teaching of Penmanship in High, Middle and Primary Schools.

THE aim of the present syllabus is to call attention to existing defects [illegible] the system of teaching penmanship, to bring forward certain specific poin[illegible] of advice, and to lay down a few general principles that will guide t[illegible] teacher in his work.

General principles.—Whether penmanship is taught in the vernacul[illegible] or in English, certain general principles have to be observed. It is oft[illegible] forgotten that writing is an art that must be acquired by slow degrees. [illegible] such, it must be taught to the learner with the utmost care in the [illegible] stages. The pupil must work under the teacher's eye in the first [illegible] and only after he has acquired some degree of skill, may he be left to hi[illegible] self. In schools teaching should be collective. It is necessary, therefore, [illegible] supervise the progress of each class as a whole. The pupils of each cla[illegible] must keep pace with each other, profiting by each other's [illegible] rected by the teacher, and attaining to a certain [illegible]

Existing defects.—At present the examination of handwriting in our schools reveals the following defects :—

(*a*) **The initial stages are neglected.** The youngest children are not shown clearly how to form the elements of their letters before attempting to write the letters themselves; nor do they form single letters *on any well-defined model.*

(*b*) **Handwriting is seldom** taught in class under the teacher's eye. Pupils write much at home; but this is done in their own way, without supervision.

(*c*) There is no uniformity of progress. At present the penmanship of any single class exhibits varying degrees of difficulty and every variety of attainment. One pupil presents a sheet of single words written at home, another a page of connected prose, another of verse, and so on.

(*d*) The examination of the home-work of any one class shows not only that the pupils have not been shown how to write, but that they do not understand what they have written. The spelling is defective and the words are often arranged in meaningless order.

As general principles, then, it has to be remembered that handwriting demands most careful attention at the start. The progress of the youngest pupils cannot be too slow. The immediate supervision of the teacher is essential. To begin with, penmanship must be done in class under the teacher's eye. Uniformity of work and progress must be arranged. The pupils of any one class should write the same material and in the same way. The correct understanding of the words or sentences to be written is essential if intelligent work has to be done.

Earliest stages.—It has to be remembered that young pupils have untrained hands and eyes. Children come to school before their bodies are mature, and we must exercise their organs in the correct use of writing materials. Great care must be exercised in the introduction to the child of a system of handwriting. He must learn the elements of the letters and the correct shape of the letters themselves. At this stage it will be expedient for him to practise on his slate or on pieces of paper with a pencil, before proceeding to the use of a copy book or an exercise book. Of course, good models must be provided for this practice. Much practice must be given in the formation of single letters and of parts of letters. At this stage and later, remember three things :—

(1) The child must learn to hold his pen or pencil correctly.
(2) There must be plenty of light, coming preferably from the left hand side of the writer.
(3) The position of the pupil's body must be healthy and comfortable.

It has to be noted also that the teacher in selecting his models will put before the child those forms of letters that he will continue to use later in his career. It would be foolish to teach a child one formation of English capital letters, and then introduce him to other formations in the later stages of his work.

Collective instruction.—Let us assume that the rudiments of English handwriting have been acquired. At this stage the pupil will have learned all the single and capital letters and he will have learned how to connect single letters and to write simple words. With the copy book in front of each pupil, careful collective instruction in class will begin. The pupils have each their book and pen before them on the desk or bench. The teacher stands at his blackboard ready to show how the letters have to be formed. In the earlier stages the pupils at the teacher's order will write one word. This must be rapidly surveyed by the teacher throughout the whole class and the essential errors corrected *in front of the whole class* on the blackboard. Of course, progress at this stage will be every slow. But the pupils will learn by the mistakes of their class mates. From word to word the lesson will proceed, each error being pointed out and publicly corrected. At this stage it does not matter in the least how much has been written; the quality of the work done is the important thing. When it is clear that the class has understood what is required, that it has learned the correct formation and style of the letters, *then, and not till then*, a home

task may be set. There seems to be some difficulty at present in the choice of home tasks. A few words or sentences may be selected from the copy books used by the class to whom the task is given, and the pupils will be told to write these a given number of times in *the same style as they have acquired in class.* Remember the following points :—

(1) These exercises should not be long or irksome.

(2) They should be invariably corrected by the teacher.

(3) They are to be supplementary to, and not a substitute for, the class teaching described above.

(4) They must be absolutely uniform; each pupil writing the same words and sentences. Only in this way can class correction be made possible and easy.

The same system will be found useful in the teaching of vernacular penmanship.

It will take some time for teachers and pupils to become accustomed to this system of class instruction. Head masters must explain the system carefully and make every effort to have it enforced. Time-tables should be adjusted in such a way as to admit of this class instruction. Lessons need not be of great duration : and in the higher classes these lessons in class may be reduced as the pupils begin to make perceptible progress. But in no case has the importance of this subject to be overlooked either in class or at home. There is a fatal tendency, explained by the demands of the Matriculation examination, to neglect penmanship as pupils become older. This should be rigidly checked and due attention paid to the written work of every boy in every class of the English teaching school.

Method of advanced instruction.—There is much that is altogether mechanical in the teaching of penmanship. It is necessary to pass through the stage of purely mechanical manipulation before any facility with the pen in the writing of a new script may be acquired. When a certain amount of facility has been attained, the intelligent teacher will try to relieve the monotony of the class lessons in penmanship. In the advanced teaching of handwriting in the senior classes of the school the following points should be observed :—

(1) The whole school should be given instruction in penmanship. It may be left to the discretion of the head-master whether he will teach handwriting in the Matriculation class; but existing conditions make it imperative that penmanship in its more advanced stages should be taught from the sixth to the second classes *inclusive*, elementary teaching of this subject being confined to the two seventh classes. In the case of middle English schools instruction in this subject will extend naturally to the highest classes.

(2) At this stage instruction will be on a basis of correlation. *The pupil must understand clearly what he writes.* If he does not so understand, he cannot write well. The teacher will explain the meaning of each head line to his pupils before they proceed to write it in class. In this way useful general knowledge will be acquired and instruction in penmanship made more interesting and intelligent One important point to note is that the boys of each class must use at the same time the same book.

Handwriting throughout the school.—A good system of instruction in penmanship will be manifested in the careful work of the junior pupils, in the accomplished handwriting of the senior pupils and in the general appearance of all written exercise work. In the first four years of English study unremitting attention should be paid to class instruction in handwriting and to home exercises in handwriting. This must form an integral portion of the school routine and have its due place on the time-table. In the senior classes copy book practice should be continued under the teacher's eye, while home exercises in penmanship may be somewhat relaxed. It should be carefully noted that class instruction in penmanship will have little value if pupils are allowed to write their exercises in a slovenly manner. Such exercises as are given should be corrected with due attention to the way in which they are written and slovenly work should be rejected.

Arithmetic.

Primary School.

Classes I—IV.

There should be no deliberate teaching of number until five years of age. The teaching of the beginnings of Arithmetic should be founded upon the children's experience of actual objects. The objects should be handled and not merely seen, and the use of abstract number entirely avoided.

The scheme throughout the primary school stage should be *spiral*; and the old plan of knowledge and rules in water-tight compartments corresponding to the various classes should be abandoned. A rule should not be treated exhaustively at the beginning. The simplest aspect of the rule should be first dealt with, and then the rule should be left alone for a time and returned to later. Every rule should be first presented in a concrete form and for this practical work on the part of the children is required. After several experiments they should be led to perform the operation "mentally", *i.e.*, without the use of actual objects, and finally proceed to written work. This procedure should be followed whenever a new rule is attempted. In written work it is to be remembered that an intelligent arrangement is as important as getting a correct answer. A scholar is badly taught who can work on paper and yet be entirely unable to calculate "in his head", or conversely, if he can perform an arithmetical operation mentally and be unable to express the same operation, or a harder one involving the same principle, on paper. The practice of writing down answers to oral questions in the case of large classes is very useful.

Class I. (Age 5—6) Total time 5 hours a week in half-hour periods.

First half-year—

The analysis of numbers from 4 to 10 in succession, illustrated by objects like bricks, beans or seeds loose or on string, sticks, counters, etc. In the early stages, objects on which the teaching is grounded should not be arranged at equal distances in a straight line, but in groups with not more than three in a group. Games in which scoring is required. Shop games introducing coinages, weights and measures in a very simple way, but there must be no written work. Weighing scales should be used if the teacher can procure or devise them.

Second half-year—

Revision of number up to and including 10.
Addition and subtraction up to and including 12.
Ditto ditto ditto 24.
Building up the "twos" table.
Ruling and measuring with ruler marked in inches. Simple questions as "how long is your book?"
Money table up to two annas, including 12 pies equal 1 anna; use tokens, dozens, pairs, halves.
Revision exercises in addition, subtraction and multiplication (by 2) to 24.
Linear table up to one foot (twelve inches), use ruler.
Problems on 12 pies in one anna and 12 inches in one foot.
Division of numbers up to 24 by 2 (no remainders).
Measuring and sharing.

Class II. (Age 6—7). Total time 5 hours a week in half-hour periods.

First half-year—

Extension of numbers to 36 (addition and subtraction).
Building up "threes" table.
Addition, subtraction, multiplication (by 2 and 3) to 36.
Division by 2 and 3 to 36 (no remainders).
Measuring in feet. Money to 3 annas.
Addition and subtraction of numbers to 48.
Building up "fours" table.

Addition and subtraction of money to 4 annas, of feet and inches to 4 feet.
Division and multiplication by 2, 3 and 4.

Second half-year—

Addition and subtraction of numbers to 60.
Building up "fives" table. Multiplication and division to 60 (by 2, 3, 4 and 5).
Addition and subtraction of money to 5 annas and feet to 5 feet.
Division and multiplication of money to 5 annas and inches to 5 feet.
Ruler exercises, halves and quarters, one pice is a quarter of an anna, 6 inches is a half foot, 3 inches is a quarter of a foot.
Addition and subtraction of numbers to 72. Building up the "sixes" table.
Division and multiplication of number to 72.
Addition and subtraction of money to 6 annas and inches to 2 yards.
Extension of numbers to 99 (addition and subtraction).
Multiplication and division of numbers to 99 (no remainders).

Weights—

5 tolas	=	1 chatak.
4 chataks	=	1 powah.
4 powahs	=	1 seer

Class III. (Age 7—8.) Total time 5 hours a week in half hour periods.

First part of year—

Revision of number to 99 (+, −, × and ÷).
Ditto of money to 5 annas. Length (feet and inches).
Building up "sevens" table (× and ÷ by 7).
Money to 7 annas (+, −, × and ÷).
Extension of number to 250 (+ and −).
Number to 250 (× and ÷ by 7).
Practical measuring and estimating.
Building up the "eights" table.

Capacity—

4 kanchas	=	1 chatak.
4 chataks	=	1 powah.
4 powahs	=	1 seer.

Money to 8 annas. Length to 8 feet. Half inches, half annas.
Sixteen annas in the rupee. (Two eight annas in rupee—four four-annas in rupee).
Ruling squares and oblongs.
Building up "nines" table (× and ÷ by 9).
Pies table to 9 annas Money to 1 Re. 15 as.
Building up "tens" table (× and ÷ by 10).

In multiplying a number by 10 teach that the multiplicand is moved one place to left and a zero put in vacant units' place, thus

43 430	not	43 430

The value of each digit is insisted upon throughout.

In dividing by ten the dividend is moved to the right, past the "decimal point" which is always just to the right of the units' place.

Thus—
43·
4·3

Introduce decimal ruler and show tenths. Measure lines to tenths and write both $4\frac{3}{10}$ inches and 4·3 inches. Use paper rulers made by teacher.

Second part of year—

Extension of number up to 500 (+ and −).
Number to 500 (× and ÷).

Multiplication and division by 100. In former case multiplicand is moved to left two places and two noughts added. In latter case dividend is moved to right two places past the decimal point, which is always just to the right of the units' place.

Practical work in quarters, halves, eighths.
Pies table to 10 annas. Coins to Rs. 2.
Revision. Seers and maunds introduced.
Building up the "eleven" times table (× and ÷ by 11).
Pies table to 11 annas. Money exercises to Rs. 3.
Practical work. Telling the time.
Building up the "twelves" table (× and ÷ by 12)
Pies table to 12 annas. Money exercises to Rs. 5.
Practical work. Drawing and measuring. Continue measuring lines to 10th of inch. Add two lines together and subtract a short line from a long line (*i.e.*, addition and subtraction of decimals of one unit and one decimal place. Thus 4·6 inches —3·2 inches). These and similar exercises should be done on the ruler.
Extension of money to Rs. 10.

Third part of year—

Extension of number to 999 (+ and −).
Number to 999 (× and ÷).
Halves, quarters, eighths.
Extension of money to Rs. 20 (+ and −).
Ditto linear measure to yards.
Money to Rs. 20 (× and ÷).
Easy reduction of money.
Estimating and checking estimates of weight.
Ditto ditto length.
Easy measuring in square inches.
Measuring and easy reduction.
Capacity (chataks, powahs, seers and maunds) and weights (tolas, chataks, powahs, seers and maunds).
Easy shopping accounts.

Class IV. (Age 8 –9). Total time 7½ hours per week. Three-quarter hour periods.

First part of year—

Revision of previous work.
Extension of number to 9999 (± and −).
Ditto ditto (× and ÷).
Ditto money to Rs 50 (± and −).
Ditto ditto (× and ÷)
Ditto length to chains and furlongs.
Ditto weights to include maunds.
Factors, prime and composite numbers.
Great attention should be paid to factoring. The ability to detect readily the factors of numbers is invaluable later in highest common factor, least common multiple, reduction of fractions, etc. Cancellation, too, the great labour-saving device of arithmetic, depends upon skill in detecting factors.
Multiplication and division of numbers by factors.
Measurement in tenths, but express in decimals also.
Scholars to construct paper or cardboard ruler themselves.
Extension of addition and subtraction of tenths.
Multiplication and division of tenths.
Easy methods of multiplication and division, *e.g.*, multiply by 20 and 50 in one line.
Scheme is multiply by 10 and double.
Easy reduction (downwards).
Ditto (upwards).
Simple scales, *e.g.*, let ¼ inch represent a foot.
Draw squares of 4 feet sides and give the area.
Simple plans, simple measurements of square or rectangular room
Cardinal points: simple measurements.

Second part of year—

Long multiplication by numbers of not more than two digits.
Scheme is—

```
 156 nuts
  16
 ----
1560 nuts = 10 times 156,
 936  "   =  6   "   156
 ----
2496  "   = 16   "   156
```

Long division by numbers of not more than two digits.
Scheme is—

```
     32 groups of nuts each containing 31.
    ---
31)998 nuts
    93
    ---
     68
     62
    ---
      6 nuts over.
```

Problems on simple rules.

Easy reduction by factors, *e.g.*, 793 pieces of pán shared among 32 men.

```
793 ÷ 32 = 793 ÷(4 × 8) =
   4) 793 pán
      ----
   8) 198 groups of 4 + 1 pan over.
      ----
       24 groups of 32 + 6 groups of 4 over.
```

Answer 24 pán each and 25 pán over.

Easy symbolic arithmetic, *e.g.*, how many annas are there in y rupees? What does x equal when $3x=36$?

Areas of squares and oblongs.

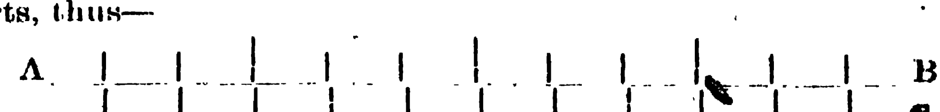
Making and using a set square (correlate with manual work).

Making the face of a clock.

Simple Geometry. First ideas—an angle as the rotation of a line about a point. There are 90° in the right angle of the set square. how many degrees in each of the other two angles?

Compound multiplication and division by factors.

Easy fractions— addition and subtraction of fifths, halves, quarters, eighths, tenths, thirds, sixths, twelfths.



Conversion of simple fractions into decimals, denominators of 2, 4, 5 and 10 and no others at this stage.

Which of two fractions is greater, *e.g.*, $\frac{3}{4}$ or $\frac{2}{3}$?

Scheme is to divide upper part of a straight line into fourths and underneath part of line into thirds.

Now divide each fourth into three equal parts and each third into four equal parts, thus—

Thus $\frac{3}{4}$ or $\frac{9}{12}$ is greater than $\frac{2}{3}$ or $\frac{8}{12}$.

Exercises on the railway map of Bengal or the roads on the district map

Third part of year—

Compound multiplication of money by factors using composite numbers of not more than two digits.

Compound multiplication of money using both kinds of numbers of not more than two digits.

Problems in concrete numbers and money.
Compound division of money.
Easy fractions, addition, subtraction and simple multiplication (denominators of 2, 3, 4, 5, 6, 8, 9, 10, 12).
Extension of addition and subtraction of decimals to two places.
Short mechanical methods of multiplication and division.
Cardinal points: Time measures.
Easy fractions, vulgar and decimal—parts of a rupee and all measures
Preliminary square measure.
Easy symbolic arithmetic.
Representations by drawings.
Simple bills.

CLASS V—of Primary School—Vocational year (age 9—10). Total time 7½ hours per week. Three-quarter hour periods.

Subhankari, bazar sums, simple mensuration. Scholar to learn local bigha table with corresponding decimals of an acre.

History.

rimary.	Books.
History as a separate subject appears for the first time in the fifth year of study. In the primary school curriculum a certain amount of history will be correlated with reading in the readers, and historical stories should be told in the earliest stages. Nothing more than this can be attempted.	Historical tales in the general readers. Oral stories from Indian Legend, etc.
Class V.—Cultivation of the "time sense" is necessary from the first. Extent of periods of 30, 50 and 100 years to be explained. Outline charts of Indian or World history to be shown in order to encourage the correct sense of time relationship One period of Indian history should be given for moderately detailed study—the Hindu period.	(1) Simple, complete and modern vernacular history of India with main periods defined. (2) Time charts of World and Indian history.

Science.

Classes I and II.

Here the course should be concentric and based chiefly upon elementary observations.

Plants.—The collection and observation of common plants, bark, leaves, fruits, seeds. *Flowers*: the cotton-tree flower, jessamine, goldmohur, champak, convolvulus, etc. *Fruits*: papaya, pomelo, litchi, mango, plums, custard apple, plantain, pineapple, jack fruit. *Ordinary crop plants*: rice, indigo, cotton, mustard, pulses. *Common trees*: children should be taught to observe bark, leaves, flowers, fruit; that is, each tree should be studied separately with regard to its bark, leaf, flower and fruit.

Animals.—Children should be taught to watch the habits of ordinary domestic animals. They should be taught the nature and habits of the commoner wild animals and snakes.

Birds.—They should be able to recognise the commoner birds such as the crow, blue jay, maina, golden oriel, owl, kingfisher, babui, bak, snipe, duck, pigeon, bulbul, kite, vulture, heron, kola bird.

Insects.—They should know the common insects; the season and time of day at which they appear, and their habits: the mosquito, dragonfly, butterfly, bee, wasp, ant, beetle, spider.

Fish.—The use of fins, gills, etc., should be taught. Skeletons may be shown and the commoner kinds of fish observed.

Life histories.—Throughout the year they should have an opportunity of studying one or two life histories of plants and insects, *e.g.*, brinjal, white butterfly, other moths, silk worm, mosquito, water-beetle, frog.

Class III.

Here the pupil must learn to observe accurately and to record regularly.

First half of the year.—The keeping of nature diary and calendar on the following lines:—

(1) Clouds—amount of cloud, direction of cloud.
(2) Rainfall to be measured in tin or mud box in inches and tenths.
(3) Varying depths of tanks.
(4) Times of sunrise and sunset. Note sun at opening and close of school or any particular hour. Note varying objects on the horizon over which the sun rises and sets at different periods of the year.
(5) Shadow stick.
(6) Direction of wind: warm and cold breezes: note the direction of the wind in connection with the time of year.
(7) The moon and its changes.
(8) Diary of crops, *e.g.*, "My father commenced sowing his jute to-day". Observe the different kinds of paddy, *aus*-paddy—early, *aman*-paddy—late or transplanted, *boro*-paddy—winter crop, wheat, barley, oats, jute, sugarcane, chillies, arhar (pigeon-pea), matikali (grain), mustard.
(9) Note the date of the flowering of certain trees and bring the flower to school: mango, jack fruit, banana, cocoanut, date, betelnut, nim, rain tree, goldmohur, jamun.
(10) Note the date when the flower dies and when the fruit first appears.

Along with the above should be arranged the experimental study of the development of the pea, bean, wheat and cucumber from seeds.

Second half of the year.—Collections should now be made, and an aquarium, an insectary and a museum may be started:—

(1) **Aquarium** (covered).—Life stories of frog, mosquito, dragonfly, water-beetle.

(2) **Insectary.**—Lizard, silk worm, caterpillars, grubs, crysallis, butterfly or moth.

(3) **Museum.**—(1) Barks, leaves of trees, pressed flowers; (2) Collections of seed; (3) Collections of soil, each being classified with the crops grown on each. Samples of soil-forming rocks, *e,g.*, quartz, felspar, mica, etc.

The method during the whole of standard III should be entirely that of the nature diary, *e.g.*, *daily* observation and the accurate recording of observations. The habit of careful recording must be inculcated before the systematic science course is commenced. Bengali weather proverbs should be taught throughout the course.

Class IV.

At this stage the principles of growth should be explained.

(1) **The Nature Diary** should be continued. These observations may be utilised in connection with Geography.

(2) **The School Garden.**—Garden work to continue into Standard V, the final year of the Primary School. Points of importance are (1) the collections of soils made in the earlier observation of crops; (2) the drainage of the garden; (3) the general situation.

(3) **Seeds.**—Germination tests with incidental observations, *e.g.*, which is stem, root, etc. Sow 50 seeds of each of several plants, *e.g.*, mustard on moist flannel—record the time and the number of days taken for germination—percentage germination. Other experiments, *e.g.*, depth of sowing, effect of moisture, heat, etc.

(4) **Plants.**—Sow in the garden different plants at different times of year, *e.g.*, sugarcane in March and paddy in April. Measure the rates of growth under different conditions; and, incidently, by so ordering the experiments work out the following principles of growth:—

(*a*) Plant and soil, the mechanical analysis of soil.
(*b*) Effect of heat, moisture, etc., on growing plant.

(5) Connection between plant and animal life. Show how the plant breathes in the same way as an animal.
(6) Life histories to be continued.
(7) Observation of trees and animals for the nature diary.
(8) Simple weather observations for nature diary.

Class V.

The final year of the Primary School course—

(1) Continue daily weather observations and nature observations in the nature diary.

(2) Continue school gardening. The garden should be close to the school. It should be fenced in if possible, well drained, and of sufficient size to allow a plot of land for each pupil, and a central path. There should be a well, or other source of water-supply, easily available.

Tools.—Each boy will require a kodali, a khurpi, a basket (which he can make himself) and a reaping hook, a watering can, a measuring tape and lines of thick cord with pegs will be required for marking out the plots.

Course.—*Digging* with kodali. Effect and purpose of digging.
Manuring.—Effect and purpose. Plant food.
Seeding.—Why seed must not be sown too shallow or too deep. As seed grows study plumule and radicle.
How plants feed and grow.—Functions of root, stem and leaves.
Production of seed.—Pollination and formation of seed.
Harvesting.—Crops should be harvested and samples of seed collected in small bottles. Germinating tests should be made later, and percentage of germination found.
Crops.—The following rotation of crops can be sown in one plot.

1st year (Class IV.)

Kharif.—(1) Jute, (2) *Aus*-paddy, (3) Maize, (4) Juar.
Aghani.—(1) *Aman*-paddy.
Rabi.—(1) Mustard, (2) Wheat, (3) Linseed, (4) Gram.

2nd year (Class V.)

Kharif.—(1) Sugarcane, (2) *Aus*-paddy, (3) Jute, (4) Maize, (5) *Aman*-paddy.
Rabi.—(1) Sugarcane, (2) Linseed, (3) Wheat, (4) Peas, (5) Gram.

Alternate 5th year course.

Class V of Primary Schools in towns—measuring, weighing, heating and the science of common things.

Measurements of length—first with the eye and then with the rule.
Measurements of area.
Wire-gauge; callipers; scales and weights.
Weighing of common objects—first by hand, then with scales.
Measuring time—a clock (show works), a watch, use of pendulum.
Plumb line.
Spirit level.
Steam—Observation on boiling water, condensation of steam, etc.
Mercury: Effect of heat on mercury—Expansion.
Thermometer—Its manufacture, uses, readings in ice, in boiling water, under tongue, in school room, in sun.
Water—How carried. Wells, pipes, taps, fountains, canals. Things that float, rafts, boats. Things that sink, anchors. How water is lifted. Methods of irrigation in India. Pumps.
Air—Bubbles, pouring water through a funnel into a bottle. How fishes live. A burning candle. Fans. Paper windmills. Aeroplane propellor. Shuttlecock, arrow, kite. The pop-gun.
Winds—A sailing ship. A syringe. A bicycle tyre, pump and valve.
A barometer.
A candle—its composition; the wick. A lamp.
Candle under tumbler over water: candle in narrow-necked bottle.
Chalk—What is it? Obtain limestone by heating it: Lime water.
Sugar heated in a test-tube; wood heated in a test-tube.
Sulphur ditto ; Lead ditto ditto.
Powders—Flour, chalk, pencils, blacklead.
Pastes—Paste, clay, putty, mud, brickmaking, pottery.
Porous solids—Bread, sponge, brick, chalk, blotting paper, wicks, earth, springs, filter.

Solids that dissolve—Salt, sugar, manufacture of sugar, crystals, hard water, varnish.
Things that stretch—Rubber, elastic bands, a football, bicycle tyre.
Things that bend—Bow and arrows, cord, rope (hand made), springs, spiders' webs, clock springs, chains.
Things that melt—Ghee, tallow, wax, lead, iron and iron smelting.
Forms of strength—Floor, joists and boards, stairs, ladders, arch, the roof.
Machines—A lever, pulleys, a knife. Scissors, hoop, fly-wheel of sewing machine. Bicycle, the chain, gearing. The loom. Hinges, axles—the grindstone, screws and screw drivers.
Sounds—Drum, whistle, sounds from stretched strings. A bell, harmonium.

Manual Scheme for Primary Schools.

Primary stage.—Owing to the fact that the infant classes are usually left alone to employ themselves during at least a part of the day, and that manual training in many schools is an optional subject both for teachers and scholars, the exercises should be interesting and so arranged that they can be done by the children independently.

Class I.

Clay modelling.—Simple household utensils, pottery, etc. Modelling in connection with the beginnings of Geography. The children should model from pictures or from models made by the teacher.

Class II.

Stick laying with the use of seeds to shapes shown on a wall chart.
The following shapes may be used :—

An umbrella, a house, a tent, a fence, a gate, a fence and gate, a door, a window, a house with fence and gate, a group of tents, a tree, a plant (with half sticks and a seed), a tree (with half sticks), a tree bearing fruit (small real leaves may be added), a window (with quarter sticks), a verandah, a balustrade, a large house with balustrade, verandah, a door and windows; add fence, gate, trees, plants, a water lifter; add these to house. (Several children should now work together under charge of a monitor.) A man, a cart, a cow, a man carrying, *bail* gharry, add a box to the gharry. Build up a hât from several new elements, children working together; thus—a stall, a basket of seeds, lentils, rice, miniature bundles of jute. Several children may now construct a hât of four shops. Now add a river and a man rowing a boat, now a bridge, a man carrying a basket on his head, etc.

Class III.

Tear out of paper, according to picture chart, a wall, a house, a man, a tree, a boat, a large *pucca* house, a cow, a hen, a vulture, a horse, a horse carriage, cow-cart, a bridge, a man with a spade, a man fishing, a man with a *lathi* A man with a bundle on his head. Multiply them by folding the paper and so build up a street. A railway engine carriage, etc. Each model may be improved with pencil or colours. Make a book (using a pin for stitching), an envelope.

The teacher may teach any paper folding which he knows; and the first and second classes may combine in this work.

Class IV.

Clay work combined with sticks. The models suggested in the first and second years should be made with clay and sticks combined and any other materials available. The models should be as true to life as possible and should not be flat but standing. All materials may be used, *e.g.*, straw for roofs, leaves for plants, paper for men's clothes, scissors and knives may be used if available

Class V.

Cardboard modelling. All work must be accurate to $\frac{1}{16}$th inch. Glue should be used and not paste. Brass paper fasteners (split pins) are useful. Plenty of coloured paper should be provided. Models must be completely

finished before inviting the approval of the teacher; for example, the model may be painted suitably or covered with coloured paper; drawers should also have handles (a piece of cork or wood glued on), hinges to doors, etc. The model must be approved by the teacher in regard to the accuracy of its construction, the testing of dimensions, etc.. before the scholar is allowed to decorate it.

The material used should be thin cardboard or thick paper. The exercises indicated below cannot be performed satisfactorily with ordinary foolscap paper or with strawboard.

Two methods of working should ordinarily be followed :—

(1) The scholars should construct their models from a dimensioned drawing shown on a wall chart or in a text-book.

(2) They should construct their models from an actual object by taking measurements of the object and working to scale.

Vocational year of Primary School.

Dimensional sketches of objects and models given on a wall chart.

(1) Construct a cardboard ruler graduated in inches, half the ruler in half inches, quarter of the ruler in quarter inches, a sixth in eighths and one inch in tenths.

(2) Construct a cardboard scale showing 1" to foot up to 3 feet. Measure and draw plans of furniture to scale.

(3) Draw circles and simple geometrical figures (*e.g.*, triangle, square, oblong) to scale. Cut out in cardboard. Save these models for future experiments.

(4) Construct a cardboard 45° set square. Copy direct from model. Make another half size. Ditto for 30°, 60°, set square. Refer to angles as 1, 2, 3 and make them at each corner.

(5) Draw and cut out triangles using the set squares.

(6) Construct and cut out a protractor.

(7) Graduate and cut out a thermometer scale. Copy from actual object.

(8) Draw and cut out the following flat objects :—A box with sides flattened out, a clock, a house with sides flattened out, a door, a window, a fence (made of pieces of paper cut to scale); a gate, a bridge with pillars, with arches, a picture frame, etc.

(9) Models constructed to scale but not in the flat, an envelope (in paper), a tray, a picture frame (to stand up), a box, a table, a stool, a house, a house with windows and doors. Add a fence to it. Sliding callipers, a weather-cock (working model), a kite a windmill, a fan. Embellish and finish all these models in ways which may suggest themselves to an artistic temperament, but on no account must the finishing process be utilized to cover up inaccurate work. This again applies to all manual work throughout the middle school and high school stages.

(10) Simple models in paper and cardboard illustrating History, Literature and descriptive Geography.

Geography.

Primary stage.

Classes I and II (half hour per week).—In the earliest stage all that can be attempted at present in Bengal is the illustration of the simplest geographical phenomena. Children should be led to recognise and name simple geographical facts visible within reach of the school. In this way rivers and lakes will be recognised, but nothing elaborate at this stage can be attempted. The teacher will be compelled to work largely from school pictures, which must be provided. Whenever possible, modeliing in clay should accompany these early lessons. Geographical definitions to be based on modelling. Weather observations should be made in conjunction with Nature Study and the teacher should compile a nature calendar from the combined observations of the whole class.

Class III (2 hours per week).—Rudimentary idea of measurement leading to idea of a plan. Stories of other lands. The recognition and the naming of geographical phenomena should be continued. Easy facts of observation recorded in class in the nature calendar. Modelling of land forms continued.

Class IV.—The plan of the compound should be explained and understood. Extended stories of description. The main physical phenomena

should be now familiar. Recorded observations by individual scholars if possible, but the class nature calendar should be continued.

Class V.—(Preliminary to Regional Work)—Vocational year at end of Primary School course.

1. **On the earth as a whole—Shape of the earth.**—Globe should be in constant use. If possible each child should have one.

Cause of day and night.

Points of the compass.—These might be marked on the floor of the class room. Children might be induced to observe the phases of the moon and the brighter constellations.

2. **Observational work in the neighbourhood.—The work of water**—as the most obvious agency which is modifying the surface of the earth. Drainage of rain which falls on the play-ground or any stretch of land covered with gravel.

Visits to a stream desirable. Observations may include variation of pace in the middle and at the sides, the normally bending course, greater rate of flow on the outside of the bend, the relative steepness of the bank on that side, deposits of sand on the inner side, the increased amount of sediment that can be obtained in flood time. This may lead to the following generalisation :

Increased speed leads to more wearing and carrying power.
Decreased speed leads to less carrying power and to deposition.

Clouds and their formation.—A mountain district affords a splendid opportunity for watching the formation and disappearance of clouds. Children should become familiar with different kinds of clouds. The class might watch and measure the shadows of a stick cast by the sun, and note the time of sunset.

3. **Description of the types of scenery**—as mountains or the sea, which are not found in the locality, and of typical regions such as the poles and the desert. The animals of these regions specially interest children. At this stage pictures of some size and colour are very important. To enable the teacher to form a clear image of the scenes which he is describing, it is useful to study the treatment of this kind of material by able writers, who have the power of appealing to children, *e.g.*, Rudyard-Kipling in the two Jungle-Books.

4. **Teaching of the meaning of maps.**—Construct rough models of the district in a large sand tray.

Expeditions to be made to different points of view. Small pieces of wood can be used to mark children's homes and well-known buildings.

Following this comes the planning of the class room, etc.

5. **Early Treatment of India.**—Survey of the general structure of the country, using a good relief map and a bathy-orographical map.

The climate should be treated as simply as possible, basing it on the children's experience of their own locality.

Results of climate in the shape of crops and areas of population—very simply treated.

The distribution of plants and animals.

India taken as a great *agricultural country* may be divided simply into—

(*i*) Gangetic Plain ... }
(*ii*) Indus Plain ... } To be treated separately.
(*iii*) Dekkan ... }

A Bengal village will serve quite well to illustrate an agricultural community of a simple type.

In the teaching of occupations, a preliminary study of the school's district from that point of view is necessary.

Description of farming operations; how products are disposed of; Calcutta as a port, distributing centre and Capital of Bengal. Different kinds of farming can be described :—crop-growing, stock-raising, dairy-farming, mountain-farming. The *Thar Desert* may serve as an example of that kind of region.

6. To complete the scheme, a course should be taken of man at the lower levels, *e.g.*, *Hunting Stage*, which should fix attention on the means at his disposal for obtaining the prime requisites of life and his dependence

for success on his environment. At this point a consideration of how "Robinson Crusoe" fared would appeal to the child. Refer to the Gonds—the hunters of the Central Provinces.

7. In addition for the vocational year at the end of the Primary School course the principal continents should be shown on the globe. The distribution of the British Empire should be shown also on the globe. Pupils should know something of the essential details of the descriptive or political geography of India.

English.

Primary.		Books.
Class V.—The Rudiments. These will consist in recognising and pronouncing English letters and one syllable words. Charts having letters, words and appropriate pictures will be employed and the method will resemble that familiar to the child when three years previously he learned the elements of his vernacular. But where trained teachers are employed, the direct method should be fully used, and the simplest sentences may be practised. The sentence then becomes the unit of the lesson. The child should express a simple action in his vernacular in the form of a simple sentence. The English equivalent is then given; and when the new sounds are thoroughly familiar to the pupil, they may be written down on the blackboard. Having learned to speak easy sentences in this way, it is easy for the child to learn to read and write them. At this stage the pupil has already learned to read and write his own vernacular. It is imperative to encourage the learner to speak in English at the earliest possible time. At this first stage an easy text-book may be used for reading; and speaking and reading should go together almost from the beginning.	This represents only one stage of progress in the middle and high school courses; but in the primary school it represents the beginning and end of the study of English. Primary school pupils should be sure of their English figuring. They should also be able to write a plain school hand and to decipher an address on a letter. A restricted vocabulary of useful words in every-day use should be acquired.	Charts, pictures.

Drawing.

Any syllabus of drawing cannot proceed along the ordinary lines adopted for other subjects. It is useless to lay down a set course for each class in succession, because the progress made by the pupils varies so much, in accordance with individual aptitude and skill, that no single class can be expected to continue to do the same work throughout the year. Moreover, the supply of material differs so widely in different schools that any set course is almost impossible. It is possible, however, to decide upon a method of teaching. Certain general principles may be laid down at the outset. These may be stated as follows:—

(1) Drawing is in the first instance a training in observation and in accurate observation. At the start it does not matter in the least whether the work of the child is beautiful or not. What does matter is the extent to which his observation has been accurately trained.

(2) After this preliminary training, drawing should gradually become an art of expression. The child should be able to put on paper his conception of an incident, or of a story, or the impression which a flower or a landscape makes upon his visual sense. This, of course, represents an advanced stage in his instruction, when he has passed beyond the necessity of single models.

(3) From the earliest stage all drawing must be done from the actual object. No such thing as a copy should be allowed in the school room. In India the application of this principle should not give the slightest difficulty. There is an infinite number of simple and beautiful objects, from the brass vessels of the household to the fruits, flowers and leaves of the country.

If these three principles are clearly understood, all that remains for the teacher is to determine his method and the instruments which he will put into the hands of his pupils.

Earliest stages of instruction.—Children should be provided with pencils and with odd pieces of paper having a good surface. There is no need to provide drawing books at the beginning; but a pupil may be promised a drawing book when he has shown some progress with simpler material. No india rubber should be used by the children. If the black-board is used by the teacher of show how to begin and develop a drawing, the pupils must not copy the teacher's work, but must look carefully at the object itself and draw from it. At this stage the utmost care must be taken to secure the exercise of accurate observation. If a child is drawing a familiar fruit or leaf, he is almost certain to put down on paper his general idea of the flower or leaf, and not a representation of the object as he actually sees it. For this reason it is advisable to give models to young beginners that have distinct characteristics in their shape. The left hand side of the drawing should be first attempted, as this method leaves the work clear of the hand and keeps the drawing clean. In arranging single objects for beginners, it is advisable to select such things as will provide various grades of difficulty, for example, if a beginning is made with a leaf, it is easy to advance from the single leaf to a simple spray and thence to sprays with flowers and so on. This arrangement must be left to the common sense of the teacher; and the rate of progress should differ with individual pupils according to their skill and aptitude.

Each single object must be carefully analysed and reproduced as it actually appears to the pupils. Take for example a single leaf. This object must be considered from the point of view of size, proportion and shape. The number of ribs should be carefully noted, and not guessed at, and the way in which these ribs branch from the midribs should be carefully observed. All this can be explained by the teacher orally; and to begin with the pupils may be asked to give their observations in words. The actual drawing should be done in this way. The midrib should be drawn first with due attention to its position and curve. The left outline of the rib will then follow, and after this the right outline can be put in. There is no better object than this as an example of the method to be followed; and the variety of leaves in India is certainly adequate. Each drawing must be carefully checked from the point of view of the child's observation; and every care should be taken to insist upon the reproduction on paper of the essential features of the object. For this reason the drawing should never be on a small scale. It is better to make the work too large than too small.

There is a great variety of leaves in India, and much practice may be given in realising their essential features and in reproducing these. Other easy objects may be found amongst common fruits and vegetables that possess definite shapes and that are likely to impress the eye of a child.

Instruments to be employed.—In the great majority of schools the only instruments procurable are paper and pencil. Much can be done in the use of the pencil alone, and in the later stages of instruction a certain amount of pencil shading might be aimed at. Attention should also be paid to the quality of the line. But for young children by far the most useful instruments, in addition to the pencil, are pastel crayons. These may be used for colouring pencil drawings. With these crayons colours may be mixed, one being put on the top of the other. The colour should be put on lightly and rubbed in with the little finger. The effect is usually soft and pleasing. Instruction in the mixing of colours is, of course, necessary Many schools will be able to secure these pastels at any school supply depôt in Dacca or Calcutta. Here again the training of the observation is of the first importance. The true colours of the natural object must be discussed by the teacher and the pupils, and the variations in the colour must be observed. Other instruments may be secured by preparing coloured inks from chalks and in the use of paint boxes. The latter demand the use of brushes; and if these are introduced, care must be taken to give the children practice in brush

work at a fairly elementary stage. This means little more than the manipulation of the brush in a variety of easy forms. It is clear that no great advance in artistic work can be made unless all these instruments are employed. But in primary elementary schools, where expensive apparatus cannot be secured, a valuable training in observation may be given by means of pencil and paper alone. Whenever possible it is desirable to introduce some kind of colour-work, as this in itself is of great interest to the beginner.

Progress in the Simpler Methods.—In the use of pencil, crayon on brush, progress will depend upon the skill and capability of individual pupils. In Art work it is essential to recognise and foster individual talents, and no single pupil should be kept back in order to keep pace with the class to which he happens to belong. This individual progress can be encouraged by the provision of harder models and of more difficult instruments such as crayons and paint-boxes. The principles of instruction will remain the same: but the models to be used and the complexity of their grouping will differ from one stage to another. Here everything depends upon the teacher. It is easy to advance from leaves to sprays and flowers. Fruits and vegetables may be had in abundance, and these provide every variety of shape, mass and colour. But these objects do not exhaust the possible range of subjects nor the possible methods of treatment.

More advanced methods.

(I) **Manufactured objects.**—Much useful information may be derived from the study of manufactured objects such as brass utensils, cubes, cones, cylinders, tins, buckets, lamps, chairs, tables, bottles, etc, etc.; indeed any manufactured object whose shape involves a knowledge of perspective. Here there is the advantage of the simple instrument, pencil or pen and ink: and there is the additional advantage that with these instruments a certain amount of shading may be attempted. It is expedient to introduce this type of object as early in the course as possible; and to teach the elements of perspective as soon as the pupil has mastered the rudiments of form and learned to observe with some degree of accuracy. The following points should be noted :—

(1) To begin with, the drawing of solids, such as a tin or cylinder, will involve the use of "construction lines". These will be removed on the completion of the drawing. Here also accuracy of observation is essential. The shape of a circle and ellipse varying with the point of view of the observer should be carefully noted. A box seen from various points presents a useful study. Take the following nine positions :—

(1) the box placed below the eye.
(2) Ditto above the eye.
(3) Ditto at the left of eye.
(4) the box placed at the right of eye,
(5) Ditto below and at the left,
(6) Ditto above and at the left,
(7) Ditto below and at the right,
(8) Ditto above and at the right,
(9) Ditto directly in front of the eye.

In each position it is essential to draw exactly what and how much is seen. From these positions the elementary principles of perspective may be taught. Subjects of greater difficulty may be arranged by grouping solid figures.

(2) In drawing solids attention should be paid to light and shade. A bottle or glass placed against a white background, and at sufficient height above the floor to throw a shadow, is a good model. The pupils may be shown how to differentiate between light and shade and how to express this by pencil work. In time they should be able to shade any solid figure and so produce a pleasing artistic effect.

(3) Solid objects lend themselves to pen and ink work. This is valuable as a training in so far as it dispenses with india rubber, is a good substitute for colours and is final in itself: the first attempt cannot be altered as in pencil. Shading may be usefully practised in this way; and pupils will probably welcome the use of the pen as a proof of their progress.

The above suggestions are easily applicable to all schools, and depend little, if at all, on the supply of expensive material. Brass utensils, drinking vessels, boxes, bottles and any familiar object may be requisitioned as models. In the study of solids there is much scope for "ruler drawing" but such work does not come within the scope of any Art syllabus and belongs properly to manual and cardboard work. In the latter, accurate measurements by means of instruments on paper or cardboard are essential. But this involves not so much a training in observation, as practice in the use of instruments, and may be started whenever the pupil is able to do the simplest type of paper or cardboard work.

(II) Mass Drawing.—All the objects named above, both natural and manufactured, are useful for mass drawing. This involves a change of method. No outline is required but the object is built up as it were from the centre outwards. The crayon or chalk or charcoal should be held in the centre and the object produced by rubbing from right to left until the correct shape and mass are represented. This method is best illustrated by pastel crayons; but white chalk on brown paper, or charcoal on white paper is equally useful and easily procured. Fruits and vegetables are the best models for this treatment.

(III) Blackboard Drawing.—This mode is not easy with large classes unless special apparatus is provided, as for example, the walls of the room prepared for drawing, or boards and easels provided for each pupil. The method has many advantages. Work can be done on a large scale and is easily corrected; additional training is given to the hand and arm, and ambidexterous work can be encouraged.

Complex subjects of study.—When practice has been given in the foregoing methods and a considerable range of objects has been studied, it will be possible to take up more advanced work. To begin with, this should take the form of more complex objects of study, the difficult grouping of single objects, complicated arrangements of flowers and the study of trees. Animals and birds should now be employed and human figures. When the range of objects has been thus widened and made more complex, it is possible to practise some of the following methods:—

(1) Memory drawing—This may be introduced at a very early stage, but its value is likely to be better realised when the objects become harder. Having drawn from the actual object, the pupils may be asked to draw the same object from memory. This gives a valuable training in the observation of essential features, and compels a certain concentration of mind.

(2) Drawing from imagination—This may be made an exercise of great interest. Pupils may be asked to illustrate historical or other picturesque incidents in their reading lessons. Little can be expected at first, but the simplest attempts are of value. If the pupils have covered a considerable range of objects, including the human figure, this exercise should arouse great enthusiasm and should be capable of much extension.

(3) The study of movement—This will be taken up with the drawing of animals, trees and human figures, and should precede drawing from imagination. Exercise in the latter will compel the pupil to acquire some skill in the expression of action.

In these more advanced stages drawing should be recognised in the school as a definite method of expression, and should be freely used in other branches of study. It is essential in Nature Study and in Geography. The main features of the local landscape should be familiar to the pupils, and they should be able to reproduce these. Apart from its specific uses, a training in drawing is of the utmost value in school-life. The work should be so directed by the teacher from the outset as to produce orderly habits of mind, and a certain neatness and dexterity in the use of pen or pencil. Observation and concentration of interest must be encouraged; and in the bringing of a piece of work to completion in a reasonable time there enters the element of discipline. It will be long before work of really artistic value appears in the class room, but the observation and appreciation of natural beauty must be encouraged; and in drawing this appreciation usually brings a speedy reward in the obvious superiority of the war.

Music.

CLASSES I AND II.

Ages 6 and 7.

Exercises—স্বরসাধন।	সহজ সারগম।	ভিন্ন তাল সারগম।	
	Easy scales.	Scales in the prescribed Tal.	
রাগ।	আলাইয়া।	বিভাস।	খাম্বাজ।
Rag.	Alaia.	Bibhash.	Khambaj.
তাল।	তেতালা।	একতালা।	
Tal.	Tetala.	Ektala.	
শাস্ত্রবোধ।	হাতে তাল দেওয়া।		
Theory.	Mark time with the hands.		

CLASSES I AND II.

Ages 6 and 7.

Text-book recommended for the teacher's use—Pages 1 to 7.

গীত পরিচয়—শ্রীসুরেন্দ্রনাথ বন্দ্যোপাধ্যায় প্রণীত—মূল্য ।৶০ আনা।

Git Parichaya—By Surendranath Bandyopadhyaya—Price 6 annas.

Songs recommended.

বাঙ্গালা।

১। "মেঘের কোলে"—বিভাস, একতালা, আনন্দ সঙ্গীত পত্রিকা, আশ্বিন ১৩২২।

২। "দেহজ্ঞান দিবা জ্ঞান"—আলাইয়া একতালা, ব্রহ্ম সঙ্গীত স্বরলিপি, প্রথম ভাগ, ১৩৭ পৃষ্ঠা।

৩। "তোমারি গেহে"—খাম্বাজ, একতালা, আনন্দ সঙ্গীত পত্রিকা, আশ্বিন ১৩২২, ব্রহ্ম সঙ্গীত স্বরলিপি, প্রথম ভাগ, ১৬৭ পৃষ্ঠা।

হিন্দী।

১। "হরিগুণ গাবে"—বিভাস তেতালা, গীত পরিচয়, ৭ পৃষ্ঠা।

২। "নিশিদিন তাকো"—আলাইয়া, তেতালা গীত পরিচয়, ৫ পৃষ্ঠা।

৩। "সৃষ্টি করতা"—খাম্বাজ, দাদ্‌রা, গীত পরিচয়, ৮ পৃষ্ঠা।

মন্তব্য।

বাঙ্গালা গানে তেতালা বা দাদ্‌রা তাল নাই, কিন্তু একতালা আছে।

CLASSES III AND IV.

Ages 8 and 9.

Exercises—স্বরসাধন।	কঠিনতর সাধন।	ভিন্ন তালে সারগম।	
	More difficult.	Scales in the prescribed Tal.	
রাগ।	ভুপালী।	ঝিঁঝিট।	ছায়ানট।
Rag.	Bhupali.	Jhinjhit.	Chhayanot.
তাল।	দাদ্‌রা।	ঠুংরী।	
Time.	Dadra.	Thungri.	
শাস্ত্রবোধ।	হাতে তাল দেওয়া।		
Theory.	Mark time with the hands.		

CLASSES III AND IV.

Ages 8 and 9.

Text-book recommended for the teacher's use—Pages 7 to 13.

গীত পরিচয়—শ্রীসুরেন্দ্রনাথ বন্দ্যোপাধ্যায় প্রণীত—মূল্য ।৶৹ আনা ।

Marching and drill as in standard 4.
Games: Group I.

Class V.

Revision of standard 4.
Marching and drill as in standard 5.
Games: Group I.

Hygiene and Domestic Economy Syllabus for Girls' Schools.

Class II.

Hygiene and Domestic Economy.—The whole method of keeping clean the hut or house and its surroundings.

Food.—Cleanliness to be observed. Cleaning of utensils. Supply of good water for cooking food. How to ascertain when fish, vegetables, etc., are fresh. The cooking of rice and the advantage of eating it warm.

Sleep.—Regular hours of sleep. Disadvantage of excessive sleep in the daytime. Use of mosquito curtains. Airing and sunning of bedding and blankets.

Class III.

Kitchen.—The cleaning of utensils, preparation of vegetables and rice for cooking.

Washing of clothes.—Ventilation and sunlight. Sunning and airing of bedding, mats, etc.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

Class IV.

Kitchen—Full preparation of rice in all stages from the paddy.

Water.—Danger of drinking impure water. Importance of boiling and filtering water.

Care of infants.—Bathing; use of mustard oil; cleanliness of clothing, preparation of foods; sleep. Proper treatment and handling of infants.

Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

Class V.

(*a*) **Village Sanitation.**—Causes of the insanitary condition of a Bengal village and their influence on the prevalence of malaria—(1) jungles; (2) filthy tanks and too numerous surface collections of water; (3) too close proximity of cultivated lands to dwelling-houses; (4) bad drinking water; (5) inefficient drainage, etc. Measures for improved sanitation.

(*b*) A brief account of malaria; its causes, treatment and prevention.

(*c*) **Sick nursing.**—The sick-room: necessary furniture, cleanliness, ventilation, bedding, washing of patients. Food of patients.

Details of nursing, such as the giving of medicine, use of the thermometer, changing of sheets, the use of sheets, the use of disinfectants, etc.

(*d*) Abuse of drugs and intoxicants in districts in which the consumption of drugs and intoxicants prevails among women.

N.B.—The work turoughout these standards should be made as practical as possible. Hardly any value attaches to this subject, unless it is taken in a practical manner. They will only be possible in respect of all branches of the subject in boarding schools, but day schools may nevertheless do much in this way.

Hygiene for Boys' Schools.

In the first three classes of Primary Schools in this Presidency lessons on Hygiene should be entirely oral. These lessons should take the form of talks on the following or similar topics:—

(*a*) The necessity for personal cleanlines.

(*b*) The necessity for keeping rooms clean.

(*c*) The necessity for pure water, fresh air, sunlight and ventilation, the danger of shutting up sleeping-rooms.

(*d*) The danger of insanitary and dirty habits, such as spitting.

(*e*) The necessity of exercise.

(*f*) Some information as to how simple complaints—wounds, snake-bites, burns, etc., should be treated: how a drowning person should be handled, etc.

The teaching must proceed not merely by precept but by example. The first essential, then, is that the teacher himself should be a man of healthy and clean habits: the second that the school should be well ventilated and scrupulously clean; the teacher should also insist that every child who comes to school must be clean and tidy.

Class IV.

1. Cleanliness—Skin and hair.

   Clothing and bedding.
   Food.
   Water and air.
   Bathing.
   Dwelling house.
   Care of bowels, disposal of waste urine.
   Waste and refuse.

2. Stimulants—Bhang, charas, etc. Cigarettes and spirits.
3. Contagious diseases—malaria, small-pox, plague, cholera—cause prevention and cure.
4. First aid—Hæmorrhage, fractures and drowning.

Class V.

1. Cleanliness—Personal.

   Water and air.
   The dwelling.
   Hair lice, body lice.

2. Food. Need for, kinds of.
3. Food. Effect of excess, rules of eating.
4. Disease. How spread through water, food, clothing, contact. Malaria, consumption, enteric, plague, cholera.
5. Exercise, Need of.

Text-books to be used in Classes IV and V.

Any one of the following—

1. Village Sanitation (Palligrame Svasthyaraksha). (Revised edition.) Dr. Kamakhya Charan Banerjee. (Asoke Chandra Banerjee.) As. 3.

2. Swasthya Bijnan. Jaharlal Das, L.M.S., and Sarat Chandra Brahmachari, M.A., B.T. (Brojendra Mohan Datta, Students' Library, Calcutta.) As. 5.

3. Garhasthya Swasthya Niti, Part II. Lt. P. Choudhury, M.B., I.M.S. (B. C. Basak, Albert Library, Dacca.) As. 3-6.

4. Swasthya Katha (for boys). Girish Chandra Basu. (Ghosh & Co., Calcutta.) As. 3.

5. Swasthya Tattwa. Part I. Rai Harinath Ghosh Bahadur, M.D. (Author). As. 5.

6. Bengal Text Book on Hygiene and Domestic Economy. Dr. C. Banks and Haridhan Datta. (Macmillan & Co.) As. 2-6.

7. Swasthya O Grihasthalir Katha (for girls). Girish Chandra Basu. (Ghosh & Co., Calcutta.) A. 1.

8. Easy Lessons in Hygiene, Standards III and IV. Rai Dinanath Sanyal Bahadur, B.A., M.B. (S. C. Saniel & Co.) As. 4.

N.B.—These books are also intended for the corresponding classes of Girls' Schools in Bengal.

The Needle-work Syllabus for Girls' Schools.

Class I.

(*i*) Needle drill and hemming.
(*ii*) Top sewing and back stitching.

Class II.

(*i*) Running, filling and patch work.

Class III.

(*i*) Cross-stitch.
(*ii*) Making a chemise (gathers can be, but need not be, used for the band).
(*iii*) Plain knitting with two needles.

Class IV.

(*i*) Cutting out and making a jacket.
(*ii*) Making button holes.
(*iii*) Marking on cloth in vernacular characters.
(*iv*) Knitting plain and purl with two needles.

Class V.

(*i*) Cutting out and making a petticoat with tucks, and gathering it and putting it into a band.
(*ii*) Darning and herring-boning.
(*iii*) Knitting of plain socks for babies.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 10th July 1919.

Summary.—The rainfall was generally heavy in Eastern Bengal and was light to moderate elsewhere. More rain is still needed in some western districts. The recent rain has greatly facilitated the transplanting of winter paddy and has improved the prospects of standing crops. Harvesting of jute and autumn paddy has commenced in the low-lying tracts of Eastern Bengal. The average price of common rice for the Province has slightly risen as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of Tippera was 2,222.

Serial No.	District and sub-divisions.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches			
1	24-PARGANAS	2·2[illegible]	$5\frac{9}{16}$	$5\frac{9}{16}$	Transplanting of *aman* paddy continues. Fodder and water are sufficient.
	Diamond Harbour.	8·82	$5\frac{1}{2}$	$5\frac{1}{2}$	
	Barrackpore	2·18	$5\frac{1}{8}$	$5\frac{1}{8}$	
	Barasat ...	1·91	$5\frac{3}{8}$	$5\frac{9}{16}$	
	Basirhat ...	9·81	$6\frac{3}{4}$	$6\frac{1}{4}$	
2	NADIA ...	2·23	$5\frac{7}{16}$	$5\frac{7}{16}$	More rain is wanted. Weeding of jute and *aus* paddy continues. Prospects of jute are fair; the effects of the weather are favourable. Some damage has been done to jute by insect-pests.
	Kushtia ...	(*n*)	(*n*)	$5\frac{1}{2}$	
	Meherpur ...	(*n*)	(*n*)	$6\frac{1}{4}$	
	Chuadanga ...	3·52	6	$5\frac{1}{2}$	
	Ranaghat ...	2·22	$5\frac{1}{8}$	$5\frac{1}{8}$
